Tuesday – March 8, 2011 – 3:30 p.m.
First Floor North Conference Room

Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

**Strategic Operating Plan**

Director of Administrative Services Lauren Bradley said that this is a continuation of the Strategic Operating Plan review from Council's February 4 retreat. Staff compiled the goals and objectives into a word document, highlighting changes. The new "Multimodal Transportation" focus area has not been wordsmithed by staff, pending Council's review.

Throughout discussion, Council reviewed the draft Strategic Operating Plan which goals and objectives were confirmed, amended or deleted.

It was the consensus of Council, at the Mayor's suggestion, to add an approximate dollar amount necessary to achieve each objective, and to bring that analysis back to Council at the April 12 worksession.

Councilman Smith hoped to have the next City Council Retreat longer than one day to make sure that they are not rushed in compiling their Strategic Operating Plan and not devote the entire retreat to goal-setting. He volunteered to be on the next Retreat Committee.

**Budget Calendar**

Director of Administrative Services Lauren Bradley reviewed the Fiscal Year 2011-12 budget planning calendar.

Council discussed (1) the next Finance Committee meeting which will be to discuss the fees and charges; (2) regarding new census numbers, an analysis to be provided by Ms. Bradley regarding the per capita costs for services; (3) regarding new census numbers, seats on the Metropolitan Sewerage District Board which City Attorney Oast would provide to Council; (4) the difference between the October Capital Improvement Plan mini-retreat and the information to be presented at the budget briefing on April 12 (which will be sent out in advance to Council); (5) information regarding ridership on the buses due to the increase of gas prices; and (7) update on the new MAHEC building on Hendersonville Road's request for transit service.

At 4:31 p.m., Mayor Bellamy recessed the worksession until the 5:00 p.m. formal meeting in the Council Chamber.

Tuesday – March 8, 2011 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith;

City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

**PLEDGE OF ALLEGIANCE**

Mayor Bellamy led City Council in the Pledge of Allegiance.

**INVOCATION**

Councilwoman Manheimer gave the invocation.

Mayor Bellamy asked for a moment of silence in memory of the passing of Mr. Robert P. "Bob" Ingle.

**I. PROCLAMATIONS:**

**A. RECOGNITION OF UNC-A MEN'S BASKETBALL TEAM**

Mayor Bellamy and Councilman Davis were very pleased to announce that UNC-Asheville has won six games in a row and captured its third Big South Conference championship with a 60-47 victory over Coastal Carolina Saturday night on Coastal's homecourt. The Bulldogs have a 19-13 overall record this year. Asheville has qualified for the NCAA Tournament for the second time in school history.

UNC Asheville had three players make the All-Tournament team. They are Matt Dickey, John Williams and J.P. Primm. John Williams set a Big South record with six blocked shots in the championship game victory over Coastal Carolina. Matt Dickey was named Tournament Most Valuable Player.

The Bulldogs made their final season a winning one in the final season of play at Justice Center. UNC-Asheville went 10-5 at Justice and won the final game ever played there last Tuesday night over Charleston Southern, 72-63.

UNC-Asheville had three players scored their 1,000$^{th}$ career point this season in John Williams, Matt Dickey and J.P. Primm.

Matt Dickey was a first team Big South All-Conference selection, while J.P. Primm was a second team all-conference selection. Matt also made the Big South All-Academic team.

UNC-Asheville head coach Eddie Biedenbach recorded his 200$^{th}$ win as Bulldog head coach this season. He is the Big South's all-time winningest head coach for both overall wins and conference victories.

Mayor Bellamy presented Coach Biedenbach with a key to the City, along with Asheville ballcaps to members of the team and staff. She acknowledged that the team worked hard for their accomplishments and was proud for them to represent the City of Asheville well.

Coach Biedenbach and Director of Athletics Janet Cone commended the players for their teamwork as they are great student athletics. They presented City Council with a T-shirt.

The following individuals were recognized: Janet Cone, Director of Athletics; Mike Gore, Associate Director of Athletics; Head Coach: Eddie Biedenbach; Assistant Coaches: Nick McDevitt, Brett Carey, Kotie Kimble; Players: John Williams, Eric Stubbs, Matt Dickey, J.P. Primm, Chris Stephenson, Quinard Jackson, D.J. Cunningham, Madison Davis, Jeremy Harn, Jaron Lane, Josh Seligson, Toles Hartman, Trent Meyer, and Chew-dee-ah Pal.

**II. CONSENT AGENDA:**

**A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON FEBRUARY 22, 2011**

**B. RESOLUTION NO. 11-44 - RESOLUTION CONFIRMING CITY COUNCIL SUPPORT OF PARTICIPATION IN THE YWCA'S "STAND AGAINST RACISM" EVENT ON APRIL 29, 2011**

Summary: The consideration of a resolution for City Council support for the City's participation in the YWCA's "Stand against Racism" effort on April 29, 2011.

The YWCA of Asheville is participating in a nationwide "Stand against Racism" event to be held April 29, 2011, and has requested community organizations plan events in support of the overall effort to acknowledge racism still exists in our community.

A walking diversity tour of downtown is being proposed as a supplement to an ongoing collaborative diversity campaign between the City of Asheville and Buncombe County Health and Human Services. Approximately 15 -20 employees from the City of Asheville would receive training prior to the event from the Center for Diversity Education. City employees would use their lunch hour to sign up for time slots throughout the day in which they would walk the predetermined .5 mile route, led in groups by the trained peer guides, through downtown Asheville.

The tour will examine areas within a short distance of City Hall that are significant to the stories of women's suffrage, the history of slavery and civil rights, the impact of Native Americans, Jewish business and the Scots-Irish in the growth of Asheville as a center of commerce, how the LGBT, Hispanic, Asian and eastern European/Slavic communities contribute to the economic and cultural health of our community and why the changing face of our city, county and region is important to and impacts each of us as citizens and/or employees.

Buncombe County employees would be invited to participate with their City of Asheville colleagues. A virtual version of the tour will be made available to employees who are not able to participate due to physical or scheduling limitations.

Short video interviews in which participants share what standing against racism means to them would be taped as groups complete their walk. The interviews would then be posted on City of Asheville websites.

Pros:

- Participation in the event will allow individuals the opportunity to express their desire to stand against racism during their lunch hour.
- The walk and associated videos will make a visual statement about the City's support of YWCA of Asheville's mission of ending racism.
- The walk also meets Asheville Balanced Choices (ABC's) employee wellness goals for increased physical activity opportunities.
- The event is an expression of the City of Asheville's core value of Diversity.
- The walking tours are planned to continue beyond the Stand against Racism throughout the year to highlight the City of Asheville's year-round commitment to value and highlight diversity in our community.

Con:

- Eradicating racism involves much more than making a visual statement.

As participation in the event would take place during employee lunch hours, there is no fiscal impact involved in organizing the walk. The training and subsequent walking tours are part of an ongoing diversity training initiative that is supported by management as an important component of employee training and development.

City staff recommends City Council adopt a resolution of support for a City of Asheville walking diversity tour in support of the YWCA's "Stand against Racism" effort.

**RESOLUTION BOOK NO. 33 – PAGE 353**

**C. RESOLUTION NO. 11-45 - RESOLUTION AUTHORIZING THE CITY OF ASHEVILLE TO PURCHASE UP TO 900 LED ROADWAY STREET LIGHT FIXTURES**

Summary: The consideration of a resolution authorizing the City of Asheville to purchase up to 900 LED Roadway street light fixtures not to exceed $290,000.

City Council previously approved using grant funds approved through the Energy Efficiency and Conversation Block Grant (EECBG) for the procurement of up to 900 LED Roadway streetlights. The purpose of the grant is to reduce energy consumption, increase energy efficiency and reduce carbon footprint.

Upgrading 900 LED fixtures will reduce the municipal carbon footprint by an estimated 223 tons per year. As a result of the City of Asheville purchasing and owning these streetlights Progress Energy Carolinas (PEC) will provide a reduced electricity rate, which will result in $48,492 annual savings. Those savings will be reinvested into additional carbon footprint reduction efforts for the municipality. The purchase of the initial 900 fixtures will be considered Phase 1 in a larger program to upgrade all municipal streetlights with LEDs. Funding for the subsequent phases will be determined through the annual budget process. Phase 1 installation will be concentrated in the East of the River Way neighborhood otherwise know as the River District.

In order to receive the reduced electricity rate, the City of Asheville is required to purchase a PEC approved fixture. Currently the LED Roadway manufactured by BETA is the only approved fixture. Therefore, the City needs to pursue a single source provider purchase order with BETA. This is allowable as per N.C.G.S. 143-129(e) which states that "the governing body of a political subdivision of the state shall approve the purchase of apparatus, supplies, material or equipment without formal bidding when "(ii) a needed product is available from only one source of supply or (iii) standardization or compatibility is the overriding consideration"

This action complies with the Strategic Operating Plan by supporting Council's efforts to reduce the municipal carbon footprint reduction efforts by 4% each year and leverage internal and external partnerships for pursing capital improvements and infrastructure projects.

Pros:

- Phase 1 of this program will reduce the municipal carbon footprint 0.7%
- The City of Asheville will lead the state with Phase 1 being the largest LED street light installation to date.
- The savings from phase 1 street lighting will financially support future investments in carbon reduction measures.

Con:

- The City of Asheville will be responsible for streetlight replacement

The purchase of this equipment will use the remaining $290,000 of EECBG grant funds. No other city funds will be required for the project. The installation will reduce utility operations costs in the General Fund by $48,492 annually.

City staff recommends City Council adopt a resolution authorizing the City of Asheville to purchase up to 900 LED Roadway street light fixtures not to exceed $290,000.

**RESOLUTION BOOK NO. 33 – PAGE 354**

**D. RESOLUTION NO. 11-47 - RESOLUTION AUTHORIZING THE CITY MANAGER TO RENEW THE EXTENSION OF CONTRACT WITH THE N.C. DEPT. OF CRIME CONTROL & PUBLIC SAFETY FOR REGIONAL HAZARDOUS MATERIALS RESPONSE FOR REGION 6**

Summary: The consideration of a resolution authorizing the City Manager to renew the extension of contract with the N.C. Dept. of Crime Control & Public Safety for regional hazardous materials response for Region 6.

The N.C. Dept. of Public Safety and Crime Control is in the process of extending contracts from the dates of July 1, 2011, to June 30, 2012, with seven North Carolina governmental units in North Carolina for provision of regional hazardous materials emergency response. The City of Asheville has been a regional hazardous materials provider since Fiscal Year 1994-1995. The State of North Carolina provides funding that fully supports the operational costs of the program.

North Carolina is divided into seven geographical regions for the purpose of hazardous material emergency response. The North Carolina Department of Crime Control and Public Safety contracts with municipalities across North Carolina to respond into the geographical regions and provide technician level hazardous materials emergency response. The region six areas encompass the westernmost twenty counties.

Due to the time requirements of this contract, this action has not been presented to the Asheville City Council Public Safety Committee.

This action complies with the Strategic Operating Plan by assisting in making Asheville a safer city, based on appropriate metrics for similarly sized cities.

Pros:

- The State of North Carolina provides the hazardous materials response apparatus, all response equipment and provides for administrative costs of operating the team. In addition, the state funds extensive training for members of the Asheville Fire Department to enable us to competently handle hazardous materials emergencies.
- The City of Asheville has full use of the apparatus and all specialty equipment within the City of Asheville. Without the state hazardous materials contract, Asheville taxpayers would need to provide much of the resources necessary to properly respond to emergencies within Asheville. With the contract, the equipment and resources are funded at the state level, rather than at the local level.
- During the seventeen years that we have provided regional hazardous materials response services, we have not experienced difficulties or disadvantages with the program.
- Firefighter and citizen safety will be enhanced.

Con:

- None have been identified or known at this time.

The State of North Carolina provides funding that fully supports the operational costs of the program; therefore there is no impact to the City's General Fund budget.

City staff recommends City Council authorize the City Manager to enter into the one year extension of and agreement with the N.C. Dept. of Crime Control and Public Safety to provide regional hazardous materials emergency response for region 6.

**RESOLUTION BOOK NO. 33 – PAGE 356**

**E. RESOLUTION NO. 11-48 - RESOLUTION OPPOSING HOUSE BILL 129 AND SENATE BILL 87 ENTITLED "LEVEL PLAYING FIELD/LOCAL GOV'T COMPETITION"**

Summary: The consideration of a resolution opposing the North Carolina House Bill 129 and Senate Bill 87.

The above bills are entitled, "Level Playing Field / Local Government Competition." This analysis refers to "Edition 1" of the bills, both dated 2-21-11.

The stated purpose of the bills is to protect jobs and promote investment in North Carolina. The mechanism for protection is structured as restrictions on local government on engaging in what governing boards deem to be public-purpose communication and/or broadband projects. While one might assume that the bill's target of communications services that deliver broadband and other services "to the public, or any sector of the public, for a fee" would rule out Asheville, this is not necessarily the case. The City of Asheville owns and operates assets that support a public safety radio system, a critical need for our officers in the field. Over the lifetime of the communications system, the City has leased surplus communications system assets to the private sector in order to underwrite a cost savings plan for the operations of the system, thus saving citizens from an additional tax burden.

Restrictions of the bills include limiting permanent or temporary subsidy of a broadband enterprise fund by other enterprise funds, as well as making cities liable for taxes that, normally, only private telecommunications corporations would have to pay. The bills state that cities "shall not subsidize provision of communications services with funds from any noncommunications service", and would rule out a private/public partnership (such as a potential partnership with Google Fiber) or grant funding (such as ARRA or other Federal funding). Such restrictions would significantly harm Asheville.

The restrictions also forbid the financing or leasing of real property (which could be rights-of-ways for a communication network or tower sites) per NCGS 160A-19 and 160A-20. Asheville's ability to build new public safety telecommunications towers, or relocate them, would be affected. Finally, the bills apply these restrictions to interlocal agreements. While the bills exempt facilities that are "within the city's jurisdictional boundaries for the city's internal governmental purposes," it is not always clear-cut what an "internal governmental purpose" is, and whether a city that partners with a county or other local government would be subject to these restrictions. It is worth noting that not all of the City of Asheville's critical public safety telecommunications towers are within the City's jurisdictional boundaries.

Other Feedback to Bills

Sources such as the Southeastern Telecommunications Officers and Advisors Association (SEATOA), a coalition of state and local telecommunications workers, have stated that these bills will harm public safety networks. They say, "public safety networks are typically regional communication networks of Counties, Cities, and Towns who pay fees and receive federal grants to cover operational costs. This bill would shut them down by limiting their service

areas and imposing restrictive rate-setting and financial limitations; it will also make them ineligible for Homeland Security, ARRA and Farm grants."

The NC League of Municipalities states, "both of these bills are designed to restrict the ability of cities to own and operate cable, video programming, telecommunications, and broadband services. The League is opposed to the legislation."

Telecommunications industry leaders and trade associations have also spoken out against the bills.

While Asheville does not have any current plans to pursue municipal broadband, these bills may have unintended consequences that could impact operations or cause fiscal harm. Given Asheville's recent experiences with legislation with unintended consequences that caused significant potential expenses and led to the loss of a critical public safety asset valued at $4.5M in today's dollars to rebuild (Video Service Competition Act of 2006), staff recommends that this legislation be opposed.

These bills could have a negative fiscal impact in two ways. First, the City's ability to accept grant dollars or engage in communication system interlocal agreements would likely be negatively impacted because of the City's practice of underwriting public safety communications expense with leases to the private sector. Second, if City Council wished to engage in broadband economic development activities to boost the tax base, such as a public-private partnership to build a high speed broadband system similar to Google Fiber, such an action would be significantly more difficult to accomplish than it is today.

City staff recommends City Council adopt a resolution opposing House Bill 129 and Senate Bill 87.

**RESOLUTION BOOK NO. 33 – PAGE 357**

**F. RESOLUTION NO. 11-49 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR A COMPREHENSIVE ANTI-GANG STRATEGIES AND PROGRAM GRANT FROM THE OFFICE OF JUVENILE JUSTICE DELINQUENCY PREVENTION OF THE U.S. DEPT. OF JUSTICE**

Summary: The consideration of a resolution authorizing the City Manager to apply for a 36 month Comprehensive Anti-Gang Strategies and Program grant totaling $750,000 funded by the Office of Juvenile Justice Delinquency Prevention of the U.S. Department of Justice.

In October 2004, elected officials, City staff and Asheville citizens mobilized to develop comprehensive strategies to address issues of law enforcement, neighborhood restoration, and prevention/intervention/treatment programs and activities in the West Riverside area of Asheville as part of a Weed and Seed initiative. The strategy was introduced to the community, via a series of public meetings, to determine the concerns of residents of the targeted area. The strategy was favorably received with the understanding that residents would be integrally involved in the planning and implementation of the initiative. In July 2006, the U.S. Department of Justice announced the designation of Asheville as an "Officially Recognized" site for the federal Weed and Seed initiative aimed at reducing crime and improving quality of life. Official recognition made the City of Asheville eligible to apply for Weed and Seed funds once a year over a five year period. The last funding award was accepted by the Council on November 9, 2010.

Crime data collected over the last 3.5 years suggests the initiative is having an impact in the targeted area. This grant would allow the City of Asheville to expand the success and coverage of Weed and Seed goals into areas experiencing higher crime. This program creates greater access to the law enforcement community with the intent of building stronger relationships based upon mutual trust. The use of funds would enhance existing evidence-based gang

prevention, intervention, and suppression programs such as: Gang Resistance Training for both youth and families, Truancy Intervention Court for Asheville City School District students, direct suppression of violent group or gang related crime, and Police Activities League programming. Organizations, agencies, and programs, will work in partnership to deliver complementary services to at risk or gang-involved youth. Proposed activities meet many of the needs identified by Weed and Seed, Changing Together, RICH Task Force, Ready by 21, Listening to our Teens Network, Asheville Police Department crime data and Western Carolina Gang Task Force.

This action complies with the City Council Strategic Operating Plan in the "Safe Focus Area" goal. It make Asheville the safest city in America based on approved metrics for similarly sized cities, continue community policing initiatives; support recreation and employment alternatives for youth at risk of gang exposure

Pros:

- Continue to address violent group and gang related crime in affected areas
- Increases and expands community policing efforts
- Enhances existing proven gang prevention, intervention, and suppression programs.
- Program works with community resources to affect change
- Provides a comprehensive crime prevention plan to address law enforcement and prevention/intervention programs for at-risk or gang-involved youth in high crime areas.

Con:

- Some resistance to change by the residents who live in the target areas.

The City of Asheville will be positively impacted in the amount of $750,000 by accepting federal funds available through the grant if awarded. No local matching funds required.

City staff recommends City Council adopt the resolution authorizing the City Manager to apply for the Fiscal Year 2011 Comprehensive Anti-Gang Strategies and Program grant funded by the Office of Juvenile Justice Delinquency Prevention of the U.S. Department of Justice.

**RESOLUTION BOOK NO. 33 – PAGE 358**

**G. ORDINANCE NO. 3951 - BUDGET AMENDMENT TO USE FEDERAL HIGHWAY INTENSITY DRUG TRAFFICKING AREA FUNDS**

Summary: The consideration of a budget amendment, in the amount of $300,000, to authorize the use of Federal High Intensity Drug Trafficking Area (HIDTA) Funds to purchase equipment and fund personnel costs and training for members of the Asheville HIDTA.

The High Intensity Drug Trafficking Areas (HIDTA) program was authorized by the Anti-Drug Abuse Act of 1988 and is administered by the Office of National Drug Control Policy. The original designation of five HIDTA sites in 1990 has expanded into more than thirty areas around the country. The HIDTA's mission is to reduce drug trafficking in the most critical areas of the country, thereby reducing the impact of illegal drugs in other areas. The Asheville HIDTA will serve as a key drug trafficking reduction effort, critically positioned between the Atlanta HIDTA and the Appalachia HIDTA. The Asheville HIDTA is comprised of members of the United States Drug Enforcement Administration (DEA), Asheville Police Department, Buncombe County Sheriffs Office, Henderson County Sheriffs Office and McDowell County Sheriffs Office. The Asheville HIDTA has received this $300,000 and ongoing $150,000 annual funding after more than four years of competitive process for the HIDTA designation. The Asheville HIDTA will be a component of the Asheville DEA Task Force. The City of Asheville will serve as the fiscal agent for the Asheville HIDTA. The Asheville HIDTA has received authorization for $300,000 in federal HIDTA funding. This proposed budget amendment would authorize the use of this funding for equipment purchases, personnel costs and training for members of the Asheville HIDTA.

This action conforms to the City Council's Strategic Operating Plan under 1) Fiscal Responsibility in that we are using federal HIDTA monies to enhance the Asheville HIDTA's equipment, personnel and training needs that would otherwise not be funded, and 2) Safe City in that providing the various equipment and training allows the Asheville HIDTA to be more professional and effective in proactively enforcing and preventing illegal drug trafficking.

Pro:

- Federal HIDTA monies to cover the cost of equipment, personnel and training related to reducing illegal drug trafficking in our region.

Con:

- None noted

The increase of $300,000 is for equipment, personnel and training. The City of Asheville will directly receive $150,000, and the remaining $150,000 will be passed through to the Piedmont HIDTA. Accepting these funds is a significant financial benefit to the Asheville HIDTA by allowing the task force to better equip and train the task force employees. There is no impact to the City's General Fund budget.

City staff recommends City Council adopt the budget amendment, in the amount of $300,000, to authorize the use of Federal HIDTA funds to purchase equipment and fund personnel costs and training for the Asheville HIDTA.

**ORDINANCE BOOK NO. 26 – PAGE 458**

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Smith moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Bothwell and carried unanimously.

## III. PRESENTATIONS & REPORTS:

### A. UPDATE ON BLOCK AREA REDEVELOPMENT AND FUTURE PERFORMANCE CENTER

Mr. James Baudoin, Director of the Performing Art Center, explained the wonderful economic impact of the proposed Performing Art Center, especially around the surrounding neighborhood. He explained The Block study area. The Center's components will consist of 2,000 theatre seats, a black box studio and a multi-purpose rehearsal room. The site will accommodate mixed use and commercial development. They will continue in the design phase until 2013 which will begin the construction phase. Because of the economic impact, they engaged the Asheville Design Center (ADC) to work with them.

Mr. Chris Joyell, Executive Director of ADC, reviewed the recently issued 73-page report titled "The Block: Expanded Site Analysis and District Design Considerations" is intended to serve as a guiding document for the neighborhood's future. He outlined the shape of The Block and explained the public process.

In establishing the goals for the project, it was emphasized from the outset that the end report is not a plan – it is a tool for planning. Major goals of the project include: (1) empowering residents and businesses in the decision-making process; (2) exploring opportunities to attract investment and leverage community improvements; (3) discovering avenues to reconnect The

Block with the East End Neighborhood and downtown; (4) assisting in the implementation of the Downtown Master Plan; and (5) promoting the idea of community-based considerations for The Block.

The key objective is to meet the demands of growth while preserving the community's historic legacy. Everyone should recognize the significance of balancing development, history, culture and ecology in The Block Area:

- History and Culture – To ensure that the existing historic and cultural integrity of the neighborhood and ecologically significant landscapes are restored.
- Key Places – To recognize key places which have historical, cultural and aesthetic values and strive to preserve them for a lasing foundation of redevelopment.
- Site Analysis – To establish a framework from which successful design considerations can be made.
- Creation of district-wide design coordination for revitalization – To agree that all proposed district development must account for the neighborhood and its users and strive to preserve the integrity of The Block.
- District Design Considerations – To establish design considerations which reflect a sound understanding of initial community goals, and suitable approaches to revitalizing The Block.

The ADC report is provided as a "living document" to be continually shaped through public dialogue and community demands. A balance of development, history, culture and ecology will be a continuing theme. Ongoing attention to sustainable green building practices, creative multi-modal transportation and other factors will inspire a dynamic "live-work-play" community.

The future Performance Center offers a unique opportunity to build the creative economy of Asheville and also have a significant impact on the greater Block area.

On behalf of City Council, Mayor Bellamy thanked Mr. Baudoin and Mr. Joyell for their informative update.

**C. ARTS & CULTURE SUBCOMMITTEE OF DOWNTOWN MASTER PLAN UPDATE**

Project Manager for the Asheville Downtown Master Plan Sasha Vrtunski said that the Arts and Culture Subcommittee wanted to give Council a brief update on their efforts, highlighting the upcoming Asheville Buncombe Creative Sector Summit. Arts are a major economic engine for downtown as well as for our city and larger community. The Strategy 1 of the plan highlighted the importance of strengthening the arts community in Asheville to ensure that it continues to thrive and even grow. As an arts destination, having strong arts organizations are essential to funding and supporting our many arts non-profits, artists and businesses. The Subcommittee is currently concentrating on four items from the Plan: (1) creative sector summit; (2) coordinating arts calendars; (3) exploring Cultural Arts Commission; and (4) creative sector asset map/audit. Many of the other items in the Plan will flow from the summit and the resulting alliance.

Mr. Graham Hackett, Interim Executive Director for the Asheville Arts Council, said that the Downtown Master Plan calls for an "Arts Audit" to be carried out, then to be followed by a summit. The committee carefully considered these steps, and felt strongly that the summit needed to happen first before the audit, or assessment, could be completed. The summit has been planned and will enable the committee to follow up with participants for the assessment. He provided the brief summary of the committee's work.

*Asheville Buncombe Creative Sector Summit*

The Arts and Culture subcommittee has been working over the past four months to put together a summit of creative professionals, leaders of community organizations, and key stakeholders. Asheville-Buncombe's 1st Annual Creative Sector SUMMIT is a 2-day conference bringing these stakeholders together for networking, education, and collaboration.

At the summit, participants will learn about the objectives from the master plan, the Americans for the Arts Economic Impact Study; current City of Asheville programs and resources; Asheville Area Arts Council grants, initiatives, and facilities and the Arts 2 People's Artist Resource Center. Janet Kagan, a nationally known arts advocate, will give the keynote address, "The Role of the Creative Sector in Community and Economic Development". Participants will also take part in break-out sessions. Follow-up will include correspondence articulating the Summits findings, continuing online and in-person forums, and action steps to enhance the Creative Sector's community engagement.

Because the creative sector is an important economic engine for the city and the county, this summit is an important opportunity for community leaders to engage with the arts community to foster its growth. The Arts & Culture subcommittee is encouraging local leaders to attend the summit.

*Artist's Resource Center*

In the Downtown Master Plan, an Artists Resource Center (ARC) was identified as a needed resource for local artists. Arts 2 People has taken the lead on this project and received several grants as well as funds raised through their Lexington Avenue Arts and Fun Festival (LAAFF). Arts 2 People is preparing to open the doors of the Artist Resource Center in the historic YMI Building, in one of the retail suites facing South Market Street. The ARC offers a curriculum of core business management classes geared toward creative professionals. The ARC is designed to support the economic development of the creative sector by enhancing the ability of individual creative entrepreneurs to manage their businesses. Classes will include such topics as bookkeeping, social networking, production issues, marketing and more. Additionally, visitors to ARC can access difficult to afford hardware and software tools, professional development mentoring, networking opportunities and more.

*Arts Calendar*

A smaller working group has been meeting to discuss the need for a centralized arts and events calendar. Although several online calendars already exist (including ExploreAsheville.com and LiveWireAsheville.com), no calendar covers all of the arts disciplines in our area. The primary challenge is to identify an organization with the resources to manage and promote such a calendar. The task force believes that the Creative Sector Summit will be a natural springboard for this kind of collaboration, and therefore has decided to table the calendar discussion until after the Summit.

*Potential Cultural Arts Commission*

Through the discussions of the Arts & Culture subcommittee, it became apparent to committee members that there is not a natural home for the arts and culture in the current city boards and commissions structure. Discussions led to the idea of a Cultural Arts Commission, which would serve to advise City Council on the cultural arts sector of the community. Committee members are still researching other communities' approaches and best practices for supporting the creative sector, and plan to have a proposal to bring forward in the coming months.

On behalf of City Council, Mayor Bellamy thanked the leadership of the Arts & Culture Subcommittee.

**C. QUARTERLY REPORTS**

**Planning & Economic Development Committee**

Councilman Davis, Chairman of the Planning & Economic Development Committee, thanked his fellow Committee members Councilwoman Manheimer and Councilman Smith and City staff. He then updated Council on some major accomplishments during the 2nd quarter of the Committee as follows: (1) Substantive Projects Affected by Permit Extension Act: Planning staff reviewed list of projects affected by Permit Extension Act; (2) Downtown Parking Study, Completed May 2008: Reviewed staff recommendation to update the Downtown Parking Study completed in May 2008 during the month of December, and forwarded to City Council; (3) Further Research on Permitting Telecommunication Towers in Residential Zoning Districts: Reviewed information gathered from other North Carolina municipalities on permitting telecommunication towers in residential zoning districts. Committee directed staff to revise current zoning amendment and present to City Council; (4) Policy Direction for Legislative Agenda and Action Plan: Staff directed to issue RFP for federal representation and gather information from other North Carolina peer cities on best practices for these agreements; (5) Table of Uses: Planning staff outlined changes to UDO necessitated by creation of unified "Table of Permitted Uses;" and (6) Downtown Management Subcommittee for the Downtown Master Plan – Update & Economic Impact Analysis Funding Request: Committee supported recommendation that Council meet the requested funding for economic impact analysis contingent on funding as structured in the staff report; forwarded to City Council.

**Strategic Operating Plan**

Assistant City Manager Jeff Richardson said that the Asheville City Council identified short and long term goals at the January 2010 strategic planning retreat and staff is providing its quarterly updates on progress of the five key focus areas.

City Council has asked City staff to provide quarterly updates on key strategic initiatives associated with the five primary focus areas of the City's Strategic Plan. Staff has tracked projects using performance indicators and measurement through the Fiscal Year 2010-11. Similar to the previous quarter, this update will be presented in the form of a video. In addition, staff provided Council with the Economic Development Key Indicator Report.

He then showed Council a video showing the staff's progress on the key strategic areas for this quarter.

This information is to update City Council on key operational initiatives specific to City Council's Strategic Operating Plan. No action is necessary at this time.

Mayor Bellamy thanked Mr. Richardson for providing the update in a video format. She asked that the Therapeutic Recreation Program be highlighted in the next update. She also thanked the Police Department Gang Suppression Unit for their work in reducing incidences related to gang activities.

**Financial Report**

Director of Administrative Services Lauren Bradley provided Council with a dashboard view of revenue and expenditures. For Fiscal Year budget 2011-12, the outlook remains manageable for continuation budget. The assumptions consist of no property tax increase; no fund balance appropriation; continuation of core services; and savings strategies with a focus on workload metrics.

The executive summary of the City's overall financial position for the fiscal year through December 2010 is as follows:

*Amendments.* The General Fund budget presented in the second quarter report is unchanged from the budget that was presented in the first quarter report. There were no General Fund budget amendments adopted in the second quarter. A summary of the budget changes since July 1 is presented below.

| | |
|---|---|
| Adopted Budget | $ 91,635,962 |
| Health Care Technical Adjustment | (3,553,000) |
| Budget Amendments: | |
| City Hall Repairs* | 450,000 |
| Annexation Revenue & Expenses | 166,757 |
| 12/31/2010 Budget | $ 88,699,719 |

* Fund balance appropriation

*Revenues.* Through December 31, 2010, the City has collected $50,589,353 in General Fund revenue, which represents approximately 57.3% of the total General Fund revenue budget. Staff received property tax data from Buncombe County in January which showed that the FY 2010-11 tax base grew by 0.7%, which is the slowest growth in more than ten years. As a result, staff has revised downward the property tax revenue estimate for the current year. Sales tax revenues are up 3.2% compared to the prior fiscal year and remain on track to meet budget. As noted in the first quarter report, the only major revenue variance to report is in the investment earnings category, where low interest rates will result in lower than anticipated revenues in this category. Overall, staff is currently projecting that *total FY 2010-11 General Fund revenue will come in under budget by $1.2 million.*

*Expenditures.* General Fund expenditures through December 31, 2010 total $42,135,677 or 47.5% of the budget, which is typical for this point in the fiscal year. As noted in the 1st quarter report, staff has implemented several management strategies to curb expenditure growth during the current year in order to address the projected under performance in revenues. *These savings, representing roughly 1% of the overall budget, are expected to come from a combination of strategies that have minimal impact on public services. These strategies include further selective hiring, line item reductions, deferring capital expenses where possible, and seeking opportunities to maximize efficiency in operations.*

*Fund Balance.* The City ended FY 2009-10 with available fund balance of $12.3 million, which equated to 14.2% of FY 2009-10 expenditures. *With implementation of the savings strategies mentioned above, FY 2010-11 expenditures are expected to roughly equal revenues, which means available fund balance will remain at $12.3 million or 14.2% of estimated expenditures.*

In response to Mayor Bellamy, Ms. Bradley gave a general summary of investment earnings and how the City invests.

Mayor Bellamy stated that we are building up Fund Balance, noting that there is no property tax increase proposed.

**D. ECONOMIC STIMULUS PACKAGE UPDATE**

American Recovery & Reinvestment Project Manager Brenda Mills said that the following is part of the City staff's recurring American Recovery & Reinvestment (ARRA) update to Asheville City Council on projects and job creation.

On February 17, 2009, President Barack Obama signed into law the American Recovery and Reinvestment Act (ARRA) of 2009, a bill that included $789 billion in funding for programs and tax relief for the purpose of stimulating the U.S. economy in its current state of recession.

14

The recovery measure contained more than $150 billion for public works projects for transportation, energy and technology, and $87 billion to assist states in meeting rising Medicaid costs.

The federal stimulus package provided over 10.5 billion in direct aid to North Carolina to create jobs and rebuild infrastructure, including highways and schools. The recovery program would also inject additional funding into the state through targeted tax cuts, additional grants from federal agencies and direct funding for specific federal programs in the state.

The City of Asheville's funding came from entitlement and grant funding with some grant funding through cooperation with other governmental agencies. The report will provide as much detail on each area of funding and status of the projects approved.

The table below shows the city's funding by entitlement (based on median incomes, crime statistics, population of urbanized area, etc. for funding eligibility) and grants (and sub-grantee awards). Entitlement funding totaled $6,077,152.00 and a receipt of grants in the amount of $1,984,960.00 all total funding in the amount of $8,062,112.00. *For the completed projects and/or those almost complete, we have a count of 16.18 jobs created.* For the surface transportation projects, construction companies typically have general layoffs for the winter so they used their own workforce in the performance of these particular contracts.

The status of projects follows with job creation data as available. Additional information will be available later for projects that have recently started and/or have been delayed in starting at our next report.

| Entitlement Funding | Agency | Amount |
|---|---|---|
| Homeless Prevention Fund | Housing & Urban Development | $509,460 |
| CDBG-R | Housing & Urban Development | $332,942 |
| Energy Efficiency & Conservation Block Grant (EECBG) | Dept. of Energy | $804,700 |
| Edward J. Byrne Justice Assistance (JAG) Grant | Dept. of Justice | $265,466 |
| Transit Capital | Federal Transit Administration | $2,500,000 |
| Surface Transportation (STP-DA) | NC Dept. of Transportation | $1,664,584 |
| **Grant and Sub-Grantee Funding** | **Agency** | **Amount** |
| Drinking Water SRF (NCDENR) | NC Dept of Environmental and Natural Resources | $510,000 |
| Clean Water SRF | NC Dept of Environmental and Natural Resources | $454,500 |
| Mobile Source Emissions | NC Dept. of Air Quality | $30,000 |
| Local Energy Assurance Planning (LEAP) | Dept. of Energy | $209,940 |
| | | |

| | | |
|---|---|---|
| Clean Cities: Carolina Blue Skies & Green Jobs Initiative (Sub-grantee with Triangle J in Raleigh) | Dept. of Energy | $779,020 |
| Summer Internship Grant for Engineering Division | NC Dept. of Health and Human Services (NC DHHS) | $1,500 |

**Community Development Block Grant-R (CDBG-R) - $332,942.00**

- **Tier II Emergency Home Repair ($75,000).** The sub-recipient was Mountain Housing Opportunities (MHO) who performed extensive repair on five homes owned by very-low and low-income, special need households. Maximum investment per home was $15,000. Repairs facilitated enabled weatherization activities to be allowable and effective. This project has a 100% LMI benefit and is complete.

- **Weed and Seed Weatherization Program ($75,000).** The sub-recipient was Western North Carolina Green Building Council (WNCGBC). Funding used to market and facilitate weatherization for 60 low-income households in the West Riverside area of Asheville. WNCGBC partnered with Community Action Opportunities Weatherization program. This project has 100% LMI benefit and is complete awaiting final completion reports from Community Action Opportunities.

- **Mountain BizCapital ($26,000).** Funding used as a revolving loan fund for two micro-businesses. To date, $14,000 expended and this project has 100% LMI benefit.

- **City of Asheville Louisiana Street Phase 1 (Budgeted $123,648).** This project is the construction of sidewalk serving this lower-income neighborhood in the city and is an LMI Area under 570.208(a)(1). It was completed for less cost than original budget with the remainder of funds will be used in Phase 2.

- **City of Asheville ($33,294).** Ten percent allowable for program administration.

- **Job Creation.** To date, *3.37 full time jobs have been created* with this funding.

**Homeless Prevention and Rapid-Rehousing Program (HPRP) - $509,460**

The funding supports the City of Asheville's Homeless Prevention and Rapid Re-Housing Program (HPRP). It is designed to prevent homelessness or rapidly re-house households (individuals and families) who would be homeless, but for, this assistance and who, after the maximum 18 months of support, indicate an ability to maintain housing. The goal of HPRP is that households that would otherwise be homeless will maintain housing or obtain housing as a result of participating in HPRP.

HPRP provides funds for: administration (5%), outreach (3%), housing stabilization for case management and housing location services (24%), financial assistance for arrears, rent, utilities, and some moving costs (57%), legal services (8%), and data collection (4%). No less than 60% of the funds will be used within the first two years of the grant, and 100% of HPRP funds will have been spent at the end of three years.

HPRP provide for HMIS data entry, provide client point-of-entry information and referral services, provide case management/housing stabilization services, evaluate progress of HPRP and provide implementation oversight. Awarded to a joint application, this includes the following local non-profit agencies: Pisgah Legal Services, Western North Carolina Aids Project, United Way's 2-1-1, Eblen Charities and Asheville Buncombe Community Christian Ministry.

To date, for Homelessness Prevention 180 persons and 72 households with this program through December 2010. For Rapid-Rehousing, 91 persons and 44 households have been assisted. *This funding has created 2.32 jobs.*

**Energy Efficiency and Conservation Block Grant (EECBG) - $804,700**

The City of Asheville has implemented energy retrofits to municipal buildings with the completed installation of two solar thermal units, lighting retrofits to city hall and pending upgrades to the HVAC system at the city's civic center complex later this year.

With the funding, the city implemented an education and outreach program for sustainability and is still exploring the use of funds for the establishment of a competitive community sub-grant program for energy efficiency and conservation. We intend on saving at minimum 321,195 BTUs of energy and 26,084 tons of green house gas emissions. *This funding has created 3.89 full time jobs.*

**Local Energy Assurance Planning (LEAP) Grant - $209,940**

This initiative funding will focus on building regional energy assurance capability to allow the region *(23 cities and counties participating)* to better coordinate and communicate local and state-wide on energy security, reliability, and emergency response issues. The objectives of this initiative are to: (1) strengthen and expand local government energy assurance planning and resiliency, (2) reduce the impacts from energy supply disruptions, and (3) create jobs and save jobs in energy assurance planning at the city level. The City of Asheville is contracting with the Land of Sky Regional Council to provide oversight and regional planning for this grant. *This funding has created one job for a LEAP Regional Planner who began August 2010.*

To date, there is a timeline of actions for this planning, the regional partners are meeting and now working on a template for their individual plans and a website has been created for the regional partners as a tool for their planning needs. A survey is being finalized to find the baseline for all participating agencies. Work Groups for conservation and acquisition have been created and will begin meeting mid-February.

City staff and the LEAP Regional Planner participate in quarterly regional calls through the Public Technology Institute (PTI) with LEAP grantees across the country.

**Transit Capital ($2,590,439)**

The City of Asheville shares this funding with Henderson County, NC ($585,841) since being reclassified as an urbanized area as part of the 2000 Census. The City of Asheville will use its funding to purchase five (5) clean diesel buses and ten (10) bus shelters and Henderson County is purchasing two CNG buses and one CNG Van.

To date, bid out ten (10) shelters and have received and getting ready to install three. The specifications for the buses are being developed and the bid will be release in the next 30 days.

**Edward J. Byrne Justice Assistance Grant - Awarded $372,630**

Funding shared through a memorandum of understanding with Buncombe County, North Carolina with their portion being $107,164. The city's funding ($265,466) will be combined with budgeted city funds to upgrade and install a key card access and camera security system for the Municipal Building, Asheville Police Dept. Firing Range, Public Works and City Hall areas.

City Council approved change in contract to RHS at your regular meeting on November 9, 2010. Project began late December 2010. Information Technology Department is currently working with vendor to identify needs in the Municipal and City Hall Buildings.

**NC Department of Transportation ($1.2 million):**

City managed five (5) projects with this funding which will have the following outcomes and impact:

1. Paving and creating bicycle lanes with the *Coxe Avenue/South Slope Milling, Paving, Re-striping Project.* Project completed at a cost of *$203,234.30.*

2. *Downtown Asheville Corridor Enhancements Project* involves new plantings and tree replacements in the downtown area. Project completed at a cost of *$75,447.16.*

3. Improved pedestrian safety will be the result of the Signal upgrades, *Fairview Road at Onteora Boulevard/Baldwin Street Project.* Project completed at a cost of *$58,814.14.*

4. The *Kimberly Avenue Re-surfacing and Re-Striping Project* will provide a new asphalt surface in this area from Evelyn Place to Gracelyn Road. Project completed at a cost of *$475,151.35.*

5. The *Asheville Sidewalk Improvements Project* will close gaps in the existing city of Asheville sidewalk system. Project 85% complete with spending at *$310,077.77.* Resumed project this week with change in weather.

**NC Department of Environmental and Natural Resources (NCDENR)**

- **Drinking Water State Revolving Loan ($510,000)**
  Funds used on the North Fork Pumping Systems which went into service the first week of October. The city will be provided formal training and manuals by the contractor, Hickory Construction. This upgrade reduces the power consumption at the North Fork Water Treatment Plant by 80% (94k W instantaneous or 2200kW/h per day). There should be some savings in chemical usage as well. *There were 3.8 jobs created in the third quarter 2010.* Project completed with approval of the City Council for a change order to increase the contract in the amount of $3,161.00 to accommodate: (1) additional conduit and handholes to the North Fork WTP front gate and (2) the lack of existing wiring at the pump skids. Total cost of the project is under the loan amount at *$331,635.00.*

- **Clean Water State Revolving Loan ($454,500)**
  Funds used to apply to the master plan for the Dingle Creek Watershed with a final cost of the project of *$260,964.* The project created one acre of stormwater wetland which will treat storms up to the 10-year return period and will help reduce flows in the existing creek channel and settle out sediment and nutrients while reducing the temperature of the water. It will stabilize the existing channel. The project treats and improves the quality of the runoff produced by the bulk of the Dingle Creek Watershed. *Funding for this project created 1.8 FTEs.*

**Carolina Blue Skies Green Jobs Funding ($779,020)**

These funds will allow the city to increase capacity of the current Compressed Natural Gas (CNG) Station, convert 11 current fleet vehicles to CNG and purchase and upgrade 11 vehicles to CNG. The current status of the funding is as follows:

- Hiring of a project manager to oversee CNG station upgrade which will begin in March and projected for completion in summer 2011.
- The first round of vehicle retrofits will begin in April.
- The second and last round of vehicle retrofits will occur next fall.

**NC Division of Air Quality (Emissions Grant) - ($30,000)**

These funds are being used to pay for the incremental cost to use biodiesel fuels for our Public Works fleet.

**NC Department of Health & Human Resources (NCDHHS) - ($1,500)**

Provided for a summer intern for the Engineering Division to support research and project assistance.

There are no current changes to fiscal impact of any of the ARRA projects approved by City Council. We are continuing to have work completed under budget and on schedule.

City Manager Jackson made it clear that the $8 Million in ARRA funds are not being used to balance the budget, but to address strategic goals and capital improvement projects. This has been an excellent supplement for our programs.

## IV. PUBLIC HEARINGS:

### A. PUBLIC HEARING TO CONSIDER CLOSING SEVERAL PORTIONS OF UNOPENED RIGHTS-OF-WAY AND CITY STREETS WITHIN THE MONTFORD COMMONS DEVELOPMENT AREA

Mayor Bellamy opened the public hearing at 6:19 p.m.

Assistant Public Works Director David Foster said that this is the consideration of a resolution of to permanently close several portions of unopened rights of way and City streets within the Montford Commons Development area, which includes: an unopened portion of Woodside Place; an unopened unnamed right of way between Gudger Street and the unopened portion of Woodside Place; an unopened portion of Bay Street; all of the unopened portion of Jason Street and a portion of City maintained Jason Street; all of City maintained Michael Street; and all of the unopened unnamed right of way located near Jason Street. This public hearing was advertised on January 28, February 4, February 11 and February 18, 2011. On February 22, 2011, City Council approved a continuance to this date, at the request of the applicant.

N. C. Gen. Stat. sec 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, adjoining property owners, Frontier Syndicate LLC; Rhesa Read Tull Jr., Dorothy Tull Mothershead, and Margaret Tull Davis (heirs of G. Farrar Parker) have requested the City of Asheville to permanently close several portions of unopened rights of way and City streets within the Montford Commons Development area, which includes: an unopened portion of Woodside Place; an unopened unnamed right of way between Gudger Street and the unopened portion of Woodside Place; an unopened portion of Bay Street; all of the unopened portion of Jason Street and a portion of City maintained Jason Street; all of City maintained Michael Street; and all of the unopened unnamed right of way located near Jason Street.

Adjacent property owner Asheville City Schools did not join the request to permanently close several portions of unopened rights of way and City streets within the Montford Commons Development area and were advised by certified letter returned receipt. Asheville City Schools did not respond.

Dana Parker contacted the City of Asheville as a part property owner along with Rhesa Read Tull Jr., Dorothy Tull Mothershead, and Margaret Tull Davis (all heirs of G. Farrar Parker) stating she is against permanently closing several portions of unopened rights of way and City streets within the Montford Commons Development area as she would not be afforded ingress and regress to her property. Information provided by the applicant indicates there is access to her property from an unopened right of way, not included in the closure area.

The Greenway Commission met on November 11, 2010. They voted unanimously to support the street closures and strongly recommended that any future development plan include the greenway connection as discussed in the site master plan.

This closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use. The Strategic Plan Goals most closely aligned with the Montford Commons Development closure requests is the Job Growth and Community Development Goal in that it will provide sustainable high density infill growth that makes efficient use of existing resources.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties
- Meets Council's goals to promote sustainable high density infill growth that makes efficient use of existing resources

Con:

- None

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt the resolution of to permanently close several portions of unopened rights of way and City streets within the Montford Commons area.

Ms. Dana Parker, one of the four heirs of the G. Farrar Parker parcel, was not opposed to the development, but was opposed to closing the 51 foot road access to her property. He developer wants to close her current access and give her only 15-feet access from the rear of her property, which is also a ravine. In addition, the proposed access is only 35 feet from the entrance to a school. The plan also shows the developer's building on her property. She spoke with the developer and he explained that he would resubmit a new plan for approval which did not include her property. She suggested that the new plan allow her the same driveway option she currently has, which will tie her road into the front entrance of his development on Hill Street. She also noted that prior to the title search, the other 3 heirs signed the purchase contract, but during the title search it was discovered that she was also an heir. The developer then contacted her about selling the property but they have not come to an agreement at this time.

Mayor Bellamy closed the public hearing at 6:26 p.m.

In response to Councilman Bothwell, City Attorney Oast said that that it must appear to the satisfaction of Council that no individual owning property in the vicinity of the street or alley or subdivision would be deprived of reasonable means of ingress and egress to his property. He felt that as long as some satisfactory alternative access was available, then Council could close the road.

In response to Councilwoman Manheimer, Mr. Foster noted that both the proposed and existing access are only platted roadways.

In response to Councilwoman Manheimer, Mr. Foster said that the when the developer first requested the City to close the streets, they were under the impression that all the adjacent property owners were in agreement with the closure. He even had a signed contract to purchase the subject property. Then the title search revealed another heir to the subject property.

When Ms. Manheimer asked if there were any other adjacent parcels of land to the road closures that are not owned by the developer, Mr. Foster believed they are, but none directly in the development area.

In response to Councilman Russell regarding a time issue, Mr. George Gabler, representing Frontier Syndicate, said that they have been expecting to hear about their HUD funding by now. They cannot get funding for the project on a piece of land they don't own. They have acted in good faith in that they thought they had a valid contract, noting it was their title search that showed another heir. They did notify her and they hope to get to an arrangement to buy the land. If they do not, they will have to redesign a corner of their building. He did note that the roads do not exist in any meaningful way.

In response to Councilwoman Manheimer, Ms. Parker said she is 50% owner and the other three heirs own 16.6% respectively.

When Councilman Russell asked if staff has looked at the proposed access to see if it was reasonable, Mr. Foster said they have not looked at it from that prospective, but they did make sure the property was not land-locked.

In response to Vice-Mayor Newman, Mr. Gabler said that according to their surveyor, there is adequate access to the parcel.

After a short discussion and in hopes for the parties to reach a solution, Councilman Russell moved to continue this matter until April 12, 2011, with the following information being presented at that time (1) staff to identify the parcels not owned by the developer with reference to notification and if they are not a parcel to be purchased how will it be accessed or maintained or if the parcel is under contract; and (2) surveyor or engineer's explanation of the adequacy of access. This motion was seconded by Councilman Bothwell and carried unanimously.

**V. UNFINISHED BUSINESS:**

**A. RESOLUTION NO. 11-50 - RESOLUTION AMENDING THE TRANSFORMATIONAL DEVELOPMENT PROJECTS INCENTIVE POLICY (LAND USE INCENTIVE POLICY) FOR THE CITY OF ASHEVILLE**

Mayor Bellamy said that on February 22, 2011, City Council continued this matter to this date at the request of the Housing & Community Development Committee.

Planning & Development Director Judy Daniel said that this is the consideration of revised elements proposed by the Sustainability Advisory Committee for Energy and the Environment for the Transformational Development Projects Incentive Policy adopted in November 2010.

In November, the Asheville City Council adopted a new "Transformational Development Policy", designed to assist development of projects that meet certain important goals set by the Council that are facing financing constraints. The Council deferred implementation of the new Policy until they had heard comments from the Sustainable Advisory Committee on Energy and the Environment (SACEE) regarding the "green" elements of the policy.

In January, the SACEE report was presented to the City Council. The report contained a number of recommendations, and went somewhat beyond the scope originally requested by the

Council. After discussion, the Council asked the staff and SACEE for some additional information, and for the recommended changes to be considered by other interested groups as well; and to report back to the Council on February 22.

The Council also requested that staff provide a copy of the Policy indicating where the requested modifications were to be inserted.

In response to the request for added input, the staff gave a review of the proposed modifications to the Council of Independent Business Owners (CIBO) on Friday, February 11. There were a number of comments, all generally stating that any changes to restrict the Council in awarding these grants should be avoided. There were also comments expressing that open space was already required in the Unified Development Ordinance (UDO), and there were already enough supports for energy saving elements.

The staff also gave a presentation on the proposed changes to the Downtown Commission on Friday, February 11. They generally reflected the same sentiments as heard at CIBO, indicating a preference for a less restrictive policy.

The staff gave a similar review to the Coalition of Asheville Neighborhoods (CAN) on Monday evening, February 14. That group was generally in support of the modifications. The prevailing sentiment was that if tax revenues were to be affected for any length of time, the incentive should be narrowly focused toward projects that meet multiple Council goals.

The staff also sent a copy of the Policy and suggested changes to the Economic Development Council. To date, no response has been received.

The staff presented the Policy and suggested changes to the River Development Commission.

Vice-Mayor Newman said that the Housing & Community Development Committee, and others, discussed this policy and based on those discussions, he provided Council with a proposed revised Land Use Incentive Policy. Said policy reads:

"Every 10 points earn one year of economic incentive (i.e., equivalent to property taxes for one year). Every 10 points earns a 10% reduction in the following fees and charges: Zoning Permit, Building Permit, Driveway, Grading Permit, Plan review fees and Water service connection fee. Required elements (these are the same as the current policy except with Energy Star certification):

- Energy Star Certification
- Inside city limits, within 1/8 mile of a major highway
- Assume legal costs if challenged
- 20% equity participation by party requesting incentive
- Residential units sold as condos must be primary residence of occupants for the life of the incentive.

| Public Benefit Element | Points |
|---|---|
| **Green Building/Energy** | |
| Energy Star Certified | 5 |
| Leed Bronze or HB Silver | 10 |
| Leed Silver or HB Gold | 20 |
| Leed Gold or HB Platinum | 30 |
| Leed Platinum | 40 |

**Affordable Housing** – For rental projects, just agree to 10 year affordability criteria for rents at 80% of area medium income.

| | |
|---|---|
| 10%+affordable | 10 |
| 20%+affordable | 20 |
| 30%+affordable | 30 |
| 40%+affordable | 40 |

**Workforce Housing** – Must agree to 10 year affordability criteria for rents at 120% of area medium income.

| | |
|---|---|
| 25%+workforce | 5 |
| 50%+workforce | 10 |
| 75%+workforce | 15 |

**Mixed Use and Location**

| | |
|---|---|
| Includes a minimum 20% non-residential | 5 |
| Within the Sustainability Bonus area | 5 |
| Brownfield Redevelopment | 5" |

Vice-Mayor Newman moved to adopt the Transformational Development Projects Incentive Policy (now to be called the Land Use Incentive Policy) just presented. This motion was seconded by Councilman Bothwell.

When Mayor Bellamy asked for comments, no one spoke.

At Councilwoman Manheimer's request after a brief discussion, Vice-Mayor Newman agreed to amend his motion to delete the required element entitled "residential units sold as condos must be primary residence of occupants for the life of the incentive." Councilman Bothwell agreed to the amendment as well.

In response to Councilman Russell regarding whether the policy Council adopted in November, 2010 is effective, City Attorney Oast said that when Council considered the policy, it was subject to revisions regarding green and sustainable practices. He understands that to mean that the policy has not been finalized. The vote at that time was 4-3, with Councilman Bothwell, Councilman Davis and Councilman Russell voting "no."

While responding to various questions from Council, Vice-Mayor Newman stated that this revised policy contains clear, objective criteria.

At Councilman Davis' request, Vice-Mayor Newman and Councilman Bothwell agreed to revise the amended motion that this policy be revisited in one year at which time staff is to evaluate the metrics set in the policy to see if they are too aggressive or not aggressive enough to achieve the public policy.

Councilwoman Manheimer clarified that the motion would also include that one of the required elements be the same as in the November policy (which was inside city limits, within ¼ of a mile of a major highway), that this policy would replace the November policy in its entirety, and that the policy would be effective upon adoption by Council.

It was Council's understanding, at Mayor Bellamy's clarification, that this Land Use Incentive Policy is separate from the fee rebate program for affordable housing.

Upon inquiry of Vice-Mayor Newman, Ms. Daniel said that this policy will be easier for staff to work with as it contains clear criteria.

The following amended motion made by Vicé-Mayor Newman and seconded by Councilman Bothwell and carried on a 6-1 vote, with Councilman Russell voting "no": (1) to delete the required element entitled "residential units sold as condos must be primary residence of

occupants for the life of the incentive"; (2) that the policy be revisited in one year at which time staff is to evaluate the metrics set in the policy to see if they are too aggressive or not aggressive enough to achieve the public policy; (3) revise one of the required elements to read "inside city limits, within ¼ of a mile of a major highway"; (4) policy would replace the November policy in its entirety; and (5) policy would be effective upon adoption by Council.

**RESOLUTION BOOK NO. 33 – PAGE 359**

**B. DISCUSSION OF EARLY VOTING SITES FOR 2011 CITY COUNCIL ELECTION**

Mayor Bellamy said that the Buncombe County Board of Elections is in the process of preparing their budget for 2011-12 and has asked if City Council will want early voting sites for their election this year.

At the February 8, 2011, City Council meeting, City Council asked for additional information to determine if they will request the Buncombe County Board of Elections to prepare for early voting sites for their election this year. That requested information is below: (1) In 2007, 1,061 people early voted at the Board of Elections Office on College Street; (2) In 2009, 1,349 people early voted at the Board of Elections Office on College Street; (3) In 2009, 2,008 people voted in the four additional early voting locations; and (4) Asheville-Buncombe Technical Community College will pay for the costs that can be attributed to their election (extra precincts that are needed, any extra workers, and for the coding and ballot costs for their election).

The following information was also available to assist Council in their decision: (1) In 2009, City Council requested by Buncombe County Board of Elections to add four additional early voting locations one week before the general election on November 3, 2009. They were located at Parks & Recreation on Gashes Creek Road, North Asheville Branch Library, West Asheville Branch Library and South Buncombe Branch Library. Out of the total cost for the November election ($122,786), approximately $39,406 were costs associated with the early voting sites. This is a conservative estimate. There were 3,357 City voters who took advantage of the early voting sites; (2) The City of Asheville will have 37 normal polling places in October and then again in November. If remote sites are opened in November, the Board of Elections will have to provide ballots for all voters for all municipalities, per the State Board of Elections; (3) The City must notify the Board of Elections 90 days before the election in order for them to submit a plan of implementation to the State Board of Elections for approval. Generally, the sooner we let the Board of Elections know about remote sites the better; (4) While the Board of Elections will certainly aim to provide the desired location for the one-stop sites, ultimately the final specific decision lies with the County Board of Elections and the State Board of Elections. Many factors have to be considered in these decisions; (5) Citizens will indeed always have the opportunity to vote early at the downtown office at 35 Woodfin Street for the full time period; and (6) A cost guideline would be $1,000 per day per site. This is an estimate since there are many line items that are significantly affected by the number of sites opened, i.e., training, advertising, travel, number of employees, overtime, etc.

Councilman Smith felt it would be good to have some early voting so we can see if there is a trend.

Due to the economy, Councilman Russell moved to not provide additional early voting sites, other than the one on College Street. This motion was seconded by Councilman Davis.

When Mayor Bellamy asked for public comment, no one spoke.

Vice-Mayor Newman felt we have seen an enormous growth in early voting in North Carolina and has noticed upward trends in people voting.

24

The motion made by Councilman Russell and seconded by Councilman Davis failed on a 3-4 vote, with Vice-Mayor Newman, Councilman Bothwell, Councilwoman Manheimer and Councilman Smith voting "no."

Vice-Mayor Newman moved to request the Buncombe County Board of Elections add four additional early voting locations six days before the general election in the north, south, west and east areas. This motion was seconded by Councilman Bothwell.

Vice-Mayor Newman withdrew his motion in order to get additional information from the Board of Elections. Said information includes: (1) Why is there a discrepancy of 4 additional early voting sites one week early (cost guideline is $1,000 a day for 6 days = $6,000) x 4 = $24,000 vs. the approximate $39,406 costs associated with the additional early voting sites; (2) Does the City of Asheville pay for the early voting site on College Street; (3) Was any of the 4 additional voting sites open on Saturdays, and if so, how many people voted early on Saturdays in 2009 at the 4 additional sites; (4) Was the College Street site open on Saturdays, and if so how many people voted early at that site in 2009; (5) How many people voted in the 2009 election; and (6) How many people voted in the 2007 election (not counting early voting at the Board of Elections Office).

It was the consensus of Council to have additional information provided to Council for the April 12, 2011, meeting.

**C. RESOLUTION NO. 11-50 – RESOLUTION SUPPORTING FULL FUNDING FOR THE COMMUNITY DEVELOPMENT BLOCK GRANT PROGRAM**

Community Development Director Jeff Staudinger said that the Community Development Block Grant (CDBG) funding is in danger of deep cuts that if adopted would reduce grants this year by two-thirds, and result in staff cuts. Elected official around the country are strongly advocating for the continuation of this program, and preparing for a similar situation for Fiscal Year 2012.

The federal budget for this current year has not yet been adopted. The government has been operating since October of 2010 on a Continuing Resolution (CR), scheduled to expire on March 4. The House passed a new spending bill- H.R. 1- to fund the government for the rest of this year. It proposes funding CDBG for only that portion of this federal fiscal year that has already passed- essentially eliminating the CDBG program (62.5% cut from last year's funding, from $3.99 billion to $1.5 billion). H.R. 1 also contains a provision to eliminate any unobligated ARRA funding (CDBG-R included). It also contains a provision to rescind all Sustainable Communities funding, which would eliminate funding for our TIGER II Planning Grant and the Regional Sustainable Communities Planning Grant awarded to Land of Sky Regional Council. Representative Shuler voted against the House-adopted Continuing Resolution.

We will likely see a short-term CR passed, of uncertain duration, to allow for time for House-Senate negotiations for a funding bill for the rest of this year. That short-term CR will probably include $4 billion domestic spending cuts, and be a harbinger for additional domestic discretionary spending reductions for this federal fiscal year, that is now almost half completed.

The Senate is likely to agree to something approaching that level of short-term cuts in order to avoid a government shut down on March 5. Looking at the challenge ahead to pass a budget for the remainder of this year, Senate Democrats have endorsed the President's five-year discretionary spending freeze – signaling that some deep cuts are on the way. Republicans will push the Senate to embrace the grand total of cuts approved by the House, but not necessarily line-for-line every cut approved by the House. In every case, CDBG is at risk of significant cuts.

He provided Council with a fact sheet which goes into further detail of the accomplishments of CDBG within our community over the past five years. CDBG provides the

flexibility to fund a myriad of activities, fill gaps where needed, and leverage and attract additional resources to projects. This combination of CDBG with other resources adds to our local economy through the purchase of goods and services and adds to the betterment of the lives of our local citizenry through improved neighborhoods and lives.

We are now in the midst of our federal Fiscal Year 2011 funding process, and staff is reviewing 24 CDBG applications requesting $2.3 million in funding from the agencies that provide affordable housing, homelessness intervention and prevention, small business development, financial literacy, emergency home repairs. The services offered through CDBG affect thousands of Asheville residents. If last year's allocation were cut by 63%, we would have about $500,000 to distribute in grants, and about $100,000 for staffing. One of the most effective tools the City has to help reach its strategic goals would essentially be eliminated.

According to staff from national membership organizations such as the National Community Development Association, the US Conference of Mayors and the National League of Municipalities, Senators want to hear from people who will be directly affected by cuts to the program. These organizations consider it to be extremely urgent that we communicate with our Senators as soon as possible.

Mr. Scott Dedman, Executive Director of Mountain Housing Opportunities, urged Council to strongly support the CDBG funding.

Councilwoman Manheimer moved to adopt a resolution supporting full funding for the Community Development Block Grant funding. This motion was seconded by Councilman Smith and carried on a 6-1 vote, with Councilman Russell voting "no."

**RESOLUTION BOOK NO. 33 – PAGE 363**

**Closed Session**

At 7:30 p.m., Councilman Smith moved to go into closed session for the following reasons: (1) To discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session. The statutory authority is contained in G.S. 143-318.11(a)(4); and (2) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Bothwell and carried unanimously.

At 8:01 p.m., Councilman Russell moved to come out of closed session. This motion was seconded by Councilman Smith and carried unanimously.

## VI. NEW BUSINESS:

### A. ORDINANCE AMENDMENT TO REQUIRE PAWNBROKERS AND SECOND-HAND DEALERS TO SUBMIT THEIR DAILY PAWN AND/OR PURCHASE TRANSACTIONS TO THE ASHEVILLE POLICE DEPARTMENT ELECTRONICALLY

Assistant City Attorney Kelly Whitlock said that this is the consideration of an amendment to the City's pawnbroker ordinance which would require pawnbrokers and second-hand dealers to submit their daily pawn and/or purchase transactions to the Asheville Police Department (herein "APD") electronically.

26

Currently, the City's ordinance, in accordance with state law, requires pawnbrokers to maintain records of every pawn and/or purchase transaction and have them available for inspection and pickup each workday by APD. Pawnbrokers are required to record the following information: 1) a clear and accurate description of the property 2) the name, residence address, phone number and date of birth of pledgor; 3) the date of the pawn transaction; 4) the type of identification and the identification number accepted by the pledgor; 5) the description of the pledgor, including approximate height, weight, sex and race 6) the amount of money advanced 7) the date due and the amount due; 8) all monthly pawn charges 9) the agreed-upon stated value between the pledgor and the pawnbroker.

Secondary metals recyclers and precious metal dealers are also required, pursuant to state law, to maintain records of all purchase transactions for inspection by law enforcement.

The current process of paper reporting is tedious and both resource and labor-intensive. Currently, an investigator from APD physically retrieves the paper records on a bi-monthly basis. Thereafter, the paper records are manually entered into a database which is often back-logged. This results in out-of-date information and impedes the prompt resolution of property crime cases. Requiring pawnbrokers, secondary metals recyclers and precious metal dealers to report their pawn and/or purchase transactions electronically will provide investigators with access to up-to-date information during the course of an investigation. Not only will electronic reporting assist law enforcement, it will also provide these businesses with a more user-friendly and efficient means of reporting.

In addition to the issues stated above, the current ordinance has also created an unintended loophole. Criminals selling stolen goods can evade detection simply by avoiding pawn shops since pawnshops are required to maintain records of each pawn and/or purchase transactions for inspection by law enforcement. Many property crimes are left unsolved as a result of criminals selling stolen items at second-hand stores that are not required to maintain records of their purchase transactions of second-hand goods and report them to APD (i.e. consignment shops, antique dealers, EBAY stores, cash converter stores, used record/video game stores, used sporting goods stores, and used musical equipment stores). Requiring these "other" types of second-hand dealers to submit their purchase transactions electronically to APD will assist in closing this substantial loophole.

The proposed changes are (1) to have pawnbrokers, secondary metal recyclers, precious metal dealers and other second-hand dealers will submit their pawn/purchase transactions of second-hand goods to APD electronically; and (2) submit no later than 48 hours of the transaction.

Currently, APD subscribes to LeadsOnline and approximately 18 businesses in the City voluntarily use it to report their pawn and/or purchase transactions. LeadsOnline is the nation's largest online investigation system for law enforcement regarding missing property, providing rapid electronic access to transactions of reporting businesses. APD pays an annual subscription to use LeadsOnline and reporting businesses are provided the service free of charge. Only authorized law enforcement personnel investigating property crimes may access data on the LeadsOnline system.

On November 16, 2010, APD discussed the potential changes to the ordinance with the Asheville Public Safety Committee. Upon review, the Committee made a motion to approve the amendments to the ordinance, contingent upon further input from the community.

On December 13, 2010, APD conducted an informational meeting in order to provide details to the public about the potential changes to the ordinance and the process of reporting electronically via LeadsOnline.

On February 15, 2011, APD addressed before the Public Safety Committee the pros and cons of implementing a monetary threshold (i.e. exempting second-hand goods that fell below a monetary threshold from the reporting requirement).

The following changes have been incorporated into the proposed ordinance:

1. Requiring pawnbrokers, secondary metal recyclers and precious metal dealers to submit their pawn and/or purchase transactions to APD electronically.

2. Requiring pawnbrokers to hold any goods pledged, pawned, or purchased for 7 days to conform to state law requirements.

3. Requiring "other" second-hand dealers to submit their purchase transactions of second-hand goods to APD electronically.

    a. Defining second-hand dealers as: any person, sole proprietorship, partnership, joint venture, corporation, company, association or any other form of organization whose regular business is buying, selling, bartering, exchanging, or accepting for sale on consignment, in any manner, at retail or wholesale, or otherwise dealing for profit in, second-hand goods.

    b. Defining second-hand goods as: tangible personal property from the public previously used, rented, owned or leased (excluding property required to be registered by the NCDOT- Division of Motor Vehicles, clothing, shoes, books, and animals).

    c. Exempting the following businesses/persons from the definition of second-hand dealers:

        i) A person or business whose only business transactions with second-hand goods in the City consist exclusively of donated items and/or purchases from 501(c)(3) organizations; or

        ii) A person or business whose only business transactions with second-hand goods in the City consist of the sale of personal property acquired for household or other personal use such as garage sales, yard sales, estate sales and/or auctions held by a licensed auctioneer; or

        iii) A person or business whose only business transactions with second-hand goods in the City consist of a display space, booth or table maintained for displaying or selling merchandise at any trade show, convention, festival, fair, flea market, swap meet or similar event that is not in a fixed location unless otherwise regulated under N.C.G.S. § 66-11 (regulated metals) or N.C.G.S. §66-163 et seq. (regulated precious metals)

- Examples of second-hand dealers include physical EBAY stores, consignment shops (non-clothing items), antique dealers, used record and video game stores, used sporting goods stores, used musical equipment stores and cash converter stores.

The City's ordinance will be effective April 15, 2011.

This action complies with the City Council Strategic Operating Plan in the focus area of "safe".

Pros:

- Assists APD in the prompt resolution of property crimes
- Assists APD in locating wanted/missing persons
- Provides a more user-friendly and efficient means of reporting for pawnbrokers, secondary metal recyclers, and precious metal dealers
- Less resource and labor-intensive for APD than the current process of paper reporting
- Does not significantly interrupt daily business transactions or subject customers to inconvenience
- Service is provided free-of-charge to reporting businesses
- Free on-line support service

Cons:

- Requires access to a computer with internet connection
- Transition to data entry for pawnbrokers, scrap metal dealers, and precious metal dealers
- Requires "other" second-hand dealers to start reporting purchase transactions of second-hand goods

For the past four years, the City and the County have jointly contracted with LeadsOnline in the amount of $23,002 per year, with the City's annual share totaling $10,066. APD pays this amount directly to the County through CJIS funds.

Approximately 13 local businesses in the City voluntary report their transactions electronically via LeadsOnLine: 5 pawnshops, 5 secondhand stores and 3 precious metal dealers. Approximately 5 businesses in the City have signed up with LeadsOnLine.

If Council approves of the proposed changes, adoption of the ordinance is recommended.

In response to Mayor Bellamy, Ms. Whitlock said that after further discussion, staff is open to exempt consignment sales in the definition of second-hand dealers. The APD is looking for criminals who sell and want their money immediately. Consignment shops typically get items and sell them at a later date.

Mayor Bellamy was concerned that sporting goods stores, in particular Play It Again Sports, buy and sell used sporting goods at an average of less than $20 per item. She didn't want to hurt some of our small business owners unintentionally with the additional cost in staff time.

Police Chief Bill Hogan explained that establishing a threshold would make it easy for a criminal to sell his stolen goods at the amount just under the threshold (regardless of the value) so it would not have to be reported. Also, if someone comes in with a number of different items, it should be reported because those are the kinds of things that come out of cars.

When Mayor Bellamy asked about businesses who do not have a computer or internet, Chief Hogan assumed that most people in business have a computer. It does, however, take an internet connection in order for the information to be electronically transferred to the APD. To enter the data is very quick. We don't want to put an undue burden on our businesses; however, we need to identify those individuals who are victimizing people on a regular basis. He said the APD would be happy to work with businesses if they have a problem.

In response to Councilman Bothwell, Police Chief Hogan said that where there are consignment booths with an established business at an antique mall, staff would be willing to

write that out of the ordinance. Again, he is more concerned about people coming into the business off the street to sell.

In response to Councilman Bothwell about scrap metal dealers who already have an established system of bookkeeping and reporting, Police Chief Hogan said that it is his understanding that you can enter the information into the business software and it will dump right into LeadsOnLine.

Councilman Russell moved to adopt an amendment to the City's pawnbroker ordinance which would require pawnbrokers and second-hand dealers to submit their daily pawn and/or purchase transactions to the APD electronically, with the exemption of consignment sales in the definition of second-hand dealers; and with a small dollar threshold. This motion was seconded by Councilwoman Manheimer.

The following individuals spoke in support of the ordinance amendment in that it is a low cost to the business owner and a very simple program to use in order to assist law enforcement in investigations:

Mr. Alan Sheppard, Owner of Alan's Jewelry & Pawn and representing two other pawn Shops
Mr. Russell Whitmire, Manager of Leicester Pawn & Gun Shop
Mr. Graham Shaw, Corporate Operations Manager at Alan's Jewelry & Pawn

The following individuals spoke in opposition of the ordinance amendment, mainly because of the amount of time to enter the data, the need for additional staff, the need to purchase a computer and internet service, and the cumbersome extra step for small priced items to be entered, noting specific amendments they would like to see:

Mr. Robert Cleveland, Owner of Play it Again Sports (suggest sporting equipment items with a fair market value of under $250 be excluded from the second-hand dealer definition)
Mr. Kenneth Jones, Manager of Antique Market Gallery on Broadway (provided Council with copies of ordinances from three other cities) (suggested antique dealers and consigners be exempt from the second-hand dealer definition and develop a list of what would fall under the regulations to be reported and all others exempt)
Representative of Sweeten Creek Antiques
Mr. Russ Towers, Co-Owner of Second Gear
Ms. Debra Bryant, Bryant Antiques in Biltmore
A dealer from Bryant Antiques in Biltmore
Ms. Carolyn Doyle, Plato's Closet
Representative of Biltmore Lamp & Shade Gallery
Partner of Village Antiques
Mr. Otto Hauser, owner of Self Antiques and Owner of Antique Market Gallery

In response to Mayor Bellamy, Ms. Whitlock said that staff would be happy to change the effective date from April 15, 2011.

In response to Councilman Russell, Ms. Whitlock said this ordinance applies only to purchasing second-hand goods. Regarding booths, there is an exemption that any person or business whose only business transactions with second-hand goods in the City consist of a display space, booth or table maintained for displaying or selling merchandise at any trade show, convention, festival, fair, flea market, swap meet or similar event that is not in a fixed location (fixed location is anything that is more than 365 days). Anything temporary would be exempt.

Upon inquiry of Vice-Mayor Newman, Councilman Russell amended his motion to amend the second-hand definition to exempt on both sides of the transactions those items purchased

from garage sales, estate sales and auctions. Councilwoman Manheimer accepted the amendment.

Upon inquiry of Councilman Bothwell regarding enforcement, Police Chief Hogan said that enforcement is difficult and if a business is caught violating the ordinance, it would be a first class misdemeanor. They also follow-up on tips. If information is not uploaded everyday, no red flags would be raised. He said they typically get to know the business and work with them.

At Councilwoman Manheimer's suggestion, Police Chief Hogan said that staff would be amenable to introduce a small threshold of $20-30 range. He reiterated the Police Department wants to account for purchases by the store, not sales.

Mayor Bellamy felt it might be appropriate to hold one more public meeting so people can clearly understand the ordinance, with Council's amendments, and then have staff bring back a revised ordinance amendment. She suggested notification in the City's eNews, and even an ad in the newspaper. Ms. Whitlock said that she has a list of businesses she will notify, along with sending out a press release.

In response to Councilman Davis, Ms. Whitlock said that the cost to the dealer will be access to a computer and an internet connection.

Councilman Bothwell seemed like it would be possible to include in the ordinance amendment the specific goods that should be reported.

It was the consensus of Council to have staff host another public meeting to go over the amendments of Council as follows (matter to be brought back to Council on April 26, 2011): (1) exemption of consignment sales in the definition of second-hand dealers; (2) a $25 threshold; and (3) exemption on both sides of the transactions those items purchased from garage sales, estate sales and auctions.

**B. PUBLIC/PRIVATE PARTNERSHIP PROPOSALS**

Economic Development and Civic Center Director Sam Powers said that based on Council's adoption of the Land Use Incentive Policy, the developer requested the Weirbridge Workforce Housing Incentive Grant and the Rockwood Park/Audubon Apartments voluntary annexation and City/County/private park development items be continued to allow the developer to work with staff on the new policy guidelines. The developer has requested the next meeting on March 22, 2011.

Due to the feasibility of staff working with the developer and still meeting the agenda guidelines, it was the consensus of Council to postpone both items until the April 12, 2011, agenda.

**C. RESOLUTION NO. 11-46 - RESOLUTION AUTHORIZING APPROVAL OF HOUSING TRUST FUND LOANS TO BEAUCATCHER PROPERTIES, LLC (SHILOH ROAD) AND MOUNTAIN HOUSING OPPORTUNITIES, LLC (EAGLE MARKET PLACE)**

Community Development Analyst Randy Stallings said that this is the consideration of a resolution authorizing approval of Housing Trust Fund loans to Beaucatcher Properties, LLC (Shiloh Road) and Mountain Housing Opportunities, LLC (Eagle Market Place).

Staff received three (3) applications for HTF funding totaling $680,000. These applications were presented to the Housing and Community Development Committee (HCD) on February 17 and each was evaluated on its own merit. Resources were insufficient to approve all applications. The current available cash balance in the Housing Trust Fund is $293,711. Non-

liquid assets in the form of City-owned real estate could potentially return an additional $300,000 to the fund prior to fiscal year-end; however, those funds are tentative and the timing of receipt remains unknown.

Regularly scheduled loan payments for the remainder of the fiscal year can confidently be projected at $55,940. These future payments have been considered by the HCD in their decision. The total amount of fund resources, including both the current cash balance and projected revenues thru June 30, 2010, is $349,651. Possible future appropriations have not been considered by the HCD in their projections.

Of the three (3) applications presented, two (2) have been recommended by the HCD for approval. An application from Beaucatcher Properties LLC for a project on Shiloh Road in South Asheville has been approved by HCD at an amount of $80,000. The total award is conditional upon the receipt of future program revenue. At the present time, HCD is requesting that $48,000 be made available for the project. The remaining $32,000 will be awarded only if sufficient funds become available.

An application from Mountain Housing Opportunities, LLC (MHO) has been approved by HCD for a development in the historic Eagle Market Street neighborhood. The amount of the loan request is $300,000. A firm loan commitment is needed by the end of April to secure sufficient points for local leverage in the final tax credit application. Disbursements from the HTF are not anticipated to be needed until early 2012.

Beaucatcher Properties, LLC- Shiloh Road (address unassigned) $80,000.

Mr. Kirk Booth representing Beaucatcher Properties LLC has proposed a 4-unit rental project on Shiloh Road in South Asheville. The total development cost is $255,000. The site size is .36 acres and the property is currently zoned RS-8. Rents will be restricted to persons below 60% AMI. The project will include two (2) 2-bedroom single family residences, each with a 1-bedroom accessory apartment over a rear garage. The site is infill development in an older established neighborhood within 500 feet of a transit stop.

The terms requested are $80,000 at 2.00% interest-only for 30 years. Due to the scale of the project, no TRC or P&Z approval is required and the developer is ready to begin construction immediately. It is anticipated that units could be fully constructed and leased by the end of June.

The requested per-unit subsidy is $20,000. The loan request represents 31.3% of the total development cost. The land is being purchased from a local bank at 55% below the tax assessed value. The total per-unit development cost is very low at $63,750 per unit. The project will not be Energy Star certified but does incorporate many of the desired elements such as Energy Star appliances, low-e windows, and low-flow water systems.

Pros:

- The development costs per unit are very low at $63,750.
- Land cost is far below market value.
- The accessory apartments allow for additional density as use by right.
- Relatively small investment required by the City.
- Infill development supports strategic planning goals.
- Single family rentals provide alternatives to families with children.
- Construction is ready to proceed immediately.
- The developer has a good track record with the Housing Trust Fund and has completed other local projects in a timely manner.
- Local labor will be used for the project.

Cons:

32

- The per-unit subsidy of $20,000 is the program maximum.
- Very few affordable units will be added to the local housing stock per dollar invested.

Mountain Housing Opportunities, LLC (MHO)- Eagle Market Place $300,000

MHO has proposed a 70-unit multifamily rental development in the historic Eagle-Market Street neighborhood. The total development cost is $11.3 million. The site size is .41 acres and is currently zoned Central Business District. Rents will be restricted to persons below 60% of Area Median Income. In response to the stated priorities of the fund, 60% of the units will be one-bedroom and efficiency units. There is also a commercial component of the project; however, only the residential development is under consideration for Housing Trust Fund Support.

The terms requested are $300,000 at 2.00% interest-only for 20 years. The project brings significant equity through Low Income Housing Tax Credits. The design will incorporate the historic Del Cardo, Ritz & Collette buildings, thereby preserving the historic character of the neighborhood. MHO and the Eagle Market Street Development Corporation are partners in this proposed development.

The requested per-unit subsidy is very low at $4,285 per-unit. The loan request represents only 2% of the total development costs. The developer has also applied for HOME funds in the amount of $275,000. The Del Cardo and Collette buildings are being donated to the project. The Ritz building is being purchased at a cost of $1.3 million, or $18,571 per unit. The total per-unit development cost is somewhat high at $162,011.

The project will be LEED certified. Ten percent (10%) of the units will be fully ADA accessible and an additional 58 units will have ADA features which would make the units visitable. Twenty-two underground parking spaces are incorporated in the design. The developer is negotiating with local parking operators to secure monthly parking for tenants.

The projects directly support the City's Strategic Operating Goals as follows: (1) *Affordable*: The project proposal is supportive of the City's goal of providing safe and decent affordable housing units to the citizens of Asheville; and (2) *Sustainable*: The proposed projects provide new housing units located near transit lines, higher urban development densities, and encourage higher standards of energy efficiency. The projects also address the priorities of the Consolidated Strategic Housing & Community Development Plan by increasing the housing stock, providing affordable rental units, building high quality energy-efficient housing, and coordinating development with transportation and jobs.

The current balance in the Trust Fund is $293,711. There are insufficient funds at the present time to fully fund the proposed developments; however, projected receipts prior to fiscal year end will be sufficient to fund both projects at the level approved by HCD. The available fund balance will be depleted if the loans are approved and the fund will be unavailable for future development until funds are replenished in FY 2011-12. The projects are new construction and are anticipated to add $11.6 million dollars in new development to the City tax base.

The Housing and Community Development Committee recommends City Council approve a resolution approving the following loans: (1) $80,000 to Beaucatcher Properties, LLC for the development of four (4) single-family rental units on Shiloh Road; $48,000 of the loan to be made immediately available for disbursement following loan closing and $32,000 to be made available when sufficient funds become available; and (2) $300,000 to Mountain Housing Opportunities, LLC for the development of seventy (70) multifamily units at Eagle Market Place; all funds to be made immediately available for disbursement following loan closing.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Russell moved for the adoption of Resolution No. 11-46. This motion was seconded by Councilman Bothwell and carried unanimously.

**RESOLUTION BOOK NO. 33 – PAGE 355**

**B. BOARDS & COMMISSIONS**

Regarding the Asheville-Buncombe Fair Housing Commission, it was the consensus of Council to readvertise for the vacancies due to no interested applicants.

**RESOLUTION NO. 11-52 - RESOLUTION APPOINTING A MEMBER TO THE CITIZENS-POLICE ADVISORY COMMITTEE**

Vice-Mayor Newman, Chairman of the Boards & Commissions Committee, said that Ron Maynard (east representative), on the Citizens-Police Advisory Committee, resigned, thus leaving an unexpired term until June 30, 2011.

The following individuals applied for a vacancy on the Citizens-Police Advisory Committee: Adam Clayton Banner, Lori Gerber, Barbara Monteath Buchanan, Toni Hicks, Richard G. Lee, Gabriela Volkomer, Sarah Nunez and Debbie Applewhite.

Vice-Mayor Newman said that the Boards & Commissions Committee recommended appointing Ms. Debbie Applewhite.

Councilman Russell moved to appoint Debbie Applewhite to serve the unexpired term of Mr. Maynard, term to expire June 30, 2011, and then to serve a full three-year term, term to expire June 11, 2014, or until her successor has been appointed. This motion was seconded by Councilman Davis and carried unanimously.

**RESOLUTION BOOK NO. 33 – PAGE 364**

**RESOLUTION NO. 11-53 - RESOLUTION APPOINTING A MEMBER TO THE PUBLIC ART BOARD**

Vice-Mayor Newman, Chairman of the Boards & Commissions Committee, said that Harry Harrison has resigned from the Public Art Board, thus leaving an unexpired term until June 30, 2012.

The following individuals applied for a vacancy on the Public Art Board: William Meller, Richard G. Lee, Sharon Trammel, Susanne Hackett and Leslie Shaw.

Vice-Mayor Newman said that the Boards & Commissions Committee recommended appointing Ms. Sharon Trammel.

Councilman Smith moved to appoint Sharon Trammel to serve the unexpired term of Mr. Harrison, term to expire June 30, 2012, or until her successor has been appointed. This motion was seconded by Councilwoman Manheimer and carried unanimously.

**RESOLUTION BOOK NO. 33 – PAGE 365**

**VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:**

**VIII. ADJOURNMENT:**

34

Mayor Bellamy adjourned the meeting at 9:48 p.m.

Magdalen Bourleson — CITY CLERK

James W. Bellamy — MAYOR

Tuesday – March 22, 2011 – 3:00 p.m.
First Floor North Conference Room

Worksession

Present: Mayor Terry M. Bellamy, Presiding; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Vice-Mayor Brownie W. Newman and Councilwoman Esther E. Manheimer (both travelling to meeting from out of town)

**General Fund Operating Budget**

Director of Administrative Services Lauren Bradley said that regarding Revenue assumptions (1) Overall slight decrease in revenues (a) State revenue decrease for Transit operations; and (b) Decreases in investment earnings and permit revenue; (2) No property tax increase; and (3) No fund balance appropriation. Regarding Expenditure Assumptions (1) Continuation of core services; (2) Savings strategies with a focus on workload metrics; (3) Expenditure increases expected for fuel, law enforcement, LGERS; and (4) No change in employee compensation and City health care contribution.

Regarding compensation and benefits (1) Compensation to remain at current levels during FY 11-12; and (2) Blue Ribbon Task Force recommendations presented to City Council February 22, 2011 (a) Operate a sustainable Health Care Program that provides access, quality and cost-effective medical care; (b) General Fund contribution to health care fund remain flat (i) Necessitates increases to premiums, co-payments and co-insurance; (c) Expansion of Employee Health Clinic; (d) Implementation of Wellness Program with incentives; and (3) Consideration of continuation of retiree health care coverage for future hires.

Regarding medical plan design changes (1) Plan Design Changes (a) Wellness program implementation with incentive to participate; (b) Three plan options (HRA, Basic & Enhanced); (c) Increase in employee premium costs on average of 30%; (d) Increase in member out of pocket costs (co-payments & deductibles); (e) Preventive services covered at 100%; (f) Expanded capabilities of Health Services with no fee for service; and (g) Domestic Partner Benefits extended; and (2) Wellness Program Participation (a) Health Risk Assessment and Biometric screenings; (b) Non-tobacco affidavit or commit to participate in cessation program; and (c) Participate in initial one-on-one meeting with Health Services staff and regular follow up to ensure compliance with recommendations.

Regarding domestic partner benefits (1) Available during open enrollment for FY 11-12 plan year (a) Anticipated cost impact of around 1%; and (b) Prepared to offer for same-sex domestic partners as directed by City Council; and (2) Impact of IRS regulations (a) Employee paid premiums for coverage post-tax; (b) Income tax implications for value of employer subsidy for benefit; and (c) Restrictions on HRA and Flexible Spending reimbursements.

Ms. Bradley then talked about service delivery (1) East Asheville Community Center (a) Center available for scheduling community events and programming; (b) staffing shifted to other community centers; and (c) financial impact = $80,000 in cost savings; (2) Transportation Demand Management Program (a) exploring alternatives for housing regional program (DOT regional plan and vision statement on hold); (b) currently funded 50/50 by State and City funds; and (c) financial impact = $50,000 in cost savings.

Brush and leaf collection (1) brush collection (a) return to twice per month brush collection; and (b) financial impact = $125,000 in expenditures; and (2) leaf collection (a) collect only bagged leaves (i) twice per month collection during leaf season; (ii) bags can be provided free of charge to households; (iii) improves efficiency of collection; and (iv) positive impact on street sweeping and water quality; and (b) financial impact = $83,000 in cost savings.

Regarding Solid Waste & Recycling, the Waste Stream Reduction Program (1) Changes the way we collect solid waste and pay for it consistent with recommendations in the Sustainability Management Plan; (2) Introduces variable-sized garbage cans: 65-gallon and 95-gallon; (3) Introduces single stream recycling in 95-gallon carts; and (4) Cost of program enhancements is approximately $1 Million; proposed solid waste fee structure designed to cover costs. She then reviewed the solid waste fee proposal for 65-gallon vs. 95-gallon and noted that staff is still working with the recycling provider to reduce the fee. This model is a change in service delivery.

**Fees & Charges**

Ms. Bradley then reviewed the fees & charges as follows: (1) Fire Inspection fees in the ETJ (a) Brings service up to full cost recovery by adding a 20% surcharge to inspections in the ETJ; and (b) $25,000 anticipated in revenue; (2) Parking garage rates (a) Civic Center garage (i) Hourly: 50 cents to 75 cents; (ii) Monthly: $70 to $80; and (iii) Monthly discounted rates: $35 to $40; (b) Rankin and Wall Street garage special event rates (i) Special Events: $6 to $7; and (c) Downtown resident monthly parking discount: 60% of monthly fee; (Finance Committee was unanimously against this.) (3) Special event discount rate (a) In FY 10-11, City Council approved a 75% discount on permit fees for non-profits holding special events; (b) To date, 49 events have qualified - Value of fees waived is $7,180; and (c) Some concerns have been raised about the use of space - Staff is recommending a cap to the fee waiver at six events per year per group; and (4) Domestic Partner Registry (a) Registry active by May 1; (b) City resident fee: $75; and (c) Outside City resident fee: $100.

Ms. Bradley said at Council's April 12 budget briefing she would review the enterprise funds, Capital Improvement Program and update Council on the outside agencies. The proposed budget presentation would be held on April 26, along with the budget public hearing on May 10 and final budget adoption on May 24.

After Ms. Bradley's presentation and throughout Council's discussion and direction, Ms. Bradley responded to various questions/comments/suggestions by Council (with those not readily available to be provided to Council). Some questions/comments/ suggestions consisted of, but are not limited to: does the re-opening of the Hillcrest Pedestrian Bridge merit the additional allocation of three police officers; options and trade-offs to compensate employees with a small increase in pay; data on what Mission Hospitals would charge if they ran our Health Care Clinic; future Finance Committee discussion regarding leveling the playing field so single employees do not subsidize married employees under our Health Plan; data requested about attrition rates for City employees over last three years; when will the Blue Ribbon Healthcare Task Force recommendations be voted on or are they already being built into the budget; is it possible to have a monthly leaf collection in addition to asking residents to call in for leaf collection; suggestion to go to every other week on garbage collection; suggestion for formal request for the Land-of-Sky to take over the Transportation Demand Management Program since it is regional; comment that changes to the East Asheville Community Center sends a wrong message just to save $8,000; what is the term of payback by the vendor for capital costs regarding the single stream recycling; suggestion to see a greater incentive for people to have smaller recycling cans; is it possible of scanning the garbage can bar codes and bill the property owners based on how many pick-ups; suggestion to use some Energy Block Grant funds or interns to find creative ways to run our recycling program; note that if we offer enough recycling options, more people will begin to recycle saving us tipping fees and extend the life of the landfill; opportunity to partner with Buncombe County for reduction in waste stream to the landfill; data on amount of solid waste

reduction citywide per year; can people purchase the 95-gallon containers themselves; interest in seeing options for different fees for different cans; any idea how many City employees would use the domestic partner benefits; is the domestic partner benefit application fee true cost recovery; request to have a quarterly report of the workload for the City Clerk's Office administering the Domestic Partner Registry; will the proposed annexation laws affect the fire inspection fees proposed; and any thoughts to go up incrementally on parking garage fees.

Due to timing, Ms. Bradley was unable to complete her presentation on the fees and charges regarding Water Rate Study. City Manager Jackson said that staff would re-work Council's budget briefing schedule to possibly include another briefing.

At 4:40 p.m., Councilman Davis (in the absence of Mayor Bellamy and Vice-Mayor Newman) adjourned the budget briefing.

Tuesday – March 22, 2011 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding (excused from meeting at 7:10 p.m.); Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer (arrived in meeting at 5:06 p.m.); Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

**PLEDGE OF ALLEGIANCE**

Mayor Bellamy led City Council in the Pledge of Allegiance.

**INVOCATION**

Councilman Russell asked for a moment of silence for those who have suffered in the natural disasters.

**I. PROCLAMATIONS:**

**A. RECOGNITION OF RONALD PAULUS, MD, MBA, PRESIDENT AND CEO OF MISSION HEALTH SYSTEM**

Mayor Bellamy was pleased to recognize Dr. Ronald Paulus, President and CEO of Mission Health System since September of 2010. Dr. Paulus was pleased to be a part of Asheville and looked forward to continuing to work with the City, County and region.

**B. PROCLAMATION PROCLAIMING MARCH 22, 2011, AS "CIVITAN INTERNATIONAL DAY"**

Mayor Bellamy read the proclamation proclaiming March 22, 2011, as "Civitan International Day" in the City of Asheville. She presented the proclamation to Mr. Calvin Remmers, President of the Asheville Civitan Club, who briefed City Council on some activities taking place during the month.

**C. PROCLAMATION PROCLAIMING MARCH 25, 2011, AS "GREEK INDEPENDENCE DAY"**

Mayor Bellamy read the proclamation proclaiming March 25, 2011, as "Greek Independence Day" in the City of Asheville. She presented the proclamation to Mr. Andy Apostolopoulos, Chair of the Karpenisi Committee of Asheville Sister Cities Inc., who thanked City Council for their support and announced their upcoming events. He presented Mayor Bellamy with a gift of flowers.

**D. PROCLAMATION PROCLAIMING APRIL 10-16, 2011, AS "CRIME VICTIM RIGHTS WEEK"**

Mayor Bellamy read the proclamation proclaiming April 10-16, 2011, as "Crime Victim Rights Week" in the City of Asheville. She presented the proclamation to Ms. Lori Gerber, MS, Founder of Center for New Beginnings, who briefed City Council on some activities taking place during the week.

**II. CONSENT AGENDA:**

Mayor Bellamy read a resolution in memory of Katherine M. Davis, Councilwoman Davis' mother. On behalf of City Council, she expressed Council's deepest sympathy. She asked that the resolution be added to the Consent Agenda.

**A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MARCH 8, 2011**

**B. RESOLUTION NO. 11-54 - RESOLUTION AMENDING POLICY GOVERNING CITY COUNCIL APPOINTMENTS**

Summary: The consideration of a resolution amending the policy governing City Council appointments.

There has been some confusion regarding when the various boards and commissions should cancel their meetings due to inclement weather. On January 25, 2011, the Boards & Commissions Committee discussed this issue and is recommending the policy be amended to include a new section as follows:

"Inclement Weather

If the Asheville City Schools are cancelled, then any board/commission meeting scheduled for that day will be cancelled.

The chairman of the board/commission will have the discretion of cancelling a meeting in the event of safety concerns when the Asheville City Schools have delayed starts"

In addition, a second amendment was recommended by the Committee that "The Boards & Commissions Committee may request that a member in good standing be allowed to serve out their term should they become a non-city resident."

Staff recommends City Council adopt the two amendments to the policy governing City Council appointments.

**RESOLUTION BOOK NO. 33 – PAGE 366**

**C. RESOLUTION NO. 55 - RESOLUTION OF INTENT TO CLOSE AN ALLEY OFF MADISON STREET AND SETTING A PUBLIC HEARING FOR APRIL 26, 2011**

Summary: The consideration of a resolution of intent to permanently close an alley off of Madison Street and to set the public hearing on April 26, 2011.

N. C. Gen. Stat. sec 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, adjacent property owners, Andy Brokmeyer, Millagro LLC and Scott Blake, Blake Holdings LLC have requested the City of Asheville to permanently close an alley off of Madison Street.

The Greenway Commission met on March 10, 2010, and unanimously approved the closure.

This closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties

Con:

- None

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt the resolution of intent to permanently close Cooper Boulevard and to set the public hearing on April 26, 2011.

**RESOLUTION BOOK NO. 33 – PAGE 371**

**D. RESOLUTION NO. 11-56 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN INTERLOCAL AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR STATE MATCH TO PURCHASE TWO DIESEL-ELECTRIC HYBRID AND TWO DIESEL BUSES**

**ORDINANCE NO. 3952 - BUDGET AMENDMENT TO PURCHASE BUSES**

Summary: The consideration of a resolution authorizing the City Manager to enter into an Interlocal Agreement with the N.C. Dept. of Transportation (NCDOT) in the amount of $199,938 as State match to purchase two diesel-electric hybrid and two diesel buses to replace four of the existing 1996 diesel buses; and a budget amendment in the amount of $1,999,376, 10% of which will come from the City's Transit Capital Fund, to purchase these buses.

City staff is in the process of acquiring four new buses for the transit fleet. Part of the effort was to pursue 10% State match for the capital expenditure. Staff applied with the NCDOT and the funds were granted.

The new buses will replace four of the 1996 diesel buses that have already reached their useful life. This is part of the City staff's effort to replace eleven of the remaining 1996 buses. The aging fleet is still operative; however the 1996 buses have begun presenting the problems attributable to age, engine repairs and other parts increasing the maintenance costs. To date, five of the sixteen buses have been replaced with diesel-electric hybrid buses.

The City is in the process to develop the specifications to bid this project, since it was unable to find any contract that will satisfy City's and Federal Transit Administration requirements. The estimated timeframe for completion is 18 months.

The estimated cost of this project is $1,999,376. The City is funding this project using section 5309 of the Federal Transit Administration which provides eighty percent (80%) for capital projects or $1,599,500. The City will provide 10% or $199,938 and with this Interlocal Agreement the State will contribute the additional 10%.

This action complies with the current City Council's Strategic Operating Plan by helping to achieve short-term and long-term energy goals and reducing city carbon emissions, helping to establish a multi-modal transportation plan by making transit system improvements, and helping to fully leverage funding for transportation improvements. This action also complies with the capital improvement recommendations included in the Transit Master Plan that was accepted by the City Council on October 27, 2009.

The Transit Commission supports the subject action.

Pros:

- The subject allocations would enable the City to continue replacing its aged transit system fleet which would produce savings in maintenance and fuel costs.
- The subject action would help reduce the City's carbon emissions.
- The Federal Transit Administration (FTA) would fund 80% of the subject project cost.
- The North Carolina Department of Transportation (NCDOT) would fund 10% of the subject project cost.
- The City of Asheville's local match has been identified and would not require any additional allocation of funds.

Con:

- The City is required to fund 10% ($199,938) of the subject project cost.

The project cost will be $1,999,376, with 80% of this total to be paid by federal funds - FTA section 5309; 10% or $199,938 by the City and 10% or $199,938 by the State. The City funding of $199,938 will be appropriated from the Transit Capital Reserves. After this appropriation, there will be approximately $50,000 remaining in the Transit Capital Reserves.

City staff recommends City Council (1) authorize the City Manager to enter into an Interlocal Agreement with the North Carolina Department of Transportation in the amount of $199,938 as State match to purchase four buses, two diesel-electric hybrid and two diesel buses to replace four 1996 diesel buses; and (2) adopt the budget amendment, in the amount of $1,999,376, 10% of which will come from the Transit Capital reserve funds, to purchase these buses

**RESOLUTION BOOK NO. 33 – PAGE 372**
**ORDINANCE BOOK NO. 26 – PAGE 460**

**E. RESOLUTION NO. 11-57 - RESOLUTION ADOPTING THE 2007 LOCAL WATER SUPPLY PLAN**

Summary: The consideration of a resolution adopting the 2007 Local Water Supply Plan.

Every year, the Water Resources Department is required to complete a Local Water Supply Plan (LWSP) update. On February 22, 2011, the N.C. Dept. of Environment and Natural Resources (NCDENR) issued a letter stating that the department's 2007 LWSP is complete and must be adopted by the water system's governing board. The LWSP contains a variety of information about the City of Asheville's water system, including:

- The distribution system (i.e. types/sizes of water lines);
- Water conservation programs;

- Water use (i.e. number of metered connections and average use by customer type);
- Water sales to wholesale customers;
- Monthly withdrawals from reservoirs;
- Surface water sources (i.e. locations and average monthly withdrawals);
- Wastewater discharge by the Metropolitan Sewerage District (MSD);
- Present and projected population;
- Present and future water supplies; and
- Other relevant information as NCDENR may require.

In order for the 2007 LWSP to be compliant with N.C.G.S. 143-335(l), City Council must formally adopt the plan. Once NCDENR reviews and approves the 2008, 2009, and 2010 plans, they will also have to be adopted by City Council.

This project is part of City Council's strategic plans to remain compliant with State regulations.

Pro:

- Adoption of the 2007 LWSP will ensure compliance with N.C.G.S. 143-355(l).

Con:

- If the 2007 LWSP is not adopted, then the City will not be compliant with N.C.G.S. 143-355(l) and may be issued a Notice of Violation from NCDENR.

There is no fiscal impact.

City staff recommends City Council adopt the 2007 Local Water Supply Plan.

**RESOLUTION BOOK NO. 33 – PAGE 373**

**F. RESOLUTION NO. 11-58 - RESOLUTION AMENDING THE MEMBERSHIP OF THE SUSTAINABLE ADVISORY COMMITTEE ON ENERGY & THE ENVIRONMENT TO ADD AN EX-OFFICIO NON-VOTING MEMBER FOR THE ELECTRIC POWER UTILITY SERVING THE CITY OF ASHEVILLE**

Summary: The consideration of a resolution amending the membership of the Sustainable Advisory Committee on Energy & the Environment (SACEE).

At the March 8, 2011, Boards & Commissions Committee meeting, they reviewed a request by SACEE for an additional voting seat on their Committee. After discussion, it was the consensus of the Boards & Commissions Committee to leave membership composition as established on September 26, 2006 as is, and add one ex-officio non-voting member for the electric power utility serving the City of Asheville.

Staff recommends City Council amend the membership of the Sustainable Advisory Committee on Energy & the Environment to add one ex-officio non-voting member for the electric power utility serving the City of Asheville.

**RESOLUTION BOOK NO. 33 – PAGE 379**

**G. ORDINANCE NO. 3953 - BUDGET AMENDMENT FOR A PLAYGROUND AT THE WNC NATURE CENTER**

Summary: The consideration of budget amendment, in the amount of $60,000, for a playground at the WNC Nature Center.

The City of Asheville in the Parks, Recreation & Cultural Arts Department has received a contribution from the Friends of the WNC Nature Center, Inc. to support the design and installation of a playground at the WNC Nature Center.

The action complies with the City Council 2010-2011 Strategic Plan Goal of fiscal responsibility of exploring alternative for enhancing the city's long-term financial commitment to master plan implementation, infrastructure maintenance, capital improvements, and public facilities. The action also complies with the Parks, Recreation, Cultural Arts & Greenways Master Plan in that it increases department funding with alternative funding and ensuring a high level of service in parks and facilities by addressing capital maintenance of existing parks and facilities to meet community standards.

Pros:
- Provides additional funds to support capital improvements at the Nature Center;
- Provides funds to enhance special projects and services to Nature Center visitors.

Con:
- None

A project budget authorizing one-time improvements to design and construct the playground will be established with approval of this budget amendment. The project budget will authorize expenditures up to $60,000. These expenditures will be fully funded with a donation from the Friends of the Nature Center in the amount of $60,000 that has been received; thus, there is no net fiscal impact to the City's operating budget.

City staff recommends City Council to adopt a budget amendment authorizing the City Manager to increase the budget for funds received from the Friends of the Nature Center in the amount of $60,000 to support design and installation of a playground at the WNC Nature Center.

**ORDINANCE BOOK NO. 26 – PAGE 462**

**H. RESOLUTION NO. 11-59 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE, ON BEHALF OF THE CITY OF ASHEVILLE, A FEDERAL AVIATION ADMINISTRATION GRANT AGREEMENT FOR TERMINAL RENOVATION REIMBURSEMENT**

Summary: The consideration of a resolution authorizing the Mayor to approve a Grant Offer from the Federal Aviation Administration (FAA) in the amount of $514,193.

The FAA has offered a grant agreement to the Asheville Regional Airport. This grant, in the amount of $514,139 is for Terminal Renovation reimbursement.

Staff recommends adoption of the resolution authorizing the Mayor to execute the grant agreement for Project No. 3-37-0005-039-2011.

**RESOLUTION BOOK NO. 33 – PAGE 380**

**I. MOTION ADOPTING THE BUDGET PLANNING CALENDAR FOR FISCAL YEAR 2011-12**

**J. RESOLUTION NO. 11-60 - RESOLUTION AUTHORIZING SUPPORT AND TO SERVE AS THE GOVERNMENT PARTNER IN THE ASHEVILLE ART MUSEUM'S GRANT APPLICATION TO THE NATIONAL ENDOWMENT FOR THE ARTS TO FUND THE DESIGN DEVELOPMENT PHASE OF THE ASHEVILLE ART MUSEUM CAPITAL EXPANSION PLAN**

Summary: The City of Asheville has a long history of outstanding collaborations and partnerships with the Asheville Art Museum, and has supported the capital expansion plan since its inception. There is a grant opportunity via the National Endowment for the Arts – Our Town Grant designed to support an art organization in its efforts to support creative place making projects that contribute to the livability of a community. If invited to submit a formal application, the Asheville Art Museum will apply for $250,000 to support the cost associated with the design development phase of the Asheville Art Museum capital expansion plan.

At its meeting on March 14, 2011, the City of Asheville Recreation Advisory Board made its recommendation to Asheville City Council to support and serve as the government partner in the Asheville Art Museum's formal application to the National Endowment for the Art's – Our Town Grant proposal;

**RESOLUTION BOOK NO. 33 – PAGE 381**

**K. RESOLUTION NO. 11-64 – RESOLUTION IN MEMORY OF KATHERINE M. DAVIS**

**RESOLUTION BOOK NO. 33 – PAGE 407**

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Russell moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Bothwell and carried unanimously.

## III. PRESENTATIONS & REPORTS:

### A. EAST END/VALLEY STREET NEIGHBORHOOD VISIONING PROJECT

Ms. Carmen Ramos-Kennedy, representing the East End Neighborhood Association, was pleased to present Council with the "East End/Valley Street Neighborhood Visioning Project." The overview of the project is that in the spring of 2010, the City jointed with the re-vitalized East End/Valley Street Neighborhood Association to plan and conduct a neighborhood visioning process. Members of the neighborhood came together earlier in the year to recreate a sense of community and to ensure that they have a voice in any future development of the area.

The overall goal of the Visioning process was to involve a diverse group of members of the East End/Valley Street neighborhood in the process of developing a shared vision for the future of their neighborhood. More specific goals for the process were (1) fostering relationships between neighborhood members through facilitated discussions; and (2) developing a clearer and more focused plan of work for the Neighborhood Association.

The effort was a collaborative process that involved Bill and Marianna Bailey, two local community members with extensive background in facilitating neighborhood and community development, as facilitators, City staff as process facilitators and members of the Neighborhood Association's newly formed Steering Committee. The Project took place over four Thursdays evenings in May and June. Approximately 35 members were involved in the process.

The Neighborhood Visioning Project resulted in the identification of 4 goal areas (1) strengthen the Association and inspire community participation; (2) record the stories and history of the East End/Valley Street Neighborhood; (3) promote activities for East End/Valley Street neighborhood; and (4) develop an East End Land Use Plan.

Since completion of the East End/Valley Street Visioning Project, the East End/Valley Street Neighborhood Association has moved forward with appointing four teams to guide the implementation of the neighborhood vision and future activities of the Neighborhood Association. The four teams are East End Neighborhood, Historic Preservation, Martin Luther King Park and Land Use. They have also elected new officers and begun work on implementing their identified goals.

On behalf of City Council, Mayor Bellamy thanked Ms. Ramos-Kennedy and the East End/Valley Street Neighborhood Association on this worthwhile project.

In response to Councilman Bothwell, Mayor Bellamy said that conversations are in process about renaming South Charlotte Street back to Valley Street.

Councilman Russell moved to accept the report and requested staff to advise Council on plan implementation. This motion was seconded by Councilman Davis and carried unanimously.

**IV. PUBLIC HEARINGS:**

**A. CONTINUATION OF A PUBLIC HEARING TO CONSIDER A CONDITIONAL ZONING REQUEST FOR INGLES MARKETS INC. LOCATED AT 153 SMOKY PARK HIGHWAY FROM HIGHWAY BUSINESS DISTRICT TO HIGHWAY BUSINESS DISTRICT/CONDITIONAL ZONING FOR THE DEVELOPMENT OF A NEW 105,175 SQUARE FOOT GROCERY STORE WITH ASSOCIATED CAR WASH, GAS STATION AND 32,060 SQUARE FEET OF ADDITIONAL RETAIL SPACE AND A SIGNAGE PLAN**

**ORDINANCE NO. 3954 - ORDINANCE TO CONDITIONALLY ZONE INGLES MARKETS INC. LOCATED AT 153 SMOKY PARK HIGHWAY FROM HIGHWAY BUSINESS DISTRICT TO HIGHWAY BUSINESS DISTRICT/CONDITIONAL ZONING FOR THE DEVELOPMENT OF A NEW 105,175 SQUARE FOOT GROCERY STORE WITH ASSOCIATED CAR WASH, GAS STATION AND 32,060 SQUARE FEET OF ADDITIONAL RETAIL SPACE**

**ORDINANCE NO. 3955- ORDINANCE ADOPTING A SIGNAGE PLAN FOR INGLES MARKETS INC. LOCATED AT 153 SMOKY PARK HIGHWAY**

Mayor Bellamy said the public hearings (which were combined into one hearing) were held on February 22, 2011, and continued to this date to see if the applicant would agree to the conditions incorporated into the motion. The continuance would also allow staff to meet with Ingles representatives and hopefully come to some agreement.

Urban Planner Nate Pennington said that on February 22, 2011, City Council held a public hearing on a conditional zoning request from Ingles Markets, Inc. to consider a site plan for the redevelopment of the Ingles property located at 153 Smoky Park Highway. A large number of modifications to the UDO (Unified Development Ordinance) (many related to parking lot landscaping) were being sought by the applicant. While the public hearing was held on February 22nd, the item was ultimately continued to in order to give time for the Ingles representatives to work with City staff in reducing the number of modification requests to bring the site plan in further compliance with the UDO. Since the time of the February 22nd meeting, Ingles has submitted a revised site plan for Council consideration. All items related to parking lot landscaping have now been satisfied. The following list provides an outline of the current status of the original modification requests related to the revised site plan. The only remaining request (not supported by staff) is related to vehicular canopy lighting, and no changes have been made to that request by Ingles representatives.

1. *Retaining Walls* – Section 7-10-5 of the UDO requires that foreground landscaping or attached vegetative screening be required for any retaining wall sections over 20 feet in height regardless of location relative to a public or private street. **No changes to this modification request are being proposed and staff supports this request.**

2. *Off-Street Parking* – Section 7-11-2(c)(1) of the UDO requires a minimum number of off-street parking spaces based on land use. The Ingles shopping center development requires a total of 846 spaces. 718 spaces are provided resulting in a deficiency of 128 spaces or approximately 15% of the required total. **The deficiency in parking spaces has increased by 14 spaces from the original site plan due to the addition of the interior pedestrian island. Staff supports this modification request.**

3. *Parking Lot Landscaping* – Section 7-11-2(d)(4)c. of the UDO requires that when more than four trees are required in a parking lot with interior rows, 50% of the trees and shrubs must be planted in islands or medians located within the parking lot. The required amount of trees to be planted in islands and medians throughout this shopping center is 115 trees. **This modification request is no longer necessary as the required number of trees have been adequately distributed throughout the parking lot.**

4. *Parking Lot Landscaping* – Section 7-11-3(d)(4)d. of the UDO requires that when more than four bays of parking are proposed, an interior island with an average width of 20 feet and a length equivalent to the length of the parking bay is required. **This modification request is no longer necessary and the requirement for the installation of an interior island has been met.**

5. *Parking Lot Landscaping* – Section 7-11-3(d)(4)h. of the UDO requires that each parking space be located within 60 feet of a tree as measured from the trunk of the tree to the closest point of the parking space. **This modification request is no longer necessary. All proposed parking spaces are within 60 feet of a tree.**

6. *Open Space* – Section 7-11-4(c) of the UDO requires that 15% of lot area be reserved for open space for developments that primarily include suburban open space amenities. **The applicant has elected to pay a fee in lieu of the deficient amount of required open space and therefore this modification request is no longer necessary.**

7. *Outdoor Lighting for Vehicular Canopies* – Section 7-11-10(k)(1) of the UDO requires that areas under a vehicular canopy have an average illuminance of 20 maintained footcandles. The applicant is requesting an average of 80 maintained footcandles or 400% increase although the submitted photometric site plan indicates an average of 57.9 maintained footcandles which equates to a 289.5% increase. **This modification request is still requested as originally submitted, and staff's non-support for this item remains unchanged.**

   **Staff has conducted an informal lighting survey of other stations and canopies. The majority of the sites surveyed, outside of the existing Ingle's sites, were found to comply with the 20 Footcandle average.**

8. *Big Box Required Standard #1* – Appendix 7-F of the UDO requires that if less than 25% of the parking is located to the side or rear of the building, then the parking area is to be buffered from the street with a 50-foot landscaped buffer that incorporates 150% of the plantings called for in a Class "B" buffer and includes a berm or wall with a minimum height of 42 inches. The applicant is requesting the elimination of this requirement due to the existing development on the site. **No changes to this modification request are being proposed and staff supports this request.**

9. *Big Box Required Standard #1* – Appendix 7-F of the UDO requires that outparcels shall meet the design standards set forth in this section and shall not incorporate drive through facilities. The applicant is seeking to have this requirement eliminated. **No changes to this modification request are being proposed and staff supports this request.**

Mayor Bellamy noted that at this continued public hearing, Council would take further comment on new information only related to the parking lot landscaping requirements and the outdoor lighting issue. However, since the parking lot landscaping requirements have been satisfied by the applicant, public comment would only be taken on the remaining issue of the outdoor lighting variance request.

City Attorney reminded Council that since this is a conditional zoning, any conditions must be agreed to by the applicant and the Council.

Mayor Bellamy opened the public hearing at 5:32 p.m. for both the conditional zoning issue and the signage plan issue.

Mr. Preston Kendall, Project Manager for Ingles Markets, said their prototype gas canopies are 100 footcandles, but have looked at what they felt they could do as far as customer safety is concerned and reduced their request to 60 footcandles. He showed pictures of Ingles canopies, noting they don't have light trespass or glare. He said that he went to over 40 convenient stores/gas stations and couldn't find a one in the City that met the lighting ordinance standard. The biggest reason they request the 60 footcandles is for safety. At night their gas stations are still open for credit and debit cards and their customers come first to them. Ingles canopies had special features that keep light from glaring out the sides, noting that Ingles stores have many energy-saving measures. He urged Council to consider their variance request of 60 footcandles for customer safety.

Mr. Gene Ellison, attorney representing Ingles Markets, felt that because the fuel center is located 115 feet from Smoky Park Highway, the light will not be illuminated onto Smoky Park Highway. He felt this is truly a safety issue. He hoped City Council would consider their variance request to 60 footcandles.

The following individuals urged City Council to uphold the City's lighting ordinance of 20 footcandles (which standard comes from an Illuminating Engineering Society of North Carolina recommendation), for various reasons, mostly regarding the negatively impacting the night sky by light pollution and night blindness:

Mr. Brian Dennison, local astronomer
Mr. Alan Ditmore, Leicester resident
Mr. Bernard Arghiere, East Asheville resident
Mr. Bill Roskind
Mr. Steve Rasmussen (also opposed to variances regarding signage plan)
Mr. Fred English, Haw Creek resident
East Asheville resident
Ms. Laura Piraino, Asheville resident
Mr. Mike Lewis

Mr. Ben Pace, member of the Enka Candler Business Association, supported Ingles variance request for 60 footcandles as more light increases safety.

Mayor Bellamy closed the combined public hearing at 6:08 p.m.

Councilman Bothwell felt there is no hardship shown on any of the variances requested and could not support any variance request.

In response to Vice-Mayor Newman, Assistant Director of Planning & Development Shannon Tuch, explained how the City came up with the standard that areas under a vehicular canopy have an average illuminance of 20 maintained footcandles. She noted that the common standard across the country is between 20-24 footcandles and the 20 footcandle standard is from national organization (Illuminating Engineering Society of North Carolina).

In response to Vice-Mayor Newman, City Attorney Oast said that a consensus on the ordinance does not have to be reached at this meeting. However, he felt that the ordinance could not be final or implemented until agreement is reached and there is some agreement reflected on the record. He felt that Council can adopt an ordinance with conditions, subject to Ingles either agreeing or not agreeing at some later meeting.

Vice-Mayor Newman moved to adopt an ordinance for the conditional zoning of the project identified as Ingles Markets, Inc., located at 153 Smoky Park Highway from Highway Business District to Highway Business District/Conditional Zoning to allow for the development of a new 105,175 square foot grocery store with associated car wash, gas station and 32,060 square feet of additional retail space, and approval of the modification requests only supported by City staff (not the outdoor lighting for vehicular canopies modification), subject to (A) Ingles agreeing to meet the City's standards regarding the outdoor lighting for vehicular canopies; and (B) to following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with full cut-off fixtures (including wall packs) and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (5) This project will undergo final review by the TRC prior to issuance of any required permits; (6) A lot recombination of both subject parcels must be completed before zoning permit issuance; (7) Existing trail connecting the Old Starnes Cove Road neighborhood to the Ingles store will be required to clearly delineate surface with a pervious material such as mulch or gravel; (8) Façade enhancements to the existing shops within the center are required to be completed within 5 years of the Conditional Use Permit approval and shall be architecturally compatible in color and shall incorporate design elements in common with the Ingles structure; (9) Future development of outparcels shall adhere to the design standards outlined in the Façade Renovation addendum provided by the applicant to ensure compatibility with the overall design of the structures within the development; and (10) that the City's standards be met regarding the outdoor lighting for vehicular canopies outlined above by City staff. This motion was seconded by Councilman Smith.

Ms. Tuch responded to various questions/comments from Council, some being, but are not limited to: is there a measurement difference in light trespass between LED footcandles vs. other footcandles; request to go through the lighting survey conducted by City staff; what is the lighting standard for parking lots; and would it be easy to retrofit a vehicular canopy should the standards be higher.

Vice-Mayor Newman, as all of Council, felt that this is a good project and hopes it moves forward; however, he felt it was important for Council to stand by its standards. The developer has presented no evidence to show how this is a unique project that warrants variance from this standard. He would be open, though, to have a larger conversation if it's felt we need a different city-wide standard.

Mayor Bellamy also was open to reviewing the city-wide standard regarding the outdoor lighting for vehicular canopies. She felt some may not understand that Council is only discussing the light under the canopy, not the entire parking lot. She also felt we that the Smoky Park Highway corridor might benefit from more light.

Councilman Smith did not want to set any precedent for one company in town. He felt the 20 footcandle provides adequate safety lighting. He, too, would be open to revisiting the standard regarding the outdoor lighting for vehicular canopies.

Councilwoman Manheimer felt Council may, in the future, wish to revisit the conditional zoning process with regard to limiting Council's ability to completely waive the entire variance vs. only a percentage of the variance.

The motion made by Vice-Mayor Newman and seconded by Councilman Smith carried on a 5-2 vote, with Mayor Bellamy and Councilman Davis voting "no."

**ORDINANCE BOOK NO. 26 – PAGE 464**

Vice-Mayor Newman moved for the adoption of Ordinance No. 3955, with the following conditions: (1) All signs shall meet the HB zoning district setbacks, the site distance triangle requirements and all applicable building code requirements; (2) Window films shall be limited to image displays only; films that incorporate any form of commercial advertisement or trademark must be counted towards the development's signage requirements which are not included in this application; (3) Any changes to the signage included in this plan may require a new review by City Council; and (4) All signs shall comply with the proposed standards and no exceptions or variances are permitted. This motion was seconded by Councilman Russell.

Vice-Mayor Newman felt that the sign ordinance is an arena where a certain degree flexibility is very beneficial to the public. In particular for larger developments we have seen a number of different sign plans developed that are individually tailored for that project that are clearly superior the outcome we would get if we simply stayed with our generic ordinance.

Councilman Bothwell understood about improving the design, but he felt the intent is to curb signs and gradually make our community more attractive. He would like liked Ingles to design their signs that would fit within our sign ordinance.

Mayor Bellamy felt that we need to tailor our community to how we want to grow, recognizing we can make modifications. We have better products due to the conditional zoning tool.

Councilman Smith felt variances should be site specific with evidence of hardship.

The motion made by Vice-Mayor Newman and seconded by Councilman Russell carried on a 5-2 vote with Councilman Bothwell and Councilman Smith voting "no."

City Attorney Oast said that he didn't think we ever had a situation where there was a failure to reach mutual agreement on one condition in a conditional zoning, and the ordinance adopted was subject to that agreement. The way he proposed to implement this is that he will prepare the ordinance in draft form, but unless and until an agreement is entered on the record in the minutes, by letter or personal appearance by Ingles representatives, the ordinance will not be finalized and recorded.

Mr. Ellison said that he has been given authority to agree to all conditions imposed by City Council, including the standard for outdoor lighting for vehicular canopies. He looked forward to proceeding on this project and appreciated the opportunity to be heard.

Councilman Russell thanked Ingles on working with City staff to satisfy the initial variances.

**ORDINANCE BOOK NO. 26 – PAGE** 469

**B. PUBLIC HEARING TO CONSIDER CLOSING COOPER BOULEVARD**

**RESOLUTION NO. 11-61 - RESOLUTION PERMANENTLY CLOSING COOPER BOULEVARD**

Assistant Public Works Director David Foster said that this is the consideration of a resolution to permanently close Cooper Boulevard. This public hearing was advertised on January 28, February 4, February 11 and February 18, 2011.

Mayor Bellamy opened the public hearing at 6:54 p.m.

N. C. Gen. Stat. sec 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, adjacent property owner Ingles Market Inc., represented by Preston Kendall, Real Estate Property Manager, has requested the City of Asheville to permanently close Cooper Boulevard.

The Greenway Commission considered the application for the permanent closure of Cooper Boulevard on January 13, 2011. Attention was focused on the existing dirt walking trail in the rear of the property connecting Old Starnes Cove Road to the rear of the existing Ingles store. The Commission, after some discussion, made the following motion unanimously approving the request for the permanent closure of Cooper Boulevard: "City staff shall research the feasibility of a permanent, multi-use, maintained trail connecting the neighborhood to the new Ingles Market development, and for the Planning & Zoning Commission and City Council to consider that research in their approval of the street closure and zoning modifications." After staff research with our Building Safety Department, it was determined that since the trail with a paved path on the back of the property, they recommended leaving it informal.

There is an existing waterline that accesses up Cooper Boulevard and the Water Department's recommendation was to retain a 20-foot wide permanent easement for maintenance and operation of water lines. However, staff understands that Ingles plans to remove the waterline. If they are not able to remove or relocate the line, then we will retain the easement.

This closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties

Con:

- None

City staff recommends City Council adopt the resolution to permanently close Cooper Boulevard.

Mr. Preston Kendall, representing Ingles Markets, stated that in order to proceed with their project they have to close the road. He said they own both sides and the end of Cooper Road.

Mayor Bellamy closed the public hearing at 6:55 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Manheimer moved for the adoption of Resolution No. 11-61. This motion was seconded by Councilman Bothwell and carried unanimously.

**RESOLUTION BOOK NO. 33 – PAGE 382**

**C. PUBLIC HEARING TO CONSIDER AMENDMENT TO CHAPTER 7 OF THE UNIFIED DEVELOPMENT ORDINANCE TO MODIFY PARKING REQUIREMENTS FOR PROJECTS IN A DESIGNATED AREA FOCUSED ON THE RIVER ARTS DISTRICT BUT EXTENDING BEYOND THE INCLUDE NEARBY PROPERTIES**

**ORDINANCE NO. 3956 – ORDINANCE AMENDING CHAPTER 7 OF THE UNIFIED DEVELOPMENT ORDINANCE TO MODIFY PARKING REQUIREMENTS FOR PROJECTS IN A DESIGNATED AREA FOCUSED ON THE RIVER ARTS DISTRICT BUT EXTENDING BEYOND THE INCLUDE NEARBY PROPERTIES**

Mayor Bellamy opened the public hearing at 6:58 p.m.

Planning & Development Director Judy Daniel said that this is the consideration of an ordinance amending the Unified Development Ordinance (UDO) to modify parking requirements for projects in a designated area focused on the River Arts District but extending beyond to include nearby properties. This public hearing was advertised on March 11 and 18, 2011.

Since the adoption of the Wilma Dykeman Riverway Master Plan (WDRMP) by City Council in 2004, there has been substantial redevelopment and business expansion in the area focused around the River Arts District. Much of this business investment has centered on developing artist studios and galleries, eating and drinking establishments, office uses, and residential uses. The growth of these types of businesses has led to increasing problems with parking, an on-going challenge to individual developers as they struggle to provide sufficient parking on their own parcels for their proposed developments. The challenge is particularly difficult for the smaller lots supporting independent, entrepreneurial businesses.

While developers have struggled to locate sufficient off-street parking there is also a recognition that there appears to be sufficient parking overall throughout the district, although much of it informal and unpermitted. This parking appears to more than accommodate the need for parking in the area for the time being. The staff therefore believes that reducing the off-street parking requirements is a potential solution for one of the primary challenges to adaptively reusing buildings in the area for new businesses. We believe that the change will help stimulate additional redevelopment and investment in this area, an important goal indentified in the WDRMP and the 2025 Master Plan that has become an even higher priority during the economic downturn of the past few years.

This wording amendment proposes a reduction to off-street parking requirements as a means to reduce redevelopment challenges and facilitate the implementation of the City Council adopted Wilma Dykeman Riverway Master Plan and elements of the 2025 Master Plan. The specific proposal is to reduce the requirements for off-street parking on a sliding scale basis depending on the scale of the development in an area defined by a map. The proposed area to be included in that map was reviewed by members of the Asheville Area Riverfront Redevelopment Commission (AARRC) and the River District Design Review Committee (RDDRC) at a joint meeting on February 21, 2011. For the purposes of this report, the area designated on the map is referred to as "River Parking Reduction Area".

*Precedent for reductions in parking:* There are a number of examples where parking requirements have been relaxed in the UDO and these have typically been considered based on the specific zoning districts. For example, properties in the Urban Place District and the Neighborhood Corridor District are allowed a 50% reduction in off-street parking requirements. These districts anticipate a mixed-use development pattern with multi-modal transportation options (wider sidewalks, on-street parking, etc) provided through the district. Other zoning districts, such as the River District, support a wider variety of development patterns but also offer a 20% reduction in off-street parking requirements. The area surrounding the riverfront redevelopment area, while not unified by a common underlying zoning, includes the same goals for a mixed-use district meeting this intent as described and illustrated in the WDRMP. The proposed reduction is not a dramatic increase over reductions already available to most of the properties in those areas.

Another example of a parking reduction is included in the UDO for residential development within one half mile of the downtown Central Business District where developments are not required to provide off-street parking for their developments. In addition, the Central Business District (CBD) has an off-street parking waiver for the entire district. The CBD is a district that identifies as a goal a development pattern that supports multi-modal transportation and pedestrian access. The City of Asheville has been proactive in developing a full range of parking solutions including structured parking, surface parking and on-street to serve patrons of downtown. In some cases the on-street parking is provided by meter and in other areas is reserved by monthly permit. Balancing out this public investment in parking infrastructure are the individual private investors who provide on-site parking when possible, based on market demand. One of the direct benefits of this parking exemption in downtown has been the redevelopment and reuse of smaller properties.

*Long-term considerations:* The long range vision for the River district areas is consistent with other multi-modal and urban development areas of the City and it is expected that the River district areas would similarly benefit from a reduction in off-street parking requirements. The need for an ordinance like this represents a positive change in the riverfront area because it is born out of business successes in the district. The district has grown in the number of studios and now many studios and other businesses are open year-round, not just during the twice yearly studio strolls. Parking will be an on-going concern in the district and certain strategies will have to be identified and implemented to provide long-term solutions. As this evolves there may also need to be City involvement in finding or managing parking areas for use by the district. The downtown area is an example of the success that City support for parking can bring to a district. Parking options are an on-going consideration in downtown that now includes surface parking, parking garages and on-street parking options.

The Planning and Zoning Commission voted 6-0 to recommend approval at their March 2nd meeting. The River District Design Review Committee and the Asheville Area Riverfront Redevelopment Commission also reviewed the proposed amendment and recommend approval of the changes. Members of the RDDRC working jointly with members of the AARRC provided direction on the scope of the amendment and developed the map titled 'River Parking Reduction Area '. City staff also supports the amendment. Both the RRDRC and the AARRC also recommend that staff continue to monitor the situation, with the assistance and input of the AARRC and the RDDRC for a period of 2-5 years, and return with a report to the Council and additional recommendations as needed.

Pros:

- Provides a reasonable reduction in individual parking requirements
- Encourages the continued redevelopment and expansion among existing properties in the district
- Recognizes the importance of informal parking arrangements, shared parking and on-street parking
- Encourages parking and walking to destinations in the district

- Assigns reductions on a sliding scale to support smaller buildings, properties, and projects

Cons:

- On-street parking is sometimes concentrated on streets that have reached or exceeded their capacity
- Access to informal parking is not guaranteed
- This proposed amendment has limitations to solving the parking challenge in the district long-term
- The amendment points to the need for the City of Asheville to participate in providing a parking solution

There is no direct fiscal impact to the city from this short-term strategy. Other long range or more permanent strategies may require financial resources and will be carefully considered at a later time.

City staff recommends City Council adopt the wording amendment.

Mr. Alan Ditmore felt the ordinance amendment does not go far enough to relax parking requirements.

Mayor Bellamy closed the public hearing at 7:05 p.m.

Councilman Davis said that there are a lot of things happening in that area and a reduction in the parking requirements will facilitate those activities. He noted that the City owns a fair amount of land in the River District and there may be some opportunity to create some surface parking.

Vice-Mayor Newman felt the riverfront area is not as built out as downtown (where there is no requirement for parking), but it has a lot of the same qualities. He felt this is a positive step, but encouraged staff to go further in this direction and to look for creative ways to provide community parking to serve the whole area. He felt that in pedestrian oriented areas to place a minimum requirement to set aside a certain number of parking spaces on each individual property is an inefficient use of land.

Councilman Smith agreed with Vice-Mayor Newman and noted the River District Design Review Committee unanimously approved this as well.

Councilman Bothwell agreed that we should look at other opportunities to reduce parking requirements, but it seems to him that in places where parking is appropriately priced, private entities would build a parking facility.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Davis moved for the adoption of Ordinance No. 3956. This motion was seconded by Councilman Russell and carried unanimously.

**ORDINANCE BOOK NO. 26 – PAGE 475**

**Closed Session**

At 7:10 p.m., Councilman Smith moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including

litigation involving the following: State of North Carolina vs. Lisa Roth. The statutory authorization is N.C. Gen. Stat. sec. 143-318.11(a)(3); and (2) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Russell and carried unanimously.

Councilman Russell moved to excuse Mayor Bellamy from the remainder of the meeting. This motion was seconded by Councilman Davis and carried unanimously.

At 7:34 p.m., Councilman Russell moved to come out of closed session. This motion was seconded by Councilman Davis and carried unanimously.

**V. UNFINISHED BUSINESS:**

**A. RESOLUTION NO. 11-62 - RESOLUTION AUTHORIZING A PURCHASING AND CONTRACTING POLICY FOR THE CITY OF ASHEVILLE THAT AUTHORIZES THE CITY MANAGER TO EXECUTE CONTRACTS AND AWARD BIDS**

Director of Administrative Services Lauren Bradley said that this is the consideration of a resolution adopting a revised purchasing and contracting policy for the City of Asheville.

During the last several months, in response to economic conditions and a continued need to identify operational efficiencies, staff has worked to identify changes to the City of Asheville's purchasing and contracting policies and procedures. The goals of these changes include:

- Improving the clarity, efficiency, and effectiveness of purchasing and contracting procedures (adding value to the process while reducing costs);
- Making it easier for businesses – especially small businesses – to work with the City of Asheville, and;
- Evaluating affordable opportunities to extend the Living Wage provision to city contracts without impacting the opportunity for small businesses or minority-owned businesses to work with the City.

While most of the changes are administrative in nature, two changes require City Council approval, which include:

(1) Adjusting the contracting authority threshold for department directors and the city manager to better align with other thresholds defined by NC General Statute, and;
(2) Incorporating a Living Wage provision to the terms and conditions of General Service contracts with a value of more than $30,000 but less than $90,000.

**(1) Contract Authority**

North Carolina public contracting statutes establish dollar thresholds associated with informal and formal bid requirements. Informal bids are permitted for construction and repair contracts as well as the purchase of apparatus, supplies, materials and equipment from $30,000 up to the formal limit. Formal bids are required for the purchase of apparatus, supplies, materials and equipment at $90,000 and above. Based on these thresholds, the City of Asheville has established contracting and purchasing requirements and procedures for all city employees.

North Carolina law provides that a city's governing board has the authority to contract on behalf of the municipality. The governing board may delegate its authority to others within the

organization, such as the city manager. The City of Asheville has maintained a City policy that explicitly delegates the authority to contract on behalf of the City to the city manager and department directors based on dollar thresholds. The current thresholds for contracting authority are:

- Department Director – Below $25,000
- City Manager – Below $100,000 for construction/repair; below $50,000 all others
- City Council – $100,000 and above for construction/repair; above $50,000 all others

Because the City's dollar thresholds for contracting authority do not currently align with the dollar thresholds established by North Carolina public contracting statutes, Asheville maintains an additional set of forms, processes, and procedures to accommodate the various levels of approval authority and statutory requirements, which complicates the processing of transactions. As a result, staff is recommending that the City of Asheville's thresholds for contacting authority be adjusted to better align with statutory thresholds. The recommended thresholds for contracting authority are:

- Department Director – Below $30,000
- City Manager – Below $100,000 for construction/repair; below $90,000 all others
- City Council – $100,000 and above for construction/repair; above $90,000 all others

By making this adjustment, the City will gain efficiencies in training staff and processing transactions. Likewise, staff expects this adjustment to decrease the time it takes to process transactions by approximately 25-50%.

**(2) Living Wage Provision**

In 2007, Asheville City Council approved a living wage for city employees of $10.86 per hour without health insurance and $9.50 per hour with health insurance for all full-time and part-time employees. Since 2007, the Asheville/Buncombe Living Wage as provided by Just Economic has increased to $11.35/hour for full or part-time employees without employer provided health insurance and $9.85/hour for full and part-time workers with employer provided health insurance. The City of Asheville currently meets this living wage for full-time employees, and staff anticipates recommending Council adopt the revised living wage for full-time City employees for FY 2011-12.

In 2007, Just Economics also asked City Council to consider incorporating a living wage provision into its contracting requirements with vendors. Staff has researched the options for extending the living wage to vendors who do business with the City of Asheville. Based on that work, staff would recommend a phased approach for implementing a living wage requirement on city contracts for General Services. General Services is the only area of contacting not governed by the general statutes of North Carolina and therefore lends itself to additional provisions by the governing body. It is the area of contracting where other North Carolina cities and counties have implemented the living wage.

A phased approach would allow for review of the effects of the living wage provisions on contracting before the next increase in the amount is raised during the budget cycle period. The phases of this approach are summarized in the table below:

| Tiers | Fiscal Year | Initial Living Wage | Contracting Threshold | City Council Review of Impact & Approval of Next Increase |
|---|---|---|---|---|
| | | | | |

| | | | | |
|---|---|---|---|---|
| **1** | **FY11** | **11.35 without benefits<br>9.85 with benefits** | **$30,000-$90,000** | **April 2011** |
| **2** | **FY12** | **11.35 without benefits<br>9.85 with benefits** | **$30,000-$90,000** | **April 2012** |
| **3** | **FY13** | **11.35 without benefits<br>9.85 with benefits** | **Consider increase above $90,000** | **April 2013** |

As part of the City's revised Purchasing and Contracting Policy, staff would recommend incorporating a living wage provision for General Service contracts within the $30,000-$90,000 threshold. The requirement would be included as part of the standard terms and conditions for these contracts. If a complaint is filed and substantiated against a vendor for non-compliance, the contract would be terminated.

Staff would regularly monitor and provide quarterly updates on the impacts of the living wage provision to the Finance Committee.

The revised policy was considered by the City Council Finance Committee at its meeting on March 15, 2011. The committee was unanimous in its support for adjusting the contract authority thresholds recommended by staff. The committee voted 2-1 in support of the living wage provision.

Pros:

- Changes will significantly improve the efficiency of the City's contracting and purchasing processes, saving City and vendor resources.
- The policy makes it considerably easier to work with local businesses on Small Procurement and General Services transactions.
- Introduces checks-and-balances for transactions by formalizing an audit procedure.

Cons:

- Administration of the living wage provision can be complicated for a vendor that otherwise does not pay a living wage but is required to for City contracts.
- There may be a cost associated with the living wage provision for the City, although research has shown that it is typically minimal. The City will be responsible for paying the living wage associated with a contract, not the vendor.

Staff anticipates that the changes to the purchasing and contracting policy will result in significant efficiencies in staff time and resources. The changes will also improve the ease and efficiency of the process for vendors, cutting down the time to process transactions by approximately 25-50%.

While the living wage provision in the General Services category may have a fiscal impact for the City, research has shown that cost implications are typically minimal and less than 1%. The phase-in approach recommended by staff is intended to provide the opportunity to continually monitor and evaluate any cost impact associated with the change.

Staff recommends proceeding with the changes to policy described above.

At Councilman Russell's request, it was the consensus of Council that the changes be broken down into two parts – one for adjusting the contracting authority thresholds and one for incorporating a living wage provision.

The following individuals spoke in support of incorporating the Living Wage provision as outlined by City staff:

Ms. Vicki Meath, Director of Just Economics
Mr. Craig White, on behalf of the Center for Participatory Change
Ms. Bella Jackson, volunteer with Just Economics
Mr. Mark Hubbard, part-time employee at Just Economics
Mr. Greg Borum, Children's First Communities & Schools of Buncombe County
Mr. James Sheeler, Asheville resident
Ms. Jameson, member of Just Economic

Mr. Alan Ditmore felt Americorps would have a hard time with their mission, which is to try to employ everyone, if they had to pay more per person.

Ms. Leslie Kulba said that the money to pay the living wage will have to come from somewhere – the taxpayers.

In response to Councilman Russell, Ms. Bradley explained that if the contractor is going to put out a bid for work, the contractor would build into the cost what it would cost to pay the living wage for their employees who are working under our contract. It would be a part of the cost to provide the service.

When Councilman Russell asked about the number of city contracts in this range, Ms. Bradley said that staff has been trying to identify contracts in this range that might be affected by this provision. There are many contacts that fall within this threshold in terms of general services, but trying to figure out who might not be paying a living wage currently that has a contract with the City and what might the financial be is ongoing. We do not collect that data from employers now. We do, however, feel that there are a couple that may be affected, i.e., security contract, mowing contract. Those types of services might be affected by a living wage provision.

In response to Councilman Russell, Ms. Bradley said that if the City receives a complaint by an employee of a vendor who would fall under this provision (as any other terms and conditions of a contract) and the City substantiates that complaint, it will be grounds for termination of the agreement.

Councilman Russell supports paying a living wage and was pleased the City does that for their employees. In addition, he does appreciate Just Economics' work. However, from the economic standpoint of a supply-and-demand labor pool and free economics, he could not support the motion.

In response to Councilman Bothwell, Ms. Bradley said this applies to future contracts only and is not retroactive.

Councilwoman Manheimer said that if a living wage is a requirement of the bid, it's a level playing field for all vendors.

Councilman Bothwell said that on the local level when we use taxpayer money to bid down the cost of labor in the City we are doing a disservice to all of the workers in the City.

In response to Vice-Mayor Newman, Ms. Bradley said staff recommends implementing this living wage provision for one year and Council receive a quarterly report. This would be reviewed annually with the budget process.

At the request of Vice-Mayor Newman, Councilman Bothwell and Councilwoman Manheimer accepted the friendly amendment that this living wage provision be reviewed annually and receive quarterly reports.

At the request of Vice-Mayor Newman, Councilman Bothwell and Councilwoman Manheimer accepted another friendly amendment that staff include an analysis of including an index for annual inflation in our living wage number.

Councilman Russell moved to adopt the change adjusting the contracting authority threshold for department directors and the city manager to better align with other thresholds defined by NC General Statute. This motion was seconded by Councilman Bothwell and carried unanimously (Mayor Bellamy being excused).

Councilman Bothwell moved to adopt the change incorporating Living Wage provision to the terms and conditions of General Service contracts with a value of more than $30,000 but less than $90,000, and that the living wage provision be reviewed annually, Council receive quarterly reports, and staff include an analysis of including an index for annual inflation in our living wage number. This motion was seconded by Councilwoman Manheimer carried on a 4-2 vote, with Councilman Davis and Councilman Russell voting "no" (Mayor Bellamy excused).

**RESOLUTION BOOK NO. 33 – PAGE 384**

**B. INTERIM REPORT ON THE MILLS RIVER WATERSHED PROTECTION PROPOSAL**

City Manager Jackson said that there has been a series of meetings involving Asheville and Hendersonville city staff to review the 2002 Mills River Watershed Management Plan, which includes in-depth recommendations and a scope of work to be conducted in terms of protecting this valuable watershed. Staff has concluded at this point that there is a role for the City and have begun looking at best practices and trying to define what that role would be. But there are recommendations that have to do with land conservation, acquisition of land, agriculture extension services, stormwater regulations, etc. Trying to find that appropriate role, when there is an expectation of investment from the water rate-payers, is what we have been striving for and we are trying to partner with Hendersonville and their staff to come up with a recommendation. Mayor Bellamy is also in the process of convening a meeting of Hendersonville, Mills River and Asheville Mayors, managers and utility directors.

We have also received an update that on March 2, the ad hoc committee met and several committees were created. They have postponed taking final action on forming the 501 (c) (3).

He will keep Council updated.

**C. RESOLUTION NO. 11-63 - RESOLUTION OPPOSING CUTS TO THE UNIVERSITY OF NORTH CAROLINA SYSTEM OR THE NORTH CAROLINA COMMUNITY COLLEGE SYSTEM BY THE NC GENERAL ASSEMBLY**

City Attorney Oast said that Council adopted its legislative agenda on January 25, 2011. The North Carolina General Assembly convened for the 2011 regular session on January 26, 2011. By letter dated February 21, 2011, the City transmitted its legislative agenda and supporting materials to the local delegation.

The deadlines for submitting local bills to bill drafting have passed. The deadline for introduction of local bills has passed in the Senate. The deadline for introduction of local bills in the House is March 30, 2011. The deadline for submitting public or general bills to bill drafting is March 24 in the House, and March 25 in the Senate. The deadline for introduction of public bills is April 6 in the House, and April 12 in the Senate.

**I. Asheville Requests**:

The status of the specific requests made by Asheville is reported below:

A. Woodfin/Asheville Boundary Adjustment. This is the proposal to reconfigure Asheville's and Woodfin's corporate boundary lines in the area of the UNC-A. This issue has come up several times before. Last year, at the request of the Woodfin, this proposal was modified to include an adjustment on Merrimon Avenue to accommodate a proposed roundabout at the entrance to the Reynolds Mountain Subdivision, where Asheville and Woodfin have a shared boundary. Merrimon Avenue is a State road in this area, and the work on the roundabout is to be performed by the Department of Transportation. At that time, information regarding the proposed location of the boundary in the roundabout area was not complete, so the proposal was delayed and not acted on. We have been contacted by bill drafting staff, who have advised that no bill will be introduced until the information required for the boundary line in the roundabout area is complete. We have not yet received the information needed, and it appears that this proposal is stalled for another year. We will continue to work with Woodfin and the Department of Transportation to obtain the necessary information, and be ready to proceed when it is supplied.

B. Clarification of Video Service Competition Act. As Council is probably aware, "municipal broadband" is an issue that is receiving much attention in this legislative session. When the City sought clarification last year of the status of municipal intranet facilities provided in connection with a local cable television franchise, it was done as part of a general law bill, rather than a local act. If our particular request is to come up again this year, it would likely again be a provision of a general law. So far, we are not aware of a legislative proposal to address this issue, but will monitor bills and revisions.

C. Clarify Recent Legislation Regarding Financing of Energy Improvements. As of the date of this report, we have seen no bill or other legislative proposal indicating that the revisions suggested last year by the School of Government and the State Treasurer's office to clarify local authority to finance energy improvements through a property assessment program will be addressed. If a bill is introduced, it would likely take the form of a general law. We are checking with the School of Government for any progress on this issue.

D. Annexation Agreements. As of the date of this report, we are aware of no legislative proposals to enhance Asheville's ability to use voluntary annexation. As reported below, there are some bills that have been introduced to limit annexations by North Carolina cities in general, and Asheville in particular.

**II. Other Legislative Matters**:

A. State-wide Energy Efficiency Program. By separate resolution, Council requested that our delegation support legislation for a state-wide energy efficiency program, as proposed by the NC Save$ Energy Alliance. According to a representative from the Alliance, Senator Nesbitt has taken an interest in this proposal, and may not only support such a bill, but may sponsor it. We have supplied him with copies of relevant material and have offered to assist with drafting and research.

B. Annexation. Attempts to limit City-initiated annexation continue. Bills have been introduced in both houses of the legislature to impose a moratorium on annexations until July 1, 2012, and to stay annexations in progress, including those that are in some stage of judicial review. This would affect the Biltmore Lake annexation. In addition, a bill has been introduced to repeal the Biltmore Lake annexation; this bill is similar in effect to bills that have been introduced regarding other cities in North Carolina. A bill has also been introduced to impose a five year moratorium on annexations by municipalities in Buncombe County. The League of Municipalities

is working on the state-wide, or general law, bill. Council is encouraged to contact members of our delegation regarding the local bills, and information is available to assist in that process.

C. Leicester Incorporation. Last week, a bill was introduced to incorporate the Town of Leicester. Several years ago, when a similar proposal was considered, the City Council expressed concern about the size of the area to be incorporated. We are advised that the new proposal is smaller. While a written description is now included in the bill, we need some visual representation of that area to make a sound comparison. The bill that has been introduced makes the incorporation subject to a referendum.

D. Municipal Broadband. On March 8, 2011, Council adopted a resolution opposing bills that would limit local government authority to provide fiber-optic service to residents and citizens. A copy of that resolution has been transmitted to our delegation. As Council knows, Asheville is under consideration by Google for a project that would make very high speed internet available in the area at affordable rates. This has obvious implications for economic development. The bills under consideration would compromise the City's ability to facilitate or participate in that project. We will make our delegation aware of how this bill potentially affects Asheville.

E. Other Bills of Interest. Bill numbers and a brief summary are provided below. Please advise if more information is needed on any bill. To our knowledge, these bills have not been adopted yet.

- HB 308 – Admission Ticket Reform Act. Possible implications for the Civic Center.
- HB 281 – ETJ Restrictions. Would allow residents in ETJ to run for municipal office and vote in municipal elections.
- HB 309 – Selective Vegetation Removal/State Highways. Would allow for removal of vegetation from right-of-way of State highways to enhance the visibility of roadside signs. Would also allow for digital billboards on State highways.
- SB 279 – Clarify definition of renewable energy resources to include wood.
- SB 281 – Municipal Service Districts. Allow the establishment of municipal service districts for the purpose of converting private streets to public streets.
- SB 291 – Catawba County/Local Bid Preference. Allows Catawba County to award contracts for public construction projects to local bidders under certain circumstances.
- SB 305 – Carrboro/Housing Discrimination. Allows Carrboro to adopt ordinances prohibiting housing discrimination of basis of sexual orientation, gender identification, or gender expression.
- HG 332 – Clarify Development Moratorium Authority. Provides that development moratoria are not permitted for the purpose of developing new or amended plans or ordinances.
- SB 315 – Roadside Campaign Signs. Allow political campaign signs in State highway right-of-way.

- SB 318 – Repeal Plastic Bag Ban in Coastal Areas. As title indicates; applies only to those coastal counties authorized to ban plastic bags.

- HB 349 – Promote Green Roofs on Buildings. Authorizes certain incentives, including relief from storm-water fees, for green roofs.

This report is provided for information purposes. If further information is needed, please let us know.

**III. Resolution Opposing Cuts to the University of North Carolina System, or the North Carolina Community College System, by the NC General Assembly:**

At the Mayor's request, a resolution has been prepared to oppose cuts to the university or community college system by the General Assembly. Cities that are locations for these institutions are being strongly encouraged by the North Carolina Metropolitan Mayors Coalition to consider resolutions in support of these institutions.

When Vice-Mayor Newman asked for public comments, none were received.

At the suggestion of Council members, City Attorney Oast said that he would provide Council with copies of the bills and/or more information regarding (1) SB 205 - Carrboro/Housing Discrimination, which allows Carrboro to adopt ordinances prohibiting housing discrimination of basis of sexual orientation, gender identification, or gender expression; (2) HB 349 – Promote Green Roofs on Buildings, which authorizes certain incentives, including relief from storm-water fees, for green roofs; and (3) HB 309 – Selective Vegetation Removal/State Highways, which would allow for removal of vegetation from right-of-way of State highways to enhance the visibility of roadside signs - would also allow for digital billboards on State highways.

Vice-Mayor Newman moved to oppose the bill that has been introduced to repeal the Biltmore Lake annexation (because the City has followed the rules) and express that sentiment to our legislators. This motion was seconded by Councilman Davis and carried on a 4-1 vote, with Councilman Russell voting "no" (Mayor Bellamy excused and Councilwoman Manheimer recused by general consent).

Vice-Mayor Newman said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Russell moved for the adoption of Resolution No. 11-63. This motion was seconded by Councilman Smith and carried unanimously (Mayor Bellamy excused).

**RESOLUTION BOOK NO. 33 – PAGE 405**

**VI. NEW BUSINESS:**

**A. ORDINANCE NO. 3957 - BUDGET AMENDMENT TO FUND THE REPLACEMENT OF HVAC EQUIPMENT AT PACK PLACE EDUCATION, ARTS & SCIENCE CENTER**

Director of Administrative Services Lauren Bradley said that this is the consideration of City funding and an associated budget amendment, in the amount of $284,000, for the replacement of HVAC equipment at Pack Place Education, Arts & Science Center.

The Pack Place Board of Trustees has approached the City of Asheville to explore a funding partnership that would address a critical capital improvement need at Pack Place Education, Arts & Science Center. According to its Boards of Trustees, Pack Place is

immediately facing necessary replacement of HVAC equipment in order to continue operation. The Board has provided a report outlining the project details.

The total cost of the project is estimated to be $284,000. The Board of Trustees anticipates that it could potentially allocate up to $90,000 toward the project from its repair and reserve fund, which has a total balance of $120,000. However, the Board has indicated that this allocation may limit its ability to cover future capital maintenance and repair needs. The repair and reserve fund is funded by interest earned from Pack Place's endowment.

The City of Asheville has a direct and long standing partnership with the Pack Place Education, Arts & Science Center. In the early 1980s, the City acquired the property on Pack Square formerly occupied by the Pack Memorial Library and the Plaza Theaters. In addition to the land, there are several easement and party wall agreements that are part of the package of real estate interest that comprise this property.

As part of a public/private partnership to redevelop this area, the City of Asheville funded the debt service that provided for the construction of Pack Place. City voters approved the issuance of $3.0 million in general obligation (GO) debt for the Pack Place Education, Arts & Science Center on September 23, 1986. The debt was issued in December 1988 and combined with the issuance of $5.4 million in street and sidewalk GO bonds that was also approved by the voters, bringing the total debt package to $8.4 million. The loan term was 20 years at an interest rate of roughly 7.0%.

Around the same time in 1988, the City leased the property to the Pack Place Education, Arts & Science Center, a non-profit corporation. Pack Place renovated the old library and constructed new facilities on the old theater property and adjacent land using the City-issued debt. The City and Pack Place are co-owners of the improvements that were made pursuant to the lease.

In July 1993, the City took advantage of a lower interest rate environment to refinance several of its outstanding debt issuances, including the $8.4 million that was issued in December 1988 for Pack Place and city infrastructure. The total debt package issued in 1993 was for $11.5 million. The loan term was 15 years at an interest rate ranging from 4.0% to 4.8%. The final payment on this debt was made in fiscal year 2007-08 in the amount of approximately $180,000.

Buncombe County provides an annual funding allocation for Pack Place operations. It is anticipated that the county's allocation for FY 10-11 will be around $400,000. Pursuant to the original lease and subsequent lease renewals, Pack Place is responsible for all costs associated with the facility's capital maintenance.

Pack Place has been and continues to be one of the centerpieces of Asheville's revitalized downtown. The existence of Pack Place has been a catalyst for much of the redevelopment that has occurred in the surrounding area, bringing people to downtown, which in turn supports local businesses.

This item was considered by the City Council Finance Committee. The Committee voted unanimously to provide a capital contribution to Pack Place in the amount of $284,000 to fully fund the HVAC replacement project, with funding coming from capital project savings that would otherwise be appropriated in the City's Fiscal Year 2010-11 Capital Improvement Program (CIP).

The action does not directly relate to City Council's annual strategic operating plan.

Pros:

- Addresses a critical capital need in an important cultural and civic institution that serves the public; if left unaddressed, facility closure may be needed during the summer months, which would have negative economic and community impacts.

Cons:

- Reduces the amount of capital project savings available for programming in the FY 2010-11 capital improvement program.

There is currently $450,000 in capital project savings that staff has previously recommended building into the FY 10-11 capital improvement program (CIP). Fully funding the Pack Place HVAC project reduces the amount of capital project savings available for programming in the FY 2010-11 CIP by just over 60%. This funding would otherwise be used toward the City's pay-as-you-go capital programs like road resurfacing, facility maintenance, sidewalk maintenance and sidewalk construction.

Staff would recommend (1) that the City partner with Buncombe County to provide a capital contribution for the balance of project costs that Pack Place is unable to cover with its repair and reserve fund. Based on the memorandum provided by the Pack Place Board of Trustees, the City's share would be around $100,000; and (2) that in the near future City Council consider and clarify the City's role in capital maintenance and improvements at the Pack Place Education, Arts & Science Center and then update the lease agreement to reflect any changes in the City responsibilities.

When Vice-Mayor Newman asked for public comments, none were received.

Councilman Russell moved to adopt a budget amendment, in the amount of $284,000, to fully fund the HVAC replacement project, with funding coming from the capital project savings, due to the fact that the City is co-owner of the building and we have not made a contribution since fiscal year 2007-08. This motion was seconded by Councilman Bothwell.

Councilman Bothwell noted that the Art Museum has great plans for expansion and the HVAC project will not only be an immediate fix, but handle the expansion project as well.

Councilman Smith expressed concern about taking money from the CIP when Council has not seen a plan on how to address the other infrastructure needs. Director of Administrative Services Lauren Bradley responded that unfortunately staff has not talked with Council about staff's proposal of the CIP yet. It's about a $17 Million CIP. She didn't want Council to feel that by taking some portion of this that we are hamstringing the CIP because Council will see at the next budget briefing that we have a solid CIP for next year. It will mean, though, that incremental amounts will have to be taken out of the categories that are already built.

Councilman Russell explained to Council why the Finance Committee supported allocating the entire 284,000 amount to fully fund the HVAC project.

Vice-Mayor Newman felt it was important that before any further funding requests are made that Council discuss the City's role in capital maintenance and improvements at the Pack Place Education, Arts & Science Center.

The motion made by Councilman Russell and seconded by Councilman Bothwell carried unanimously (Mayor Bellamy excused).

**ORDINANCE BOOK NO. 26 – PAGE 477**

**B. CITY COUNCIL E-MAIL**

Director of Information Technology Jonathan Feldman said that this is for Council consideration and discussion regarding available electronic mail options.

The following is background information and analysis on City Council's choices for the email system that they use. Staff stands ready to implement whatever is desired by City Council.

**Option 1. Externally-provided email for Council members**

- Not subject to City policy, including restrictions on political activity.
- Inexpensive or free.
- Difficult for City staff to archive or review.

As an enhancement to this option, it may be more user friendly to the public if the City offers a city "alias" for council members who do opt to continue to use their own email addresses. This alias would relay the email, so, for an account of "councilmember1@mail.com", citizens who sent an email to "councilmember1@ashevillenc.gov" would be relayed to the "councilmember1@mail.com" address. The council member would then reply from that address.

**Option 2. City-provided email for Council members**

- **Archiving**: Allows for an increased level of public accountability because of automated archiving; emails are retained in the archive for access by staff, even when deleted by a council member.
- **Policy**: Emails are subject to the City's email policy.
- **Campaigning**: It is staff's understanding that City resources may not be used for political campaigns, therefore this email account would not be able to be used for campaign activity.
- **External email and open records**: If City Council members use a separate account for political activity, that account is still subject to open records requests.

As little as $50 per year; as much as $350 per year, depending upon how many council members choose the City-provided email option.

City Council discussed the different options available and would advise City Manager Jackson which, if any, option they would like to have. City staff would then notify the public of the new e-mail address and, if City related, encourage the public to contact that member of Council at the new e-mail address.

**VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:**

Ms. Linda Pannullo spoke to Council about the deficit.

Mr. Alan Ditmore spoke to Council about municipal contraception funding.

The following claims were received by the City of Asheville during the period of February 4 – March 10, 2011: AT&T (Streets), Amy Underwood (Inspections), Iris Schneider (Police), PSNC (Water), AT&T (Water), Jean Penland (Streets), Elizabeth Cheesborough (Water), Richard Mire (Water), David W. Highsmith Jr. (Transit), Ward Griffin (Sanitation), Robert Gunter (Sanitation), Michelle Rumfelt (Water) and Chris Glover (Water). These claims have been referred to Asheville Claims Corporation for investigation.

**VIII. ADJOURNMENT:**

Vice-Mayor Newman adjourned the meeting at 9:02 p.m.

Magdalen Bulleson
CITY CLERK

MAYOR

Tuesday – March 29, 2011 – 6:30 p.m.
T.C. Roberson High School

Community Meeting – South Asheville

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; and City Attorney Robert W. Oast Jr.

Absent: None

Mayor Bellamy opened the meeting and welcomed the audience. She then introduced City Council members and explained the questions and answer process.

Director of Administrative Services Lauren Bradley explained the City's strategic goals and financial realities. She then explained the constraints to which the City is subject, as well as the level of service delivery we provide and the volume of citizens and visitors to whom we provide them. She said that Asheville has taken advantage of significant grant opportunities, including, but not limited to: (1) 15 buses replaced; (2) an investment of $7.5 million from ARRA funds into capital (7 sidewalk projects); (3) two new fire stations; (4) Livingston Street Center; (5) Sullivan Act capital allocation; and (6) Azalea Road project. Despite the challenging financial picture, there are reasons for optimism. We have diverse, engaged and innovative citizens, we are taking advantage of partnerships and grant opportunities, and we are actively involved in the capital improvement planning.

Public Works Director Cathy Ball outlined the stormwater management structural improvements in Fiscal Year 2011 (1) Ditching on Caribou Road; (2) Ditching on London Road; (3) Installing under drains on Park Avenue; (4) Replacing culvert on Taft Avenue; (5) Repairing ditch line on Allen Street; (6) Replacing trench drain on Peachtree Street; and (7) Dingle Creek Wetlands and Stream Restoration. Regarding good housekeeping for stormwater, staff has cleaned 1124 storm drains and have swept 70 miles of curb. Future initiatives include the implementation of additional recommendations of the Dingle Creek Master Plan, along with the continued good housekeeping measures. She showed videos on the Dingle Creek Wetland Creation Project and the importance of stormwater management.

Director of Transportation Ken Putnam discussed transportation related projects and provided Council and the audience with a sidewalk update. He said the transportation (mobility) is found in the N.C. Dept. of Transportation Streets & City Streets; MPO Transportation Plans; Bicycle Master Plan; Transit Master Plan; Parking Plan; Greenways Master Plan; and Pedestrian Master Plan. Sound Transportation objectives include integration, Balance, Multi-Modal, Long-Range Planning, Partnerships and Multi-Year Funding. He provided statistics from the 1999 Pedestrian Plan, which was updated in 2005. He then explained the prioritization process criteria used, which is Priority Zones (Zoning Jurisdiction); Proximity to Community Destinations; Proximity to Transit Stops; Needed Linkages; Feasibility of Construction; and Major Thoroughfares and Connector Streets. Recently completed projects include (1) Hendersonville Road, from West Chapel Road to Forest Street – 2,700 linear feet; (2) Linden Street, from Birch Street to Royal Pines Drive – 1,100 linear feet; (3) Pinchot Drive/Springside Road, from existing greenway to T.C. Roberson High School – 1,000 linear feet; and (4) Long Shoals Road, from Hendersonville Road to I-26 – 16,100 linear feet. Potential projects in the South include (1) Brevard Road, Ridgefield Boulevard to Rocky Ridge Road (Biltmore Square Mall area); (2) Overlook Road, Springside Road to Briarcliff Drive; (3) Overlook Road, Long Shoals Road to Springside Road; (4) Hendersonville Road, I-40 to the Blue Ridge Parkway (U-5189); and (5) Springside Road. He will continue the Documentation Process, continue implementing the Pedestrian Plan, formalize Prioritization Process (Point Values), "score" the Top 50 Potential Projects, plot Projects and Link to Website and continue working towards integrating all the master plans. As Asheville continues to redefine transit, it will (1) listen to the community; (2) focus on sustainability; (3) provide more frequent and reliable service; and (4) supply more and better Information.

Mayor Bellamy then opened up the meeting for questions and answers explaining that all answered questions would be delegated to City staff for response and posting on the City's website. Questions/comments responded to consisted of : Looking 5-10 years forward, what strategic action is the city considering to develop and diversify revenue streams; what are the current plans for expansion of NC 25-A (Sweeten Creek Rd) to four lanes; concern of Springside Drive traffic safety and road conditions; any chance Sanitation could return to twice monthly brush pickup; need for sidewalks from Carolina Day to Long Shoals; and since Airport Road is a gateway to the city, why is there always excessive signage and no enforcement.

Mayor Bellamy and Council members expressed their appreciation for the community involvement.

At 7:45 p.m., Mayor Bellamy adjourned the meeting.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – April 12, 2011 – 3:00 p.m.
First Floor North Conference Room

Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilwoman Esther E. Manheimer

**Enterprise Funds**

Director of Administrative Services Lauren Bradley said that she would not review all the City's Enterprise Funds, but just those that have policy considerations. The other Enterprise Fund's expenditures and revenues expect to be flat for next fiscal year.

She then briefly reviewed the Water Rate Study, Parking Fund and Transit Fund.

Water Rate Study: Rate Structure Modifications: include (1) Raise commercial and multi-family volumetric rates relative to single family (a) Provide more equitable cost recovery; and (b) Initial target – 85% of Residential rate for Multi-Family and Small Commercial; (2) Separate Irrigation from Residential rate (a) Targets true elective usage; and (b) Raise to 120% of Residential rate in FY 2013; and (3) Raise Wholesale rates to keep up with overall rate increases.

Using a chart, she explained the FY 11-12 recommendation for the water rates. There is no change in the residential customers, but increases to the commercial charges, multi-family charges and wholesale customers.

Parking Fund Outlook: (1) Parking revenues are projected to exceed expenses by $358,740 in FY 11-12 (a) Includes $500,000 transfer to the Transit Fund; and (b) Includes transfer of $406,260 in operating funds to parking capital improvements; and (2) FY 12-13 projection for revenues over expenditures is $275,000 (includes full debt service for 51 Biltmore and $500,000 transfer to Transit Fund). She then showed a chart of parking capital improvements.

Transit Fund Outlook: (1) Loss of $600,000 in State funding; partially off-set by decreases in expenditures (a) Increases General Fund transfer by $350,000 for a total of approximately $985,000; (2) Budgeting for a slight increase in fuel costs despite efficiencies gained from hybrids and new diesels; (3) Union contract under negotiation this summer; and (4) RFP for management transit services may increase costs. She then showed a chart of transit capital improvements.

Golf Fund Outlook: (1) Current expenditure over revenue projections would require a $150,000-$200,000 transfer from the General Fund; and (2) Indentifying opportunities for cost savings and revenue enhancements to minimize or avoid a General Fund transfer in FY 11-12 (a) Recommendations brought back to Council with the proposed FY 11-12 budget. The Recreation Board moved for staff to look at options to operate Golf Course with no general fund transfer and that they look at an RFP for operation of Golf Course by outside vendor.

Ms. Bradley and other City staff responded to various questions/comments from Council, noting that some questions which could not be readily answered would be provided to Council. Questions/comments made, but not limited to, the following: with the loss of state funding over

the past few years, what is the trend of the Transit Fund; why was the transit route that the new MAHEC building on Hendersonville Road turned down by the Transit Commission; what are the benefits of the Automated Vehicle Location System for buses; request for a list of transit eliminated route deviations; and request for additional information on the irrigation for the back 9 at the Golf Course.

**General Capital Improvement Program**

Mr. Bradley then reviewed the General Capital Improvement program five year overview and program detail for FY 11-12.

Capital Improvement Planning Categories include: (1) Multi-modal: Streets, sidewalks, greenways, pedestrian safety projects, Transit system investments; (2) Infrastructure: Bridges, retaining walls, sewer projects, traffic signal poles, infrastructure associated with water lines; (3) Buildings & Facilities: Building and facility maintenance, roof replacements, recreation center maintenance, park maintenance, Civic Center renovations, Urban Trail maintenance; (4) Equipment & Technology: Radio infrastructure and radio replacements, software upgrades and replacements; and (5) Vehicle Replacement: Vehicles and other rolling stock.

She showed charts of the CIP 5-year history (2007 – 2011) which totaled $41.1 million over five years; the CIP 5-year projection (2012-2016) which totals $59.45 million over five years; the CIP program for FY 2011-12; the CIP revenues for FY 2011-12 which totals $17.55 million in FY 11-12.

Multi-Modal: Street and Pedestrian Safety Program (1) Street Resurfacing: $1.02 million, 5.90 miles resurfaced (a) Compared to FY 10-11: 30% increase in funding and 13% increase in linear feet resurfaced; (2) Street rebuilds: $293,000 (Montford Avenue project) (a) Compared to FY 10-11 - No street rebuild projects were funded in the last five-year CIP; (3) Pedestrian Safety: $35,000 - Haywood Street and Montford Avenue ped signals and crosswalks; (4) Sidewalk maintenance: $250,000, 1.68 miles maintenance work (a) Compared to FY 10-11: Funding remains at FY 10-11 levels and $811,000 in sidewalk maintenance personnel and related costs budgeted in operating budget; (5) New sidewalk construction: $1.8 million, 1.82 miles new sidewalk (a) Compared to FY 10-11: (i) Five times the funding for in-house construction materials; (ii) Nearly three times the linear feet output; and (iii) Addition of $1.3 million in debt financing yielding 7,500 linear feet of new sidewalk; (6) Total General Fund sidewalk program: $2,861,000 - Compared to FY 10-11: Nearly double total funding for sidewalk program; (7) Greenway development: $1.45 million, 1.5 miles (a) Debt financing used to fund construction of the Beaucatcher/Overlook greenway; and (b) Land acquisition funds for Town Branch greenway; and (8) Transit projects: $450,000 - Security cameras on buses, Automated Vehicle Location System, bus shelter replacement, and system signage.

Infrastructure (1) Infrastructure associated with water lines: $660,224 (a) Completion of the Azalea Road project funding, South Lexington and Melrose improvements; (2) Sewer projects: $130,000, Airport Road (a) Opportunity to recover costs through MSD's sewer extension policy; (3) Retaining wall projects: $300,000, Cherokee/Sunset; (4) Bridge replacement: $900,000, Wild Cherry; and (5) Traffic signal metal pole replacements: $120,000, 2 intersections.

Building and Facilities Program: (1) City Hall Exterior Repairs: $5,500,000; (2) Roof replacements: $200,000, 4 fire stations; (3) Facility maintenance projects: $805,309 (a) Compared to FY 10-11: No facility maintenance or roof projects were funded and FY 11-12 projects include Municipal Building chiller replacement, HVAC conversion, Fleet building ventilation system; (4) General Fund contribution to Civic Center renovations: $300,000; (5) Public Art (a) maintenance: $40,000; and (b) acquisitions: $47,807 (represents 1% of eligible projects over five year CIP); (6) Recreation center maintenance: $100,000 (a) Stephens- Lee maintenance, ADA improvements in all centers; and (7) Park maintenance: $200,000 (a) Playground replacement, court resurfacing.

Equipment, Technology and Vehicle Replacement: (1) Public safety radio replacements: $200,000; (2) Development Services Center software replacement: $125,000; and (3) Vehicle replacement: $2,610,000 (a) Compared to FY 10-11: 50% increase in funding and nearly $700,000 dedicated to alternative fuel vehicles (i) $550,000 matching funds for Clean Cities grant; and (ii) 1.3% reduction in fleet carbon footprint.

Green CIP: (1) Achieve a 4% carbon footprint reduction each year for 20% total reduction over five years; and (2) Funded by "revolving" utility savings generated by energy efficiency projects for investment into additional projects (a) Streetlight retrofit project provides significant utility savings for five-year Green CIP; and (b) $900,000 projected for second phase of streetlight retrofit project in FY 11-12.

Unfunded Capital Projects: (1) City Projects (a) Scaling up multi-modal investments, facility maintenance program, and vehicle replacement; (b) Radio system infrastructure upgrade: $9,000,000 (i) Will be considered In future CIP planning; and (c) Montford Fire Station: $1,000,000 (a) Potential to be budgeted in FY 13-14 if Sandhill Fire Station does not move forward; and (2) Community Projects (a) Process for considering other community projects - Pack Place capital needs, multi-modal projects, etc.

Throughout discussion, Ms. Bradley and other City staff responded to various questions/comments from Council, noting that some questions which could not be readily answered would be provided to Council. Questions/comments made, but not limited to, the following: for the past CIP five year history, what is the cost savings in operations as a result of the capital investments; explanation of street rebuilds vs. street resurfacing; explain selection of street rebuilt of Montford Avenue; are bike lanes included in street rebuilds; where is Dr. Martin Luther King Jr. Drive and Stratford Road on the list for resurfacing or rebuilding; what is the length on Montford Avenue that will be rebuilt; status of Safe Rides to School program; request to look at Long Shoals Road area for Safe Rides to School project; request to have information relayed to residents about sidewalks on Overlook Road; request for map showing alignment of the Town Branch greenway, along with breakdown of financial costs; information on whether Beaucatcher/Overlook greenway and Town Branch greenways can be delayed; request for information on the mix of alternative fuels; are there any plans to replace current vehicles with electric vehicles; where is the Sand Hill Fire Station to be located if the Biltmore Lake annexation proceeds; explanation of why public service radios are necessary opposed to use of cellular phones; request for some alternatives for the $9,000,000 radio system infrastructure update in the future CIP planning; has there been any thought on what the City will do with the W.C. Reid Center if the Housing Authority grant is not received; does the Asheville Police Department evidence room have security cameras; are the needs of the Grove Arcade Building part of the 5-year CIP; and request that the Finance Committee review in July what the exploratory first steps would be and what projects might be part of a bond referendum, providing Council with a realistic timeframe.

It was the consensus of Council to amend Public Art Board policy guidelines to include that any public art purchased should be from regional or local artists.

Ms. Bradley noted that she has provided Council with the Strategic Operating Plan with the projected progress and cost implications per Council's request. If Council had no objections, she would place the adoption of the Strategic Plan on the April 26 agenda for adoption.

Ms. Bradley also provided Council with a memorandum responding to action items that were identified by City Council during the March 22, 2011 budget work session.

Regarding WNC Community Media Center (formerly URTV), Ms. Bradley explained the City's funding for that program of 60/40 split of PEG fees. The City has budgeted $30,000 for next fiscal year; however, they are requesting $115,000 or they will have to close their doors at the end of this month. The City was not notified of their closing except from a press release they

issued. It was the consensus of Council to have (1) City Attorney Oast review the management contract which expires at the end of 2011 for the clause that allows the City to perform a financial and/or equipment audit and that said audits be handled as quickly as possible; and (2) Ms. Bradley contact the executive director and the board chair and state that the City has budgeted $30,000 and with whatever the County budgets can they come up with a budget and a proposal that meets the funding available to them. She was also directed to ask URTV management for a letter in writing that they will close at the end of April, 2011, noting that there will be no payment made in May of 2011.

At 4:37 p.m., Mayor Bellamy adjourned the budget briefing.

Tuesday – April 12, 2011 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

**PLEDGE OF ALLEGIANCE**

Mayor Bellamy led City Council in the Pledge of Allegiance.

**INVOCATION**

Mayor Bellamy gave the invocation.

**I. PROCLAMATIONS:**

**A. EMPLOYEE RECOGNITIONS**

City Manager Jackson recognized (1) Public Works Director Cathy Ball and Stormwater Division of Public Works Employees: McCray Coates, Ray Tracy, Chuck Watson, Ric Ledford, Monte Clampett, Danny Gibson, Arthur Hensley, Woody Ledford, John Fly, Toby Shelton, Stephanie O'Conner and Keisha Lipe for their work on the 2010 Award for Large Sedimentation and Erosion Control Program. The City of Asheville stormwater services division has worked very hard to provide great customer services to the citizens of Asheville by working closely with design professionals, contractors, developers and private citizens to reduce loss of sediment from construction sites. This sedimentation could potentially enter our streams. City staff has provided the community with material to update the citizens on the changes in our new ordinances. Following an audit performed by NCDENR, the City of Asheville was awarded the Large Program of the Year for sedimentation and erosion control. To be considered as a large program, dedication of 3 or more employees to the erosion and sediment control efforts is required. The selection of the large program of the year begins with a recommendation from the local regional engineer for NCDENR. This recommendation is then voted on by all the NCDENR regional engineers based on work performance; and (2) Senior Police Officer Louis Tomasetti and Senior Police Officer Brandon Morgan for receiving their Advanced Law Enforcement Certificate. In accordance with the criteria established by the North Carolina Criminal Justice Education and Training Standards Commission, Senior Police Officers Louis Tomasetti and Brandon Morgan were approved for their Advanced Law Enforcement Certificate by a vote of the full Commission at their last meeting. The Commissions Professional Certificate Program is designed to reward and recognize officers who continually strive to better themselves

professionally, by attending various schools and training sessions, above and beyond what is currently mandated by the State of N.C. Officers must also have several years of full-time experience as well. The certificate is the highest such honor awarded by the State, and recognizes education, training, and experience by the recipient.

On behalf of City Council, Mayor Bellamy thanked the employees on what they do on behalf of the City of Asheville and City Council. She was proud of City staff and looked forward to highlighting more accomplishments.

**B. PROCLAMATION PROCLAIMING APRIL AS "CHILD ABUSE AWARENESS MONTH"**

Mayor Bellamy read the proclamation proclaiming April, 2011, as "Child Abuse Awareness Month" in the City of Asheville. She presented the proclamation to Mr. Bill McGuire, representing Child Abuse Prevention Services Inc., who briefed City Council on some activities taking place during the month. Ms. Tammie Shook, representing the N.C. Dept. of Social Services Child Protection Services Division, provided Council with a "Pinwheel for Protection."

**C. PROCLAMATION PROCLAIMING APRIL AS "PARKINSON DISEASE AWARENESS MONTH"**

Mayor Bellamy read the proclamation proclaiming April, 2011, as "Parkinson Disease Awareness Month" in the City of Asheville. She presented the proclamation to Mr. Dick Poore, President of the Chapter of the American Parkinson's Disease Association, and Mr. Jim Hall, who briefed City Council on some activities taking place during the month.

**D. PROCLAMATION PROCLAIMING APRIL 17-23, 2011, AS "CLEANING FOR A REASON WEEK"**

Vice-Mayor Newman read the proclamation proclaiming April 17-23, 2011, as "Cleaning for a Reason Week" in the City of Asheville. He presented the proclamation to Ms. Karan Walton, from Tidy Environments Janitorial Service Inc., who briefed City Council on some activities taking place during the week of Cleaning Homes for Women with Cancer.

**E. PROCLAMATION PROCLAIMING APRIL AS "LANDSCAPE ARCHITECTURE MONTH"**

Vice-Mayor Newman read the proclamation proclaiming April, 2011, as "Landscape Architecture Month" in the City of Asheville. He presented the proclamation to Ms. Stephanie Pankiewicz, NCASLA Mountain Section Chair, who briefed City Council on some activities taking place during the month.

**F. PROCLAMATION PROCLAIMING APRIL 10-16, 2011, AS "NATIONAL VOLUNTEER WEEK"**

Mayor Bellamy read the proclamation proclaiming April 10-16, 2011, as "National Volunteer Week" in the City of Asheville. She presented the proclamation to Ms. Sarah Wohlmuth the Director of Hands On Asheville, United Way's Volunteer Center, who briefed City Council on some activities taking place during the week.

**RECOGNITION OF RECIPIENTS OF GOVERNOR'S AWARD FOR VOLUNTEER SERVICE**

Mayor Bellamy said that National Volunteer Week is a time for us to stop and think about what volunteers contribute to the efforts of local government, non-profits and faith-communities to improve the lives of our citizens. In addition to proclaiming this week National Volunteer Week,

Mayor Bellamy took time to recognize 2 groups of local volunteers who have received special recognition for their efforts over the past year. These groups are the Buncombe County recipients of the 2011 Governor's Award for Volunteer Service.

The first group is made up of the 30 students of the 2011 City of Asheville Youth Leadership Academy who earned their nomination for their involvement in over 25 volunteer projects that include packing food at MANNA, preparing dinners for the residents of the ABCCM Women's Shelter, planting trees along Livingston Street, and tutoring children at the I Have a Dream program, among others. Ms. Erika Germer, CAYLA program Coordinator introduced the students.

Mr. Everett Clark, Rev. Eddie Morgan and the Crossroads Team from the First Baptist Church were the other Buncombe County nominees. They were nominated for their work over the past five years to support members of our community who are experiencing homelessness. The Crossroads Team has worked with the Asheville-Buncombe Homeless Initiative and the Veterans Administration to co-host the VA Stand Down and Project Connect. In addition, their support for people experiencing homelessness at the First Baptist Church has created a safe and welcoming space, offering regular outreach & meals to people experiencing homelessness, space for women with the Room at the Inn shelter, day-time activities for men staying at the Veterans Quarters.

**II. CONSENT AGENDA:**

**A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MARCH 22, 2011; AND THE COMMUNITY MEETING HELD ON MARCH 29, 2011**

**B. RESOLUTION NO. 11-65 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AMENDMENT TO THE LICENSE AGREEMENT WITH BELL ATLANTIC MOBILE OF ASHEVILLE INC. FOR ADDITIONAL ANTENNAS AND EQUIPMENT AT 57 CRESTWOOD DRIVE, ARDEN, N.C.**

Summary: The consideration of a resolution authorizing the City Manager to execute an amendment to the License Agreement between Bell Atlantic Mobile of Asheville, Inc. and the City of Asheville for additional antennas and equipment at 57 Crestwood Drive, Arden, North Carolina.

The City of Asheville owns and operates a telecommunications tower located on property at 57 Crestwood Drive in Arden. In March 2009, Asheville City Council authorized the lease of tower space and adjacent ground space to Bell Atlantic Mobile of Asheville, Inc. At this time, Bell Atlantic has made a request to increase the number of antennas located on the tower and increase the ground space lease area in order to improve service to their cellular customers.

Currently, Bell Atlantic Mobile of Asheville, Inc. operates 9 antennas with 9 coax lines at the 90 foot elevation of the tower. The request includes increasing the number of antennas to 12 total at the 90 foot elevation, with 12 corresponding coax lines. The current ground lease area measures approximately 437 square feet; this proposed amendment would increase the ground lease area by 3 square feet in order to accommodate one additional cabinet.

A third party vendor of Bell Atlantic, Vertical Solutions, has performed a structural engineering analysis of the tower with the proposed loading, and has certified that tower can accommodate this additional loading. This property also contains a water reservoir, and staff has confirmed with Water Resources that this request does not impose any conflict in current water operations at this site.

In order to compensate for this additional loading, Bell Atlantic has offered to increase their current rental rate by $1000 for a total of $33,448 per year with 4% annual increases. Staff

has reviewed this proposed rate increase and found it to be representative of fair market value for this type of installation.

This action complies with the City Council Strategic Operating Plan in that strategic tower asset management presents the City with revenue enhancements. These revenue enhancements can help the City's telecommunications operations become more sustainable and fiscally responsible.

Pros:

- Enhanced revenue through the license fee income
- Maximized vacant space on existing tower infrastructure

Con:

- None

Revenue from the rental of tower space at the 57 Crestwood Drive location is recorded in a capital project designated to build funding for maintenance and the eventual replacement of the City's telecommunications towers. The additional revenue from this amendment to the license agreement with Bell Atlantic Mobile of Asheville will be recorded in that project. There is no impact to the City's General Fund budget.

City staff recommends City Council adopt a resolution authorizing the City Manager to execute an amendment to the license agreement with Bell Atlantic Mobile of Asheville, Inc. on behalf of the City of Asheville.

Ms. Nikki Reed, Real Estate Manager, responded to Councilman Bothwell's question regarding the price.

**RESOLUTION BOOK NO. 33 – PAGE 408**

**C. RESOLUTION NO. 11-66 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE EARTH DAY AND HEALTHY KIDS DAY EVENT ON APRIL 16, 2011**

**RESOLUTION NO. 11-67 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ALL GO WEST EVENT ON APRIL 23, 2011**

**RESOLUTION NO. 11-68 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE BIG LOVE FEST EVENT ON MAY 1, 2011**

**RESOLUTION NO. 11-69 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE MOUNTAIN SPORTS FESTIVAL ON MAY 27, 28 AND 29, 2011**

**RESOLUTION NO. 11-70 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE BEER CITY FESTIVAL ON JUNE 4, 2011**

**RESOLUTION NO. 11-71 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT DOWNTOWN AFTER 5 EVENTS ON MAY 20, JUNE 17, JULY 15, AUGUST 19 AND SEPTEMBER 16, 2011**

**RESOLUTION NO. 11-72 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE VEGFEST ON AUGUST 7, 2011**

**RESOLUTION NO. 11-73 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE GOOMBAY FESTIVAL ON AUGUST 26, 27 AND 28, 2011**

**RESOLUTION NO. 11-74 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE CLIPS OF FAITH BEER AND FILM TOUR ON SEPTEMBER 9, 2011**

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Asheville Earth Day & Health Kids Day event on April 16, 2011; All Go West on April 23, 2011; the Big Love Fest on May 1, 2011; the Mountain Sports Festival on May 27, 28 & 29, 2011; the Beer City Festival on June 4, 2011; the Downtown After 5 outdoor special events in 2011; the Asheville VegFest on August 7, 2011; the Goombay Festival on August 26, 27 & 28, 2011; and the Clips of Faith Beer and Film Tour on September 9, 2011.

- The Lake Eden Arts Festival in conjunction with Mountain Roots Management has requested through the City of Asheville Development Services Center that City Council permit them to serve beer and/or unfortified wine at the Asheville Earth Day & Healthy Kids Day and allow for consumption at this event.

  Asheville Earth Day & Healthy Kids Day will be held on Saturday, April 16, 2011, from 11:00 a.m. to 10:00 p.m. within the boundaries of Pack Square Park's Roger McGuire Green, Reuter Terrace, Vance Median and Raised Lawn areas including Spruce Street between the intersections of South Pack Square & College Street, North Pack Square between the intersections of Biltmore Avenue and South Pack Square, and within the City Hall/Courthouse Parking Lot, with alcohol specifically limited to the designated areas as referenced on the accompanying site maps, limited to the hours of 2:00 p.m. to 10:00 p.m.

- Dogwood Alliance in conjunction with Yellow Dog Entertainment, LLC has requested through the City of Asheville Development Services Center that City Council permit them to serve beer and/or unfortified wine at the All Go West Festival and allow for consumption at this event.

  The All Go West Festival will be held on Saturday, April 23, 2011, from 12:00 p.m. to 10:00 p.m. within the boundaries of Westwood Place & Waynesville Ave.

- Just Economics has requested through the City of Asheville Development Services Center that City Council permit them to serve beer and/or unfortified wine at the Big Love Fest and allow for consumption at this event.

  The Big Love Fest will be held on Sunday, May 1, 2011, from 1:00 p.m. to 8:00 p.m. within the boundaries of Pack Square Park's Roger McGuire Green, Reuter Terrace,

Vance Median and Raised Lawn areas including South Market Street between the intersections of South Pack Square and College Street, North Pack Square between the intersections of Biltmore Avenue and South Pack Square, South Pack Square between the intersections of Biltmore Avenue and South Market Street and within the City Hall/Courthouse Parking Lot.

- Mountain Sports Festival, Inc. has requested through the City of Asheville Development Services Center that City Council permit them to serve beer and/or unfortified wine at the Mountain Sports Festival and allow for consumption at this event.

  The component of the Mountain Sports Festival requesting alcohol will be held on Friday, May 27, 2011, from 5:00 p.m. – 10:00 p.m., Saturday, May 28, 2011 from, 10:00 a.m. – 10:00 p.m. & Sunday, May 29, 2011, from 12:00 p.m. to 6:00 p.m. within the boundaries of Carrier Park, as per the event area limits referenced on the accompanying site map.

- Big Brothers Big Sisters WNC in conjunction with GSCBA & ABA has requested through the City of Asheville Development Services Center that City Council permit them to serve beer and/or unfortified wine at the Beer City Festival and allow for consumption at this event.

  The Beer City Festival will be held on Saturday, June 4, 2011, from 12:00 p.m. to 6:00 p.m. within the boundaries of Pack Square Park's Roger McGuire Green, Spruce Street between the intersections of South Pack Square and College Street, and within the City Hall/Courthouse Parking Lot.

- The Asheville Downtown Association has requested through the City of Asheville Development Services Center that City Council permit them to serve beer and/or unfortified wine at the Downtown After 5 events and allow for consumption at these events.

  Downtown After 5 will be held on Friday, May 20, June 17, July 15, August 19 and September 16, 2011, from 5:00 p.m. to 9:00 p.m. within the boundaries of the 100 block of Lexington Avenue, as per the event area limits referenced on the accompanying site map.

- Goat Mountain Sanctuary has requested through the City of Asheville Development Services Center that City Council permit them to serve beer and/or unfortified wine at the Asheville VegFest and allow for consumption at this event.

  The Asheville VegFest will be held on Sunday, August 7, 2011, from 12:00 p.m. – 9:00 p.m. within the boundaries of Battery Park Avenue & Otis Street as per the event area limits referenced on the accompanying site map.

- YMI Cultural Center has requested through the City of Asheville Development Services Center that City Council permit them to serve beer and/or unfortified wine at the Goombay Festival and allow for consumption at this event.

  The Goombay Festival will be held on Friday, August 26, 2011, from 12:00 p.m. to 11:00 p.m., Saturday, August 27, 2011, from 11:00 a.m. to 11:00 p.m. and Sunday, August 28, 2011, from 10:00 a.m. to 6:00 p.m. within the boundaries of Eagle Street, South Market Street and Wilson Alley, as per the event area limits referenced on the accompanying site map. The Goombay Festival will also be held on Friday, August 26, 2011, from 10:00 a.m. to 9:00 p.m. within the boundaries of Pack Square Park's Roger McGuire Green, the City-County Parking Lot and within a designated area of Spruce Street between the intersections of College Street & Court Plaza, as per the area limits referenced on the accompanying site map.

- The Asheville Downtown Association in conjunction with New Belgium Brewing Company has requested through the City of Asheville Development Services Center that City Council permit them to serve beer and/or unfortified wine at the Clips of Faith Beer and Film Tour and allow for consumption at this event.

  The Clips of Faith Beer and Film Tour will be held on Friday, September 19, 2011, from 7:00 p.m. to 10:00 p.m. within the boundaries of Pack Square Park's Roger McGuire Green, the City-County Parking Lot and within a designated area of Spruce Street between the intersections of College Street and Court Plaza, as per the area limits referenced on the accompanying site map.

These actions have no direct connection with the City of Asheville Strategic Operating Plan.

Pro:

- Allows fundraising opportunities for the Lake Eden Arts Festival, Dogwood Alliance, Just Economics, Mountain Sports Festival, Inc., Big Brothers Big Sisters WNC, Asheville Downtown Association, Goat Mountain Sanctuary and YMI Cultural Center.

Con:

- Potential for public safety issues

Overtime pay for Asheville Police officers per sponsorship agreement for Downtown After 5 is $3,800 and for the Goombay Festival it is $25,215. There is no fiscal impact for Asheville Earth Day, All Go West, Big Love Fest, Mountain Sports Festival, Beer City Festival, Asheville VegFest, and Clips of Faith Beer and Film Tour.

City staff recommends City Council adopt the resolutions authorizing the City Manager to approve a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at Asheville Earth Day & Health Kids Day, All Go West, Big Love Fest, Mountain Sports Festival, Beer City Festival, Downtown After 5, Asheville VegFest, Goombay Festival, and Clips of Faith Beer and Film Tour.

**D. ORDINANCE NO. 3958 - TECHNICAL BUDGET AMENDMENT IN THE HOUSING TRUST FUND**

Summary: The consideration of a technical budget amendment in the Housing Trust Fund in the amount of $400,000 from program income and Housing Trust Fund reserves to fully budget planned expenditures for FY 2010-11.

In FY 2000-01, the City established the Housing Trust Fund to provide financing for affordable housing initiatives in the City. Each year since FY 2000-01 City Council, as a part of the budget process, has approved an annual transfer from the General Fund to the Housing Trust Fund. This transfer, along with program income from loans that are being re-paid, provides ongoing funding for affordable housing initiatives. In the current fiscal year, the adopted General Fund transfer to the Housing Trust Fund was $300,000.

In prior fiscal years, the loans or notes receivable that the City disbursed to the developers of affordable housing were recorded on the City's general ledger as balance sheet transactions, not as expenditures. As a part of its FY 2009-10 financial audit, the City's external auditors recommended that the City modify its internal processes to record the issuance of notes receivable in the Housing Trust Fund as expenditures and budget for them accordingly.

As noted above, the adopted budget for FY 2010-11 already includes a $300,000 appropriation in the Housing Trust Fund that reflects the General Fund transfer for this year. The table below outlines the total expected expenditures in the Housing Trust Fund in FY 2010-11, including administrative expenses as well as all disbursements of loan proceeds that Council has already approved.

| | |
|---|---|
| Administrative Expenses | $52,000 |
| MHO Larchmont (loan approved April 2010) | $400,000 |
| Beaucatcher Commons (loan approved March 2010) | $200,000 |
| Shiloh Road – first draw (loan approved March 2011) | $48,000 |
| | |
| Total | $700,000 |

Therefore, in order to provide budget authorization for these expenditures of $700,000, the Housing Trust Fund budget needs to be increased by $400,000. The City expects to receive $150,000 in revenue from program income in the current fiscal year, which will provide a portion of the funding for the budget amendment. The remaining $250,000 in budget authorization will come from reserves in the Housing Trust Fund.

This action complies with the City Council Strategic Operating Plan goal of "Operate the City of Asheville to the highest levels of fiscal responsibility."

Pro:

- Provides the required budget authorization for expenditures that are expected to occur in the Housing Trust Fund in FY 2010-11.

Con:

- None.

All of the disbursements that have occurred or are planned prior to June 30, 2011 have already been approved by City Council. This technical budget amendment will simply bring the City into compliance with the recommendations made by the external auditors from Dixon Hughes.

City staff recommends City Council adopt the technical budget amendment in the Housing Trust Fund in the amount of $400,000 from program income and Housing Trust Fund reserves to fully budget planned expenditures for FY 2010-11.

**ORDINANCE BOOK NO. 26 – PAGE 479**

**E. RESOLUTION NO. 11-75 - RESOLUTION AUTHORIZING THE CITY MANAGER TO IMPLEMENT A FARE-FREE WEEK TO PROMOTE TRANSIT DURING THE STRIVE NOT TO DRIVE WEEK OF MAY 16-20, 2011**

Summary: The consideration of a resolution authorizing the City Manager to implement a fare-free week to promote transit during the Strive Not to Drive Week, which is May 16-20, 2011.

Twenty years ago Bike to Work Day was launched in Asheville. Over the years this event evolved into Strive Not to Drive (SNTD) Week focusing more broadly on a variety of

transportation alternatives to the single-occupant car, including carpooling, walking, and public transit.

Strive Not to Drive Week is an annual event encouraging people to avoid driving their car for a day or part of a day in order to experience the benefits and opportunities of walking, bicycling, riding the bus, carpooling, telecommuting, etc.

This year the Transit Sub-committee of the SNTD Committee would like to offer commuters the following options:

1. Bus fare would be free throughout the week, which will incentivize commuters to take the SNTD pledge and take the bus at least some days that week.

2. Throughout the week the sub-committee will promote ***Bring a Friend and Win,*** which will encourage current bus pass holders to bring one or more friends with them on the bus. At the Transit Center, both the pass holder and friend will be able to fill out a form and enter a drawing for a free monthly pass. The SNTD sub-committee will award two in each category, for a total of four free passes. Pass holders can enter as many times as they bring a friend, but each friend has to be different to accomplish the purpose of getting pass holders to get new people on the bus. The cost of the four free passes will come from the Transportation Demand Management program budget.

3. The sub-committee also plans to target certain constituencies during the week to get them on the bus, including seniors and Black Mountain/Swannanoa residents.

These options support the City of Asheville 2010/11 Strategic Plan by helping to promote emission-reducing options such as "integrate and implement a multi-modal transportation plan including sidewalks, bike paths, signal preemption, transit, greenways, and other system improvements resulting in a funding priority list."

Pros:

- The fare-free period would help promote the Strive Not to Drive activities.
- Free-fare during the SNTD week would promote and encourage choice riders to try the transit system.
- The fare-free would potentially attract new riders.

Con:

- The system would lose about $10,000 in revenue from cash and ticket books.

The system would lose about $10,000 in revenue from current riders that pay with cash and ticket books. Operating expenses for FY 2010-11 are currently less than the budgeted amount and City staff expects this trend to continue for the remainder of the year. Based on this information, the anticipated loss in revenue can be absorbed within the approved operating budget.

Staff recommends a resolution authorizing the City Manager to implement a fare-free week in order to promote the Strive Not to Drive activities.

**RESOLUTION BOOK NO. 33 – PAGE 437**

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Smith moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Russell and carried unanimously.

**III. PRESENTATIONS & REPORTS:**

**IV. PUBLIC HEARINGS:**

**A. CONTINUATION OF PUBLIC HEARING TO CONSIDER CLOSING SEVERAL PORTIONS OF UNOPENED RIGHTS-OF-WAY AND CITY STREETS WITHIN THE MONTFORD COMMONS DEVELOPMENT AREA**

Mayor Bellamy said that she has received a request from Mr. Vincent Smarjesse, representing Montford Commons, LLC, requesting a continuance until June 14, 2011, in order to resolve certain issues. Therefore, Councilwoman Manheimer moved to continue this public hearing until June 14, 2011. This motion was seconded by Councilman Bothwell and carried unanimously.

**A. PUBLIC HEARING TO CONSIDER AMENDMENT TO CHAPTER 7 OF THE UNIFIED DEVELOPMENT ORDINANCE TO ESTABLISH A TABLE OF PERMITTED USES**

**ORDINANCE NO. 3959 – ORDINANCE AMENDING CHAPTER 7 OF THE UNIFIED DEVELOPMENT ORDINANCE TO ESTABLISH A TABLE OF PERMITTED USES**

Mayor Bellamy opened the public hearing at 5:36 p.m.

Planning & Development Director Judy Daniel said that this is the consideration of an ordinance amending the Unified Development Ordinance (UDO) to establish a table of permitted uses. This public hearing was advertised on April 1 and 8, 2011.

Planning staff was directed by the City Council to prepare the table, consolidating into one location all the uses allowed in the various zoning districts of the UDO by right (Permitted uses = P), permitted with certain additional standards (Special / USSR = S), those requiring approval by the City Council (Conditional = C), and those expressly prohibited in certain districts (EXP). Most municipalities are moving towards the adoption and utilization of a single table which many find easier to reference than separate lists included within the development standards of each zoning district. This amendment will create both a new table, but also proposes to retain the existing lists, at least for the time being.

Creating the initial version of the table was not a difficult task; but creating that table revealed numerous discrepancies between the districts and the standards for some uses. These necessitated changes such as establishing a common name for listed uses in each district and verification of districts and standards for all USSR and Conditional uses. The work revealed a host of inaccuracies and other problems that had accumulated within the UDO since its adoption. This is not an unusual situation for any large and complex ordinance, but it added considerably to the time required to complete the work initiated by the creation of the table of permitted uses.

Further, during the time of preparing these changes, a court case in North Carolina precipitated a need to reconsider the use of "expressly prohibited" uses, except in a very few circumstances. The majority of those things listed as "uses" were actually related to development standards more than use, so those prohibitions have been moved to the development standards

sections of the districts. Since the River District is set up differently (all uses are permitted unless expressly prohibited), the express prohibitions were left there.

These changes cumulatively require extensive modifications to Article 2, Definitions; Article 8, General Use Districts; and Article 16, Uses by Right, Subject to Special Requirements and Conditional Uses. The range of these technical and substantive decisions included:

1) Article 2 - Definitions:

   - Many use types, although similar, had different names in different districts. These were consolidated and one common name used.
   - Some listed uses susceptible to interpretation were not defined, and definitions were added.
   - Antiquated language was rewritten for some uses and definitions updated.

2) Article 8- Individual District Regulations. Multiple changes in Article 2 and in Article 16, led to the need for numerous technical and substantial changes in Article 8:

   - Some uses listed as USSR or Conditional uses, were actually not allowed in Article 16, and were *deleted*; some uses listed as permitted, were actually USSR uses and were *changed*; and some uses listed as USSR in Article 16, were not listed and were *added*.
   - Some uses were listed with added restrictions, and these were changed into a USSR use for consistency.
   - Some use types were combined because they were very similar in character and impact and did not need separate listing.

3) Many changes were required in Article 16 (Uses Permitted by Right Subject to Special Standards/Conditional Uses). Examples include:

   - With the full range of uses listed comprehensively in the Table, it became apparent that some uses that were not allowed in certain districts probably should be allowed, either by right or as a "USSR" or a Conditional use. New standards are recommended for those uses.
   - The standards for many uses needed "tweaking" to adjust to current concerns or to add new districts.
   - Certain use types grafted in over the years led to a disorderly listing of uses rather than the intended alphabetical listing. The list has been reordered.
   - Article 16 includes a listing of the uses and the applicable districts included before the actual uses. There were discrepancies between this list and the use standards. The USSR list is proposed to be eliminated as it is the most extensive, and the must susceptible to errors. The applicable districts are deleted from the Conditional uses list.

One very important and positive thing became evident when this comprehensive table of uses was created. Other than in the single-family residential districts and the highest intensity industrial districts, all other zoning districts are already fit the definition of mixed-use districts. A range of multi-family dwelling options are already allowed in most of these districts, although perhaps not encouraged with incentives. So as the City begins to contemplate more substantive changes to the UDO to encourage more mixed-use development the task will be to create incentives and design standards, as the residential potential is already in place.

In summary, the nature of the changes are substantially technical but not substantive and are designed make the UDO a bit more "user friendly", and a means to determine what uses are allowed in what zoning districts more easily. She also noted that the staff will next be considering and evaluating the potential for "collapsing" some zoning districts that are essentially similar in nature and uses.

Regarding compliance with City Council's goals and plans, both the Comprehensive Plan and strategic Council goals call for transparency and partnerships. This amendment proposes to strengthen the integrity of the information contained within the UDO and to make this information readily available to the public, the staff, and other interested parties.

The concept of this wording amendment was initially reviewed by the Planning & Economic Development Committee in July 2010 and again in more detail in December 2010, where the staff received direction to move forward on implementing these changes.

The staff went through the changes in detail with the Planning & Zoning Commission over three meetings in January, February, and March. With minor changes, they recommend approval of these modifications. The Commission has recommended continuing to allow the following uses in the Industrial District, which the staff had recommended deleting as permitted uses (thinking that they were not really appropriate in a district that allows heavy industrial uses): Crematories for human remains, Stadiums and arenas, Places of worship, Funeral establishments, and Theaters.

Pros:

- Makes necessary corrections to missing, conflicting, and duplicative references
- Provides a consolidated reference for all users

Con:

- Table is large and complex, color coding could assist but not available for reproduction (although will be available on-line)

City staff concurs with the Planning & Zoning Commission and recommends that the Council adopt the ordinance as proposed.

Mayor Bellamy closed the public hearing at 5:43 p.m.

In response to Mayor Bellamy, Assistant Planning & Development Director Shannon Tuch said that they will amend the ordinance to clarify the term telecommunication facilities to distinguish between the actual towers vs. antennas.

Also in response to Mayor Bellamy, Ms. Daniel said that where places of worship is mentioned to include "including, but not limited to churches, synagogues; or mosques."

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3959, as with the two amendments requested above. This motion was seconded by Councilwoman Manheimer and carried unanimously.

## V. UNFINISHED BUSINESS:

### A. DISCUSSION OF EARLY VOTING SITES FOR 2011 CITY COUNCIL ELECTION

Mayor Bellamy said that the Buncombe County Board of Elections is in the process of preparing their budget for 2011-12 and has asked if City Council will want early voting sites for their election this year.

At the February 8 and March 8, 2011, City Council meeting, City Council asked for additional information to determine if they will request the Buncombe County Board of Elections (BOE) to prepare for early voting sites for their election this year. That requested information is below: (1) The discrepancy from the $39,306 associated with the November 2009 election was a typographical error. The correct amount the four additional early voting locations for one week before the General Election in 2009 was $29,306 (which is close to the guideline of $1,000 per day per site); (2) The City of Asheville pays for all of the actual costs associated with their elections, which would include the early voting sites at the BOE Office; (3) 17,281 voters voted in the 2009 election, with 1,349 voting early at BOE Office and 2,008 people voting in the 4 additional early voting locations; (4) 2009 Saturday voting: (A) 261 voted on the 1st Saturday – 217 at the 4 locations; 44 at BOE Office; and (B) 281 voted on the 2nd Saturday – 224 at the 4 locations; 57 at BOE Office; and (4) 15,528 voters voted in the 2007 election, with 1,061 voting early at BOE Office.

Information from the February 8 and March 8 meetings was also available in order to assist Council to make their determination.

Councilman Davis felt that early voting is important and more sites is a good way to foster better turnout; however, given the City's economic outlook, he felt he could not support additional voting sites, especially since there is early voting at the BOE office. Therefore, he moved to only have early voting at the BOE office. This motion was seconded by Councilman Russell.

When Mayor Bellamy asked for public comment, no one spoke.

The motion made by Councilman Davis and seconded by Councilman Russell failed on a 2-5 vote, with Mayor Bellamy, Vice-Mayor Davis, Councilman Bothwell, Councilwoman Manheimer and Councilman Smith voting "no."

Vice-Mayor Newman felt that spending $24,000 (4 additional sites x 6 days) to decide the governance for the next four issues and to encourage greater civic involvement. He then moved to request the Buncombe County Board of Elections add four additional early voting locations six days before the general election in the north, south, west and east areas for a total appropriation of $24,000. This motion was seconded by Councilman Bothwell.

Mr. Mark Cates, resident of Asheville, opposed spending the additional $24,000 due to crucial cuts and raising fees necessary to serve the community

Councilman Smith felt that having access to voting is one of our primary responsibilities as a government. We are setting priorities and this is a priority that voters have access to the process. He feels the additional early voting sites are money well spent.

The motion made by Vice-Mayor Newman and seconded by Councilman Bothwell carried on a 5-2 vote, with Councilman Davis and Councilman Russell voting "no."

### B. FEDERAL LEGISLATIVE UPDATE

Mayor Bellamy said that there has been an almost 17% cut of Community Development Block Grant funds. More information will be forthcoming to see how it will impact our community. Vice-Mayor Newman, Chairman of the Housing & Community Development Committee, noted that they had planned for a 10% reduction.

Mayor Bellamy said that at the April 26 meeting there will be an update regarding the state legislative items. She asked for the following to be addressed and what those bills will mean to our community: independent Airport Authority, Biltmore Lake annexation, Buncombe County district elections, and no annexation authority for five years. She noted that the City was not formally notified that any of those bills were submitted. She was concerned about that process. City Attorney Oast said that he may be travelling to Raleigh to personally talk with some of our legislators.

## VI. NEW BUSINESS:

### A. ORDINANCE NO. 3960 - ORDINANCE ADOPTING THE FEES & CHARGES MANUAL FOR 2011-12 BUDGET

Director of Administrative Services Lauren Bradley said that this is the consideration of an ordinance adopting the Fees & Charges Manual for 2011-12.

The proposed FY 2011-12 fee adjustments were reviewed by the Council Finance Committee on March 15, 2010, and discussed with the full Council at the March 22, 2010 budget worksession.

For FY 11-12, it was staff's goal to minimize fee impacts to city residents and businesses while looking for opportunities to more fully recover the cost of providing specific services where feasible. This direction is consistent with City Council's Strategic Operating Plan goal to look for opportunities for fee relief. As a result, adjustments to General Fund fees adjustments are limited in scope and address a small number of areas where there was opportunity to more fully recover the cost of services.

In addition to the General Fund fee adjustments, staff has proposed adjustments to some fees in the Parking Fund, most of which are designed to bring greater uniformity to the rate structure in the City's three parking garages. The additional revenue generated by the Parking Fund fee changes is expected to be approximately $68,000. There are also some minor fee changes proposed in the Civic Center, Golf, and Transit Enterprise Funds.

Finally, staff is requesting that Council approve the FY 2011-12 Water Resources fee adjustments that are being recommended by Raftelis Financial Consulting. These adjustments, which will create more equitable cost recovery across the water customer classes, include increases to the commercial and multi-family volumetric rates and the wholesale rate. There are no changes being proposed to the residential rate in FY 2011-12. This recommendation is consistent with City Council's Strategic Operating Plan goal to improve the affordability of water rates for residential customers. The additional revenue generated by the Water Fund fee changes is expected to be approximately $340,000.

Staff is requesting that Council take action on the fee recommendations so that the additional revenue from the fee adjustments can be included in the Manager's Proposed Budget, which is scheduled for presentation to Council on April 26. By approving the fees now, Council will also provide staff will time to begin communicating fee changes to citizens, customers and stakeholders so they are aware of changes that will be implemented on July 1. Every department will be responsible for developing and implementing a communications plan to let citizens know about fee changes.

General Fund fee changes recommended by the Finance Committee would produce approximately $37,900 in additional revenue, which amounts to less than one-half of one percent of the General Fund budget. These fees are designed to more fully recover the expenditures associated with providing specific services. She highlighted: (1) Fire inspection fees in the ETJ (a) brings service to full cost recovery by adding a 20% surcharge to inspections in the ETJ; (2) Parking Garage rates (a) adjust rates to bring consistency between garages; and (b) most rate adjustments made to Civic Center garage (i) hourly: 50 cents to 75 cents; (ii) monthly: $70 to $80; and (iii) monthly discounted rates: $35 to $40; (3) Special Event discount rate (a) in FY 10-11, City Council approved a 75% discount on permit fees for non-profits holding special events; and (b) recommendation to cap events eligible for waiver to six per year per non-profit organization; and (4) Domestic Partner Registry (a) registry active by May 1, 2011; and (b) fee: $45.00.

Water Rate study recommended changes (1) Raise commercial and multi-family volumetric rates relative to single family (a) provide more equitable cost recovery; (2) Separate irrigation from residential rate (a) targets true elective usage; and (b) raise to 120% of residential rate in FY 2013; and (3) Raise wholesale rates to keep up with overall rate increases. She then reviewed the chart of the water rate recommendation increases, noting that the residential fee would remain the same.

Staff recommends that Council adopt the proposed FY 2011-12 fee proposals and staff will work to notify customers of any rate changes between now and July 1, 2011.

Councilman Bothwell moved to adopt the proposed fee adjustments for the Fiscal Year 2011-12 fiscal year. This motion was seconded by Councilwoman Manheimer.

Mr. Mark Cates was concerned that City Council was raising fees again and felt that they were generous with other people's money.

When Councilman Davis brought up a co-sponsorship request of Eblen Charities, it was the consensus of Council to have staff obtain more information on the request and related expenses and report back to City Council.

Councilwoman Manheimer said that the fees were discussed in the Finance Committee and they do reflect full cost recovery. Regarding water rates, the recommendation was to move towards full cost recovery and through the study realized that our residential rate payers are subsidizing multi-family and commercial users. We are trying to move toward a more equitable fee arrangement regarding water.

Councilman Russell agreed that many of these fees are full cost recovery; however, regarding water, he felt that the City should consider lowering our cost for residential users.

Vice-Mayor Newman too would like to see the residential rate structure go down; however, the infrastructure needs a lot of work. At this time he thinks the money is needed for the capital improvements to the system, but there will be a point when we have done enough to level off.

In response to Councilman Russell, Mr. Lex Warmath, Vice-President of Raftelis Financial Consultants Inc. (consultant conducting the Water Rate Study), explained that the cost structure for Asheville is higher than some other communities due to the age of the system and a whole range of factors. During the study they looked at whether there was cost justification for level of discount for the very large users compared to everyone else, but particularly to the residential customer. Very few utilities offer that level of discount. Typically an industrial rate might be in the 15-30% discount at max, but Asheville is at 55-60%. Regarding retaining and bringing in business, if there are very large water users, they will be more interested in

guaranteed water supply than cost difference, noting there are not that many large water users anymore.

Councilman Bothwell felt that raising the commercial rate will make it more cost effective to conserve for those businesses who still use a lot of water. Steering our community towards better conservation is an economic driver for the future. Fresh water is in very short supply internationally. He believed in 20 years, businesses will be lining up to find places that have sufficient water supply. Encouraging conservation through our rate structure will ultimately benefit the City.

Mayor Bellamy could not support the motion. She felt we should be going up small increments and talking with our large water users in advance so they can plan for any increase. Presently, some large water users are struggling to stay open. When industry looks to locate in an area, they do ask about water rates compared to other cities. She also felt that other fees proposed are not consistent in what Council discussed in their retreat.

The motion made by Councilman Bothwell and seconded by Councilwoman Manheimer carried on a 4-3 vote, with Mayor Bellamy, Councilman Davis and Councilman Russell voting "no."

**ORDINANCE BOOK NO. 26 – PAGE 539**

**Recycling**

Public Works Director Cathy Ball presented Council with another reiteration of the waste stream reduction proposal. At the March 22 worksession, staff came before Council with a proposal to increase the capacity for recycling by providing a 95-gallon container, based on pilot studies done. We also proposed to develop a semi pay-as-you-throw program that would allow people to pick different sizes of trash cans. For various reasons, Council was concerned even incrementally about increasing costs and passing those onto our residents. Staff had the opportunity to meet with an individual and bring back another proposal for Council's consideration. Staff is not asking Council to approve a contract with RecyleBank or approve an amendment with our current recycling contractor, but asking Council to consider increasing the recycling fee to help support this kind of joint concept of a two-fold approach: One is to bring in some kind of RecycleBank type program (this is a rewards program) and offer individuals to take advantage of discounts based upon how much they recycle; and (2) Providing the 95-gallon recycling containers. The purpose is not to convince Council that RecycleBank is the best route, but they have met with them and feel they have some good things to offer, but did want to present to Council their concept because there are real numbers based on Asheville.

She said the concept of the program is that more an individual recycles, the more opportunity they have to get real rewards in terms of things our community has to offer. She showed a chart of the real impact and durable results from Houston, Texas; Wichita, Kansas; Rochester Hills, Michigan; and Hollywood, Florida.

The real rewards are things that people use every day. Any company who is a national sponsor has to pay to be a part of the program and they also have to have a green component to their business. There would be over 2,000 reward partners and she showed sample reward offers. The program is also set up to allow about 40% of local and regional businesses to participate. They would not have to pay an annual amount to do that, but they would have to offer some type of discount to their restaurant or their place of business in order to participate in the program. People can also donate the RecycleBank points to support local schools or non-profit organizations. In terms of Asheville (after specifically looking at the pilot program), the benefits of participating citizens would be $89 to $138 annual reward value per household, based on 2.5 points per pound of material recycled. The pilot study indicated that just by adding the 95-

gallon containers we increase recycling by about 7%. By adding RecycleBank we have conservatively said we can add another 3% for a total increase of 10% in recycling.

She reviewed the following financial summary:

Additional Costs: City capitalizes carts - $200,000
City pays RecycleBank (marketing) - $105,000
City pays CMI additional (technology improvements to vehicles)- $38,000
Tipping fee savings ($130,000)
Net annual cost of $213,000.

The citizens would need to pay an additional $.65/month or $7.80 per year to generate revenue to support the annual cost of $213,000.

Prior to staff increasing the existing contract or entering into an agreement with RecycleBank or another type of vendor, staff would have to come back to City Council for approval.

There was considerable discussion regarding this proposal with Ms. Ball responding to various questions/comments, some being, but are not limited to: what is the total cost of the 95-gallon carts; how many years would the debt service payment be for $1.5 Million; how long will the carts last; with the new service, will the pick-up service change; does everyone need to participate and if not if there a higher per month charge for those that do; confirmation that 80% of Asheville already recycles; confirmation that the contractor will add three more lines of what can be recycled; what neighborhoods were included in the pilot recycling program and were the differences in the recycling from each neighborhood; what type of education was included in the pilot recycling program; was there 100% resident participation in the pilot recycling program; how does RecycleBank know the amount of recycling collected in order to award the points; what is the duration of the contracts with RecycleBank and the current provider; would everyone be charged the additional recycle fees whether they wanted to participate or not; and how user friendly is redeeming the points and what is the percentage of people that do redeem them.

In response to Mayor Bellamy, Ms. Ball said that the goal is to increase the types of materials that can be recycled and the amount of material people can recycle.

Councilman Russell moved to support proceeding with the waste stream reduction proposal of a RecycleBank type program. This motion was seconded by Councilman Bothwell.

Mr. David Wasserman supported this type program in that the City would be giving residents the opportunity to offset the increase.

In response to Vice-Mayor Newman, Ms. Ball said that for currently households pay $2.95/month or $36/year for recycling. Currently to run our recycling program is $940,000 and the fees to equal that amount are $2.65. The other 30 cents is used for our administration/ marketing costs and things done internally.

Vice-Mayor Newman felt this is a new innovative idea and concept; however, he would prefer to learn more about it before recycling fees are raised.

Councilman Russell withdrew his motion to support proceeding with this type program.

Mayor Bellamy scheduled this topic on the April 26 worksession and suggested other options be presented as well.

**Closed Session**

At 7:09 p.m., Councilman Smith moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including a lawsuit involving the following parties: Cherie Byrd, City of Asheville, Asheville Police Department and Eric Lauffer. The statutory authorization is N.C. Gen. Stat. sec. 143-318.11(a)(3); and (2) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Russell and carried unanimously.

At 7:21 p.m., Councilman Smith moved to come out of closed session. This motion was seconded by Councilman Bothwell and carried unanimously.

**B. WEIRBRIDGE VILLAGE LAND USE INCENTIVE GRANT REQUEST**

**RESOLUTION NO. 11-76 - RESOLUTION SETTING A PUBLIC HEARING ON APRIL 26, 2011, TO CONSIDER A LAND USE INCENTIVE GRANT AGREEMENT FOR WEIRBRIDGE VILLAGE**

At Councilwoman Manheimer's request, Councilman Russell moved to recuse Councilwoman Manheimer from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Smith and carried unanimously.

Community Development Director Jeff Staudinger said that the owners/developers of Weirbridge Village have applied for a Land Use Incentive Grant per the policy adopted by Council on March 8, 2011. This report summarizes their application and reports on eligibility and points.

The Weirbridge Village project entails the development of 280 units of rental housing located at the intersection of Hendersonville Road and Racquet Club Road in the City of Asheville. No commercial or other mixed use development is cited in the proposal.

The project, as presented to staff, appears to meet the Eligibility Requirements,

- Equity: A 20% equity contribution is required. The project developers indicate they have contributed 20.67% equity to the project. This includes unreimbursed expenses from the original PUD process.
- Energy Star Certification: The developers indicate the project will achieve Energy Star certification.
- Inside city limits, within ¼ mile of designated major highways: The project is located in an eligible location.
- Legal Costs; the developer must agree to assume all legal costs if the LUI is challenged: The developer has agreed to assume all legal costs if the Land Use Incentive policy is challenged.

The project proposes the following Public Benefit Elements:

- Workforce Housing units with assured affordability at that rent level for a minimum of ten years: *50% of total units* (10 points)
- Green Building/Energy: *Energy Star certified* (5 points)
- Located within the Sustainability Bonus Area: *Yes* (5 points)

The project therefore scores 20 points. Based on this score, the project would be eligible for a two year Land Use Incentive Grant.

The project meets the following 2010-11 Strategic Plan Goals: (1) *Affordable*: Create and preserve affordable rental and homeownership opportunities in Asheville. The project is directly related to the opportunity for public/private partnerships and innovative financing to incentivize affordable housing development; and (2) *Green and Sustainable*: Set and develop a plan for implementing a community reduction goal. The project is being built to Energy Star standards, and will be certified by Energy Star.

The project meets applicable Master Plans in the following ways: (1) The project supports the goals of the *2009 City Transit Master Plan* by its location "along major transit corridors..." ; and (2) The project supports the goals of the *2009 Sustainability Management Plan*, which calls for the City to encourage Transit Oriented Development. According to sources cited by the developer, "the minimum density at which rapid transit can operate efficiently is approximately 12 units per acre. The Weirbridge Village development is 17 units per acre." The development is recycling during construction, and post construction will offer both recycling and composting available for residents. Weirbridge Village also will employ "best management practices" stormwater measures.

The developer has requested an exemption from the requirement that a project not have yet received building permits.

Weirbridge Village requests an additional 20 points for "extenuating circumstances surrounding the 25 year stormwater design at Weirbridge Village." Staff will research and report on the developer's request pending the setting of a public hearing for the grant request.

The current assessed value of the property is $1,171,500. The developer's estimate of completed project taxable value is $19,600,000. The current annual city tax, based on current assessed value, is $4,920. The annual estimated city tax post completion, based on the developer's estimate, is $82,320. Thus, the estimated annual Land Use Incentive Grant would be $77,400, the exact amount to be determined by the length, in years, of the grant award, and the actual assessed value of the development upon completion.

The amount of fees payable for Zoning Permit, Building Permit, Driveway Permit, Grading Permit, Plan Review Fees and Water Service Connection Fee is $207,572. The value of each 10% of the fee rebate would be $20,752. The exact amount would be determined by the percentage of fee rebate awarded as part of the Land Use Incentive Grant.

If Council decides to honor the developers request for an exemption to the building permit condition, the project as proposed appears eligible for a Land Use Incentive Grant. The next step is for Council to adopt a resolution setting a public hearing date of April 26, 2011. Per policy, Council must determine whether to award such a grant, and if so, for what time period. Based on the information submitted to date, staff finds that the project is eligible for a two-year award.

When Vice-Mayor Newman asked for public comments, none were received.

Vice-Mayor Newman said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Davis moved for the adoption of Resolution No. 11-76. This motion was seconded by Councilman Russell and carried unanimously (Councilwoman Manheimer recused).

**RESOLUTION BOOK NO. 33 – PAGE 438**

## C. RESOLUTION NO. 11-77 - RESOLUTION INCREASING THE MUNICIPAL CARBON FOOTPRINT REDUCTION GOAL TO 4% EACH YEAR FOR THE NEXT FIVE YEARS

Energy Coordinator Maggie Ullman said that this is the consideration of a resolution increasing the municipal carbon footprint reduction goal to 4% each year for the next five years.

In 2007 Asheville City Council approved a carbon footprint reduction goal of 2% per year until an overall reduction of 80% was achieved. In 2008 the Office of Sustainability was formed to lead this effort. The first priority of the Office of Sustainability was to create the Sustainability Management Plan (SMP) to guide reduction efforts and prioritize opportunities. This plan was approved in 2009. The conceptual strategy for carbon reduction in the SMP is a three pronged approach: capital investment, management decision making, and creating an organization that values sustainability.

Carbon Reduction Performance to Date:

| | **Carbon Reduction** | **Programs and Initiatives** |
|---|---|---|
| FY 2007-2008 | 2.74% | Created Office of Sustainability |
| FY 2008-2009 | 2.39% | Created Sustainability Management Plan. 4/10 work schedule, automatic computer shutdown program, energy conservation competitions |
| FY 2009-2010 | 3.87% | B5 Biodiesel in fleet, recycling and sustainability education program, facilities maintenance reorganizing, fire station improvements, water pump improvements |

City Council's 2010 Strategic Operating Plan included a goal to indentify strategies and costs for doubling the municipal carbon footprint reduction goal from 2% to 4% annually. Staff evaluated, analyzed and compared opportunities in the Sustainability Management Plan, as well as identifying carbon reduction opportunities within the City's Capital Improvement Plan (CIP). Staff then created a five year Green CIP to demonstrate the City's ability to achieve 20% reduction over 5 years. The Green CIP compiles 13 separate projects such as LED streetlights, HVAC upgrades, solar thermal and alternative fuel vehicles. In addition, the Green CIP includes 4 ongoing activities including: education, building maintenance, biodiesel fuel and energy management. The Green CIP projects a 20.94% carbon footprint reduction over five years.

The financial analysis for the Green CIP demonstrates the city's ability to achieve increased carbon reduction without increasing general fund expenses. The Green CIP would be self funded through the utility dollar savings that result from implementing the projects, these dollars would revolve each year to financially support the program. Like most capital plans, specific projects included in the five-year timeframe may change; however, staff has created the plan to demonstrate the City's ability to achieve 20% reduction over five years by reinvesting utility funds saved through the implementation of energy efficiency projects. Staff would bring forward a final Green CIP and sustainability program plan as part of the FY 11-12 budget.

Staff shared this staff report with the Sustainability Advisory Committee on Energy and the Environment (SACEE) and they provided this statement:

> "SACEE enthusiastically supports Staff's proposed 5 Year, 20% Carbon Reduction Program and encourages Council to adopt this resolution through the budget process as proposed. SACEE also commends staff for developing a first-class program that will achieve the City's annual carbon reduction goal at the same time as generating substantial economic and community benefits. In adopting this program, the City will take a very

significant step towards curbing its carbon pollution, and Council and Staff are to be lauded in their leadership and managerial excellence in this effort.

This action complies with the Strategic Operating Plan by supporting Council's efforts to reduce the municipal carbon footprint reduction efforts by 4%.

Pros:

- Increased commitment to carbon reductions supports green job development and local business
- Demonstrate a strong leadership commitment to carbon reductions

Con:

- Capital funding will be required to accelerate investment in cleaner and more efficient vehicles, equipment and building systems.

Council will consider fiscal impact as part of the annual budget process.

City staff recommends City Council adopt a resolution to increase the municipal carbon footprint reduction goal to 4% each year for the next five years.

Mayor Bellamy felt it would be worth having staff pursue how the waste reduction program can fall into the sustainability category and be funded with those savings. It was her desire to see more recycling and not increase the resident rate. Ms. Ullman said that currently the policy is exclusively looking at carbon reduction for the organization, not the community. She said that she would have to analyze the financial projections.

Vice-Mayor Newman said that under the proposal, the additional savings, above paying back the debt, would go back into the energy reduction goal. If the savings were taken out of that, it would not be possible to reinvest in energy efficiency measures. He felt there are two different goals - an energy conservation goal and then solid waste management goal.

Councilman Smith wanted to make sure that there was coordination between the City Hall window replacement and the City Hall repairs. City Manager Jackson said that the primary focus of the City Hall repairs is the roof structure and securing the masonry around the building.

Vice-Mayor Newman moved to adopt the resolution to increase the municipal carbon footprint reduction goal to 4% each year for the next five years, with the amendment in the resolution to read that "Should City Council take no action at that point, the 4% carbon reduction goal would remain as the annual target." This motion was seconded by Councilman Bothwell.

Mr. Mark Cates felt that LED technology is good but the price continually goes down. He hoped that we do not move too quickly and pay more up front than we would in two years from now.

The motion made by Vice-Mayor Newman and seconded by Councilman Bothwell carried unanimously.

**RESOLUTION BOOK NO. 33 – PAGE 439**

**D. BOARDS & COMMISSIONS**

Vice-Mayor Newman, Chairman of the Boards & Commissions Committee, said that the Boards & Commissions Committee recommended re-advertising for another month for our vacancies on the Sustainable Advisory Committee on Energy & the Environment, the Fair

Housing Commission and the Historic Resources Commission. He urged anyone interested in serving on these boards to go to the City's website for an application.

**VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:**

**RESOLUTION NO. 11-78 – RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH BLUELINE SYSTEMS & SERVICES LLC. TO PERFORM AN AUDIT OF THE ASHEVILLE POLICE DEPARTMENT EVIDENCE ROOM**

**ORDINANCE NO. 3961 – BUDGET AMENDMENT FOR AGREEMENT WITH BLUELINE SYSTEMS & SERVICES LLC. TO PERFORM AN AUDIT OF THE ASHEVILLE POLICE DEPARTMENT EVIDENCE ROOM**

City Manager Jackson said that staff is request Council to authorize him to enter into an agreement with Blueline Systems & Services LLC to perform an audit of the Asheville Police Department's Evidence Room, and the associated budget amendment in the amount of $175,000.

Police Chief Bill Hogan said that their goal is to get the audit started as quickly as possible. He has met with the President of Blueline to request a complete audit of the property room and to ensure the integrity of that process. He said that drug seizure monies might be available to fund this audit and as soon as they receive permission from the federal government they will reimburse the General Fund the $175,000. The audit will look at the existing pending cases and previous cases – anything that has evidentiary value, particularly drug, guns and money.

In response to Mayor Bellamy, Police Chief Hogan said that as soon as Council authorizes the resolution, the audit should begin very quickly as the auditor understands the importance.

Mayor Bellamy requested that as soon as the audit report is finalized that we provide it to the District Attorney Ron Moore the same day.

In response to Councilman Smith, Police Chief Hogan outlined the changes which will be made to ensure this doesn't happen again, noting that he will ask the auditor for any suggestions for the operation of the evidence room.

When Mayor Bellamy asked District Attorney Ron Moore if he was comfortable with the company that will perform the audit and whether he felt the audit would meet his needs, he replied yes. He then provided Council with an outline of the occurrences to date starting with him asking the Police Chief for an audit on February 22.

Councilman Russell moved for the adoption of Resolution No. 11-78. This motion was seconded by Councilman Davis and carried unanimously.

**RESOLUTION BOOK NO. 33 – PAGE 440**

Councilman Russell moved for the adoption of Ordinance No. 3961. This motion was seconded by Councilman Davis and carried unanimously.

**ORDINANCE BOOK NO. 26 – PAGE 545**

**RESOLUTION NO. 11-79 – RESOLUTION AMENDING THE CITY COUNCIL MEETING SCHEDULE TO ADD A WORKSESSION ON APRIL 26, 2011, AT 4:00 P.M. IN THE FIRST FLOOR NORTH CONFERENCE ROOM OF CITY HALL**

Councilman Russell moved to schedule a worksession on April 26, 2011, at 4:00 p.m. in the First Floor North Conference Room to discuss the recycling program proposal. This motion was seconded by Councilman Smith and carried unanimously.

**RESOLUTION BOOK NO. 33 – PAGE 441**

**CLAIMS**

The following claims were received by the City of Asheville during the period of March 11-31, 2011: Hugh Moran (Police), Sonia Clay (Police), AT&T (Water), Linda Brown (Fire), John Powell (Streets), Mary Lou Howell (Streets), Christy K. Clavio (Building Safety), Frank McCoy (Transit), Sarah Becker (Building Safety), Alvis Tingle (Sanitation), Julie Satterfield (Police) and Christopher German (Transit). These claims have been referred to Asheville Claims Corporation for investigation.

**VIII. ADJOURNMENT:**

Mayor Bellamy adjourned the meeting at 8:15 p.m.

Magdalen Boulware
CITY CLERK

MAYOR

Tuesday – April 26, 2011 – 4:00 p.m.
First Floor North Conference Room

Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

**Recycling**

Public Works Director Cathy Ball said that the purpose of this report is to provide City Council with additional information regarding an enhanced residential recycling program.

At the April 12, 2011, City Council meeting, staff recommended an increase in the recycling fee of $0.65 per month or $7.80 per year. The current fee is $2.95 per month. Staff proposed that the additional fee would cover the following:

- Allowing, but not requiring, residents to select a larger (95 gallon) recycling container; and,
- Providing a marketing and rewards program, such as Recyclebank, for residents who participate in the recycling program.

Currently, residents can put all of their recyclables in one container. This process is known as "single stream recycling". Additionally the City is working with our vendor to add materials like yogurt containers to the accepted materials list. Neither of these two enhancements requires a fee increase.

Council requested additional information regarding the options of offering residents a 95 gallon recycling container and/or a rewards program. Staff evaluated these two options separately and determined the cost for the programs shown in the table below.

| Option | Description | Cost Increase per year | City Savings per year | Net per year | Rate Increase per month | Rate Increase per year |
|---|---|---|---|---|---|---|
| 1 | 95 gallon container | $220 K | $105 K | ($115 K) | $0.35 | $4.20 |
| 2 | 95 gallon container + Recycling rewards program | $343 K | $130 K | ($213 K) | $0.65 | $7.80 |

The recycling rewards program currently being evaluated by the City is Recyclebank. Based on Recyclebank's evaluation of Asheville, residents who participate in the recycling program could be eligible for a discount on local and national business in the amount of $90 to $130 per year.

In April 2007, Asheville City Council passed a resolution committing to reduce the municipal carbon footprint 80% by the year 2050. To lead this strategic effort, Asheville developed a Sustainability Management Plan that was adopted by City Council. Solid waste was included as a focus area in the plan, along with a series of programmatic recommendations to reduce waste generation in Asheville in its FY 2010-11 strategic plan, Council specifically identified the reduction of solid waste as a top priority.

At the April 20, 2011, SACEE recommended approval of the 95 gallon containers with the recycling rewards program or Option 2 above.

If approved, staff would need six months before full implementation could take place. During those six months, the City would procure bins and all necessary equipment, finalize changes to the existing recycling contract and implement a community education initiative.

This action aligns with Council's Green and sustainable goal: Asheville will be the southeastern leader in clean energy and environmental sustainability by expanding community education programs and implementing ways to reduce city-wide solid waste.

Pros:

- Reduction of land filled solid waste
- Increased awareness of recycled material for residents
- Supports Council's sustainability goals

Con:

- Cost per month per household will increase if either of the options is selected.

She provided some information provided by Recyclebank regarding their point redemption.

Ms. Ball, Solid Waste Manager Wendy Simmons and a representative from Recyclebank responded to various questions/comments from Council, some being, but are not limited to: in the pilot program, what are the percentages for (1) participation; (2) recycled materials; and (3) drop in waste to the landfill; could the 7% increase from the pilot program be due to the citizen awareness of the larger 95 gallons containers; do all residents on a route have to participate in the program to obtain points; how are the points determined per route; difference between coupons and point redemption; will enough people use the point reward program to make it financially beneficial for them; what percentage increase in recycling is anticipated with the Recyclebank proposal; is there an opportunity for an escape clause in the contract if certain targets are not met; can the points be donated for a cause and if so, how would that program work; does it cost businesses to participate in the reward program;

After discussion, it was the majority of Council's consensus to proceed with Option 1 and have staff bring the proposal forward for a formal vote.

**Action Items from April 12, 2011, Budget Briefing**

Director of Administrative Services Lauren Bradley said that she provided Council a memorandum to respond to action items that were identified by City Council during the April 12, 2011 budget work session.

**(1) Grove Arcade Capital Plan** – How does the City's current arrangement with the Grove Arcade contemplate capital improvements at the facility? The City of Asheville currently receives $50,000 per year, due each June 1, from the Grove Arcade Public Market foundation, as repayment for its portion of the 1998 COPS loan. The city can expect to receive this payment as outlined by June 1 of this year. Regarding capital improvements, the city of Asheville is not contractually obligated to participate in any necessary capital improvements to the Grove Arcade. Currently, Historic Grove Arcade (HGA) LLC. (Progress Energy) is responsible for 66% of the total costs for capital improvements in the building and Grove Arcade Public Market Foundation (GAR) is responsible for 34% as its cost share. In addition, GAR has $300,000 budgeted in this current budget year for on-going operational maintenance items in the building, and currently has $100,000 in capital reserves.

**(2) Transit Deviations** – Provide an update on the transit route deviations that have been addressed as part of the Transit Master Plan.

Planning to add
Zillicoa St

Removed September 20, 2010
Farmers Market, Woodridge Apartments, Dial-a-ride Discount Shoes, Dial-a-ride Ridge & Grail

Planning to Keep
Medical Park, Goodwill, Golden Living Center, Grove Park Inn , Airport, Klondyke Apartments, VA Hospital , Warren Wilson College, UNCA

Planning to Remove
Canterbury Apartments, Dial-a-ride Care Partners, Overlook Shopping Center, Hospital, Innsbruck Mall, Overlook Shopping Center , Dial - a - ride Reuters Center, Dial-a-ride Midland, Dial-a-ride Kimberly, Eliada Home, Ledgewood Apt, Spruce Hill Apts.., Meadow Apts., Overlook Apartments, Deaverview Apartments, Laurel Wood Apartments, Biltmore Square Mall, Sulpher Springs Rd., Caledonia Rd., Rock Hill Rd. east, Courtland Rd, Sante & Watauga, Liberty & Raleigh Rd.& Oakley, Baker Dr. & Rash Dr. & Oakmont Terrace, Hazel Mill Rd, Mt Clare & Hillside, Dial-a-ride NC Voc Rehab, Peachtree Rd., Erskine Apartments, River Ridge Shopping Center, West Gate, Regent Park, Target (route deviation), Pine Grove St.

Planning to Shorten Deviation
Hillcrest Apartments, AB Tech, Pisgah View Apartments

Mayor Bellamy said that she would contact Director of Transportation Ken Putnam for some questions regarding the deviations.

**(3) Golf Course Irrigation System** – How much would the golf course save annually by having the irrigation system installed on the back nine? What was the total estimated capital cost for the project? A memorandum from Parks, Recreation and Cultural Arts Director Roderick Simmons was provided.

Mr. Simmons responded to questions from Council regarding the Golf Course irrigation system.

**(4) Operational Savings** – Highlight other operational savings the City has realized as a result of past capital projects. Staff will provide this information in a follow-up memorandum.

**(5) Montford Avenue Street Rebuild** – Provide a map of the proposed Montford Avenue street rebuild project. Maps were attached.

**(6) Greenway Construction Program** – Provide maps of the proposed Beaucatcher/Overlook Greenway and the Town Branch Greenway. Provide a projected timeframe for the construction of both greenways. Maps were attached.

**Pack Place Board**

After a short discussion initiated by Councilman Russell regarding whether an elected official should be a voting member on the Pack Place Board, City Attorney Oast said that he would address the issue at the Boards & Commissions Committee meeting on May 10.

At 4:50 p.m., Mayor Bellamy adjourned the worksession.

Tuesday – April 26, 2011 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

**PLEDGE OF ALLEGIANCE**

The For Girls Only Club led City Council in the Pledge of Allegiance.

**INVOCATION**

Vice-Mayor Newman gave the invocation.

**I. PROCLAMATIONS:**

**A. PROCLAMATION PROCLAIMING MAY AS "MOTORCYCLE AWARENESS MONTH"**

Mayor Bellamy read the proclamation proclaiming May, 2011, as "Motorcycle Awareness Month" in the City of Asheville. She presented the proclamation to Mr. Steve Ensley who briefed City Council on some activities taking place during the month.

**B. PROCLAMATION PROCLAIMING MAY AS "FOSTER CARE MONTH MONTH"**

Mayor Bellamy read the proclamation proclaiming May, 2011, as "Foster Care Month" in the City of Asheville. She presented the proclamation to Ms. Heather Reardon, Foster Care Supervisor, who briefed City Council on some activities taking place during the month.

**C. PROCLAMATION PROCLAIMING MAY 1-7, 2011, AS "ARSON AWARENESS WEEK"**

Mayor Bellamy read the proclamation proclaiming May 1-7, 2011, as "Arson Awareness Week" in the City of Asheville. She presented the proclamation to Fire Chief Scott Burnette, who introduced other fire and law enforcement personnel who represent the Asheville-Buncombe Arson Task Force. Chief Burnette also briefed City Council on some activities taking place during the week.

**D. PROCLAMATION PROCLAIMING MAY 1-7, 2011, AS "DRINKING WATER WEEK"**

Mayor Bellamy read the proclamation proclaiming May 1-7, 2011, as "Drinking Water Week" in the City of Asheville. She presented the proclamation to Water Resource Department employees Leslie Carreiro, Florie Presnell, Brandon Buckner, Chad Pierce, Ivan Thomas, Audran Stevens and Steve Shoaf. Water Resources Director Shoaf briefed Council on some activities taking place during the week.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON APRIL 12, 2011

B. MOTION SETTING A PUBLIC HEARING ON MAY 10, 2011, TO ADOPT THE FISCAL YEAR 2011-12 ANNUAL OPERATING BUDGET

C. ORDINANCE NO. 3962 - ORDINANCE TO REDUCE THE SPEED LIMIT ON RUMBOUGH PLACE AND SALOLA STREET IN WEST ASHEVILLE FROM 35 MPH TO 25 MPH

Summary: The consideration of an ordinance to reduce the speed limit on Rumbough Place and Salola Street in West Asheville from 35 mph to 25 mph.

According to state law (NCGS # 20-141), the statutory speed limit in North Carolina is 35 mph inside municipal corporate limits for all vehicles and 55 mph outside municipal corporate limits for all vehicles except for school buses and school activity buses.

Furthermore, local authorities may authorize by ordinance higher speeds or lower speeds than the statutory 35 mph speed limit on locally-maintained streets provided that the higher speed limit cannot exceed 55 mph. Speed limits authorized by local authorities are effective when the appropriate signs are erected.

City staff recently completed an engineering and traffic investigation and determined that a 25 mph speed limit would be reasonable and safe on Rumbough Place from US 19-23 (Patton Avenue) to Salola Street and on Salola Street from Rumbough Place to Sand Hill Road. The subject streets primarily serve residential properties in a well established neighborhood. Daily traffic volumes are less than 1,000 vehicles per day and the 85$^{th}$ percentile speed ranges from 28.7 mph to 32.9 mph.

This action complies with the City Council Strategic Operating Plan in the Safety focus area by improving the "street experience" for all users including pedestrians, bicycles, and motorists in a primarily residential corridor.

Pros:

- City staff has been able to respond favorably to a citizen's request.
- Based on the 85$^{th}$ percentile speed, most drivers would adhere to a 25 mph posted speed limit.

Cons:

- The initial cost to install the appropriate speed limit signs is about $600.
- Typically, speed limit signs have a serviceable life of five to seven years.

The initial cost to install the appropriate speed limit signs is about $600 and is included in the current operating budget for the Transportation Department.

City staff recommends that City Council approve an ordinance enacting and/or changing a 25 mph speed limit on Rumbough Place from US 19-23 (Patton Avenue) to Salola Street and on Salola Street from Rumbough Place to Sand Hill Road in West Asheville.

ORDINANCE BOOK NO. 27 – PAGE 1

D. RESOLUTION NO. 11-81 - RESOLUTION ACCEPTING TRELLIS AS A CITY-MAINTAINED STREET

Summary: The consideration of a resolution to accept Trellis Court as a city-maintained street.

Code of Ordinances sec. 7-15-1(f)(4)a requires that streets dedicated for public use be accepted by resolution of the City Council. The developer submitted a written request on January 27, 2011, asking the City to accept the subject street as a city-maintained street.

Trellis Court from Brotherton Avenue to its dead-end is a developer-constructed street that has an average width of 18 feet with 24-inch curb and gutter, a length of 0.09 mile, and a right-of-way width of 50 feet.

Transportation Department staff and Public Works Department staff inspected the subject street and determined that it was constructed according to current standards as indicated in the City of Asheville's Standard Specifications and Details Manual. In addition, the developer's engineer has furnished a signed and sealed letter verifying that the subject street was constructed to current City of Asheville standards.

Following City Council's approval of this resolution, the subject streets will be added to the official Powell Bill List.

This action complies with the City Council 2010-11 Strategic Operating Plan within the Sustainable Focus Area by accepting street infra-structure to help support the healthy growth of the City.

Pros:

- The City of Asheville will receive Powell Bill Funds from the North Carolina Department of Transportation (NCDOT) to help maintain the street.
- The street provides access and connectivity in a residential community.

Con:

- Powell Bill Funds will not cover 100% of the total cost to maintain the street.

There will be no initial financial impact to the City, although the responsibility of maintenance will belong to the Public Works Department. The City will receive Powell Bill Funds in the future to help maintain the street.

Staff recommends that City Council accept Trellis Court as a city-maintained street.

**RESOLUTION BOOK NO. 33 – PAGE 443**

**E. RESOLUTION NO. 11-82 - RESOLUTION THE CITY MANAGER TO SIGN A CHANGE ORDER FOR PHYSICIAN SERVICES PROVIDED THROUGH THE CITY'S HEALTH SERVICES DIVISION**

Summary: The consideration of a change order for physician services provided through the City's Health Services Division.

In January 1995, Council authorized the City Manager to enter into an agreement for part-time physician services in the Health Services Division. Dr. Paul Martin entered into a contractual agreement with the City of Asheville to provide three clinic days to City employees and their families. These clinic days have been very successful for Health Services.

Due to the ongoing need to Dr. Martin's services to employees, change order action is needed to continue his assistance to employees in the Health Services facility.

This action complies with the Fiscal Responsibility prong of the City of Asheville's Strategic Operating Plan for 2010-11. By offering city employees clinic hours and complimentary health services for non-critical issues, Heath Care funds are saved in unnecessary doctor and emergency room visits, maintaining the city's long term financial commitment to high levels of fiscal responsibility.

Pros:

- The Health Services Clinic and Health Services Satellite Clinic provides on-site care for non-critical health needs
- Onsite care and services for employees saves the City of Asheville money in expenses that are not paid in unnecessary doctor and emergency room visits
- Dr. Martin is a trusted member of the Health Services staff team

Con:

- There are no foreseen cons for these services

This change order would be a one-time increase of $20,000 to the existing $100,000 contract. Funds have been budgeted and will be encumbered from the Health Care Fund to cover the cost of the change order to the contract amount.

City staff recommends City Council adopt a resolution authorizing the City Manager to sign a change order for physician services with Dr. Paul Martin, MD to continue to provide physician services to employees and their families.

**RESOLUTION BOOK NO. 33 – PAGE 445**

**F. RESOLUTION NO. 11-83 - RESOLUTION AMENDING THE 2005 LEASE WITH DEWINE SEEDS – SILVER DOLLAR BASEBALL, LLC, REGARDING THE USE OF MCCORMICK FIELD FOR THE OPERATION OF THE ASHEVILLE TOURISTS**

Summary: The consideration of a resolution authorizing the City Manager to amend the 2005 lease with DeWine Seeds to adjust the 2011 lease payments owed to the City by DeWine Seeds, contingent upon successful negotiations of a new lease for the use of McCormick Field for the operation of the Asheville Tourists.

DeWine Seeds –Silver Dollar Baseball, L.L.C. (herein "DeWine Seeds") wishes to re-negotiate the terms of the lease for the use of McCormick Field for the continued operation of the Asheville Tourists, to adjust 2011 lease payments, contingent upon a successful lease negotiation.

On July 1, 2005, the City entered into a 10-year lease with Asheville Tourist Baseball Club, Inc. for the use of McCormick Field to operate a minor league baseball program within the city limits of Asheville; and on October 25, 2005, City Council approved the assignment of lease for use from Asheville Tourist Baseball Club, Inc. to Palace Baseball, LLC.

On January 26, 2010 City Council approved the assignment of lease for use from Palace Baseball, L.L.C. to DeWine Seeds for the continued operation of minor league baseball in Asheville.

DeWine Seeds has been operating the under the original 2005 lease agreement and now wishes to re-negotiate the terms of the original 2005 agreement.

The current lease agreement calls for annual lease payments to be paid in three equal payments of $33,333.33 on June 1st, August 1st, and September 1st for years 2010-2012 for a yearly total amount of $100,000.00.

In order to plan for the take over of operational functions that could potentially be part of the new lease agreement, DeWine Seeds is requesting an amendment to the 2005 lease as follows: 1) adjust the June 1 and August 1 payments owed to the City by DeWine Seeds to $32,517.00 for each monthly payment; and 2) forgo the September 1 payment in the amount of $34,966.00, contingent upon successful re-negotiating a new lease by December 1, 2011. If terms for a new lease cannot be finalized by December 1, 2011, DeWine Seeds will be required to pay the City the September 1st payment in the amount of $34,966.00 and the terms and conditions of the 2005 lease will continue to be in effect until the expiration of the term of the 2005 lease.

This action meets Council's Strategic Operating Plan in the area of Fiscal Responsibility. By working with the DeWine Seeds –Silver Dollar Baseball, L.L.C. to re-negotiate the terms of the 2005 lease for the use of McCormick Field we are achieve the Fiscal Responsibility Goal of Operate the City of Asheville to the highest levels of fiscal responsibility by Identifying resources for strategic initiatives.

Pros

- DeWine Seeds is committed to keeping minor league baseball in Asheville.
- With the change in the economic climate, this gives the Asheville Tourists and the City an opportunity to make possible changes to a 10-year old lease developed by the previous owner of the Asheville Tourists.

Con

- None

If staff and DeWine Seeds are successful in re-negotiating the lease, the changes could potentially impact the FY 2011-12 McCormick Field revenue and expense budget. If terms for a new lease can not be finalize by December 1, 2011, DeWine Seeds will pay the City the September 1st payment in the amount of $34,966.00 and there will be no impact on the FY 2011-12 budget.

Staff recommends City Council adopt a resolution authorizing the City Manager to amend the 2005 lease with DeWine Seeds to adjust the 2011 lease payments owed to the City by DeWine Seeds, contingent upon successful negotiations of a new lease for the use of McCormick Field for the operation of the Asheville Tourists.

**RESOLUTION BOOK NO. 33 – PAGE 446**

**G. RESOLUTION NO. 11-84 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH BOLTON CONSTRUCTION AND SERVICE OF WNC, INC. FOR THE PURPOSE OF RETROFITTING THE CIVIC CENTER BANQUET HALL HVAC SYSTEM**

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Bolton Construction and Service of WNC, Inc. not to exceed $112,000 for the purpose of retrofitting the Civic Center Banquet Hall HVAC system.

City Council previously approved using grant funds approved through the Energy Efficiency and Conversation Block Grant (EECBG) for the retrofitting of the Civic Center Banquet Hall HVAC. The purpose of the grant is to reduce energy consumption, increase energy efficiency and reduce carbon footprint.

This contract was bid out on March 10, 2011. Bids were received on April 5, 2011, and Bolton Construction and Service of WNC, Inc., Asheville, N.C., was selected as the most responsive responsible bidder.

This action complies with City Council's Strategic Operating Plan goal to become the southeastern leader in clean energy and environmental sustainability as well as the objective to look for grant opportunities to enhance investment in infrastructure maintenance.

Pros:

- This retrofit will establish a separate heating and cooling zone for the banquet hall so that the large system for the rest of the facility does not need to run when using the banquet hall.
- This improvement will support the upgrade of the banquet hall space to provide an improved meeting facility for the public.

Con:

- None noted.

The project will use $66,000 previously accepted EECBG grant funds and $46,000 previously budgeted capital dollars from the Civic Center Fund.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with Bolton Construction and Service of WNC, Inc. not to exceed $112,000.

**RESOLUTION BOOK NO. 33 – PAGE 447**

**H. RESOLUTION NO. 11-85 - RESOLUTION AMENDING THE ASHEVILLE-BUNCOMBE COMMUNITY RELATIONS COUNCIL'S 2010-11 OUTSIDE AGENCY AGREEMENT**

Summary: Asheville Buncombe Community Relations Council (ABCRC) requests the amendment of their 2010-2011Outside Agency agreement to allow for the use of $18,000 to pay for prior year tax obligations, interest charges and other prior bills.

ABCRC has requested that the City and County each agree to allocate $18,000 from their existing general fund agreements to enable the organization to pay the owed interest and enable negotiations with the IRS to commence. A copy of the letter from ABCRC associated with this request was provided to Council. The Buncombe County Commissioners have approved payment of these funds. The request to use 2010-11 Outside Agency funds allocated to ABCRC for this purpose has also been recommended for approval by the City Council Housing and Community Development Committee, pending staff review of the legality of this action.

Pros:

- Approval of this request enables the organization to begin the process of seeking to negotiate settlement of repayment of past taxes;
- Fair housing compliance and enforcement activity will continue to be provided by the organization.

Cons:

- Use of these funds for this purpose will mean that these funds are not available to pay for other expenses of the organization during the remainder of this fiscal year;
- The outcome of the investigations and negotiations is not known; therefore, the organization cannot predict how these conditions will affect its future viability.

City Council approved $50,000 in Outside Agency funding for ABCRC as a part of the FY 2010-11 budget. A portion of that existing funding will be used by ABCRC to pay for the prior year tax obligations, interest charges and other prior bills. No new funds are being requested.

As recommended by the HCD Committee, the staff recommends approval of the resolution authorizing the amendment of the Outside Agency grant for the requested purpose.

**RESOLUTION BOOK NO. 33 – PAGE 448**

**I. ORDINANCE NO. 3963 - BUDGET AMENDMENT TO INCREASE THE CIVIC CENTER FUND TO REFLECT UPDATED FISCAL YEAR 2010-11 REVENUE AND EXPENDITURE PROJECTIONS**

Summary: The consideration of a budget amendment, in the amount of $170,000, from the Civic Center operating revenue, to increase the Civic Center Fund budget to reflect updated Fiscal Year 2010-11 revenue and expenditure projections.

The Civic Center has exceeded budgeted revenues due to several sold-out events in the 2010-11 Fiscal Year. Expenditures are also proportionately expected to exceed budget by the end of the Fiscal Year. As a result, staff has calculated an updated estimate of the expected revenues and expenses in the Civic Center Fund. In order to fund anticipated expenses over the last quarter of the current fiscal year, staff is recommending that the Civic Center Fund budget be increased by $170,000. The additional revenue generated by concessions will cover the cost of the budget amendment; therefore, no transfer from the General Fund is required.

This amendment has been presented to the Civic Center Commission and recommended to City Council.

This action supports the City Council Strategic Plan by supporting the Civic Center as a regional entertainment destination and improving the Civic Center customer experience.

Pro:

- Provides sufficient budget authorization for anticipated revenues and expenditures in the Civic Center Fund without increasing the General Fund transfer.

Con:

- None.

As noted above, this budget amendment is funded with Civic Center operating revenue that has exceeded original budget estimates. Therefore, there is no impact to the City's General Fund budget.

Civic Center staff and Commission recommend City Council approve a budget amendment to increase the Civic Center Fund budget by $170,000 to reflect updated Fiscal Year 2010-11 revenue and expenditure projections.

**ORDINANCE BOOK NO. 27 – PAGE 2**

**J. ORDINANCE NO. 3964 - BUDGET AMENDMENT TO COVER THE COSTS FOR MILLING AND RESURFACING SOUTH LEXINGTON AVENUE**

Summary: The consideration of a budget amendment, in the amount of $35,000 from existing Sullivan Act proceeds, to cover the costs for milling and resurfacing South Lexington Avenue in conjunction with a water improvement project.

The City of Asheville Water Department has completed construction on a waterline replacement project on South Lexington Avenue. This project was not initially budgeted for resurfacing by Public Works; however, it is advantageous to complete the infrastructure repairs in the current fiscal year.

In the FY 2010-11 Budget Ordinance, Council approved a project budget of $1,710,000 for Azalea Road Improvements with funding coming from Sullivan Act proceeds. In September of this fiscal year, Council approved moving $225,000 from the Azalea Road project to fund the Northwood Road street improvement project, which left a budget of $1,485,000 for Azalea Road. During this fiscal year, the City will be paying for the design of the Azalea Road project out of this money but the construction is not anticipated to occur until FY 2011-12.

This request is to move $35,000 (the cost of milling and paving South Lexington Ave.) in this fiscal year from the Azalea Road project to pay for these costs, and then restore the $35,000 in funding to Azalea Road in next year's budget. This change will not impact the schedule for the Azalea Road project

This action complies with the City Council Strategic Operating Plan in fully leveraging funding from the State and other sources for regional transportation improvements.

Pros:

- Will allow Public Works to make improvements to South Lexington Ave. following the waterline replacement, consistent with Sullivan Act(s).
- Provides long term investment in the City's infrastructure.

Con:

- None noted.

This budget amendment is a request to move $35,000 from one project to another in this fiscal year. It has no other fiscal impact.

City staff recommends City Council adopt the budget amendment for South Lexington Ave. improvements in the amount of $35,000 from the five percent Water Department Sullivan Act Funds.

**ORDINANCE BOOK NO. 27 – PAGE 4**

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Smith moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Bothwell and carried unanimously.

**III. PRESENTATIONS & REPORTS: None.**

**IV. PUBLIC HEARINGS:**

**A. PUBLIC HEARING TO CONSIDER A LAND USE INCENTIVE GRANT FOR WEIRBRIDGE VILLAGE**

**RESOLUTION NO. 11-86 - RESOLUTION ADOPTING THE TERMS FOR A LAND USE INCENTIVE GRANT AGREEMENT FOR WEIRBRIDGE VILLAGE APARTMENTS**

Councilman Russell moved to recuse Councilwoman Manheimer from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Bothwell and carried unanimously.

Mayor Bellamy opened the public hearing at 5:28 p.m.

Community Development Director Jeff Staudinger said that this is the consideration of a resolution approving a land use incentive (LUI) grant for Weirbridge Village. This public hearing was advertised on April 15, 2011.

Mr. Staudinger said that the Weirbridge Village project entails the development of 280 units of rental housing located at the intersection of Hendersonville Road and Racquet Club Road in the City of Asheville. No commercial or other mixed use development is cited in the proposal.

The project, as presented to staff, appears to meet the Eligibility Requirements,

- Equity: A 20% equity contribution is required. The project developers indicate they have contributed 20.67% equity to the project. This includes unreimbursed expenses from the original PUD process.
- Energy Star Certification: The developers indicate the project will achieve Energy Star certification.
- Inside city limits, within ¼ mile of designated major highways: The project is located in an eligible location.
- Legal Costs; the developer must agree to assume all legal costs if the LUI is challenged: The developer has agreed to assume all legal costs if the Land Use Incentive policy is challenged.

The project proposes the following Public Benefit Elements:

- Workforce Housing units with assured affordability at that rent level for a minimum of ten years: *50% of total units* (10 points)
- Green Building/Energy: *Energy Star certified* (5 points)
- Located within the Sustainability Bonus Area: *Yes* (5 points)

The project therefore scores 20 points. Based on this score, the project would be eligible for a two year Land Use Incentive Grant.

The project meets the following 2010-11 Strategic Plan Goals: (1) *Affordable*: Create and preserve affordable rental and homeownership opportunities in Asheville. The project is directly related to the opportunity for public/private partnerships and innovative financing to incentivize affordable housing development; and (2) *Green and Sustainable*: Set and develop a plan for implementing a community reduction goal. The project is being built to Energy Star standards, and will be certified by Energy Star.

The project meets applicable Master Plans in the following ways: (1) The project supports the goals of the *2009 City Transit Master Plan* by its location "along major transit corridors..." ; and (2) The project supports the goals of the *2009 Sustainability Management Plan*, which calls for the City to encourage Transit Oriented Development. According to sources cited by the developer, "the minimum density at which rapid transit can operate efficiently is approximately 12 units per acre. The Weirbridge Village development is 17 units per acre." The development is recycling during construction, and post construction will offer both recycling and composting available for residents. Weirbridge Village also will employ "best management practices" stormwater measures.

The developer has requested an exemption from the requirement that a project not have yet received building permits.

Weirbridge Village requests an additional 20 points for "extenuating circumstances surrounding the 25 year stormwater design at Weirbridge Village." Staff has no recommendation as this is a policy decision.

The current assessed value of the property is $1,171,500. The developer's estimate of completed project taxable value is $19,600,000. The current annual city tax, based on current assessed value, is $4,920. The annual estimated city tax post completion, based on the developer's estimate, is $82,320. Thus, the estimated annual Land Use Incentive Grant would be $77,400, the exact amount to be determined by the length, in years, of the grant award, and the actual assessed value of the development upon completion.

The amount of fees payable for Zoning Permit, Building Permit, Driveway Permit, Grading Permit, Plan Review Fees and Water Service Connection Fee is $207,572. The value of each 10% of the fee rebate would be $20,752. The exact amount would be determined by the percentage of fee rebate awarded as part of the Land Use Incentive Grant.

If Council decides to honor the developers request for an exemption to the building permit condition, the project as proposed appears eligible for a Land Use Incentive Grant. Per policy, Council must determine whether to award such a grant, and if so, for what time period. Based on the information submitted to date, staff finds that the project is eligible for a two-year award.

Mr. Richard Dirks said that the developer is proposing to designate 50% of their units as workforce housing but in their presentations to the neighbors they emphasized this would be market-rate housing, except for 5%. He was also concerned about the order in which this process came about.

Mayor Bellamy closed the public hearing at 5:31 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Vice-Mayor Newman moved to approve a land use incentive grant for Weirbridge Village for a two-year grant, not including the 25-year stormwater design request for additional points. This motion was seconded by Councilman Smith.

Vice-Mayor Newman said that the goal of the Land Use Incentive Grant is to encourage infill developments that meet City's goals and typically all those important decisions are made before the permit applications start. However, in this case the developer has made some changes to the project and will meet some specific criteria outlined in the policy. He was hesitant to grant the exemption due to the fact that the timing is occurring after the permits have been applied for, but he didn't think there will be many other projects that fall into this category. Also, staff will be monitoring the project to ensure that the developer meets the criteria.

Councilman Bothwell was pleased to see the attempted compliance with our policy rules for these type of grants. However, to be consistent with his philosophy, he will vote against the motion, not because of this project, but he didn't believe shifting the tax burden to existing taxpayers to help developers develop.

Mayor Bellamy explained how the developer has saved the City money for putting in the 25-year stormwater design and urged Council to consider supporting their request for additional points.

Vice-Mayor Newman could not support amending his motion in that it was his opinion that when the developer was before Council to rezone the RS-4 property, it was his understanding that the higher 25-year stormwater design was part of the consideration for the higher intensity of development.

The motion made by Vice-Mayor Newman and seconded by Councilman Smith carried on a 5-1 vote, with Councilman Bothwell voting "no" (Councilwoman Manheimer recused).

**RESOLUTION BOOK NO. 33– PAGE 449**

**B. PUBLIC HEARING TO CONSIDER ADOPTION OF THE CONSOLIDATED ACTION PLAN FOR FISCAL YEAR 2011 WHICH SETS OUT THE PROPOSED USE OF FEDERAL COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME INVESTMENT PARTNERSHIP ACT FUNDS**

**RESOLUTION NO. 11-87 - RESOLUTION ADOPTING THE CONSOLIDATED ACTION PLAN FOR FISCAL YEAR 2011 WHICH SETS OUT THE PROPOSED USE OF FEDERAL COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME INVESTMENT PARTNERSHIP ACT FUNDS**

Mayor Bellamy opened the public hearing at 5:42 p.m.

Community Development Director Jeff Staudinger said that this is a public hearing will be conducted on April 26, 2011 to receive comments regarding the proposed Consolidated Action Plan for Fiscal Year (FY) 2011-2012, which sets out the proposed use of federal Community Development Block Grant (CDBG) and HOME Investment Partnership Act (HOME) funds for the coming fiscal year. This will be followed immediately by Council's consideration of a resolution authorizing submission of this Consolidated Action Plan to the US Department of Housing and Urban Development.

As of Monday, April 25, the City will have available an estimated $1,216,671 in CDBG funds (18% reduction in CDBG Entitlement funding from last year). Last year, $1,603,597 was available, for a reduction in funding of $386,926. In HOME funds, $1,425,526 funds are available in the fiscal year beginning July 1, 2011. This is a 12% reduction in HOME Entitlement funding. The funding total is similar to last year.

The City's Housing and Community Development Committee has made recommendations for the use of CDBG funds, which must be used in housing or community development programs in Asheville, and the Asheville Regional Housing Consortium has recommended uses for the HOME funds, which must be used for housing programs within the four-county Consortium area (Buncombe, Henderson, Madison, and Transylvania counties). He reviewed the total of 33 programs recommended for funding – 17 CDBG and 16 for HOME. Allocations are consistent with the proposed Strategic Housing & Community Plan for 2010-2015.

HOME funds and CDBG funds will assist in creating or improving 182 housing units and helping an additional 179 households afford housing Consortium-wide. CDBG funds will also benefit more than 5,350 low-income City residents through homeless services, housing counseling, small business assistance, and other needed services. Our partner agencies will contribute almost $24,000,000 of other funding to these programs, leveraging $8.25 for every $1 of HOME and CDBG funds.

Comments received at this public hearing will be incorporated into the Plan, as will comments submitted in writing. The plan is due to be submitted to HUD by May 15.

This Annual Action Plan directly supports Council's Strategic Goals of: (1) Affordable: This plan directly supports the City's affordable housing plan, uses innovative public-private partnerships to incentivize affordable housing development, and supports initiatives to end chronic homelessness emphasizing the Housing First model; (2) Green and Sustainable: works with regional partners creating green buildings and energy conservation; (3) Safe: Supports employment alternatives for youth at risk of gang exposure; and (4) Job Growth and Community

Development: Supports diversified job growth and small business development; promotes sustainable high-density infill growth; and attracts and retains quality employees.

Pros:

- Approval of the Action Plan paves the way for the receipts of over $2,900,000 of HUD funding to the City, which will be used to create affordable housing, create jobs, and improve public infrastructure.
- HUD funding will leverage $23,000,000 of additional funding for these projects.
- Reflects the carefully considered recommendations of the City's Housing & Community Development Committee and the Asheville Regional Housing Consortium.

Con:

- It is not possible to fund all the applications received, and most of those funded will receive less than the amount requested.

The Action Plan is fully funded from federal CDBG & HOME entitlement grants, unused funds from previous completed projects, and estimated program income. Staff costs to administer the program are also fully paid from federal sources. The funded programs will provide new construction and other economic activity in the City and region, creating and sustaining employment. New assisted housing units to be constructed in Asheville will add significantly to the City's tax base. Staff will bring the FY 2011-12 CDBG and HOME budgets to City Council for adoption in June along with the rest of the City's FY 2011-12 Operating Budget. Staff notes that the reduction in funding has resulted in the loss of one staff position, with no change in contract, technical assistance and compliance requirements.

Staff recommends approval of the resolution authorizing submission of the City's Consolidated Annual Action Plan for 2011-12 to the U. S. Dept. of Housing and Urban Development.

Mayor Bellamy closed the public hearing at 5:47 p.m.

In response to Mayor Bellamy, Mr. Staudinger said that every allocation has been reduced from prior years. He then explained the required contingency amount.

Vice-Mayor Newman was pleased to highlight that the HOME Consortium's number one project was to support funding for Mountain Housing Opportunities' Eagle Market Place project, which will benefit downtown neighborhoods.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 11-87. This motion was seconded by Councilman Davis and carried unanimously.

**RESOLUTION BOOK NO. 33– PAGE 450**

**C. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF THE SWEET BISCUIT INN LOCATED AT 77 KENILWORTH ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT AND A REQUEST FOR MODIFICATIONS TO LANDSCAPING REQUIREMENTS**

**ORDINANCE NO. 3965 - ORDINANCE TO CONDITIONALLY ZONE THE SWEET BISCUIT INN LOCATED AT 77 KENILWORTH ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT**

Mayor Bellamy opened the public hearing at 5:55 p.m.

Urban Planner Jessica Bernstein said that this is the consideration of an ordinance to conditionally zone the Sweet Biscuit Inn located at 77 Kenilworth Road from RS-8 Residential Single-Family High Density District to RM-8 Residential Multi-Family Medium Density District to increase the number of guest rooms from 5 to 8 and a request for modifications to landscaping requirements. This public hearing was advertised on April 15 and 22, 2011.

Ms. Bernstein said that the applicant is requesting a Conditional Zoning for one parcel in the Kenilworth neighborhood from RS-8 (Residential Single-Family Medium Density District) to RM-8 (Residential Multi-Family Medium Density District) in accordance with Section 7-7-8 of the UDO.

The project site consists of a single parcel located at 77 Kenilworth Road with an area of approximately 0.63 acres. The lot and adjacent parcels are currently zoned RS-8, in a predominantly single-family neighborhood.

The site contains an existing three-story residential structure (approximately 6,800 square feet) and one detached accessory structure (495 square foot carriage house). The structure was built circa 1924 as a single family house and was converted into a boarding house at some point (1970s). The current owners purchased the property in 1999 and converted it into a five-room bed and breakfast (five rooms being the maximum allowed under the current zoning designation).

The applicant is proposing to maintain the use as a bed and breakfast inn but the up-zoning would allow the use of all eight (8) existing guestrooms (seven rooms in the main house and one in the carriage house). This use is a "Use by Right, Subject to Special Requirements" in the RM-8 zoning district.

The proposal includes upgrades to the existing parking area to accommodate the number of parking spaces as required by the UDO (9 spaces, 1 Handicapped parking space). Access to the site will remain in the current location from Kenilworth Road.

Landscaping compliance is required on this site due to the rezoning and includes a Type A (20') property line buffer along the north, east and south boundaries adjacent to RS-8, street trees and parking lot landscaping. There is significant mature vegetation on the site that will be used as credits for much of the required landscaping around the perimeters and within the site. Aside from the expansion of the vehicular use are and the landscaping installation, no other physical improvements are proposed on the site. It should largely retain its existing visual character.

*Modifications*

- *Property line buffer reduction* – The site is already developed and one of the existing conditions of the residential appearance of the lot is that the driveway access to the rear parking is along the side property line, where a Type A property line buffer would be required. The applicant is requesting elimination of the property line buffer planting requirements along the southern boundary (but will plant several trees where there is room towards the southeastern corner of the site).
- *Driveway, parking space & structure encroachment into required buffer area* – Structures, parking spaces and driveways are prohibited in required property line buffers. Both the existing driveway and guest house encroach into the required buffer location along the southern property boundary as well as a small portion of the proposed ADA-accessible parking space.

This proposal was recommended for approval with conditions by the Technical Review Committee on March 7, 2011. Letters and a petition of support have been received from neighbors. At their meeting on April 6, 2011, the Planning & Zoning Commission recommended approval by a unanimous 6-0 vote.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the *UDO*, the *Standards and Specifications Manual*, the *North Carolina Building Code* and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The site has existed in its presently developed state for many years and the minor physical changes to delineate parking are proposed to preserve mature trees and accommodate the existing site layout. There are no significant natural or topographic features on the site or in the immediate vicinity.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The proposal is not expected to injure the value of adjoining or abutting properties. Since the physical changes to the site are minimal and because the site has been operating as a bed and breakfast for years, the impact to abutting properties should be negligible.

   Although the requested modification to greatly reduce the property line buffer on the southern boundary will result in less than the ideal / required vegetated screen, the driveway and parking in this location is an existing circumstance and not a result of this proposal. Additionally, none of the parking spaces are immediately adjacent to the property line, none face the neighboring property, most spaces are screened by the carriage house and the layout of the parking area is such that headlights of parked or idling vehicles will not be directed at the adjacent property.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   This residential structure was built in the 1920s and is similar to the other houses in the immediate neighborhood. The gravel parking area and carriage house in the rear yard is similar to other larger single-family lot configurations in the area containing garages and accessory apartments. The bed and breakfast use has been operating for many years and has done so with little intrusion. Only very minimal physical changes are proposed on the site and it should remain in harmony with the scale, bulk, coverage, density and character of the area.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**

The *Asheville City Development Plan 2025* encourages mixed but compatible uses in residential areas, stating that adaptive reuse preserves architectural diversity and contributes to a healthy neighborhood (p.69), using bed and breakfasts as a specific example. A goal identified through the *Plan* relates to recognizing and developing the historic component of Asheville's tourist economy (p.95) and creating different accommodation opportunities for visitors to the area (p.195).

This proposal relates to City Council's goals on *job growth & community development* by supporting the local economy – in which tourism plays a major role.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   The project site is located on Kenilworth Road (transit Rte. 4) in an established residential neighborhood where adequate infrastructure exists. In addition, preliminary review by other service providers has not revealed any problems for continued service to the site.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
   No traffic congestion or traffic hazard is anticipated. The use is existing and adequate off-street parking is provided on the site.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- The conditional zoning allows an established bed and breakfast to utilize all existing guestrooms within the structure – supporting tourism opportunities.
- The addition of a handicapped parking space improves accessibility to the use.

Con:

- Due to existing site constraints, the required property line vegetation cannot be installed – reducing the visual buffer between the southern neighbor and the driveway and parking area.

Ms. Angela Maddix, owner of Sweet Biscuit Inn, said that the neighborhood has embraced their business and they enjoy being a part of Asheville's tourist and business community. She asked for Council's support of her conditional zoning request.

Mayor Bellamy closed the public hearing at 5:59 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3965, to conditionally zone property the Sweet Biscuit Inn located at 77 Kenilworth Road from RS-8 Residential Single-Family High Density District to RM-8 Residential Multi-Family Medium Density District to increase the number of guest rooms from 5 to 8 with approval to the modifications to landscaping requirements, subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with full cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in

reconsideration of the project by the reviewing boards; and (5) This project will undergo final review by the TRC prior to issuance of any required permits. This motion was seconded by Councilman Smith and carried unanimously.

**ORDINANCE BOOK NO. 27 – PAGE 6**

**D. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF THE ASHEVILLE SURGERY CENTER LOCATED AT 5 MEDICAL PARK DRIVE FROM COMMERCIAL INDUSTRIAL DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT/CONDITIONAL ZONING**

**ORDINANCE NO. 3966 - ORDINANCE TO CONDITIONALLY ZONE THE ASHEVILLE SURGERY CENTER LOCATED AT 5 MEDICAL PARK DRIVE FROM COMMERCIAL INDUSTRIAL DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT/CONDITIONAL ZONING**

Mayor Bellamy opened the public hearing at 6:01 p.m.

Assistant Planning & Development Director Shannon Tuch said that this is the consideration of an ordinance to conditionally zone the Asheville Surgery Center located at 5 Medical Park Drive from Commercial Industrial District to Commercial Industrial District/Conditional Zoning for the construction of an 8,203 square foot addition to the existing building and a 27 space expansion of the parking area. This public hearing was advertised on April 15 and 22, 2011.

Ms. Tuch said that the applicant, Asheville Surgery Center, LLC, currently located at 5 Medical Park Drive in the Regional Medical Park located off of Sweeten Creek Road, is seeking conditional zoning approval to allow for an expansion. The property is currently zoned CI (Commercial Industrial). The applicant is seeking rezoning to CI/CZ (Commercial Industrial Conditional Zoning). The proposed expansion to the 30,632 square foot facility is for an additional 8,203 square feet to accommodate a Pediatric Acute Care Unit (at the front of the existing facility) and to provide for an uninterruptable power supply (UPS) to be housed at the rear of the existing facility. Additional parking, a total of 27 new spaces, is also proposed.

Due to the space limitations on the site the applicant is proposing to place this additional parking in the front setback on the property. The City's Unified Development Ordinance (UDO) at Section 7-8-20(f)(9) provides that in the Commercial Industrial District, "no parking shall be permitted in the required front setback." The applicant applied for a variance to the City's UDO Section 7-8-20(f)(9) but was denied in February of this year by the Board of Adjustment. The Board turned it down primarily because the hardship was a result of the applicant's own actions. The board recognized that the parameters under which they can grant relief are very limited while the parameters for Council are much broader. They felt this was a better CZ application than Board of Adjustment application and were pleased there was another option available as they recognized the reasonableness of the request. As a result, the applicant is now applying for a conditional zoning change to allow for a modification so that parking will be allowed in the front setback. The proposed additional spaces will be approximately 2.9 feet to 18.9 feet from the property line with an average distance of 10.4 feet from the property line. Along the front there is an additional (approximately) 13 feet in sidewalk and green space in the right-of-way.

In addition to the requested modification for the location of the parking the front setback, another modification will need to be granted to allow for a reduction in the width of the street tree/buffer area. This is required per Section 7-11-3(d)(3)d. of the UDO which states that the street tree/buffer area cannot be less than 7 feet in width. Staff is supportive of both modifications as we believe there are site constraints. Also, there is already additional green space in the right-of-way and the fact that the average width meets City standards.

To minimize the impact of the parking in the front, the applicant is proposing to screen the parking areas from the roadway with low, landscaped berms and screen walls approximately 30 inches high.

The Technical Review Committee (TRC) reviewed this proposal on March 7, 2011, and recommended approval with conditions. The applicant has subsequently resubmitted new plans addressing the vast majority of the conditions. The applicant is in the process of addressing the remaining minor conditions.

This conditional zoning request was recommended for approval (5-0 – one absent, one excused) by the Planning and Zoning Commission at its meeting on April 6, 2011. No additional conditions were added.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**

   The applicant is not changing the use of the property. The site has been used for a medical facility for many years now and is surrounded by other medical facilities. The project, if approved must meet the technical standards set forth in the City's Unified Development Ordinance and Standards and Specifications Manual. The existing site plan shows compliance with the City's development standards except those for which a modification is sought.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   Most existing vegetation on the site is being maintained. Proposed plant materials exceed the requirements found in the UDO.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The use of the land is not changing. Enhanced landscaping and the provision of additional needed parking spaces should improve the value of the surrounding properties.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   The proposed expansion of the Asheville Surgery Center is moderate in size and the facility is surrounded by similar medical buildings/operations.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
   The proposed expansion of the Asheville Surgery Center supports the goal of enhancing the role of Asheville as Western North Carolina's regional medical center.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**

The proposed use is located just off of a regional commercial corridor (Sweeten Creek Road) and transit Dial-a-Ride service is available from Transit Route 8 of the City's Transit System. The project has received approval from the City's Technical Review Committee concerning issues of water, fire and police protection, etc.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
The use proposed is not changing and is only moderately expanding.

This conditional zoning request was recommended for approval (5-0 – one absent, one excused) by the Planning and Zoning Commission at its meeting on April 6, 2011. No one but the developer's representative spoke at the meeting.

Pros:

- Expansion of existing medical facility supports the City's goal of enhancing the role of Asheville as Western North Carolina's regional medical center.
- Additional needed parking for the facility will be provided with the modification.

Con:

- None noted.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable and recommends approval of the conditional zoning request with the modifications to the location of the parking and the width of the street buffer as requested and with the conditions set forth in the TRC and the standard conditions.

Mr. Bill Roark, project manager representing Mission Hospitals, said that this conditional zoning request is necessary to accommodate the needs of the patients. He urged Council to support this conditional zoning request.

Mayor Bellamy closed the public hearing at 6:05 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3966, to conditionally zone property the Asheville Surgery Center located at 5 Medical Park Drive from Commercial Industrial District to Commercial Industrial District/Conditional Zoning, subject to the conditions recommended by staff and subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with cut-off fixtures or full cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; and (5) This project will undergo final review by the TRC prior to issuance of any required permits. This motion was seconded by Councilman Davis and carried unanimously.

**ORDINANCE BOOK NO. 27 - PAGE 10**

**E. PUBLIC HEARING TO CONSIDER PERMANENTLY CLOSING AN ALLEY OFF MADISON STREET**

**RESOLUTION NO. 11-88 - RESOLUTION TO PERMANENTLY CLOSE AN ALLEY OFF MADISON STREET**

Mayor Bellamy opened the public hearing at 6:06 p.m.

Assistant Public Works Director David Foster said that this is the consideration of a resolution to permanently close an alley off Madison Street. This public hearing was advertised on February 25, March 4, 11 and 18, 2011.

N. C. Gen. Stat. sec 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, adjacent property owners, Andy Brokmeyer of Millagro LLC, Scott Blake, and Alison Blake, have requested the City of Asheville to permanently close an alley off of Madison Street.

The Greenway Commission met on March 10, 2011, and unanimously approved the closure. There are no utility conflicts with this closing.

This closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties

Con:

- None

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt the resolution of intent to permanently close an alley off of Madison Street.

Mayor Bellamy closed the public hearing at 6:07 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Russell moved for the adoption of Resolution No. 11-88. This motion was seconded by Councilman Bothwell and carried unanimously.

**RESOLUTION BOOK NO. 33– PAGE 451**

**V. UNFINISHED BUSINESS:**

**A. ORDINANCE AMENDING TO REQUIRE PAWNBROKERS AND SECOND-HAND DEALERS TO SUBMIT DAILY PAWN AND/OR PURCHASE TRANSACTIONS TO LAW ENFORCEMENT THROUGH ELECTRONIC MEANS**

Police Chief Hogan provided Council the following memorandum: "On March 8, 2011, staff presented to City Council an amendment to the City's pawnbroker ordinance which would require pawnbrokers and second-hand dealers to submit their daily pawn and/or purchase transactions of second-hand goods to APD electronically. Council continued the matter to April 26, 2011 in order for staff to host another public meeting and incorporate requested revisions by

City Council into the ordinance as follows: 1) exemption of consignment sales; 2) a $25 threshold and 3) exemption of purchases from garage sales, estate sales and auctions.

"On April 7, 2011, APD held a public information session to give details about City Council's requested revisions, explain the reporting process, and receive feedback from local businesses owners affected by the proposed amendments. At the meeting, staff received a significant amount of community resistance to the proposed amendments, most notably that the reporting requirements would put a significant hardship on local businesses during a difficult economic time.

"Therefore, it is my recommendation that the ordinance be pulled from Council's agenda scheduled for April 26, 2011. At this time, I feel it is best not to move forward with the ordinance but continue analyze the issue over the next 12 months with the possibility of revisiting it in the future.

"I briefed the Public Safety Committee at their April 19, 2011, meeting about the concerns raised at the public information session and my subsequent recommendation. It was their unanimous recommendation to revisit the ordinance at the next Public Safety Committee meeting, which is scheduled for July."

Councilman Russell, Chairman of the Public Safety Committee, said that the Public Safety Committee will revisit the ordinance in July.

**B. MILLS RIVER WATERSHED PROTECTION REPORT**

City Manager Jackson said that as the Mills River Watershed continues to develop, questions about management of the area comprising the watershed and protection of water quality need to be addressed.

The City of Asheville Water Resources Department recognizes the need for additional attention to the issues involving the development of the Mills River watershed. The department is interested in efforts to protect the water quality of the Mills River and strongly supports those efforts. This interest is linked to the inherent responsibility to protect a valuable natural resource and to protect one of the City of Asheville's water sources.

A report (2002) prepared by the Mills River Partnership Planning Committee and the Land of Sky Regional Council addressed a watershed management strategy for the Mills River watershed. The City of Asheville was involved in this effort in a technical advisory role because we operate a water treatment facility on the Mills River.

There was discussion in 2010 about the watershed management strategy study and how to provide for the protection of the Mills River watershed. The City of Asheville and the City of Hendersonville were identified as funding sources for Mills River water quality protection based on the use water from the Mills River. The City of Asheville's position is that the management strategy needs to be updated to include more recent initiatives, and the formation of agencies and governments with responsibilities in the watershed. After the management strategy is updated, an implementation plan for action items should be developed. Documentation of a timetable for implementation milestones and the cost of identified actions will be developed. Cost sharing arrangements will be sought with inter-local agreements between the various benefactors of the management initiatives.

There are currently expenditures for watershed protection of the North Fork and Bee Tree watersheds, but there are not currently expenditures for intervention in the Mills River watershed. It is anticipated that certain action items will require funding from multiple sources to include the City of Asheville Water Resources Department.

A "Mills River Partnership" organization is being formed independently to investigate and address water quality issues in the watershed. It is staff's recommendation that Council continue to support their efforts as an advocacy and advisory group and that the City Council appoint a City Council liaison to serve as the liaison to this new organization, or to endorse Water Resources Director Steve Shoaf, as the City Manager's designee" to monitor their formation.

In response to Mayor Bellamy, Water Resources Director Steve Shoaf explained how the City protects our existing watersheds and why it is important.

Mayor Bellamy noted that the membership of the proposed Partnership consists of a farmer and someone from the WNC Agricultural Center. She felt it was important for the Partnership to consist of not just people who are concerned about the environment and local elected officials, but also include people who own land.

When Mayor Bellamy asked for public comment, no one spoke.

Councilman Davis moved to support the watershed protection efforts and intergovernmental partnership and endorse the on-going partnership by appointing the City Manager, or his designee, to monitor the formation of the Partnership. This motion was seconded by Councilman Smith and carried unanimously.

It was the consensus of Council to instruct City Manager Jackson to develop an information action plan to keep City Council updated on this Partnership.

**C. PRESENTATION OF THE CITY MANAGER'S RECOMMENDED BUDGET**

Administrative Services Manager Lauren Bradley briefly reviewed the City Manager's recommended budget.

She said the budget goals are as follows: (1) Maintain the current tax rate to support financial stability for Asheville families and businesses; (2) Continue to support our workforce as well as the stability of the region's economy by avoiding layoffs, salary cuts, and furloughs; (3) Align resources with strategic planning and core services while minimizing service reductions to other areas; and (4) Develop a comprehensive capital improvement program that maximizes opportunities to address capital goals and Master Plan priorities.

General Fund overview: (1) Overall General Fund budget is decreasing by 0.61% compared to FY 2010-11 budget (a) Second consecutive year of overall decrease in budget; (2) Overall staffing level will decrease by 15 full-time positions (including frozen positions); and (3) Budget challenges have presented transformational opportunities – innovation, efficiency, strategic planning.

Revenues (1) No property tax increase; (2) Revenues projected to decrease by 0.6% (a) 1.2% growth projected in property tax revenue; (b) 3% growth projected in sales tax revenue; and (c) Decreases in investment earnings, grant funding, and development review fees; and (3) No fund balance appropriation.

Revenue Enhancements: (1) Council-approved fee adjustments: $37,900; and (2) No adjustments to business license or development review fees.

Expenditure reductions: (1) Salaries and wages - $1,200,000; and (2) Managed savings - $800,000. Costs avoided: (1) Health Care fringe benefits -$1,500,000-$2,000,000.

Water Fund (1) Continued savings strategies including freezing three vacancies, modifications to take home vehicle policy, and implementation of energy efficiency projects; (2) Adjustments to commercial and multi-family volumetric water rates as well as the wholesale rate

to create more equitable cost recovery across customer classes; (3) No changes are proposed to the residential water rate; and (4) Capital budget includes $6.2 million for water capital improvement projects.

Other Funds: (1) Transit Fund (a) Transit System revenues down $600,000 due to decrease in State funding; partially off-set by decreases in expenditures (i) Increases General Fund transfer by $350,000 for a total of approximately $985,000; and (ii) $500,000 transfer from Parking Fund; (2) Parking Fund (a) Parking revenues are projected to exceed expenses by $358,740 in FY 11-12 (i) Includes partial debt service for 51 Biltmore parking deck; and (ii) Includes transfer of $406,260 in operating funds to parking capital improvements; (3) Civic Center Fund (a) General Fund transfer to Civic Center fund unchanged (i) $300,000 General Fund contribution for facility renovations; (4) Stormwater Fund (a) Stormwater fees remain unchanged (i) $700,000 appropriated from Stormwater Fund balance for major project on Victoria Road; and (5) Golf Fund (a) Expenditure over revenue projections: $150,000-$200,000; and (b) Indentifying opportunities for cost savings to minimize or avoid a Golf Fund transfer in FY 11-12 adopted budget.

She reviewed with Council the Capital Improvement Program 5-year projection (Fiscal Years 2012-2016) which totaled $59.45 Million. She then reviewed the Capital Improvement Program for Fiscal Year 2011-12 which totaled $17.55 Million.

Capital Improvement outcomes include (1) 30% increase in funding for street maintenance (a) 5.9 miles resurfaced; (2) Sidewalk program funding nearly doubled (a) 1.68 miles maintenance, 1.82 miles new sidewalk; (3) 1.5 miles of new greenway construction; (4) $2 million for critical infrastructure (a) Bridge replacement, retaining wall work, etc.; and (5) $7 million for facilities and deferred maintenance (a) $5.5 million for exterior repairs to City Hall.

Next steps include the (1) Budget public hearing May 10; and (2) Budget adoption May 24.

Mayor Bellamy urged Council to e-mail any questions/comments to City Manager Jackson or Ms. Bradley prior to the public hearing on May 10 on items they would like addressed or highlighted at the public hearing.

City Manager Jackson complimented the thorough work of Budget Manager Tony McDowell, Budget Analyst John Sanchez, and especially Ms. Bradley for this excellent work to prepare this budget document. He also recognized the efforts of the entire management team along with the Employee Benefits Committee. This is a balanced budget with ½ million less dollars, no use of Fund Balance and no tax increase. The budget has been presented in a businesslike fashion.

**D. STATE LEGISLATIVE UPDATE**

City Attorney Oast said that this is a review of activity in the 2011 Session of the North Carolina General Assembly.

Council adopted its Legislative Agenda on January 25, 2011. The North Carolina General Assembly convened for the 2011 regular session on January 26. By letter dated February 21, 2011, the City transmitted its legislative agenda and supporting materials to the local delegation. The deadline for submitting local bills to bill drafting and for the introduction of local bills in either house has passed. The next significant deadline in the General Assembly is the May 12 "crossover" deadline, which is the date by which a bill needs to be adopted in one chamber of the General Assembly in order to "cross over" to the other chamber and remain eligible for consideration during this session.

I. Asheville Requests. The status of the specific requests made by Asheville is reported below.

A. Woodfin/Asheville boundary adjustment. In the March 22 update, it was reported that this proposal appeared to be stalled because we had not received information about the boundary adjustment desired by Woodfin to accommodate the proposed roundabout on Merrimon Avenue near the entrance to the Reynolds Mountain subdivision. However, just prior to the March 30 local bill deadline for the House, Woodfin indicated that it was ready to proceed, and began to supply the necessary information. A bill has now been introduced (House Bill 562). We are contacting property owners in the area to advise them of the proposal, but also to advise that their particular properties will not be affected unless they "opt-in," as the proposed legislation provides. We are also working to refine the descriptions of the property that will be affected, and have spoken with a surveyor about this.

B. Clarification of the Video Service Competition Act. Our review of the summaries of bills that have been introduced (we receive the summaries daily) indicates that no bill has been introduced to amend or clarify the Video Service Competition Act, or to otherwise hold the useful internet facilities harmless when local cable t.v. franchises transition to the State cable franchise. We are aware that this, along with the use of municipal right of way for fiber-optic services in general, is an issue of concern in several communities in North Carolina, but all are affected in slightly different ways. We are sharing information with some other communities also seeking clarification of their rights and responsibilities.

On a related note, a bill has been introduced that would limit the ability of local governments to build and operate fiber-optic broadband networks within their community. On March 8, the City Council adopted a resolution expressing our concerns about this bill and limitations that it places on municipalities, and transmitted that bill to our delegation. In April, bills were introduced (HB 595, SB 511) that allow for public/private partnerships in the provision of communications services, including broadband and high speed internet. We will review those, and wait for more information.

C. Clarify legislation regarding financing of energy improvements. We have seen no legislative proposal to clarify local authority regarding financing of energy improvements on individual properties. However, there has been interest in the North Carolina Save$ Energy Program that Council supported by resolution. At the request of Senator Nesbitt's office and the NC Saves Energy Alliance, we supplied Senator Nesbitt with additional information so that he could draft and support a bill. We have been asked also to help identify a sponsor in the House.

II. Other Legislative Matters Affecting Asheville.

A. Annexation. Attempts to limit City initiated annexation continue, and many bills, local and general, have been introduced. Early in the session, bills were introduced in both houses of the legislature to impose a moratorium on annexation until July 1, 2012, and to stay annexations in process, including those that are in some stage of judicial review. This would affect the Biltmore Lake Annexation, and possibly the recently completed Coopers Hawk annexation. In addition, a bill has been introduced specifically to repeal the Biltmore Lake Annexation; this bill is similar in effect to bills that have been introduced regarding other cities in North Carolina, including a bill to repeal an annexation in one eastern North Carolina city that is no longer subject to judicial challenge. A bill has also been introduced to impose a five year moratorium on annexations by municipalities in Buncombe County.

Since the last report, bills have been introduced that are more comprehensive revisions of existing annexation law. A major (but by no means only) point of

contention in the bills is the requirement for a referendum in the area proposed for annexation. This provision has been modified in one of the bills into a "petition veto," which is viewed as only slightly different from a referendum, but preferable to a moratorium of potentially indefinite duration. On April 19 a bill was introduced in the Senate that is a comprehensive revision of the annexation law, but does not include a referendum/veto provision. We will continue to monitor these bills. The North Carolina League of Municipalities has more comprehensive information on the various annexation reform proposals. The League is working on the state-wide annexation bills, and is tracking the local bills. However, they advise that communication from local elected officials about local bills such as Biltmore Lake is crucial. As Council knows, he has written to members of the House delegation expressing our opposition to the local bills affecting our recently completed annexations. While that is helpful, the League has stressed the importance of communications from local elected officials. Information is available from City staff to assist in that process.

B. Greater Asheville Area Regional Airport Authority. On March 30, a bill (HB 552) was introduced to establish the Greater Asheville Regional Airport Authority as an independent authority. The City of Asheville did not request this bill, and had no input into the language of it. The proposal provides for Henderson County, Buncombe County, and Asheville each to have two seats, with the seventh seat to be appointed by the other six, and generally provides for the Authority to have some governmental powers, such as the ability to own real property.

   Most if not all of the land on which the airport is situated is owned by the City of Asheville, and leased to the Airport Authority. Of particular concern to the City regarding the legislation is a provision that requires the City to convey its property to the Airport Authority, apparently without compensation. We are investigating what property would be involved, how the property was acquired, who paid for it, and the effect of FAA regulations on our ability to convey the property and receive compensation.

C. Leicester Incorporation. Last month, a bill was introduced (HB 327) to incorporate the Town of Leicester. Several years ago, when a similar proposal was considered, the City Council expressed concern about the size of the area to be incorporated, and the lack of a referendum requirement. The 2011 Bill contains a provision making the incorporation subject to a referendum. As to the size of the proposed incorporation area, we have been supplied with a map, and are in the process of comparing it to the previous proposal to see how it differs. Of particular concern to us is the Erwin Hills/Lee's Creek area, which was the subject of discussions with Woodfin regarding a proposed annexation agreement demarcation line. He provided Council with a comparison of the previous and current proposals.

III. Other Bills of Interest. Bill numbers and a brief summary are provided below. Please advise if more information is needed on any bill. To our knowledge, these bills have not been adopted yet.

- HB 417 – Extend the time period for tax-deferred holding of real property as a future site for housing for low or moderate income households from 5 to 10 years.

- HB 454 – Direct the Environment Resources Commission to study issues related to safe artificial slope construction in mountainous areas of the State.

- HB 572 – Provide greater accountability for non-profit entities that receive public funding. Requires disclosure of financial statements.

- HB 746 – Protect the constitutional right of citizens to participate in government proceedings. Discourage SLAPP tactics.
- HB 777 – Amend the State constitution to provide that marriage is the union of one man and one woman.
- HB 797 – Limit the extraterritorial jurisdiction of municipalities to urban purposes and to prohibit the inclusion of property in an extraterritorial jurisdiction area for environmental impact laws or regulations.
- HB 861 – Authorize additional revenue options for local governments (food and occupancy taxes, excise taxes, impact fees).
- HB 687 – Provide that when cities and counties enact ordinances or take administrative actions for which there is no statutory authority, and the ordinance or action is an abuse or authority, a successful plaintiff may recover attorney fees.
- HB 652 – Property Owners Protection Act. Award attorney fees to successful litigants in land use cases against local government.
- SB 386 – Repeal prohibition on local government contracts with labor unions.
- SB 412 – Make violations of the public records and open meetings laws a Class 3 misdemeanor.
- SB 515 – Authorizing the Joint Legislative Commission on municipal incorporations to study the procedure for incorporating municipalities.
- SB 601 – Revise statutes relating to regional public transportation and allow local governments to enter into funding agreements.

This is only a partial list, and we have probably not included some bills that would be of interest. As always, please let us know if you want more information on the bills listed above, or information on an item not covered in this report.

Regarding the Leicester incorporation, he showed a map of the area included in 2008. Council at that time was concerned with the large footprint and felt the incorporation should be subject to a referendum. The 2011 Bill contains a provision making the incorporation subject to a referendum. In addition, they have now come back to us with a significantly smaller footprint; however, it includes some additional area not included in the 2008 proposal. The additional area is ¼ square mile but the expansion of the boundary is closer to Asheville. In 2008 Council adopted a resolution approving incorporation of the Town of Leicester subject to certain concerns.

Mayor Bellamy said that the ¼ square mile addition was to include an entire subdivision.

In response to Councilman Russell, City Attorney Oast said that part of the statutory process, requires the legislature to seek our feedback since we are close to the proposed Leicester boundary line.

Vice-Mayor Newman asked if instead of endorsing or opposing Leicester's incorporation that Asheville state that it does not have a recommendation on creation or non-creation of this municipality. But, if the legislature decides to move forward and it is created, Asheville believes

there should be a referendum and that the step-back boundary on Leicester Highway would be our preference.

In response to Councilwoman Manheimer, City Attorney Oast said that the statute requires notification of proposed incorporation and we are qualified to express our approval of the proposed incorporation. If Council approves the incorporation it would be helpful to Leicester. If not approved, it is not the end of their effort. The statute has been satisfied by notifying us and giving us the opportunity to approve it or not.

Councilman Davis did not support the newly drawn lines.

Councilman Russell moved to approve Leicester's efforts, subject to the concerns of the additional area close to Asheville and a referendum. This motion was seconded by Councilwoman Manheimer.

In response to Councilman Bothwell; City Attorney Oast said that there is a menu of services that incorporated municipalities must provide.

Mayor Bellamy wondered by Council did not want to give comments to our legislatures on this incorporation when Council gave comments on the Mills River incorporation. She felt the people in favor of incorporation of Leicester reduced the boundary lines, but felt it was necessary to include the addition property in order to not split the subdivision. She supported Leicester's incorporation with no concerns.

In response to Councilman Smith, Urban Planner Blake Esselstyn said that the proposed Leicester incorporation is roughly 24 miles (in 2008 it was 37 miles). The City of Asheville is 44 square miles. The population for the proposed Leicester incorporation is approximately 11,000.

Vice-Mayor Newman would not support the motion as he felt it was bad land use policy to incorporate vast undeveloped rural land into municipalities.

The motion made by Councilman Russell and seconded by Councilwoman Manheimer carried on a 4-3 vote, with Vice-Mayor Newman, Councilman Bothwell and Councilman Davis voting "no."

In response to Councilwoman Manheimer's earlier question in the Leicester incorporation issue, City Attorney Oast clarified his statement in that if a proposed incorporation area fails to get the approval of a nearby adjacent city, then the Commission on Municipal Incorporations may not make a positive recommendation. But in this case, we have gotten a conditional approval. The last time this happened, the conditional approval was okay.

Regarding the bill to establish an independent Airport Authority, Councilman Davis was concerned that Asheville did not have any input into the language of the bill. He understands the regional approach, but the runways were built by Asheville taxpayers and there is property that we should enjoy some partnerships with the Airport Authority. He was also concerned with the reduction of Asheville's seats on the Authority being reduced to two.

In response to Vice-Mayor Newman, City Attorney Oast said that he did not recall the previous legislative proposal a couple of years ago to establish an independent Airport Authority having the property transfer provision.

Vice-Mayor Newman, member on the Regional Airport Authority, said that he is open to the idea of an independent Authority because in some ways it doesn't seem like a major change in terms of how the Airport operates. There are lots of federal funding that has gone into the development and operation of the Airport. Much of how airports are run in the United States is dictated by the Federal Aviation Administration (FAA), not at the local level. Even though there

has not been a requirement to appoint a representative from Henderson County, the Authority has done that because they felt they should be at the table. One of the major challenges for the Airport is a lot of residents who live in WNC who choose to fly drive to Charlotte or Greenville. We have been working hard to encourage people in WNC to fly local. He liked the idea to continue growing the regional support for the Airport; however, he is concerned about precedent of the title transfer issue. He questioned having the legislature essentially seize a local government's real estate and give it to someone else. The other concern the Airport Board members have is that the legislation is very specific in terms of the types of people that the different local governments can appoint to the Board. The Board felt there would be many excellent people who want to serve on the Board who would be excluded from serving because of the restrictions. The Board also took a position against the prohibition on elected officials serving on the Board. The Board feels there is a lot of benefit for having a combination of elected and unelected people serving together.

In response to Councilman Russell's shock that the bill has moved forward with no input from the City, Vice-Mayor Newman said that the Airport Authority has endorsed the concepts of an authority, but took specific positions against the Board appointment provisions in terms of elected officials and who can be appointed.

Councilman Russell felt it was important that the City express its position on this bill soon. He felt the legislature should not act on this bill until the City of Asheville has had an opportunity to do their due diligence on issues affecting City taxpayer dollars and land.

In response to Councilwoman Manheimer on whether the provision requiring the City to convey property within 90 days of enactment of the bill is challengeable, City Attorney Oast said that staff is researching the enforceability of that provision. He said that much, if not all, of the property was acquired with significant federal assistance. It may have been the initial acquisition was a higher percentage of City funds than the current 90% federal grant funds.

Vice-Mayor Newman questioned if they can enact the bill to create an independent authority without the conveyance of property provision. City Attorney Oast didn't think ownership of the property is a necessary element of an independent authority.

Vice-Mayor Newman moved to communicate to our legislators that the City of Asheville is concerned about the following provisions (from a substantive level as well as from a precedent prospective) that (1) dictate in great detail who can serve on the board; (2) prohibit elected officials being able to serve on the board; and (3) dictate transfer of real property of the taxpayers of Asheville to another entity. This motion was seconded by Councilman Russell.

Councilman Davis asked for a friendly amendment to consider a stronger term than "concern". Vice-Mayor Newman and Councilman Russell accepted the friendly amendment to rephrase the motion to "strong concern and objection based on the information we currently have."

Mayor Bellamy opposes the motion. She has not sat idly by on this issue and has asked City Attorney Oast many questions. She has a concern that this independent authority bill was introduced without any consideration or common courtesy of Asheville although Asheville invested in the Airport many years ago. That is wrong and if we show support, then it looks as though writing bills without any consideration of municipalities is okay. She is also concerned that we are losing one seat on the Board and prohibiting elected officials from serving. She has concerns about the bill itself and will not support the motion, unless it says we are opposed to the bill. This is a precedent that a group from Raleigh can create authorities without any input from cities.

Councilman Davis felt the motion should be that we completely reject the idea, but at least the motion on the floor is doing more than doing nothing.

City Attorney Oast said that he is glad to communicate to the legislature; however, he could not over-emphasize the importance of City Council contacting our legislators to express objections or approvals of anything that affects Asheville.

Regarding compensation to Asheville, Vice-Mayor Newman felt that it's probably not possible to do some general sort of compensation to the City for its historic investments in the Airport. There is a lot of FAA funding tied up in the Airport. Basically, what the FAA says is if you want funding in the airport, then it all has to be used for aviation purposes. One place where it could be some potential would be if any of the properties at the Airport are ever developed for non-aviation purposes. Many years ago the City taxpayers helped with funding at the Airport to acquire a large piece of land, most of which is where the Airport is located and most is used for Airport purposes. But, there are some pieces of real estate around the fringes of the Airport that may not be needed now, or in the future, for more Airport purposes. If those properties are developed for commercial purposes and if they were acquired by City taxpayer funding, then we do have an historic equity interest in those properties. We could say that if there are any properties that are ever developed for non-aviation commercial purposes that were acquired with City funds, the City's equity interest in that property should be recognized and compensated.

Mayor Bellamy has a concern of transferring property that is not currently being used for aviation purposes. She has asked the City Attorney for information on what exactly what land is out there. Not everything was acquired with FAA dollars. We should not turn over every piece of land that was bought with the idea of the Airport, because some has commercial value and some is vacant property. There are opportunities for other uses besides aviation. She would not automatically title all that land over to the independent authority.

Vice-Mayor Newman felt his motion covered Mayor Bellamy's concern in that we are opposed to that. The second part would be if under whatever circumstances if they were every developed for non-aviation commercial purposes, by our consent or without our consent, that the City's historic equity investment in this property should be recognized and compensated.

Councilman Russell felt the City should state that they are opposed to this bill and the process should be very inclusive of Asheville, and any future use and major changes should be done in a more joint venture and collaborative manner. There has been a lot of things he has just learned from the discussion at this meeting. Mayor Bellamy supported this action.

Vice-Mayor Newman felt that the reality is that there is a cross-over deadline a couple of weeks away. He felt the legislators who are supporting this will say if we don't do something now, then the bill can't be re-introduced for two years. He is fine with us saying that until there is a better process and we don't want this bill enacted, but he also thinks there is value in outlining (based on the information we do have) what some of our really substantive concerns are, so that if something does get forwarded there may be ways to take those specific concerns into consideration.

Mayor Bellamy is not supportive with an independent Airport Authority as proposed unless there are significant changes. She had no problem for the bill to be delayed.

Councilwoman Manheimer said that she too is frustrated that there has been no collaborative process, but she is concerned the bill will pass. She felt this may be our only chance to say anything about the bill. She would at least like to convey that if this happens, we would at least like these components addressed.

Councilman Bothwell felt we should express our objection to the bill and then list our specific objections.

Councilman Smith would be comfortable in saying we oppose the bill based on these points. A precedent is being set and what's happening is the General Assembly is running rough-shot over municipal governments. To have representatives that don't represent all City residents making decisions for the entire City of Asheville without our input is inherently wrong. We are beginning to see a pattern develop with this and unless we begin to say we need to be included, if we are going to have good government that truly represents all the people of the City of Asheville, it is our responsibility to take that position.

Vice-Mayor Newman restated his motion as follows: Based on the information we have at this time and with the absence of the opportunity for the City Council and Asheville taxpayers (who have invested in the property to have meaningful input on it), we are opposed to the bill with the following specific concerns (1) provisions to restrict the types of citizens who can serve on the board, (2) proposal to transfer title away from the taxpayers of Asheville to another entity (also sets a precedent); and (3) if any properties are developed, under any circumstances where City tax-payer funding was used, for non-aviation purposes that the City's equity position be recognized and considered. This motion was seconded by Councilman Russell.

Councilman Russell asked for a friendly amendment that an additional concern is the make-up of the board in terms of the number of people from each jurisdiction who can serve on the Board. Vice-Mayor Newman accepted the friendly amendment.

Councilman Davis also asked for a friendly amendment that we emphasize that we are strongly opposed (especially strongly concerned regarding compensation) to this happening without our input and ask if this moves forward that the concerns outlined be taken into consideration. Vice-Mayor Newman and Councilman Russell accepted the friendly amendment.

Vice-Mayor Newman also amended his motion that we formally request an opportunity to dialogue further regarding the proposal. Councilman Russell agreed with the amendment.

Vice-Mayor Newman said that he felt there is a way this can be done right, but he is at least open to the idea of an independent authority. With federal regulations over the management of an airport, this is not a huge change.

Mayor Bellamy hoped our legislators and Airport Authority will give Council the opportunity to understand the changes proposed that impact our holdings and our partnerships. We need to be a part of the dialogue.

Vice-Mayor Newman's sense is that in terms of the Airport Authority, he was not sure they were aware of the title transfer issue.

When Mayor Bellamy asked for public comment, no one spoke.

The amended motion made by Vice-Mayor Newman and seconded by Councilman Russell carried unanimously.

Councilman Smith said that there are things moving in the state house that they are not asking for input when it will affect all the citizens of a city. It seems to him that we may be coming towards a time that it may be helpful to let Raleigh know what it is the sense of this Council that we would like to be included in conversations that affect the City of Asheville.

Mayor Bellamy said that she is traveling to Raleigh on May 4 and will most certainly bring up with issue with our legislators.

Councilman Smith moved that it is the sense of the Asheville City Council that good government that represents all the people takes into consideration the views of municipally elected officials. Recent moves to legislate without the courtesy of consultation or collaboration

and without the opportunity to deliberate are antithetical to principles of representative democracy and working towards the greater good. This motion was seconded by Councilman Bothwell.

Vice-Mayor Newman asked for time to think about the specific language before voting on the motion. Councilman Smith withdrew his motion.

It was the consensus of Council to ask City Attorney Oast to draft a letter for the Mayor expressing, on the City's behalf, the lack of opportunity to participate in the deliberative process on legislation that has substantial affect on the City of Asheville.

Councilman Bothwell hoped we are communicating to our legislators that we oppose HB 777.

Councilman Bothwell also asked Council to support the effort to legalize medical marijuana.

## VI. NEW BUSINESS:

### A. RESOLUTION NO. 11-89 - RESOLUTION ADOPTING THE CITY COUNCIL STRATEGIC OPERATING PLAN GOALS FOR 2011

Administrative Services Director Lauren Bradley said that this is the consideration of a resolution reaffirming City Council's Strategic Operating Plan for 2011.

***2011 Strategic Operating Plan Update*** - At its February 2011 retreat, the Asheville City Council affirmed its commitment to six key focus areas that serve as the foundation for the City of Asheville's Strategic Operating Plan. These focus areas are:

- **Affordable** - *The City of Asheville will offer a standard of living that is affordable and attainable for people of all income levels, life stages and abilities.*
- **Fiscal Responsibility** - *The City of Asheville will support a stronger, more prosperous community by making smart investments that accomplish lasting, tangible returns.*
- **Green & Sustainable** - *Asheville will be the southeastern leader in clean energy and environmental sustainability.*
- **Job Growth and Community Development** – *Asheville will support a dynamic and robust local economy with balanced sustainable growth.*
- **Safe** - *Asheville will be one of the safest and most secure communities when compared to similar cities.*
- **Multimodal Transportation** – *Integrate and implement a multi-modal transportation plan including sidewalks, bike paths, signal preemption, transit, greenways, streets, rivers and access to river, and other system improvements resulting in a funding priority list.*

***Performance Measurement and Reporting*** - During the 2010-2011 fiscal year, city staff continued to provide City Council with quarterly management reports in order to provide information about performance tied to the organization's adopted strategic goals and related initiatives.

Moving forward with the comprehensive quarterly management report, Council will continue to incorporate quarterly updates from each Council Committee Chair. Each Chair will present to the Council on policy initiatives designed to further achievement of the strategic goals.

Pros:

- Provide Council and city staff with an overall direction and goals of the organization
- Provide Council and city staff with a measure of success

Con:

- None-noted

The Strategic Operating Plan will provide direction for Council and the Executive Management Team throughout the budget process. Additionally, the estimated fiscal implications for the 2011-2012 fiscal year can be found in the report.

City staff recommends City Council adopt a resolution reaffirming Council's Strategic Operating Plan.

When Mayor Bellamy noted a change in the Juvenile Justice Program, Ms. Bradley said they will revise the funding notes; however, that the Strategic Operating Plan will be a put into a formal document without the progress notes or fiscal implications.

With Council's goal of 15% Fund Balance, Mayor Bellamy said that at the end of the audit year, we accounted for $2 Million (that we had told the Local Government Commission that wasn't accounted for) in our budget which impacted the Fund Balance. That would have taken us over the 15% minimum threshold. She asked what happened. Ms. Bradley said that at that point the calculation was projecting that we might be somewhere around 14.8% when you took that into consideration. After we went back and worked through the numbers, in actual process we have seen this fiscal year the Fund Balance is at the 14.2% level and that is what we are projecting will end the fiscal year. With the proposed budget, there is no Fund Balance appropriation so we would expect that to remain constant through next year. What could affect that number is if revenues recover beyond what we have projected (although she felt that was unlikely next year). The following year there might be some potential for staff to make some formal recommendations to Council to address our Fund Balance level.

Mr. Mark Cates noted the big challenge facing the City is uncertainty but he was pleased that the City will be supporting businesses through the reduction of taxes, fees and regulations

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Smith moved for the adoption of Resolution No. 11-89. This motion was seconded by Councilman Bothwell and carried unanimously.

**RESOLUTION BOOK NO. 33 – PAGE 453**

**VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:**

**Closed Session**

At 7:39 p.m., Councilman Smith moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including a lawsuit involving the following parties: Caledonia, LLC, Frank Howington, III, and City of Asheville. The statutory authorization is N.C. Gen. Stat. sec. 143-318.11(a)(3); (2) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease. The property is located in the Cedar Hill Road area. The

statutory authorization is contained in G.S. 143-318.11(a)(5); and (3) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Russell and carried unanimously.

At 7:50 p.m., Vice-Mayor Newman moved to come out of closed session. This motion was seconded by Councilman Smith and carried unanimously.

Magdalen Bouleson
City Clerk

Mayor

Tuesday – May 10, 2011 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

**PLEDGE OF ALLEGIANCE**

Mayor Bellamy led City Council in the Pledge of Allegiance.

**INVOCATION**

Councilman Bothwell gave the invocation.

**I. PROCLAMATIONS:**

**A. PROCLAMATION PROCLAIMING MAY 15-21, 2011, AS "NATIONAL PUBLIC WORKS WEEK"**

Mayor Bellamy read the proclamation proclaiming May 15-21, 2011, as "National Public Works Week" in the City of Asheville. She presented the proclamation to (1) Ronnie Hoglen and Joel Tweed from the Transportation Department; (2) Michael Dixon (Streets), Rachael Banks (Fleet Management) and Robert Johnson (Sanitation) from the Public Works Department; and (3) James Ball, Ricky Foster, Andrew White, Gene Ball, Darrell Ball and Kathleen Conner from the Parks & Recreation Department.

**B. PROCLAMATION PROCLAIMING MAY 22, 2011, AS "ASHEVILLE LIVING TREASURES DAY"**

Mayor Bellamy read the proclamation proclaiming May 22, 2011, as "Asheville Living Treasures Day" in the City of Asheville. She presented the proclamation to Ms. Carmen Ramos-Kennedy; and Asheville Living Treasures Jessie Coleman, Mary T. Parker and Lucille Flack Ray. Mayor Bellamy asked for a moment of silence as Mr. Hyman Dave, an Asheville Living Treasurer, passed away on Friday. Ms. Carmen Ramos-Kennedy stated the difference these individuals have made to our community.

**C. PROCLAMATION PROCLAIMING MAY 14, 2011, AS "STAMP OUT HUNGER DAY"**

Mayor Bellamy read the proclamation proclaiming May 14, 2011, as "Stamp Out Hunger Day" in the City of Asheville. She presented the proclamation to Mr. Gerald Brown, who briefed Council on the program.

**II. CONSENT AGENDA:**

At the request of Councilman Russell, Consent Agenda Item "E" was removed from the Consent Agenda for discussion and/or an individual vote.

**A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON APRIL 26, 2011**

**B. ORDINANCE NO. 3967 - ORDINANCE CONCURRING IN A SPEED LIMIT CHANGE ON CEDAR LANE, TWO SYCAMORE DRIVES, LINDEN STREET, PEACHTREE STREET, SYCAMORE TERRACE AND LINDEN STREET IN SOUTH ASHEVILLE FROM 35 MPH TO 25 MPH**

Summary: The consideration of an ordinance concurring in a speed limit change on SR 3159 (Cedar Lane), SR 3165 (Sycamore Drive), SR 3171 (Sycamore Drive), SR 3172 (Linden Street), SR 3174 (Peachtree Street), SR 3175 (Sycamore Terrace), and SR 3205 (Linden Street).

According to state law (NCGS # 20-141), the statutory speed limit in North Carolina is 35 mph inside municipal corporate limits for all vehicles and 55 mph outside municipal corporate limits for all vehicles except for school buses and school activity buses.

Furthermore, when an engineering and traffic investigation determines that a speed limit other than the statutory 35 mph speed limit would be reasonable and safe along a state-maintained street that is inside municipal corporate limits, a concurring ordinance from the municipality is needed. Typically, these investigations are done by municipal staff but it is not unusual for the North Carolina Department of Transportation (NCDOT) to do the investigations along their streets.

The Division 13 Traffic Engineer for NCDOT recently completed an engineering and traffic investigation and determined that a 25 mph speed limit would be reasonable and safe on the following streets:

- SR 3159 (Cedar Lane) from a point 0.19 mile west of US 25-A (Sweeten Creek Road) eastward to US 25-A (Sweeten Creek Road).
- SR 3165 (Sycamore Drive) from a point 0.12 mile east of US 25-A (Sweeten Creek Road) eastward to US 25-A (Sweeten Creek Road).
- SR 3171 (Sycamore Drive) from US 25 (Hendersonville Road) northeastward to a point 0.32 mile northeast of US 25 (Hendersonville Road).
- SR 3172 (Linden Street) from a point 0.04 mile south of SR 3159 northward to a point 0.03 mile north of SR 3159.
- SR 3174 (Peachtree Street) from SR 3159 northward to a point 0.18 mile north of SR 3159.
- SR 3175 (Sycamore Terrace) from a point 0.03 mile west of SR 3172 eastward to a point 0.11 mile east of SR 3172.
- SR 3205 (Linden Street) from a point 0.15 mile south of SR 3162 northward to SR 3162.

The subject streets serve a well established residential community in South Asheville. City traffic-engineering staff agrees with the recommended action.

This action complies with the City Council Strategic Operating Plan in the Safety focus area by improving the "street experience" for all users including pedestrians, bicycles, and motorists in a primarily residential corridor.

Pros:

- The North Carolina Department of Transportation did the engineering and traffic investigation to determine the reasonable and safe speed limit.
- Since the subject streets are state-maintained streets, the North Carolina Department of Transportation will install and maintain the appropriate signs.

Con:

- There are no known cons with the subject action.

There is no fiscal impact with the subject action. The NCDOT will be installing and maintaining the appropriate signs.

City staff recommends that City Council approve an ordinance concurring in a speed limit change on SR 3159 (Cedar Lane), SR 3165 (Sycamore Drive), SR 3171 (Sycamore Drive), SR 3172 (Linden Street), SR 3174 (Peachtree Street), SR 3175 (Sycamore Terrace), and SR 3205 (Linden Street) in South Asheville from 35 mph to 25 mph.

**ORDINANCE BOOK NO. 27 - PAGE 14**

**C. RESOLUTION NO. 11-90 - RESOLUTION AMENDING THE 2010 COMMUNITY DEVELOPMENT BLOCK GRANT AGREEMENT WITH THE ASHEVILLE-BUNCOMBE COMMUNITY RELATIONS COUNCIL**

Summary: The Asheville-Buncombe Community Relations Council has requested an amendment to their 2010-2011 Community Development Block Grant (CDBG) Grant Agreement, to allow for greater flexibility in the use of those funds.

The contract between the City and Asheville-Buncombe Community Relations Council (ABCRC) calls for the full grant amount of $45,000 to be disbursed for a full-time investigator's salary. HUD Hair Housing Assistance Program funds can also be used to pay for the investigator's salary. ABCRC requests that CDBG funds also be allowed to be used for the supervision and management of the fair housing activity, and other management costs.

The projects directly support the City's Strategic Operating Goals: *Affordable*: The amendment is supportive of the City's goal of providing safe and decent affordable housing units to the citizens of Asheville.

Pro:

- The amendment will enable ABCRC to operate through the end of this fiscal year

Con:

- None

The Community Development Block Grants subject to the amendment are allocated in the City's Consolidated Annual Action Plan for CDBG and HOME Programs for 2010. There is no change in the allocated amount.

The Housing and Community Development Committee has positively reviewed this request and staff recommends that City Council approve the requested amendment.

**RESOLUTION BOOK NO. 34 – PAGE 1**

**D. RESOLUTION NO. 11-91 - RESOLUTION AUTHORIZING CONDEMNATION TO ACQUIRE PROPERTY WITHIN AN EXISTING SEWER EASEMENT IN ORDER TO ESTABLISH A NEW SEWER LINE**

Summary: The consideration of a resolution authorizing staff to proceed with condemnation of a portion of an existing sewer easement for the purpose of providing sewer access to adjoining properties.

In 2003 and 2004, the City approved two Housing Trust Fund loans totaling $217,000 for the development of forty-two (42) townhomes in the first phase of a project in West Asheville. The original development plan proposed a maximum of 176 units over three phases. Following completion of the first ten (10) units the project stalled and the developer defaulted on both the construction loan and the City's Housing Trust Fund loans.

After several failed workout plans, the property went to foreclosure in August 2009. In addition to the partially developed parcel, other property securing the construction loan was also sold at auction. To protect the taxpayer investment in the Housing Trust Fund, the City purchased two of the adjoining parcels below market value (Parcel no. 962816976700000 and Parcel no. 962827416400000). The partially developed parcel (Parcel no. 96282706260000) containing the MSD pump station was purchased by the Managing Member of the Villas at Cedar Hill, LLC who participated as a private bidder in the sale. Immediately following the sale, a new LLC (Resurgence Development) was created and took title to the property.

The City has negotiated an agreement with Habitat for Humanity to purchase the adjoining parcels obtained at the foreclosure sale. Sale of this property would immediately return $300,000 to the Housing Trust Fund and an additional $150,000 over time. A development plan is in place to construct 55 single family homes that will be purchased by low-income families. The closing is contingent upon the City providing sewer access to the property. There is an existing recorded sewer easement that will allow sufficient access to the pump station, which is located less than 50 feet from the property boundary; however, an additional line would need to be added in that easement, thereby creating an "additional burden".

When the City inquired about an easement to allow this access, the developer responded that he would accept $250,000. Subsequent inquiries were referred to the developer's attorney, who has not returned telephone calls. Staff research has indicated the value of the easement is more likely to be in the range of $500- $5,000.

The alternative to a voluntary conveyance is condemnation. The condemnation necessary to achieve the sewer access would be limited to a portion of the existing easement, with perhaps a temporary construction easement needed on either side of the existing easement area. The easement for the additional pipe would be transferred to MSD following the condemnation. MSD has indicated they will accept the easement. Access to the easement will not adversely impact the existing development on the parcel controlled by Resurgence Development. The cost of construction of the sewer line in the easement would be the responsibility of the developer, not the City.

Under North Carolina Law, municipalities have the authority to use the power of eminent domain to acquire private property through condemnation for the public use and benefit and specifically for the purpose of establishing, extending or improving sewer lines and systems. The proposed condemnation meets both the public use and the public benefit tests required by law.

The associated costs of a condemnation are *estimated* at $15,000. This would include fair compensation for the easement as established by an appraisal, the appraisal, survey, legal fees, and associated court costs. These costs would be a direct administrative charge to the Housing Trust Fund. The request to proceed with condemnation was presented to the Housing and Community Development Committee at their April meeting, and they voted unanimously to bring this matter before City Council.

The proposed action directly supports the City's Strategic Operating Goals as follows: (1) *Affordable*: The proposed action supports the City's goal of providing safe and decent affordable housing units to the citizens of Asheville; and (2) *Sustainable*: The proposed action will enable the development of new housing units located near transit lines, higher urban development densities, and encourages higher standards of energy efficiency. The proposed action also supports the priorities of the Consolidated Strategic Housing & Community Development Plan by increasing the housing stock, providing affordable single family homes, building high quality energy-efficient housing, and coordinating development with transportation and jobs.

Pros:

- Allows for future affordable housing development on adjoining parcels as originally planned.
- Allows City-owned property to be sold and developed, resulting in substantial increased tax revenues upon build-out.
- Allows the City to proceed with sale of property, returning $300,000 immediately to the Housing Trust Fund and an additional $150,000 over time.
- Increases usage of the pump station which is currently functioning at minimum capacity.
- Brings resolution to a situation that has consumed vast amounts of staff time and administrative expense over a seven-year time frame.

Cons:

- Requires additional investment of an estimated $15,000 from the Housing Trust Fund at a time when resources are scarce.

Administrative expenses related to a condemnation filing are estimated at $15,000 and will be charged directly to the Housing Trust Fund. If the condemnation is completed, the sale of City-owned property to Asheville Area Habitat for Humanity will return $300,000 to the Housing Trust Fund immediately upon closing, and an additional $150,000 over time. The sale is anticipated to be completed in November 2011. Future City tax revenues are estimated at $28,875 annually following construction of fifty-five (55) single family homes by Habitat on the adjoining parcels presently owned by the City.

As recommended by the Housing and Community Development Committee, staff recommends City Council adopt a resolution approving:

1. Condemnation to acquire property for the public purpose of establishing a new sewer line to connect a property to be developed for affordable housing to an existing sewer system and pump station.

2. The attorneys representing the City to institute the necessary proceedings under applicable provisions of the North Carolina General Statutes to acquire the property herein described.

3. The City Manager to execute any necessary documents related to the acquisition by condemnation of property for a sewer easement and the conveyance of this sewer easement to MSD.

**RESOLUTION BOOK NO. 34 – PAGE 2**

**E. RESOLUTION SETTING A LIVING WAGE FOR CITY OF ASHEVILLE FULL- AND PART-TIME EMPLOYEES AND CONTRACT EMPLOYEES WORKING ON GENERAL SERVICE CONTRACTS $30,000-$90,000 IN VALUE**

This item was removed from the Consent Agenda for discussion and/or an individual vote.

**F. RESOLUTION NO. 11-94 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO A SUPPLEMENTAL AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION TO INCREASE THE PROJECT BUDGET FOR THE LONG SHOALS ROAD PROJECT**

**ORDINANCE NO. 3968 - BUDGET AMENDMENT FOR SUPPLEMENTAL AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE LONG SHOALS ROAD PROJECT**

Summary: The consideration of a resolution authorizing the Mayor to execute the Supplemental Agreement with the N.C. Dept. of Transportation for the Long Shoals Road Project, and the associated budget amendment, in the amount of $2,059,242.

On March 23, 2005, the Mayor executed a Utility Agreement between the City of Asheville and the NCDOT for the Long Shoals Road Project, TIP # R-2813C, in the amount of $1,805,799.61. The project consisted of the installation of a new 24-inch water line on Long Shoals Road from East of I-26 to US 25 (Hendersonville Road). The 16-inch plastic line was replaced to loop the water system to the west and south regions of the system and to eliminate costly line breaks, which caused water outages to area customers.

On March 10, 2009, the NCDOT issued a Memorandum stating that additional materials were required for the water line replacement, which caused a necessary increase of $253,441.88 for an amended project budget of $2,059,241.49. A Supplemental Agreement to increase the cost of the project was provided to Water Resources on April 14, 2011, for approval and execution by the Mayor and City Council.

This project is part of City Council's strategic plans to maintain City infrastructure.

Pro:

- Approval of the Supplemental Agreement will allow Water Resources to fully reimburse the NCDOT for the City's participation costs and to close out the project.

Con:

- If the Supplemental Agreement is not executed, then the NCDOT will charge a late payment penalty and interest on any unpaid balance due in accordance with G.S. 147-86.23 and G.S. 105.241.1.

Water Resources created a capital project to retain contingency funds needed for the increase until the Supplemental Agreement was received by the NCDOT. The contingency funds will cover the entire cost for the increase, so no other capital projects are affected.

|---|---|
| NCDOT Long Shoals Rd Original Budget | $1,805,799.61 |
| Project Increase | $ 253,441.88 |
| Total Project Cost | $2,059,241.49 |

City staff recommends City Council adopt a resolution authorizing the Mayor to execute the Supplemental Agreement with the NCDOT for the Long Shoals Road Project, R-2813C, increasing the project budget from $1,805,799.61 to $2,059,241.49.

**RESOLUTION BOOK NO. 34 – PAGE 5**
**ORDINANCE BOOK NO. 27 - PAGE 15**

**G. ORDINANCE NO. 3969 - BUDGET AMENDMENT FROM BB&T TO COVER COST OF MATERIALS AND NEW EQUIPMENT TO SUPPORT A VOLUNTEER PROJECT AT THE STEPHENS-LEE COMMUNITY CENTER**

Summary: The consideration of a budget amendment, in the amount of $5,400, from BB&T to cover cost of materials and new equipment to support a volunteer project at the Stephens-Lee Community Center.

Nationally, BB&T has created a corporate volunteer program to encourage local branches to give back to the community. In addition to making a provision for paid time off for staff to volunteer, BB&T has created a pool of funds to be used to support projects identified by local BB&T branches. Asheville Area BB&T branches have chosen the Stephens-Lee Center as the site for their 2011 project and, in addition to providing approximately 60 volunteers over 4

days, will be donating $5,400 to cover the costs of materials and improvements for the Center. A representative from BB&T has been working with Parks, Recreation and Cultural Arts staff to develop a scope of work and indentify materials and equipment necessary to complete the project. Members of the East End Neighborhood Association and Stephens-Lee Alumni Association will be invited to participate in the project. The project is slated to occur on May 17 through 20, 2011.

The project will include painting the entrance hall, kitchen, all-purpose room and classrooms, purchasing and spreading appropriate mulch for two play areas and replanting and mulching the front planting beds of the Center. The project will culminate in a cook-out at Stephens-Lee for neighborhood and Stephens-Lee alumni organizations members, BB&T volunteers and Center program participants and staff provided by BB&T staff.

This action complies with the City Council Strategic Operating Plan in that it addresses the city's aging infrastructure and improves the customer experience at the Stephens-Lee Center. This action also reflects the City of Asheville's efforts to improve and extend services by identifying volunteer opportunities and working with community groups to accomplish improvement projects on public property and in public facilities.

Pros:

- Improvement in infrastructure and customer experience at the Stephens-Lee Center
- Demonstration of community support for the East End Community
- Incorporates citizen volunteers in providing essential services to the community

Con:

- None noted

The project has been budgeted so that the donation will cover all costs for the project.

City staff recommends City Council adopt a budget amendment to accept the donation from BB&T in the amount of $5,400.

**ORDINANCE BOOK NO. 27 – PAGE 17**

**H. ORDINANCE NO. 3970 - BUDGET AMENDMENT TO ACCEPT REBATE FUNDS FROM PROGRESS ENERGY**

Summary: The consideration of a budget amendment, in the amount of $32,581.89, from Progress Energy Carolinas, to refund expenses incurred during the City Hall Lighting Retrofit for premium efficiency lighting products.

City Council previously approved accepting grant funds for the Energy Efficiency and Conversation Block Grant (EECBG) for various municipal retrofits including the City Hall Lighting Retrofit. In the six months since retrofit completion this project has already produced hard energy savings of $8,400. The proposed budget amendment is to accept a rebate check from the electric utility for using premium efficiency fixtures in this retrofit. Once accepted these rebate funds would then be used in the LED streetlight project previously approved by City Council.

This action supports City Council's Strategic Operating Plan goals to reduce the municipal carbon footprint 4% each year.

Pros:

- Accepting this rebate check will allow the city to better leverage the grant funds awarded by the Department of Energy to further City Council's goals in energy efficiency.

Cons:

- None can be identified.

The $32,581.89 will be used as revenue to further fund energy efficiency programming.

City staff recommends City Council adopt the budget amendment to appropriate revenue and budget expenditures associated with the Progress Energy Rebate check.

**ORDINANCE BOOK NO. 27 – PAGE 19**

**I. ORDINANCE NO. 3971 - BUDGET AMENDMENT TO ACCEPT STIPEND FROM WARREN WILSON COLLEGE FOR SUMMER INTERN IN THE OFFICE OF SUSTAINABILITY**

Summary: The consideration of a budget amendment, in the amount of $ 1,800, from Warren Wilson College, to appropriate revenue and budget expenditure accounts associated with the payment for one part time temporary intern in the Office of Sustainability.

The City of Asheville and Warren Wilson College (WWC) formed a strategic partnership in June 2007 to collaborate in our efforts to reduce green house gas emissions. A valuable part of this partnership is to provide professional development opportunity to WWC students. Warren Wilson College will provide the funds for payment to this intern upon approval of this budget amendment request.

The Sustainability Policy Intern will learn about local government policy and administrative policy through working with staff to support the Sustainability Advisory Committee on Energy and the Environment (SACEE).

This action complies with the City Council Strategic Operating Plan in the following ways: (1) Expand partnerships with UNC-Asheville, AB Tech and other institutions; and (2) Attract and retain quality employees with an emphasis on local labor pool development opportunities.

Pros:

- Internship supports the Transportation Department in implementing the Transit Master Plan
- Internship supports the City Office of Sustainability efforts to reduce carbon footprint of city operations

Cons:

- None identified.

The $1,800 to payment of interns stipend will be provided by Warren Wilson College to be paid through the City of Asheville.

City staff recommends City Council adopt the budget amendment to appropriate revenue and budget expenditures associated with payment of an intern's stipend.

**ORDINANCE BOOK NO. 27 – PAGE 21**

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Smith moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

**ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES**

**E. RESOLUTION NO. 11-93 - RESOLUTION SETTING A LIVING WAGE FOR CITY OF ASHEVILLE FULL- AND PART-TIME EMPLOYEES AND CONTRACT EMPLOYEES WORKING ON GENERAL SERVICE CONTRACTS $30,000-$90,000 IN VALUE**

Summary: The consideration of a resolution setting a living wage for City of Asheville full- and part-time employees and contract employees working on General Service contracts $30,000-$90,000 in value.

In 2007, Asheville City Council approved a living wage for city employees of $10.86 per hour without health insurance and $9.50 per hour with health insurance. Since 2007, the Asheville/Buncombe Living Wage increased to $11.35/hour without employer provided health insurance and $9.85/hour with employer provided health insurance. The resolution under consideration reflects the current living wage for full- and part-time City employees.

On March 22, 2011, City Council adopted a purchasing and contracting policy that includes a living wage requirement for General Service contracts $30,000-$90,000. The resolution under consideration provides for the same living wage described above for these contract employees.

Based on direction given at the March 22 meeting, it is City Council's intent to annually evaluate the living wage as part of the budget process to ensure the wage stays current with inflationary indexes (such as the Consumer Price Index) and/or the most current recommendation from Just Economics. The City Council will also evaluate if the living wage provision should be extended to additional thresholds of General Services contracts.

This action is consistent with the City Council's strategic operating plan and its goal to support a standard of living that is affordable to people of all incomes, life stages and abilities.

Pros and cons are not included with this staff report since City Council has already approved the living wage policy. The adoption of this resolution formalizes City Council's previous action.

The City of Asheville currently meets the current living wage standard for full-time employees, and so no fiscal impact is expected. While the living wage provision in the General Services category may have a fiscal impact for the City, research has shown that cost implications are typically minimal and less than 1%. Staff will regularly monitor and provide quarterly updates on the impacts of the living wage provision to the City Council Finance Committee.

City staff recommends City Council adopt a resolution setting a living wage for City of Asheville full- and part-time employees and contract employees working on General Service contracts $30,000-$90,000 in value.

Director of Administrative Services Lauren Bradley responded to questions raised by Councilman Davis regarding the bidding procedure.

Vice-Mayor Newman said that as we move forward, we need to continue to seek input from people who contract and do business with the City. We want to make sure we are not creating a difficult process and or deterring people who want to do business with the City.

Councilman Bothwell moved for the adoption of Resolution No. 11-92. This motion was seconded by Councilman Smith and carried on a 5-2 vote, with Councilman Davis and Councilman Russell voting "no."

**RESOLUTION BOOK NO. 34 – PAGE 4**

**III. PRESENTATIONS & REPORTS:**

**A. RESOLUTION NO. 11-94 - RESOLUTION AUTHORIZING THE ACCEPTANCE OF A GIFT OF THE WNC VETERANS' MEMORIAL ON THE CITY-COUNTY PLAZA, AND A CONTRACT FOR THE MAINTENANCE OF THE MEMORIAL**

City Attorney Oast said that this is the consideration of a resolution authorizing the acceptance of a gift of the WNC Veterans' Memorial on the City-County Plaza, and a contract for the maintenance of the Memorial.

In connection with the redevelopment of Pack Square/City-County Plaza, the WNC Veterans' Memorial (herein "Veterans' Memorial Board"), a non-profit organization, was formed for the purpose of raising funds for a Memorial to WNC Veterans to be located and constructed in the park, and to provide for the maintenance of the Memorial.

The work of the Board has been highly successful, with the result that the Memorial has been designed, the design was approved by the City and County, its construction has been completed, and it was dedicated on Veterans Day, November 11, 2009. In addition, the Veterans' Memorial Board has raised sufficient funds to establish and fund two trusts for the perpetual care and maintenance of the Memorial.

The trusts are proposed to reside with the Community Foundation of Western North Carolina, an organization that administers charitable funds and gifts. One of the trusts, a "flexible endowment fund" is to provide for perpetual upkeep and maintenance of the Memorial and its several components, including annual cleaning. A minimum balance is required in this fund. The other fund, a "traditional endowment fund," is for the same purpose, but no minimum balance is required. The two funds together ensure that adequate funds will be available for periodic maintenance of a routine nature from year to year, and for repairs and maintenance of a more substantial nature as needed. Management of the funds, including distribution of income to the City for maintenance and upkeep, is handled by the Community Foundation, which receives a small fee for its administrative costs.

Pursuant to the agreement with the City and County, the Veterans' Memorial Board now wishes to give the Memorial to the City and the County, and to arrange for income from the trusts to be available for use by the City for the care and maintenance of the Memorial. In order for this to occur, two actions are necessary:

1. Official acceptance of the gift from the WNC Veterans' Memorial Board. A Certificate of Gift has been prepared for the Mayor's signature.

2. Agreement to a contract for the care and maintenance of the Memorial as contemplated by the trusts. This contract has been prepared for signature by the City Manager.

The Memorial is included in the plans for the Pack Square/City-County Plaza renovation.

Pros:

- Acknowledges the gift of the Memorial, and the culmination of years of work by dedicated community organization.

- Establishes a source of funds for maintaining the Memorial.

Con: None noted.

There is no impact to the City's General Fund budget since funding for maintenance will come from the outside trusts.

Adoption of the resolution is recommended.

Mr. Richard Griffin, Chairman of the WNC Veterans Memorial, was pleased to state that during Memorial Day services in Pack Square Park on May 30, 2011, the Board of Directors of the WNC Veterans Memorial will gift jointly to the City of Asheville and the County of Buncombe all ownership interest in the WNC Veterans Memorial. This ownership transfer will mark the corporate ending of the 13-year old life of the non-profit corporation that conceived, originally designed and funding construction of the WNC Veterans Memorial. In conjunction with the ownership gift, the Board will gift to the City two monetary trusts, totaling 140,000. The two trusts will be managed and controlled by the Community Foundation of Asheville. The sole purpose of the trusts is the use of annual income by the City of Asheville for the perpetual care and maintenance of the Veterans Memorial. We are pleased that the citizens and businesses of Asheville, Buncombe County and Western North Carolina, were so dedicated to the creation of the Memorial that funding for the perpetual maintenance of the Memorial is possible. He thanked everyone who contributed and asked City Council approve the contract by which the City accepts the terms of the two monetary trusts.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Davis moved for the adoption of Resolution No. 11-94. This motion was seconded by Councilman Russell and carried unanimously.

Mayor Bellamy was pleased to present Mr. Griffin with the gift of pottery as a token of Asheville's appreciation. She thanked him very much for his leadership. She also presented the other Board members with a token of appreciation as well.

**RESOLUTION BOOK NO. 34 – PAGE 6**

**B. ASHEVILLE-BUNCOMBE REGIONAL SPORTS COMMISSION**

Mr. Ben VanCamp, Senior Advisor to the Asheville-Buncombe Regional Sports Commission, said that the mission of the Sports Commission is to identify and attract sports events and related meetings to enhance the health, wellness and quality of life for area residents and sports enthusiasts and to generate a positive economic impact by promoting our region as a recognized sporting destination. Their vision is to host memorable sporting events that will enrich the lives of athletes and spectators.

He explained the County-wide audit of (1) seasonality (a) availability of large blocks of hotel rooms; and (b) facility availability; (2) facilities (a) public; and (b) private; and (3) personnel. Concentrations have been (1) events have to fit our community's culture; (2) highlight our communities natural resources; and (3) events that take place in the first quarter of the year.

The strategies are to (1) work with existing events to help them grow; (2) incubate new events from within our community; and (3) recruit large events.

Funding in Year 1 was $75,000 (a) $25,000 from City of Asheville, Buncombe County and Buncombe County Tourism Development Authority (BCTDA). Proposed funding for Year 2 is $145,000 (a) $45,000 from City of Asheville, Buncombe County and BCTDA; (b) County funding has already been received; (c) BCTDA has budgeted for support, budget to be approved in June; and (d) $10,000 to be raised by Commission

Ms. Janet Cone, Board Chair, said that in November, the leadership added a Senior Advisor contract position to serve as the organization's staff. This advisor has been hard at work providing leadership to several new sporting events in our community. These events are expected to bring over 15,000 people into our community over the next 12 months, having a multi-million dollar economic impact. The Sports Commission staff works with event organizers, both locally and nationally, to showcase the Asheville community and its sport venues as the ideal location for their next event.

They (1) contact area hotels and sporting venues in Asheville on your behalf to gather information on rates and availability; (2) put together itineraries to visit venues and properties of interest so you can better make a decision; (3) compile area proposals and information for presentations to decision makers on final destination; (4) assist in event planning; (5) connect you with local service providers and media outlets; (6) provide visitor information and giveaways for athletes and fans; and (7) creative brainstorming to make sporting events in Asheville stand out above the rest.

The Sports Commission Board of Directors has prepared a preliminary budget for the 2011-12 fiscal year and is requesting $45,000 in support from the City of Asheville. This funding will provide the Sports Commission the resources it needs to hire a full-time Executive Director that will continue the work of creating, recruiting, and supporting sporting events in our community.

Councilman Davis recognized others involved with the Sports Commission noting that they have been working hard for a long time. There are a number of things that are not conventional sports that can be grown in our community. There is not an allocation for partnership in funding the Sports Commission because when the budget was being formed, they didn't know of the request. Therefore, this funding would require direction from Council. City Manager Jackson had explained that they can increase the outside agency funding by $45,000. He said that the other partners have come to the table with funding and felt it was important for the City to move forward and continue to be a partner. This is a real economic piece.

Councilman Davis moved to allocate $45,000 from the Fiscal Year 2011-12 budget to the Sports Commission, through a budget allocation, to be funded with either an increased revenue estimate or some other manner. This motion was seconded by Councilman Russell.

In response to Councilman Bothwell, Councilman Davis said that the Civic Center is having a record year now and there may be opportunities from rent and concession sales.

City Manager Jackson said that the basis of the recommendation was to provide the allocation in the outside agency funds if this is going to be a recurring expense; and, the basis to do this would be that it will increase your sales tax revenue.

Mayor Bellamy felt that it was important that these dollars stay in our community and the opportunities are huge based upon research. She asked the City Manager to place on our website the economic report for the Civic Center and how it impacts our downtown and hotels. People will be able to see what happens when we make an investment and what it brings back to our community.

When Mayor Bellamy asked for public comment, no one spoke.

Regarding process, Vice-Mayor Newman was surprised that this presentation resulted in an appropriation request. Councilman Davis apologized for the immediate request, especially since the outside agency requests have already been approved by Council; however, other partners have come to the table already and we will be adopting the budget at the next meeting. Mayor Bellamy also said that Council was scheduled to hear an update from the Sports Commission, and the budget issue was prompted by the City Manager recognizing there was nothing allocated in the budget for this. Therefore, the City Manager needed Council direction to move forward.

Vice-Mayor Newman suggested that in the future we try to follow the process of running the requests by either the Finance Committee or the Housing & Community Development Committee (that reviews all outside agency requests) so they can look at everything at once and make their decisions based on the limited funds.

When Vice-Mayor Newman asked if this is going to be a recurring request each fiscal year, Councilman Davis said that this will be recurring request, but they may not request the same amount each year.

City Manager Jackson said that the specific request is funding for one year of $45,000. He said that since the City will be contracting for services, we would want a multi-year (3-5 years) pro forma, which would include a comprehensive budget for the program.

Mr. Mark Cates was pleased that Council recognizes the limited resources available but is using those for economic development that will help our community.

The motion made by Councilman Davis and seconded by Councilman Russell carried unanimously.

## IV. PUBLIC HEARINGS:

### A. PUBLIC HEARING RELATIVE TO AN AMENDMENT TO A CONDITIONAL USE PERMIT FOR CROWNE PLAZA SPORTS CENTER IMPROVEMENTS

### ORDINANCE NO. 3972 - ORDINANCE AMENDING A CONDITIONAL USE PERMIT FOR CROWNE PLAZA SPORTS CENTER IMPROVEMENTS

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

City Attorney Oast said that the Authorized Practice Committee of the North Carolina State Bar has issued an advisory opinion that appearing in a representative capacity for a party before a local governmental body in a quasi-judicial proceeding is the practice of law, especially with respect to such aspects of the hearing as examining or cross-examining witnesses, or advocating for legal conclusions or results. This does not prevent persons, including land use professionals, from presenting information or expressing opinions within their knowledge or area of expertise.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 6:00 p.m.

Urban Planner Jessica Bernstein said that this is the consideration an amendment to the conditional use permit for Crowne Plaza Sports Center Improvements, located at 1 Resort Drive, for the additional of a zip line with towers, 82 parking spaces, and an additional 100 future parking spaces. This public hearing was advertised on April 29 and May 6, 2011 (City Exhibits 1 and 2).

Ms. Bernstein said that the applicant is requesting to add new uses to an existing site. This project is considered as an amendment to the previous Conditional Use Permit (Ordinance No. 3707).

The project site consists of a 108.45 acre parcel located off of Resort Drive (accessed from Patton Avenue/I-240) and is zoned Resort District. Surrounding properties are zoned Resort, Regional Business, RM-8, RS-2, RS-8, CBI, and CBII. This site is currently the location of the Crowne Plaza Resort (City Exhibit 3).

The phased master development plan approved by City Council in 2009 proposed three phases: Phase 1 included tennis courts, an indoor soccer building and an indoor pool/fitness center with associated parking. Phase 2 would include a mixed-use building and parking. Phase 3 proposed a hotel/condo building. After Council approval, the applicant eliminated the Phase 2 mixed-use building, and the hotel/condo became the new second and final phase. All development in the 2009 approval was to be located towards the main entrance to the site, in the southeast end of the large parcel.

New uses proposed include an 82-space parking lot and a zip line adventure course, as well as future expansion for 100 additional parking spaces. The project site for the proposed amendment is on the southwestern end of the resort – west of the recently constructed expo center and on the southern boundary of the golf course.

Landscaping will be required in the parking areas, including a street buffer and interior vehicular use area trees and shrubs.

This project was approved with conditions by the Technical Review Committee (TRC) on March 21, 2011. Adjacent neighbors were present at the meeting to learn more detail about the proposed zip line; however, no one expressed opposition to the project. As an amendment to a previously approved Conditional Use Permit, review by the Planning & Zoning Commission is not required.

City Council must take formal action as set forth in Section 7-5-5(e)(3) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case pursuant to Section 7-16-2(c). Staff's review indicates that all seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   *The project will meet State building code requirements and will be reviewed in detail by the Technical Review Committee to ensure compliance with safety requirements.*

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   *The proposed zip line has minimal disturbance due to the small tower footprint and the use maximizes the benefits from slopes and views in its recreational purpose. The*

*proposed parking areas are on existing flat areas with no significant natural or topographic features due to the previous development of the golf course. Appropriate landscaping will be provided to minimize visual impact.*

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   *The parcel containing the Crowne Plaza Resort is quite large (over 108 acres) and while the new proposed uses are closer to the adjacent neighborhood than the previously approved phases, the uses are minimally invasive, complementary to the existing uses on the site and should not impact the value of adjoining or abutting property. The zip line towers will not be lit and are more than 400 linear feet from the nearest house.*

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   *Although these uses are situated on the western side of the property, which is closest to the nearby residential neighborhood, the new uses are complementary to the other resort buildings and amenities on this parcel. The zip line and parking areas should have a minimal visual impact to the neighborhood and are in harmony with the character of the resort area.*

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
   *This proposal aligns with Smart Growth Land Use Policies in the 2025 Plan by including mixed-use development with hotel, recreational and residential components on a site with existing infrastructure, close to transportation and the downtown (pg. 31). Also, the tourism industry is highlighted in the Plan as needing to concentrate on "creating and marketing 'destination' travel opportunities to attract travelers" (pg. 195). Expanding and enhancing the amenities of this centrally located resort will no doubt have a positive draw to visitors.*

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   *This site is located just off I-240/Patton Avenue, which places the project in an easily accessible location by car and Asheville transit (rt. 15). The project has been reviewed by the Technical Review Committee and has been found to have adequate access to infrastructure.*

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
   *There is no traffic congestion or traffic hazard anticipated as a part of this proposal.*

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:
- The proposal is aligned with City goals relating to economic development (tourism).
- New parking areas will support existing resort uses, including recent expo center.

Con:
- None noted.

Staff recommends approval of this amendment to the previously approved Conditional Use Permit, adding new uses to the Crowne Plaza Resort site.

Mr. Tom Wilson, representing Hulsing Hotels, briefly summarized the project and urged Council for their support.

Mr. Jeff Greiner, Owner and President of Adventure America Zip Line Canopy Tours, explained what the course would consist of and how it is a family oriented activity. He was excited to bring this activity to Asheville.

Mayor Bellamy closed the public hearing at 6:06 p.m.

In response to Councilwoman Manheimer, Mr. Mark Wells, representative of Hulsing Hotels, said that there will still be 9 holes on the golf course.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3972, to adopt an amendment to the conditional use permit for Crowne Plaza Sports Center Improvements, located at 1 Resort Drive, for adding a new zip line and parking areas, subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with full cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; and (5) This project will undergo final review by the TRC prior to issuance of any required permits. This motion was seconded by Councilwoman Manheimer and carried unanimously.

**ORDINANCE BOOK NO. 27 – PAGE 23**

**B. PUBLIC HEARING TO CONSIDER REZONING PROPERTIES ON CALEDONIA ROAD AND FINALEE STREET FROM INSTITUTIONAL DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT**

**ORDINANCE TO REZONE PROPERTIES ON CALEDONIA ROAD AND FINALEE STREET FROM INSTITUTIONAL DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT**

**ORDINANCE TO REZONE PROPERTIES ON CALEDONIA ROAD AND FINALEE STREET FROM INSTITUTIONAL DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT**

Councilman Russell moved to recuse Councilwoman Manheimer from participating in these actions due to a conflict of interest. This motion was seconded by Councilman Davis and carried unanimously. At this time, Councilwoman Manheimer left the Council Chamber.

City Attorney Oast said that a valid protest petition has been filed, thus requiring a three-fourths vote of City Council to approve the rezonings of the property. Since Councilwoman Manheimer has been recused, there must be 5 out of 6 Council members to vote in favor of the rezonings in order for them to pass.

Mayor Bellamy opened the public hearing at 6:09 p.m.

**RM-16 Residential Multi-Family High Density District**

Planning & Development Director Judy Daniel said that this is the consideration of an ordinance to rezone properties located on Caledonia Road and Finalee Avenue from Institutional District to RM-16 Residential Multi-Family High Density District. This public hearing was advertised on April 29 and May 6, 2011.

Ms. Daniel said that the primary intent of the staff proposal is the rezoning of the properties owned by Caledonia LLC and Kenilworth Inn, LLC from Institutional (a residual zoning left over from a prior institutional use on part of this property) to RM-16, reflecting the existing use of this property in this residential neighborhood, in accordance with Section 7-7-2 of the UDO, Initiation of Amendments.

The primarily affected properties include all of two parcels and portions of another parcel totaling approximately 9.57 acres located on Caledonia Road at Finalee Road. One parcel (2062) is developed and contains the primary structure of the multi-family residential Kenilworth Inn Apartments. The two other undeveloped parcels (4812 and a portion of 6180) adjoin the Inn and are located on the north and east side of Caledonia Road. These properties have had Institutional zoning for many years, since a health facility was previously located in the existing structure. This historic structure was built as an inn in 1918, restored and is in current use as multi-family rental housing. Interim uses (including a mental health hospital) were institutional in nature and the properties were rezoned to Office-Institutional in 1980, which became Institutional upon the adoption of the UDO in 1997.

Adjacent parcels to the north, east, and west are primarily zoned RS-8, in a predominantly single-family neighborhood. One adjoining property to the north (PIN 2461) adjoining the Kenilworth Inn contains two buildings with garages/ storage areas for use by its residents; conditionally rezoned to Institutional in 2004 to allow for the stand alone garages. This property is proposed to remain in CZ Institutional zoning, as it is subject to important limiting conditions under the Conditional Zoning. The properties to the south, formerly a part this property before a recently approved subdivision are vacant, wooded, and steeply sloped. They are the subject of a staff initiated rezoning as well.

Since the Planning and Zoning hearing, the staff realized that this rezoning was also advertised to include a very small portion (.16 acre of a .34 acre) of another property (7364) with different and unrelated ownership which is developed with a single-family residence and is currently split zoned between RS-8 and Institutional. We believe the existing Institutional zoning on that property may be the result of a mapping error. The actual staff intent was to rezone this property fully into RS-8, not RM-16, but there was a mistake in the advertisement.

The Planning and Zoning Commission reviewed this request at their April 6, 2011, meeting. After hearing a number of comments in support of the request, the Commission voted unanimously (6:0) to recommend support of the rezoning to the Council. There were no speakers in opposition to this request, although the affected property owner has filed a protest petition in opposition to the proposed rezoning.

There were two primary reasons stated for their support of the request. The Commission agreed that the Institutional zoning should be modified as there are uses allowed in that district that could be incompatible in this residential area. The Commission also specifically noted that the proposed zoning did not change the development potential for the site for multi-family housing; and they felt the existing density allowed is appropriate at this location.

There was no discussion of the property mistakenly advertised for rezoning to RM16.

Pro:

- The rezoning establishes zoning on the properties that is more reflective of and compatible with the existing use of the property.

Con:

- The staff can identify no concerns with this rezoning as the existing use will be wholly compatible with the multi-family use and density of the existing structure on the property which will remain wholly conforming with the zoning.

Staff recommends approval of the rezoning to RM-16 for all recommended parcels which will establish a zoning district that reflects the actual use of the existing structure at its current density of use.

Rezoning to RM-16 for parcel 7364 is also recommended in order to avoid leaving a small residual piece of Institutional zoning at this location. The difference between the advertised RM-16 and the intended RS-8 is too great to allow a zoning change to RS-8 at this time, even if desired. The staff may return later with a corrective zoning recommendation for this small (.16) acre zoning change.

**RS-8 Residential Single-Family High Density District**

Ms. Daniel said that this is the consideration of an ordinance to rezone properties located on Caledonia Road and Finalee Avenue from Institutional District to RS-8 Residential Single-Family High Density District. This public hearing was advertised on April 29 and May 6, 2011.

Ms. Daniel said that the primary intent of the proposed staff initiated proposal is the rezoning of the properties owned by Caledonia, LLC from Institutional (a residual zoning left over from a prior institutional use on portion of this property that has subsequently been subdivided) to RS-8. The changed zoning reflects a density more appropriate for these steeply sloped properties in a predominately single-family residential neighborhood, and eliminates the potential for certain commercial uses (allowed in the Institution district) that are unlikely to be compatible at this location. The proposed rezonings initiated by staff are in accordance with Section 7-7-of the UDO, Initiation of Amendments.

The rezoning was also intended to affect a small piece of adjoining property (.16 acre of a .34 acre property) under different and unrelated ownership to RS-8 that is currently split-zoned between RS-8 and Institutional. The existing Institutional zoning on that property may be the result of a mapping error, and the intent was to rezone it fully into RS-8. Unfortunately, the advertisement for this rezoning mistakenly noted it for rezoning to RM-16 as discussed earlier in the RM-16 Density portion of this staff report.

The properties affected by the rezoning consist of all of one parcel and portions of two parcels owned by Caledonia, LLC; located along the east and south side of Caledonia Road from its split with Pickwick Road to its intersection with Finalee Avenue with an area of approximately 12.33 cumulative acres. Adjacent parcels to the east and west are currently zoned RS-8, in a predominantly single-family neighborhood. Adjacent parcels to the north are currently zoned Institutional and contain a structure in current use as multi-family rental housing, and also the subject of a current staff initiated rezoning from Institutional to RM-16. The Silverman property to the south fronts on Swannanoa River Road and, as noted above, is zoned Urban Place although it is vacant and without current activity on the site. Other properties to the south are zoned River and are in commercial uses.

This majority of this area was the subject of a recent Conditional Zoning proposal consisting of one large multi-family structure of 100 dwelling units. It was found to be incompatible with the surrounding neighborhood by the City Council in September of 2010. Reasons noted for the incompatibility related to the intensity of the proposed use in relationship to the steep slopes and narrow winding character of Caledonia Road. A somewhat different proposal was then proposed by the owner, consisting of two separate multi-family structures of 50 dwelling units each. The reasons stated for Council disapproval of the original project remained - the nature of the slopes and the road.

In response to general concerns expressed about the City's regulatory processes the staff initiated proposals to modify the Unified Development Ordinance (UDO) processes for development review. Those changes were subsequently adopted by the Council. With the adoption of those changes, the development proposals in process (given conditional approval by the Technical Review Committee but with no permits issued) became void. With that voiding, the staff initiated the rezoning action on these properties.

Staff believes that RS-8 zoning is more appropriate for these heavily wooded, steeply sloping properties that take access from a section of Caledonia Road that is very narrow, steep, and winding. That zoning would allow a level of development appropriate for properties of that nature, more compatible with the RE-8 zoning on adjoining properties that share that level of topographical constraint. That zoning would also provide a level of "buffering" for the historic Kenilworth neighborhood from the substantially more intense development that is likely to occur over time along Swannanoa River Road.

While the owner of this property will suffer some loss of development potential, the RS-8 is the most intense level of single-family zoning offering the potential for lower intensity multi-family development should he choose to pursue it - including duplexes, triplexes, quadraplexes (as conditional uses) and cottage developments (as a USSR use).

The Planning and Zoning Commission reviewed the proposed rezoning at its' April 6, 2011, meeting. There were many comments from the public, primarily in support of the proposed rezoning and primarily from residents of the Kenilworth neighborhood. They expressed support for the reasons noted in the staff report. Concern was expressed, however, that the rezoning did not include the entire portion of the property with PIN 6180. The advertised rezoning to RS-8 included only the portion on the east side of Caledonia Road. They felt the residual portion of the parcel along the west side of Caledonia Road, should also be included as it reflects the same density and access concerns they have expressed for these properties since the first application in the fall of 2010.

There were two comments strongly condemning the proposed rezoning. The first came from an attorney representing the affected property owner, who has filed a protest petition against the rezoning. He stated strong objections to the proposed rezoning and to the legality of the City to consider a rezoning on the property without protecting existing rights of the property owner. The second came from the representative of the Council of Independent Business Owners, who expressed the same strong objections noted previously by the attorney of the property owner.

After considerable discussion the Commission voted unanimously (6:0) to not recommend support of the proposed rezoning to RS-8. The primary reason stated for their decision to not support the request related to the proposed change of density on the property, and how that would impact the property owner. The Commission agreed that it would be logical to modify the current Institutional zoning, as there are certain commercial uses allowed in that district that could be incompatible in this residential area. They expressed support, however, for the currently allowed density at this location - especially taking into account recent actions and proposals on this site. The Commission went on to further discuss appropriate zoning and generally seemed to support change to a zoning with density similar to what currently exists

although they took no official action. The Commission suggested that the Council consider the RM-16 zoning for this site, as is proposed for the adjoining property.

Pro:

- The rezoning establishes zoning on the properties that is more reflective of and compatible with the surrounding single-family neighborhood, the steeply sloping site, and the limited access.

Con:

- The rezoning will require substantial modification of uses planned by the owner of the property under the current zoning.

Staff recommends approval of the rezoning to RS-8 for the recommended parcels which will establish a zoning district that is more appropriate for the site given the nature of the surrounding neighborhood combined with the nature of the access road and the slope of the properties.

Mr. Thom Holman, representing Caledonia LLC and Kenilworth Apartments LLC, objected to any changes of the Institutional zoning. He explained in detail why he objected on the grounds that these proposed rezonings are inconsistent with the long history at this location, they are unlawful, inappropriate, unfair, violates due process rights of the property owner, are arbitrary and capricious, will cause substantial monetary damage to the owners of the property, sends the wrong message to both developers and property owners, and weakens the Comprehensive Plan. He urged the Council to deny the rezoning of these properties as he felt they are inappropriate and should be rejected.

Mr. Paul Smith was concerned that this gives the appearance to a developer that even though he starts a project, the City can change the zoning.

The following individuals spoke in support of rezoning the properties per staff's recommendation from Institutional to RM-16 and RS-8 respectively, mainly due to the residential nature of the area and the steep slope:

Ms. Valerie Hoh, adjoining property owner
Ms. Barber Melton, Vice-President of the Coalition of Asheville Neighborhoods
Mr. Joe Hoffman, area property owner
Ms. Mary Evers, resident on Finalee Avenue
Ms. Tracy Stubbing, resident on Finalee Avenue
Mr. Chris Pelly, President of the Haw Creek Community Association
Mr. Terry Meek, resident on Pickwick Road (also requested PIN 6180 not be rezoned to RM-16 District, but to either RS-8 or RM-8)
Ms. Patsy Brison, representing Kenilworth Residents Association (any reference to any maps staff uses or the neighborhood pointing to them does not mean they are waiving their challenges to the subdivision approval by the City; and challenged the validity of the protest petition based on timing)
Mr. Robert Zieber, Asheville resident (suggested a bond for projects if the developer goes bankrupt before the project is complete)

Mayor Bellamy closed the public hearing at 6:59 p.m.

In response to Vice-Mayor Newman, City Attorney Oast said that it is unusual to get a protest petition in before the Planning & Zoning Commission meeting, but that doesn't mean it's not valid.

In response to Vice-Mayor Newman, Ms. Daniel said that staff did not have an objection of rezoning PIN 6180 to RM-8; however, staff's recommendation stands at RM-16. She also noted that there may be a problem with the RM-8 designation due to a spot zoning issue and staff would need to consult with the City Attorney on that issue.

In response to Vice-Mayor Newman, City Attorney Oast said that the process would need to be started over (through the Planning & Zoning Commission) if Council considers any different zoning designation other than what has been advertised.

Mayor Bellamy said that members of Council have previously received copies of the ordinances and they would not be read.

Vice-Mayor Newman moved tor rezone properties located on Caledonia Road and Finalee Avenue (per staff's recommendation) from Institutional District to RS-8 Residential Single-Family High Density District. This motion was seconded by Councilman Bothwell.

Vice-Mayor Newman felt the zoning classification is well justified and consistent with the City's Comprehensive Plan as well as the character of the neighborhood.

Councilman Russell could not support either of the requested rezonings as he felt this is a major property rights issue.

Councilman Smith hoped that staff will continue to identify areas that have incompatible zoning. He would support the motions due to density and uses allowed.

Councilman Davis felt this does amount to a property rights issue and in reality we are changing the rules in the middle of the game.

Councilman Bothwell was disappointed in the way Councilwoman Manheimer ultimately had to recuse herself due to a conflict of interest. He would support the motion.

Mayor Bellamy noted the first question to Council was what would they initially zone the property, noting there is an Urban Place District and a River District adjacent to the properties. She didn't think Council would have made that leap from those two districts to RS-8. Her experience is when there is a high density usage, staff transitions it to a medium density district toward the neighborhood. She felt RM-16 would be a better recommendation than RS-8 for the lower parts of the property. She hoped that the developer would work with the neighborhood as they seem to be open to residential uses on the property.

The motion made by Vice-Mayor Newman and seconded by Councilman Bothwell failed on a 3-3 vote, with Mayor Bellamy, Councilman Davis and Councilman Russell voting "no" (Councilwoman Manheimer was recused).

Councilman Bothwell moved to rezone properties located on Caledonia Road and Finalee Avenue (per staff's recommendation) from Institutional District to RM-16 Residential Multi-Family High Density District. This motion was seconded by Councilman Smith and failed on a 4-2 vote, with Councilman Davis and Councilman Russell voting "no" (Councilwoman Manheimer was recused).

At this time, Councilwoman Manheimer re-entered and participated in the remainder of the meeting.

**Closed Session**

At 7:17 p.m., Councilman Smith moved to go into closed session for the following reasons: (1) To discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session. The statutory authority is contained in G.S. 143-318.11(a)(4); (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including a lawsuit involving the following parties: Cherie Byrd; City of Asheville; Asheville Police Department; and Eric Lauffer. The statutory authorization is contained in G.S. 143-318.11(a)(3); and (3) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Bothwell and carried unanimously.

At 8:02 p.m., Councilman Russell moved to come out of closed session. This motion was seconded by Councilman Smith and carried unanimously.

**C. PUBLIC HEARING ON THE FISCAL YEAR 2011-12 ANNUAL OPERATING BUDGET**

Director of Administrative Services Lauren Bradley said that the City Council conducts a public hearing each year to receive public input on budget issues before the Annual Operating Budget is adopted.

The Fiscal 2011/2012 Proposed Annual Operating Budget was presented to City Council on April 26, 2011. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, a summary of the Proposed Budget along with a notice of the Public Hearing was published on April 29 and May 6, 2011. Adoption of the Fiscal 2011/2012 Budget Ordinance is scheduled for May 24, 2011, at the regularly scheduled City Council meeting.

The Fiscal Year 2011/2012 Proposed Budget is balanced with an Ad Valorem tax rate of $0.42 per $100 of assessed value, which represents no change from the current year tax rate. All essential City services are continued in the Proposed Budget. A copy of the Proposed Budget is available for public inspection in the City Clerk's office. Also, the Proposed Budget is available for viewing on the City's website (www.ashevillenc.gov). In accordance with the North Carolina Local Government Budget and Fiscal Control Act, the Proposed Budget may be changed by City Council in any way before adoption. It may also be changed by budget amendment after adoption, with the only exception being the Ad Valorem Tax rate, which can not be changed once the Budget is adopted.

Staff recommends City Council conduct the public hearing on the City of Asheville Fiscal Year 2011/2012 Proposed Annual Operating Budget and include public input in its consideration of the Budget.

City Manager was pleased to introduce Capt. Wade Wood, who will be Interim Police Chief effective May 12, 2011. Capt. Wood looked forward to serving the community and to move the Police Department forward.

Mayor Bellamy opened the public hearing at 8:07 p.m., and when no one spoke, she closed the hearing at 8:07 p.m.

Councilman Russell commended Council and staff on the numerous open worksessions and open meetings that have gone on to culminate in this public hearing.

Mayor Bellamy announced that adoption of the budget will occur on the May 24, 2011, meeting.

**V. UNFINISHED BUSINESS:**

**A. ORDINANCE NO. 3973 - ORDINANCE AMENDING THE FEES & CHARGES MANUAL TO INCREASE THE RECYCLING FEE**

Public Works Director Cathy Ball said that this is the consideration of an ordinance amending the Fees & Charges Manual to increase the recycling fee.

At the April 12, 2011, City Council meeting, staff recommended an increase in the recycling fee of $0.65 per month or $7.80 per year. The current fee is $2.95 per month. Staff proposed that the additional fee would cover the following:

- Allowing, but not requiring, residents to select a larger (95 gallon) recycling container; and,
- Providing a marketing and rewards program, such as Recyclebank, for residents who participate in the recycling program.

Currently, residents can put all of their recyclables in one container. This process is known as "single stream recycling". Additionally the City is working with our vendor to add materials like yogurt containers to the accepted materials list. Neither of these two enhancements requires a fee increase.

Council requested additional information regarding the options of offering residents a 95 gallon recycling container and/or a rewards program. Staff evaluated these two options separately and determined the cost for the programs shown in the table below.

| Option | Description | Cost Increase per year | City Savings per year | Net per year | Rate Increase per month | Rate Increase per year |
|---|---|---|---|---|---|---|
| 1 | 95 gallon container | $220 K | $105 K | ($115 K) | $0.35 | $4.20 |
| 2 | 95 gallon container + Recycling rewards program | $343 K | $130 K | ($213 K) | $0.65 | $7.80 |

The recycling rewards program currently being evaluated by the City is Recyclebank. Based on Recyclebanks evaluation of Asheville, residents who participate in the recycling program could be eligible for a discount on local and national business in the amount of $90 to $130 per year.

In April 2007, Asheville City Council passed a resolution committing to reduce the municipal carbon footprint 80% by the year 2050. To lead this strategic effort, Asheville developed a Sustainability Management Plan that was adopted by City Council. Solid waste was included as a focus area in the plan, along with a series of programmatic recommendations to reduce waste generation in Asheville in its FY 2010-11 strategic plan, Council specifically identified the reduction of solid waste as a top priority.

At the April 20, 2011, SACEE recommended approval of the 95 gallon containers with the recycling rewards program or Option 2 above.

If approved, staff would need six months before full implementation could take place. During those six months, the City would procure bins and all necessary equipment, finalize changes to the existing recycling contract and implement a community education initiative.

This action complies with City Council's Strategic Operating Plan under the Green and Sustainable Goal. Asheville will be the southeastern leader in clean energy and environmental sustainability by expanding community education programs and implementing ways to reduce city-wide solid waste.

Pros:

- Reduction of land filled solid waste
- Increased awareness of recycled material for residents
- Supports Council's sustainability goals

Cons:

- Cost per month per household will increase if either of the options is selected.

The incremental increase is outlined in the table above.

Ms. Ball clarified some points explaining what the changes are in the recycling and what the changes are in the amount of trash collected from the current and pilot program.

Staff recommends City Council amend the Fees and Charges Manual to increase the fee to provide for 95 gallon recycling carts and a recycling rewards program ($0.65 increase from $2.95 to $3.60 per month). However, staff is also supportive of the $0.35 increase from $2.95 to $3.30 per month (95-gallon container without recycling rewards program).

Ms. Ball responded to Councilman Bothwell regarding the basis of the recycling increase up 2% over time.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilwoman Manheimer moved for the adoption of Ordinance No. 3973 to amend the Fees & Charge Manual to increase the recycling fee from $0.35 to $3.60 per month (95-gallong container and recycling rewards program). This motion was seconded by Councilman Bothwell.

Councilwoman Manheimer felt there will be increased recycling with a recycling program in place.

When Mayor Bellamy asked for public comment, no one spoke.

In response to Councilman Davis, Ms. Ball said that this action does not commit the City to enter into a contract with Recyclebank. Provisions, including the term of the contract, for a reward program is still negotiable. Staff will come back to Council for authority to enter into a contract for a rewards program and also to amend the contract with our current recycling vendor. This action allows staff to have the funding available to start negotiating the terms of those contracts.

Councilman Davis didn't want to see the City commit to a long-term contract in that he was skeptical about the future use of coupons. However, he did support the increase of recycling.

Vice-Mayor Newman felt this is an innovative idea and compelling enough to give it a try. He wanted the negotiations to include strong performance criteria that if the program is not working then the City can get out of the contract sooner than later.

Councilman Smith was pleased that 80% of our residents already recycle (87% projection with the pilot program), so he was skeptical whether Recyclebank will be able to get us a lot further than that. However, he was not inclined not to support the Recyclebank portion because Asheville is already doing such a good job of recycling. As to marketing, we can be good if we try. He will support the motion; however, when the contract comes back he wanted to see some stellar projections and performance goals.

Councilwoman Manheimer hoped that in the future we could offer smaller trash cans for a decreased amount to incentivize people to recycle and a composting program.

In response to Vice-Mayor Newman, Ms. Ball said that does not recommend that this fee be effective immediately. It gives us the ability to start negotiations. If we do enter into an agreement with a rewards program, then we would look for the fee to start September 1, 2011. If we go with just the 95-gallon containers, we would look at an effective date of October 1, 2011.

Councilman Davis asked for a friendly amendment that we proceed with Option 1 (95-gallon container only – increase from $2.95 to $3.30) and look at the more fully vetted opportunities that the recycling rewards program can offer.

Councilwoman Manheimer suggested the friendly amendment be that Council approve Option 2 (95-gallon container with a recycling rewards program) conditioned upon approving a contract, but at the very least agree to Option 1. Councilman Bothwell agreed to the friendly amendment as described by Councilwoman Manheimer.

The amended motion made by Councilwoman Manheimer and seconded by Councilman Bothwell carried on a 6-1 vote, with Mayor Bellamy voting "no."

**ORDINANCE BOOK NO. 27 – PAGE 28**

**B. RESOLUTION NO. 11-95 - RESOLUTION ACCEPTING THE REPORT PREPARED FOR THE SWANNANOA FLOOD RISK MANAGEMENT PROJECT**

Stormwater Services Manager McCray Coates said that this is the consideration of a resolution accepting the report prepared for the Swannanoa Flood Risk Management Project.

The Hurricane Recovery Act of 2005 (Senate Bill 7) allocated funds for planning and implementation of projects to aid in flood damage reduction for North Carolina communities hardest hit by the 2004 hurricane season. The Biltmore Village area of the City of Asheville (within the Swannanoa River watershed) was named as a recipient of this funding. From December 2005 through August 2006 a planning study was conducted to identify and prioritize flood damage reduction projects for implementation in the community. This planning study was conducted by the N.C. Dept. of Environment and Natural Resources Division of Water Resources (DWR) and stakeholders from the Biltmore Village, City of Asheville and the Swannanoa watershed, with the assistance of a project consultant.

In September 2006, expenditure of funding for implementation of this Plan was reviewed without objections by the NC Government Operations Committee. This approval led to Council approval of a contract with Brown and Caldwell consulting engineers to oversee the Swannanoa Flood Risk Management Project and coordinate with the Army Corps of Engineers.

The purpose of the project was to identify additional the most cost effective measures to reduce the risk of flooding in the Swannanoa River watershed. The Feasibility Report is a decision document which considered the watershed modeling and economic analysis in identifying and prioritizing alternative measures.

Mr. Marshall Taylor, representing Brown and Caldwell, mentioned the following key objectives of the plan (1) to inventory the property within the floodplain and establish the relationship between severity of flooding and economic damages; (2) to develop realistic scenarios of future watershed and floodplain conditions; (3) to identify and evaluate projects that will reduce the risk of flooding to human life and property; and (4) to involve the public in every step of the project. If all the recommended project components are implemented at an estimated design and construction cost of $7.6 Million, an estimated $80 Million of flood damage reductions will occur over the next 50 years.

Within the scope of the project, over 50 potential flood reduction projects were identified and analyzed. From these analyses, a recommended plan was developed which calls for additional flood mitigation efforts to be implemented starting in 2011. The core of the recommended plan is the construction of three projects:

1. Rehabilitation and modification of Lake Craig Dam at Azalea Park;
2. Improvements to the rivers approach and exit from the Biltmore Avenue Bridge; and
3. Adoption of a Flood Operation Plan for the City of Asheville's Bee Tree Reservoir.

There are additional components of the recommended plan, including audible flood warning devices at key locations in the watershed and rehabilitation of Lake Tomahawk Dam. Council was provided with an executive summary of the Swannanoa Flood Risk Management Report.

He stated that the conclusions consist of: (1) the recommended plan reduces but does not eliminate the flood risk to human life and property. Flooding will continue to be a problem in the Swannanoa Valley and in Biltmore Village even after the plan is implemented; (2) it will take a great deal of cooperation and perseverance among the Swannanoa Valley communities to implement the recommended plan; and (3) continued community involvement is essential as the U.S. Army Corps of Engineers continues with planning, design, and implementation.

This action complies with the City's plans and commitments to administer $2.5M of Senate Bill 7 funding consistent with a contract executed with the North Carolina Division of Water Resources on April 1, 2007. In addition, this project has complied with the Council's Strategic to provide a safe community for our citizens.

Pros:

- Approval of the report creates a strategic plan for future regional cooperation on priority projects.
- Priorities are set for expending the remainder of state flood mitigation funding and for pursuing future state and federal grant funding.

Cons:

- None identified.

This project has been funded by the State in compliance with the Hurricane Recovery Act of 2005. There is currently additional Senate Bill 7 funding available to move forward with top priority project in the report, the proposed Lake Craig project. City staff is working with the Army Corps of Engineers as well as the North Carolina Division of Water Resources to identify future funding for other projects recommended in this report. These sources would require matching

contributions from the City in order to secure these funds.

City staff recommends City Council adopt a resolution to accept the Swannanoa Flood Risk Management Project report as recommended by Brown and Caldwell.

Ms. Mary Leonard White, Chair of the Flood Damage Reduction Task Force, felt the study was thorough and thoughtful giving recommendations and options. She hoped Council will now feel prepared to make some difficult decisions and will move on some of the recommendations.

Mayor Bellamy thanked Ms. White and the entire Task Force for their hard work on this effort.

Mr. Taylor responded to some questions raised by Councilman Bothwell regarding impervious and pervious parking areas.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Davis moved for the adoption of Resolution No. 11-95. This motion was seconded by Councilman Russell and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 7**

**VI. NEW BUSINESS:**

**A. RESOLUTION NO. 11-97 – RESOLUTION AUTHORIZING REVISIONS TO THE CITY'S CONSOLIDATED ANNUAL ACTION PLANS FOR 2011-12**

Community Development Director Jeff Staudinger said that the withdrawal of a funding request by an organization allocated HOME funds in this year's Action Plan creates an opportunity to provide additional support to the Eagle Market Place development.

On April 26, 2011, the Asheville City Council approved the Annual Action plan for CDBG and HOME Funds for 2011-2012. Included in that plan was funding of $102,900 for the Gardens at English Village Elder Housing Development, a project of the Western Carolina Community Action (WCCA) to be located in Brevard.

WCCA has now withdrawn their request for HOME funding. The project was withdrawn because a private-sector tax-credit development proposed in Brevard received a significantly higher site score in the pre-application process. WCCA recognized that it was imprudent to continue to allocate resources to a project for which further funding this year was extremely unlikely.

WCCA also informed staff that a rental development project funded in the 2009 Action Plan for the Town of Rosman will not be able to move forward. $95,000 of HOME funds allocated to this project is now available for reallocation.

In total, therefore, $197,200 in HOME funds is available for reallocation. Reallocation of $100,000 of these funds to the Eagle Market Place development could yield the project an additionally two points, enhancing its competitiveness and strengthening its financial position. The current allocation to the project is $362,800. The developers, Mountain Housing Opportunities and Eagle Market Streets Development Corporation, have a final application deadline of May 13 for their tax credit and loan financing proposal to the North Carolina Housing Finance Agency.

Staff recommends the Council support the additional allocation of $100,000 of HOME funds to the Eagle Market Place development, for a total HOME allocation to the project of $462,800.

The Regional Housing Consortium was polled and there was a consensus to agree to this allocation, with the knowledge and consent that they would confirm this at their next meeting. They would also consider the allocation of the additional funds, most probably to projects happening outside of Asheville and Buncombe County.

When Mayor Bellamy asked for public comment, no one spoke.

Ms. Cindy Weeks, representing Mountain Housing Opportunities, was pleased to report that their Glen Rock project won the Sustainable Project of the Year award for the entire southeast by the Community Affordable Housing Equity Corporation. She thanked City Council for their support of the Eagle Market Place project.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 11-97. This motion was seconded by Councilman Russell and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 9**

**B. RESOLUTION NO. 11-96 - RESOLUTION TO EXPLORE A MORE REGIONAL AND INTEGRATED TRANSIT SYSTEM**

Director of Transportation Ken Putnam said that this is the consideration of a resolution to explore a more regional and integrated transit system, as recommended by the Transit Commission after review of the Asheville-Buncombe-Henderson Regional Feasibility Study.

During November 2009, the N.C. Dept. of Transportation Public Transit Division contracted with HDR Engineering of the Carolinas and its partners to conduct a Regional Feasibility Study for public transportation in the City of Asheville, Buncombe County, and Henderson County.

The purpose of the subject study was to conduct an organizational review of the transit systems currently operating in Buncombe and Henderson Counties to determine the feasibility of establishing a closer working relationship. The work of the study was guided by a steering committee comprised of representatives from the major stakeholders.

HDR Engineering of the Carolinas presented the final report to City Council on September 28, 2010, and at that meeting, City Council, by common consent, received the report and requested the Transit Commission to review it and provide recommendations back to City Council for possible action.

The Transit Commission began the review process during their October 2010 meeting by receiving copies of the report and developing an action plan. After each of the members had time to review the report individually, they discussed it in detail during their January and February 2011 meetings. The following concerns and/or issues were identified:

- NCDOT prepared a study that was not requested locally and with no apparent political will to implement.
- The report seems to serve only NCDOT's interests.
- NCDOT has their own motivations for the report (they want to see a consolidated service).

- Although there might be a need for a report about consolidating services, this report is not the one.
- The report calls for additional services but does not include or ensure any new funding to implement it.
- Buncombe and Henderson Counties will never agree to anything that gives Asheville control, and Asheville is concerned about losing control of its system.
- The Asheville/Buncombe/Henderson systems are very different.
- How would the consolidation benefit the Asheville rider?
- NCDOT is asking too much for the local governments to agree with what is included in the report and to move ahead with it – this feels like a forced partnership.
- The Transit Master Plan is not adequately included or addressed.
- Asheville and Buncombe County are already working toward several things listed in the report to improve coordination – why force the issue through this report?
- The time table is too aggressive.

Despite the subject concerns and/or issues, there was overall agreement from the commission members that:

- Everyone could benefit from a truly regional transit system that includes other counties and other forms of transit like express buses. Several regional plans call for such a system.
- Land of Sky Regional Council and the French Broad River MPO could and should play a leading role in creating and funding a more regional system.
- Asheville and the public could benefit from a more seamless transit system that provides better service and connectivity.
- While another report might be better, there is not funding for it and it would be years before it could happen; meanwhile, we could be building toward a regional system.
- The informal ongoing work with Buncombe County to improve coordination could be more formalized.

After much discussion, the Transit Commission approved a resolution recommending using the regional feasibility report as an opportunity to call for a more regional system and to call on Land of Sky and the MPO to play a leading role in the planning and funding of such a system. The Transit Commission also recommends that City Council direct staff to work more intentionally with Buncombe County to implement common sense recommendations from the subject report in an effort to better coordinate Asheville Transit System and Mountain Mobility.

This action complies with the City Council Strategic Operating Plan in the fiscal responsibility focus area, the green and sustainable focus area, and the job growth and community development focus area by leveraging funding from the State and other funding sources for regional transportation improvements, operating the City of Asheville to the highest levels of fiscal responsibility, and creating partnerships between the City of Asheville and other organizations.

Pros:

- Explores options to provide a regional service and establishing a closer working relationship with Buncombe County.
- Might be an avenue to potentially increase transit-related revenue in order to create a more stable transit fund revenue source.

Con:

- None

There is no immediate fiscal impact regarding the recommended action.

The Transit Commission and City staff recommends City Council to adopt a resolution in favor of exploring a more regional and integrated transit system for the residents of Asheville and Buncombe County.

Councilman Smith, liaison to the Transit Commission, spoke in support of the resolution.

When Mayor Bellamy voiced concerns regarding the wording of the proposed resolution in that she felt the discussions with Land of Sky, Buncombe County and the Metropolitan Planning Organization should occur first before we ask for funds to be used to make this happen.

Councilman Smith moved to amend the proposed resolution addressing Mayor Bellamy's concerns (deletion of all but the first three "Whereas"s). This motion was seconded by Councilman Bothwell.

Ms. Julie Mayfield, Vice-Chair of the Transit Commission, explained why the wording in the proposed resolution read the way it did and hoped City Council would adopt a resolution to explore a more regional and integrated transit system.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

The motion made by Councilman Smith and seconded by Councilman Bothwell carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 8**

**C. BOARDS & COMMISSIONS**

Regarding the Asheville-Buncombe Fair Housing Commission vacancies, at the recommendation of the Boards & Commissions Committee, it was the consensus of Council to postpone action on these seats for six months.

**RESOLUTION NO. 11-98 - RESOLUTION APPOINTING MEMBERS TO THE CIVIL SERVICE BOARD**

Vice-Mayor Newman, Chairman of the Boards & Commissions Committee, said that the terms of Larry Harris and Jacquelyn Harris, as members on the Civil Service Board, expire on May 21, 2001.

The following individuals applied for vacancies on the Civil Service Board: Daniel Bradshaw, Flora Marr, Fred Cooke, Colleen Cody and Elizabeth Lynne Pou.

Vice-Mayor Newman said that the Boards & Commissions Committee recommended reappointing Larry Harris and Jacquelyn Hallum.

Councilwoman Manheimer disclosed that Mr. Harris is a member of her law firm and she would recuse herself from voting in this matter.

Councilman Bothwell moved to reappoint Larry Harris and Jacquelyn Hallum to each serve a two-year term respectively, term to expire May 21, 2013, or until their successors have been appointed. This motion was seconded by Councilman Smith and carried unanimously (Councilwoman Manheimer excused).

**RESOLUTION BOOK NO. 34 – PAGE 10**

**RESOLUTION NO. 11-99 - RESOLUTION APPOINTING A MEMBER TO THE SUSTAINABLE ADVISORY COMMITTEE ON ENERGY & THE ENVIRONMENT**

Vice-Mayor Newman, Chairman of the Boards & Commissions Committee, said that the term Gary Hamrick (member with demonstrated interest in the field of energy management) on the Sustainable Advisory Committee on Energy & the Environment (SACEE) expired on December 31, 2010.

The following individuals applied for vacancies on the Sustainable Advisory Committee on Energy & the Environment: Charles Rosenblum, Parker Spears, Jeremiah Smith Hobie Orton, Michael Leahey, Josh O'Conner, William Hutchings, Isaac Savage and Torin Kexel.

Vice-Mayor Newman said that the Boards & Commissions Committee recommended appointing Isaac Savage.

Councilman Russell moved to appoint Isaac Savage to serve a three-year term, term to expire December 31, 2013, or until his successor has been appointed. This motion was seconded by Councilman Bothwell and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 11**

**ASHEVILLE-BUNCOMBE HISTORIC RESOURCES COMMISSION**

Vice-Mayor Newman, Chairman of the Boards & Commissions Committee, said that Amanda Warren has resigned as a member of the Asheville-Buncombe Historic Resources Commission, thus leaving an unexpired term until July 1, 2012. In addition, on July 1, 2011, the terms of Diane Duermit and Hillary Cole will expire. The Boards & Commissions Committee felt it would be appropriate to roll those into this appointment process.

The following individuals applied for a vacancy on the Historic Resources Commission: Allen Currens, Jay Lively, Randall C. Hall, Brian Cook, Jay Marino and Brendan Ross.

Vice-Mayor Newman said that the Boards & Commissions Committee recommended reappointing Hillary Cole and to interview for the other remaining seat.

City Council instructed the City Clerk to arrange interviews for Allen Currens, Randall C. Hall, Brian Cook and Brendan Ross.

Councilman Smith moved to reappoint Hillary Cole to serve an additional three-year term, term to expire July 1, 2014, or until her successor has been appointed. This motion was seconded by Councilman Davis and carried unanimously.

**VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:**

Councilman Smith encouraged everyone to observe and take advantage of free bus fare during Drive Not To Drive Week on May 16-2.

Councilman Smith was pleased to note that Asheville was crowned Beer City US for the 3rd year in a row.

Mayor Bellamy urged everyone to place non-perishable items in their mailboxes on May 14, 2011, for Stamp Out Hunger Day.

Councilman Davis announced the big Manna Food Bank fundraiser the first Saturday in June.

The following claims were received by the City of Asheville during the period of April 1 – 28, 2011: Mark Chittick (Fire), David Patterson (Parking Services), Betty J. Daughtridge (Water), Charles Bronson (Water), Creekside Homeowners Association (Sanitation), Sherah Linebaugh (Water) and Paul Fleischer (Sanitation). These claims have been referred to Asheville Claims Corporation for investigation.

**VIII. ADJOURNMENT:**

Mayor Bellamy adjourned the meeting at 9:16 p.m.

Magdalen Burleson — Jan M Bellamy

CITY CLERK MAYOR

Tuesday – May 24, 2011 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

**PLEDGE OF ALLEGIANCE**

Ms. Megan Sanchez' Kindergarten Class from Emmanuel Lutheran School led City Council in the Pledge of Allegiance.

**INVOCATION**

Councilman Davis gave the invocation.

**I. PROCLAMATIONS:**

**A. PROCLAMATION PROCLAIMING MAY 24, 2011, AS "BUDDY POPPY DAY"**

Mayor Bellamy read the proclamation proclaiming May 24, 2011, as "Buddy Poppy Day" in the City of Asheville. She presented the proclamation to Ms. Kathy Cook, President of the Ladies Auxiliary to the Veterans of Foreign Wars and Past President Doris Edwards, who briefed City Council on some activities taking place during the day. The members of the VFW Post 891 invited Council to a Memorial Day cook-out on Sunday, May 29, 2011, at 2:00 p.m. at the VFW Post, 626 New Leicester Highway.

**II. CONSENT AGENDA:**

At the request of City staff, it was the consensus to add to the Consent Agenda (1) a resolution authorizing the City Manager to apply for and enter into an agreement with the U.S. Dept. of Justice in order to apply for 5 police officers under the COPS Hiring Program; and (2) a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Asheville Grizzlies Football Game Event on June 11, 2011.

Mayor Bellamy asked that Consent Agenda Item "G" be removed from the Consent Agenda for an individual vote.

**A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MAY 10, 2011**

**B. RESOLUTION NO. 11-100 - RESOLUTION AUTHORIZING YELLOWOOD DRIVE, RED CEDAR LANE, WHITE ASHE, AND SHORTIA LANE TO BECOME PUBLICLY MAINTAINED STREETS**

Summary: The consideration of a resolution to accept Yellowood Drive, Red Cedar Lane, White Ashe Drive and Shortia Lane in Biltmore Park.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council. Biltmore Park agreed to a voluntary annexation contingent to the acceptance of the streets in Biltmore Park provided they are constructed to City standards.

Yellowood Drive, Red Cedar Lane, White Ashe Drive and Shortia Lane were constructed to City standards but inadvertently never accepted by the City for public maintenance.

Yellowood Drive, Red Cedar Lane, White Ashe Drive and Shortia Lane are developer-constructed streets that have an average paved width of 20 to 22 feet and a length of 0.02, 0.05, 0.13, and 0.05 miles, respectively.

Following City Council's approval of this resolution, Yellowood Drive, Red Cedar Lane, White Ashe Drive and Shortia Lane will be added to the official Powell Bill list.

This action is consistent with the agreement that Biltmore Farms and the City agreed to in the voluntary annexation agreement to accept streets constructed to City standards.

Pro:

- The City will receive Powell Bill funds from the NCDOT to assist in the maintenance of the roadway.

Con:

- Powell Bill funds will not cover 100% of the cost to maintain the street.

Typically one-third of the actual maintenance cost of a street is reimbursed by the State through Powell Bill Funds. The financial impact will be minimal.

Staff recommends City Council adopt the resolution to accept Yellowood Drive, Red Cedar Lane, White Ashe Drive and Shortia Lane as City maintained streets.

**RESOLUTION BOOK NO. 34 – PAGE 12**

**C. RESOLUTION NO. 11-101 - RESOLUTION AUTHORIZING THE MAYOR TO ACCEPT PROPERTY OFF ELIZABETH STREET FROM BUNCOMBE COUNTY FOR THE REED CREEK GREENWAY**

Summary: The consideration of a resolution authorizing the Mayor to accept the conveyance of real property adjacent to Elizabeth Street from Buncombe County for the implementation of Phase III of the Reed Creek Greenway.

Buncombe County owns a 0.03 acre remnant parcel (PIN 9649-23-8026-00000) located along Elizabeth Street. This parcel is needed by the City of Asheville in order to assemble the necessary right-of-way to implement Phase III of the Reed Creek Greenway. In February 2011, staff contacted Buncombe County to inquire about conveyance of this property and the county has offered to transfer the property at no cost to the city. Acquisition of the property would allow the Parks, Recreation, and Cultural Arts Department to secure needed greenway right-of-way at minimal cost.

This action complies with the (1) FY 10-11 City Council Strategic Plan in that it supports continuing a funding alternative for enhancing the city's commitment to master plan implementation, infrastructure maintenance, and capital improvements; (2) the Asheville City Development Plan 2025 in that it implements the adopted Greenway Master Plan; and (3) Parks, Recreation, Cultural Arts, and Greenway Master Plan in that it allows for the implementation of the Reed Creek Greenway, a high priority greenway corridor within the master plan.

This item has been reviewed by the Greenway Commission and has received the Commission's endorsement. This item has also been reviewed the by Recreation Advisory Board and at their meeting on May 9, 2011, and they recommended approval.

Pros:

- Securing this property is necessary for Phase III of the Reed Creek Greenway.

- Increases the City's inventory of park space.

Con:

- Modest additional maintenance costs.

No monetary consideration required for the conveyance. Any additional maintenance costs will be absorbed into the Parks Budget.

City staff recommends that City Council adopt the resolution authorizing the Mayor to accept a 0.03 acre parcel of land, adjacent to Elizabeth Street, from Buncombe County for the purpose of implementing Phase III of the Reed Creek Greenway.

**RESOLUTION BOOK NO. 34 – PAGE 14**

**D. RESOLUTION NO. 11-1-2 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY AN EASEMENT OVER A PORTION OF CITY-OWNED PROPERTY AT RIVERSIDE CEMETERY TO JON AND CAITLIN SLOOP**

Summary: The consideration of a resolution authorizing the Mayor to convey an easement over a portion of City-owned property at Riverside Cemetery to Jon and Caitlin Sloop for the purpose of installing a sewer line to service a new single family residence.

The Riverside Cemetery is owned and maintained by the City of Asheville and is approximately 49 acres in size. An MSD sewer line runs along the Northwest boundary of the property and appears to service neighboring residential homes. Asheville residents Jon and Caitlin Sloop have a contract to purchase on an adjoining vacant parcel that fronts Westover Drive and borders Riverside Cemetery. The only available sewer connection is through the Cemetery, and as such Jon and Caitlin Sloop have approached city staff with a request to purchase an easement to install a sewer service line connection to this MSD main line. Parks and cemetery management staff have inspected the proposed easement area. The location is a steep and unusable portion of the City's property, and presents no apparent conflict with the cemetery use.

The proposed easement area is approximately 270.1 square feet (10 feet wide X 27.1 feet long) and would service a new single family residence. To develop a price for the sale of this easement, city staff discussed evaluation methods with MSD, since MSD is often in the position of acquiring easements of this type. In a typical scenario, MSD calculates a per square foot value, based on the tax appraisal of a subject parcel, then reduces the price per square foot by 50% to reflect an easement value.

In this instance, the lot at Westover Drive has a tax value of $68,500 for 0.195 acres. This translates into a per square foot value of $8.08 per square foot, and when reduced by 50% yields a $4.04 per square foot easement value. When multiplied by the area of the easement (270.1), the asking price for the easement equals $1091.41.

If approved, this action would comply with City Council's goal of Job Growth and Community Development by promoting sustainable, infill growth that makes efficient use of existing resources.

This item has been reviewed the by Recreation Advisory Board and at their meeting on May 9, 2011, and they recommended approval.

Pros:

- Modest amount of compensation for the property
- The easement would not interfere with the operation of the Riverside Cemetery nor any relevant future plans

Con:

- None

The modest amount of revenue generated by the sale of the easement will be deposited into the General Fund.

Staff recommends City Council approve a resolution authorizing the Mayor to convey a 270.1 square foot easement over a portion of City-owned property at Riverside Cemetery for the purchase price of $1091 to Jon and Caitlin Sloop.

**RESOLUTION BOOK NO. 34 – PAGE 15**

**E. RESOLUTION NO. 11-103 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A CONTRACT WITH DIXON HUGHES GOODMAN LLP FOR AUDITING SERVICES FOR FISCAL YEAR 2010-11**

Summary: The consideration of a resolution authorizing the Mayor to execute a contract with Dixon Hughes Goodman LLP (hereinafter referred to as Dixon Hughes) for auditing services for fiscal year 2010 - 2011.

North Carolina General Statute 159-34 requires that local governments have their accounts audited each fiscal year and submit a copy of the audit to the Local Government Commission. In response to the aforementioned general statute, staff recommends retaining the services of Dixon Hughes to conduct the audit of the city's accounts for the fiscal year ending June 30, 2011.

Dixon Hughes has extensive experience auditing the City's financial systems, accounts and records. During the past two years, as the City has migrated to more complex financial systems through the implementation of the new enterprise resource planning (ERP) software Munis, Dixon Hughes has gained valuable insight and understanding of the financial system's processes and controls. These experiences will contribute to a more efficient and timely audit.

The proposed audit fee for fiscal year 2010-2011 is $109,000. The initial fee for last year's audit was $110,000 with a supplemental fee of $43,000 for additional services relating to the implementation of the ERP software (a combined total of $153,000). The fee proposal of $109,000 represents a slight decrease from the prior year's base fee of $110,000. No additional services are requested this year in connection with the ERP implementation.

As part of the engagement, Dixon Hughes has included a document required by the Auditing Standards Board that provides a framework for the auditor's communication with the Mayor and City Council and identifies some specific matters to be communicated. Pursuant to the Auditing Standards Board requirement, Dixon Hughes will communicate timely and directly with the Mayor and City Council on matters related to the financial statement audit that are, in the auditor's professional judgment, significant and relevant to the responsibilities of those charged with governance in overseeing the financial reporting process.

Additionally, Dixon Hughes has provided an audit schedule with milestones and timetables in an effort to improve audit planning and ensure that the audit report is delivered timely to the Local Government Commission.

This project complies with City Council's Strategic Operating Plan of operating the City of Asheville's organization to the highest fiscal responsibility.

Pro:

• Contracting with the current external auditor will help ensure the timely and successful completion of the annual audit.

Con:
• None noted.

A fee of $109,000 has been proposed for the audit and is included in the Finance Department's portion of the Fiscal Year 2011-2012 annual operating budget. The total cost for all services for the 2010-2011 audit year are less than last year's by $44,000.

City staff recommends adoption of the resolution authorizing the Mayor to execute a contract with Dixon Hughes Goodman LLP in the amount of $109,000 for auditing services for fiscal year 2010-2011.

In response to Mayor Bellamy, Administrative Services Director Lauren Bradley said that we have contracted with Dixon Hughes Goodman LLP since 2006. We did not bid this contract out because as a service to the City we are able to extend those contracts, especially when there is an established relationship where they may have knowledge of our financial system.

In response to Mayor Bellamy recalling the City being late in sending in our audit to the Local Government Commission, Interim Finance Director Kai Nelson explained some contract changes this year consisting of improved external auditors communication with Mayor and Council and improved planning consisting of timetables and milestones to meet.

Upon inquiry of Vice-Mayor Newman, City Manager Jackson felt it is beneficial to rotate the audit contract every three years.

From a recommendation by Mayor Bellamy, it was the consensus of Council to have the Finance Committee review the audit contract for the following fiscal year.

**RESOLUTION BOOK NO. 34 – PAGE 16**

**F. ORDINANCE NO. 3974 - BUDGET AMENDMENT TO FUND NORTH CAROLINA NATIONAL GUARD ARMORY IMPROVEMENTS**

Summary: The consideration of a budget amendment, in the amount of $10,000, for money paid to the City of Asheville by Ludus Production Inc., to establish a project budget for maintenance work on the property at 57 Shelburne Road, the former North Carolina National Guard Armory.

The City of Asheville entered into a use agreement on March 28, 2011, with Ludus Productions, Inc. allowing Ludus Productions the use of the building at 57 Shelburne Road. In exchange for this agreement, Ludus Productions paid to the City a sum of $10,000. The City intends to utilize this money for necessary work to the 57 Shelburne Road site, including mitigation of lead contamination, asbestos, underground storage tank removal and mitigation, HVAC repairs, roof repairs, and other maintenance items.

This action supports the City's Strategic Goal of Fiscal Responsibility by leveraging internal and external partnerships for pursuing capital improvements and infrastructure projects.

Pros:
- Assists in mitigating environmental issues.
- Utilizes unanticipated revenue for the site on the site.
- Augments Capital Improvement funding on the building.
- Allows more work to be accomplished in the next fiscal year on the site.

Con:

- None

This budget amendment is funded with the unanticipated revenue from Ludus Production, Inc. for use of the building at 57 Shelburne Road; therefore there is no financial impact to the City's General Fund.

City staff recommends City Council approve the budget amendment for $10,000 to be added to the Capital Improvement Plan project.

**ORDINANCE BOOK NO. 27 – PAGE 30**

**G. BUDGET AMENDMENT TO COMPLETE THE CLINGMAN AVENUE STREETSCAPE PROJECT**

This item was removed from the Consent Agenda for an individual vote.

**H. ORDINANCE NO. 3976 - BUDGET AMENDMENT FOR THE ASHEVILLE EAST OF THE RIVERWAY SUBSTANTIAL NEIGHBORHOOD PROJECT**

Summary: The consideration of a budget amendment, in the amount of $1,020,000, to authorize the use of Federal Department of Transportation TIGER II Planning Grant Funds and local matching requirements for the Asheville East of the Riverway Sustainable Neighborhood Project to fund for the Asheville East of the Riverway Sustainable Neighborhood Project to fund contracted and administrative services for predevelopment planning.

The US Department of Transportation was authorized to award TIGER II Discretionary Planning grants pursuant to Title I (Department of Transportation) of Division A of the Consolidated Appropriations Act, 2010 (Pub. L. 111-117, Dec. 16, 2009) (the "Act"). In national competition for funds, the City was awarded a grant of $850,000. The City of Asheville and the Federal Transit Administration (DOT's administrator for the funds) have executed a Cooperative Agreement to complete pre-development planning for an integrated system of greenways, safe streets and improved transit service for Asheville East of the Riverway target area. This proposed budget amendment would authorize the use this funding for contracted services and administrative costs. The funding will assist both general and specific planning efforts. It will enable two long-standing conceptual greenways to move towards implementation, as well as contribute towards the construction readiness of a portion of the Wilma Dykeman Riverway. Other products from the use of these funds will include a transportation network plan and energy plan for the target area, and assessments of development potential for key city owned properties.

The $1,020,000 amendment represents $850,000 of the TIGER II grant funds and $170,000 is the value of staff and partners time that will be assigned as in-kind contributions to the programs objectives.

This action supports the City Council's Strategic Goals under (1) Affordable, by providing an opportunity to enhance the City's long term financial commitment to master plan implementation, infrastructure maintenance, capital improvements and public facilities; (2) Green and Sustainable, by developing a plan to establish a community energy reduction goal in the east of the Riverway area; (3) Job Growth and Community development, by supporting local and regional sustainable community efforts, and specifically the East of the Riverway project; and (4) Multi-Modal Transportation, including the development of a multi-modal transportation plan that will include public transportation, greenways, streets, river access resulting in a prioritized funding list.

Pro:

- Enable the use of TIGER II Planning Grant funds to accomplish important city objectives;

Con:

- None

The federal funds carry a 20% match requirement; this requirement will be met through the designation on city staff time spent on the above projects as in-kind match, and also counting staff time by non-profit organizations partnering on the project as in-kind contributions. No cash match will be necessary so there is no impact on the City's General Fund budget.

Staff recommends approval of the budget amendment, in the amount of $1,020,000, to authorize the use of Federal Department of Transportation TIGER II Planning Grant Funds for the Asheville East of the Riverway Sustainable Neighborhood Project to fund contracted and administrative services for predevelopment planning.

**ORDINANCE BOOK NO. 27 – PAGE 34**

**I. ORDINANCE NO. 3977 - BUDGET AMENDMENT TO REFLECT UPDATED REVENUE RECEIVED FOR CIVIC CENTER RENOVATIONS**

Summary: The consideration of a budget amendment, in the amount of $2,327,331, to increase the Civic Center Capital Fund budget to reflect updated revenue received for Civic Center Renovations.

This amendment budgets the funding that has been secured to date from Tourism Development Authority, Buncombe County, the Alcoholic Beverage Control Board, along with existing Civic Center capital funds. It should be noted that an additional $300,000 is included in the FY 2011-12 Budget Ordinance that Council is also adopting tonight. The amendment will allow the renovation project to proceed with the risers and seat bid package.

This amendment has been presented to the Civic Center Commission and recommended to City Council.

This action supports the City Council Strategic Plan by supporting the Civic Center as a regional entertainment destination and improving the Civic Center customer experience.

Pro:

- Provides Capital budget authorization for revenues in the Civic Center Capital Fund without increasing the General Fund transfer.

Con:

- None.

As noted above, this budget amendment is funded with revenue from outside entities and existing CIP funds. Therefore, there is no impact to the City's General Fund budget.

Civic Center staff and Commission recommend City Council approve a budget amendment to increase the Civic Center Capital Fund budget by $2,327,331.

Councilman Davis was pleased to note the real partnership from the outside entities as everyone has worked a long time to improve the Civic Center.

**ORDINANCE BOOK NO. 27 - PAGE 36**

**J. RESOLUTION NO. 11-106 – RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR AND ENTER INTO AN AGREEMENT WITH THE**

166

**U.S. DEPT. OF JUSTICE IN ORDER TO APPLY FOR FIVE POLICE OFFICERS UNDER THE COPS HIRING PROGRAM**

Summary: The consideration of a resolution authorizing the City Manager to apply for and enter into an agreement with the U.S. Dept. of Justice in order to apply for 5 police officers under the COPS Hiring Program (CHP).

The Asheville Police Department (APD) is requesting authorization to apply for 5 police officer positions to support the ongoing crime prevention activities at the walkover access to Hillcrest Apartments, suppress group and gang related violence in public housing areas in support of the Focused Deterrence strategy and engage youth through Police Activities League (PAL) activities. The APD has been presented with this opportunity to reapply for CHP funding in Fiscal Year2011, after being mistakenly denied for funding by the COPS Office in Fiscal Year 2010.

This action conforms to the City Council's Strategic Operating Plan under 1) Fiscal Responsibility in that we are using federal CHP monies to enhance public safety through the hiring of 5 police officers, and 2) Safe City in that the hired police officers would be working to improve public safety in neighborhoods with the highest levels of crime, and supporting recreation alternatives for youth at risk for gang exposure.

Pros:

- Federal CHP monies to cover the salary and fringe benefits for 5 police officers for three years.

Cons:

- $215,000 increase to COA operating budget at the beginning of the fourth year.

In hiring the 5 police officers, the City of Asheville will receive $645,000 in salary and fringe benefits from the CHP over three years. The City will absorb $215,000 in salary and fringe benefits for the 5 police officers beginning the fourth year.

City staff recommends approval by City Council to apply for the 5 CHP police officer positions.

**RESOLUTION BOOK NO. 34 – PAGE 19**

**K. RESOLUTION NO. 11-107 – RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE GRIZZLIES FOOTBALL GAME EVENT ON JUNE 11, 2011**

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Asheville Grizzlies Football Game Event on June 11, 2011.

Asheville Grizzlies has requested through the City of Asheville Development Services Center that City Council permit them to serve beer and/or unfortified wine at the Asheville Grizzlies Football Game Event and allow for consumption at this event.

The Asheville Grizzlies Football Game Event will be held on Saturday, June 11, 2011, from 5:30 p.m. – 11:00 p.m., within the boundaries of Memorial Stadium as per the event area limits referenced on the accompanying site map.

This action has no direct connection with the City of Asheville Strategic Operating Plan.

Pro:

- Allows fundraising opportunities for Asheville Grizzlies

Con:

- Potential for public safety issues

There is no fiscal impact.

City staff recommends City Council adopt the resolution authorizing the City Manager to approve a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Asheville Grizzlies Football Game Event.

**RESOLUTION BOOK NO. 34 – PAGE 20**

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Manheimer moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

**ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES**

**G. ORDINANCE NO. 3975 - BUDGET AMENDMENT TO COMPLETE THE CLINGMAN AVENUE STREETSCAPE PROJECT**

Summary: The consideration of a budget amendment, in the amount of $250,000, to transfer savings from two completed capital improvement projects to the Clingman Avenue Streetscape project.

On February 9, 2010, City Council approved a contract with Moore & Sons Site Contractor's Inc. to construct the Clingman Avenue Streetscape project. Shortly after the project was awarded, members of the bicycling community voiced their concerns about the bicycle climbing lane not going all the way to Hilliard Avenue.

After much discussion, it decided to extend the climbing lane all the way to Hilliard Ave, in the contract with Moore & Sons. In order to accomplish this, an extensive utility relocation effort needed to be designed and carried out, in addition to new infrastructure to accommodate the full length of the climbing lane. These funds were not originally budgeted into the project. These relocations are the controlling operation to project completion. Once they have been completed, Moore & Sons can begin construction on the two lane section of Clingman Avenue, and ultimately complete the project. Staff estimates that an additional $250,000 is needed to complete this project.

Staff has identified savings from two other recently completed construction projects that can fill the funding needs for Clingman Ave. The Patton Avenue sidewalk project was recently completed with $135,000 remaining in City funds. The Kimberly Avenue ARRA project was also completed under budget, with $115,000 left in available City funds. Staff proposes that these funds totaling $250,000 be transferred to the Clingman Avenue Streetscape project for completion.

Staff has recently successfully completed a federal financial and engineering audit of the project. This was due to the fact that the project was partially funded by NCDOT and FHWA grants. Those grant funds have already been recovered from the respective agencies to the City.

The audits did require follow up upon project completion. This budget amendment will allow this to happen.

As you may already be aware of, the "lower" section of the project has been complete since last fall. We have received much positive response from the community. We anticipate that completion of the "upper" section will do the same.

The project complies with Council's Strategic plan in the Focus Area of Sustainability, as it will address the City's aging infrastructure, as well as fully leveraging funding from the State for transportation improvements. The project also addresses the Focus area of Green, due to the improvements to the City's mutli-modal transportation options, and the unique stormwater bio-retention swale to capture and naturally filter storm run off. In addition, this action complies with the Comprehensive Bicycle Plan.

The project will provide many improved bicycle and pedestrian features, and include a roundabout at the intersection of Clingman Ave. and Roberts Street. It also includes new on-street parking from Roberts Street to Clingman Ave. Extension, bike lanes on both sides from Riverview Street to Clingman Ave. Extension, and a bicycle climbing lane on the up grade side of Clingman Ave. from Clingman Ave. Extension to Hilliard Ave.

Pros:

- Approval of this action will allow for the completion of the Clingman Streetscape project, providing a gateway to a major entrance to the City's west side.
- Utilize saved City funds, thus not requiring any additional funds from the General Fund.
- Fulfilling two previously approved agreements with NCDOT.
- Create a more bicycle and pedestrian friendly facility for the Clingman community by having a full length bicycle climbing lane the entire length of the project.

Con:

- Obligates savings from the Patton Avenue sidewalk project and the Kimberly Avenue ARRA project that otherwise would have gone into capital reserves.

As noted above, this budget amendment will be funded with savings from the Patton Avenue sidewalk project and the Kimberly Avenue ARRA project. If these savings were not used for the Clingman Avenue project, then they would go into capital reserves and be available for future capital needs.

City staff recommends City Council adopt a budget amendment in the amount of $250,000 to complete the Clingman Ave. Streetscape project.

Mayor Bellamy noted that several times last year she had requested that any left-over capital funds from completed sidewalk projects be used toward more sidewalks. She expressed concern that the left-over funds from the Patton Avenue sidewalk project are being used to complete the bicycle climbing lane all the way up to Hilliard Avenue (noting that she is supportive of the bicycle lane).

Director of Administrative Services Lauren Bradley explained that the savings identified from projects that didn't close until the third quarter of the fiscal year.

Engineering Services Manager Greg Shuler explained the original scope of the Clingman Avenue project. He said the reason why the extended bike lane was not included in the original design was due to the excessive cost of relocating numerous utilities, which he described. Out of the $250,000, $135,000 was left-over Patton Avenue sidewalk money.

City Manager Jackson said that it was the direction of Council that the amount of funds for sidewalks increase with this budget as a result of closed out projects. In the Fiscal Year 2011-12 budget for the sidewalk program, under the Capital Improvement Program, there is $165,000 from savings from closed projects. There is a total of approximately $2 Million going toward sidewalk construction, which is two times the total that is being used on sidewalks in the current year.

Mayor Bellamy understood that is being accomplished for Fiscal Year 2011-12; however, in this current year we are allocating $135,000 from a sidewalk project for bike lanes.

Vice-Mayor Newman was supportive of this very important linkage, but noted spending $250,000 for this bike lane linkage was expensive. He wanted to make sure that we feel good that this is going to deliver the best benefit to the City, as there are a number of city-wide projects from the bicycle plan which will improve the bicycle environment in Asheville. Mr. Shuler responded that this linkage is identified on the Pedestrian Thoroughfare Plan, along with support from the bicycle community, as well as our Transportation Department. He felt this will certainly improve the safety of bicyclists.

Councilman Russell moved for the adoption of Ordinance No. 3975. This motion was seconded by Councilman Smith and carried on a 6-1 vote, with Mayor Bellamy voting "no."

**ORDINANCE BOOK NO. 27 – PAGE 32**

## III. PRESENTATIONS & REPORTS:

### A. QUARTERLY REPORTS

**Finance Committee**

Councilman Russell, Chairman of the Finance Committee, updated Council on some major accomplishments during the 3rd quarter of the Committee as follows:

**Strategic Operating Plan**

Assistant City Manager Jeff Richardson said that the Asheville City Council identified short and long term goals at the January 2010 strategic planning retreat and staff is providing its quarterly updates on progress of the five key focus areas.

City Council asked City staff to provide quarterly updates on key strategic initiatives associated with the five primary focus areas of the City's Strategic Plan. Staff has tracked projects using performance indicators and measurements through the Fiscal Year 2010-11. Staff continues to use a video format to provide project updates so that Council hears from a variety of line and management staff involved in key goals and milestones.

He then showed Council a video showing the staff's progress on the key strategic areas for this quarter.

In addition, as a subset to this presentation, staff provided the Economic Development Key Indicator Report.

City Council has asked for an activity report on a quarterly basis of the Domestic Partner Registry. For the first three weeks of implementing the Registry, 13 couples have registered.

This information is to update City Council on key operational initiatives specific to the Strategic Operating Plan. No action is necessary at this time.

In response to Councilman Smith, Director of Transportation Ken Putnam said that the City does have a plan of action regarding maintenance under the Hillcrest Bridge.

In response to Councilman Smith, Mr. Putnam said that there will not be bike lanes on Brevard Road; however, they will construct a wide outside lane for bicyclists.

**Financial Report**

Director of Administrative Services Lauren Bradley said that the financial information in this report reflects the City's overall financial position for the fiscal year through March 2011.

The following is the executive summary:

*Amendments.* There were three General Fund budget amendments adopted during the third quarter: 1) $5,071 in contributions from the Asheville Parks and Greenways Foundation to support various programs and special projects within the Parks, Recreation & Cultural Arts Department; 2) $15,000 to recognize additional revenue received from the Asheville Tourists that is being used to fund operations and capital improvements to McCormick Field; and 3) $284,000 from capital reserves to fund the replacement of HVAC equipment at Pack Place Education, Arts & Science Center. A summary of the budget changes since July 1 is presented below.

| | |
|---|---|
| Adopted Budget | $ 91,635,962 |
| Health Care Technical Adjustment | (3,553,000) |
| Budget Amendments: | |
| City Hall Repairs* | 450,000 |
| Annexation Revenue & Expenses | 166,757 |
| Parks & Greenway Foundation | 5,071 |
| Asheville Tourists Payment | 15,000 |
| Pack Place HVAC Repair** | 284,000 |
| 3/31/2011 Budget | $ 89,003,790 |

* Fund balance appropriation
** Capital reserve appropriation. There is approximately
$166,000 remaining in capital reserves

*Revenues.* Through March 31, 2011, the City has collected $71,719,635 in General Fund revenue, which represents approximately 81% of the total General Fund revenue budget. In March, the City received an additional $86,300 in Powell Bill funding after the State corrected an error in its original Powell Bill funding for FY 2010-11. The City also continued to see modest growth in sales tax revenue during the third quarter, with revenue for the year now up 1.7% compared to last fiscal year. Revenue from building permits continues to trend lower than budget. In addition, the third quarter report from the ABC Board indicates that the City's revenue that from ABC sales will come in under budget this year. Overall, staff is now projecting that *total FY 2010-11 General Fund revenue will come in under budget by $1.35 million.*

*Expenditures.* General Fund expenditures through March 31, 2011, total $60,891,538 or 68.4% of the budget. This rate of expenditure is slightly lower than in prior years, which reflects the impact of the savings strategies that staff has implemented during the fiscal year. *These strategies include a selective hiring program, line item reductions, deferring capital expenses where possible, and seeking opportunities to maximize efficiency in operations.*

*Fund Balance.* The City ended FY 2009-10 with available fund balance of $12.3 million, which equated to 14.2% of FY 2009-10 expenditures. *Based on financial results through the third*

*quarter, staff is still projecting that FY 2010-11 expenditures will roughly equal revenues, which means available fund balance will remain at $12.3 million or 14.2% of estimated expenditures.*

**IV. PUBLIC HEARINGS:**

**A. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR THE PROJECT IDENTIFIED AS INGLES MARKETS INC. LOCATED AT 863 BREVARD ROAD FOR THE CONSTRUCTION OF A 99,073 SQUARE FOOT GROCERY STORE AND GASOLINE FUELING STATION WITH MODIFICATION REQUESTS TO OFF-STREET LOADING, OFF-STREET PARKING AND RETAINING WALL STANDARDS**

**ORDINANCE NO. 3978 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR THE PROJECT IDENTIFIED AS INGLES MARKETS INC. LOCATED AT 863 BREVARD ROAD FOR THE CONSTRUCTION OF A 99,073 SQUARE FOOT GROCERY STORE AND GASOLINE FUELING STATION**

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

City Attorney Oast said that the Authorized Practice Committee of the North Carolina State Bar has issued an advisory opinion that appearing in a representative capacity for a party before a local governmental body in a quasi-judicial proceeding is the practice of law, especially with respect to such aspects of the hearing as examining or cross-examining witnesses, or advocating for legal conclusions or results. This does not prevent persons, including land use professionals, from presenting information or expressing opinions within their knowledge or area of expertise.

Urban Planner Nate Pennington submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Pennington said that this is the consideration of the issuance of a conditional use permit for the project identified as Ingles Markets, Inc., located at 863 Brevard Road, for the construction of a 99,073 square foot grocery store and gasoline fueling station with modification requests to off-street loading, off-street parking and retaining wall standards. This public hearing was advertised on May 13 and 20, 2011.

He said that the applicant is requesting site plan approval for one parcel zoned RB (Regional Business) for the redevelopment of an existing Ingles grocery store in accordance with Section 7-5-9(a) of the UDO which designates review for commercial buildings with a gross floor area of more than 100,000 square feet. Level III projects are reviewed as Conditional Use Permits in the Regional Business district.

The project site consists of one parcel comprising 8.06 acres according to the submitted site plans. The project proposes to demolish the existing Ingles store in phases so as to remain open during construction and reconstruct a larger grocery store (City Exhibit 4 – Site Plan). Further, the project will include a gas canopy and retail kiosk along Brevard Road. The following list provides a breakdown of the existing shopping center and the proposed development:

| | |
|---|---|
| Existing | |
| Ingles Store: | 53,572 SF |
| | |
| Proposed | |
| New Ingles Store: | 99,166 SF |
| Gas Canopy/Retail Kiosk: | 4,853 SF |
| **Total Shopping Center:** | **104,019 SF** |

The combined square footage of the development meets the Level III review threshold (projects exceeding 100,000 square feet) and is subject to the Conditional Use Permit findings outlined in Section 7-16-2(c) of the UDO.

The project is proposed to be phased in a way that will allow Ingles to remain operational during all phases of construction. Phase I involves the demolition of a portion of the building along the northern perimeter including grading for a portion of the new building. Once this is complete, construction will begin in this area on the new building. When complete, Ingles will relocate into the new portion of the building and the rest of the remaining building will be demolished and rebuilt to form a unified store as part of Phase II.

Primary access to the site is from an existing traffic light along Brevard Road. A secondary un-signalized entrance (to be used primarily as a truck route) is proposed near the existing adjacent Citgo gas station and convenience store to the south.

According to the site plan, 297 spaces are required inclusive of required ADA parking. A bike rack with fifteen (15) spaces is proposed in front of the new Ingles store. A modification request is being sought to authorize a reduction in the amount of required off-street parking (see Modifications section below).

Significant landscaping will be required throughout the site, including street trees, parking lot landscaping, street buffering, building impact landscaping, dumpster/loading zone screening, and a Class "B" bufferyard along the northwest portion of the rear property line. The rear buffer separates the neighboring residential zoning designation (RS-4) from the commercial zoning designation (RB) of the subject property.

The open space requirement for this type of development is 15% of the total site size; a total of 1.2 acres for this site. The site plan illustrates that 1.38 acres has been reserved to meet this requirement.

While signage is illustrated on the elevation drawings for this project, it is not part of this development review. Signage for the development will be reviewed in detail with the master sign package application following the public hearing on this project.

The applicant is requesting a total of three (3) modifications to the site plan which must be approved by City Council. The staff supports all three (3) of the requests.

1. *Retaining Walls* – Section 7-10-5 of the UDO requires that foreground landscaping or attached vegetative screening be required for any retaining wall sections over 20 feet in height regardless of location relative to a public or private street. Retaining wall "C" is proposed to be located behind and partially to the side of the new building in the northwest corner of the subject

property. The wall varies in height and approximately 85 linear feet will exceed 20 feet in height. The wall will be constructed adjacent to a vehicular access aisle that wraps around the store. The applicant has requested a modification to not include foreground or attached vegetative landscaping along the 85 linear feet of wall that exceeds 20 feet. The wall will meet the standard requiring it to be faced with natural or artificial stone, brick, form-liner art or patterns. Given the difficulty in planting in such close proximity to the vehicular access aisle and the location of the wall behind and partially to the side of the store, the **staff supports this request.**

2. *Off-Street Parking* – Section 7-11-2(c)(1) of the UDO requires a minimum number of off-street parking spaces based on land use. The Ingles development requires a total of 297 spaces. 217 spaces are provided resulting in a deficiency of 80 spaces or approximately 26% of the required total. The applicant has provided staff with a parking analysis for supporting the parking reduction based on the peak operating hours of the store. Therefore, the **staff supports this request.**

3. *Off-Street Loading* – Section 7-11-2(c)(3) of the UDO requires a minimum number of loading berths based on structure size. For a store of this size, four (4) loading berths are required. The applicant has proposed two (2) loading berths as part of their development. This design is similar to other Ingles stores throughout the area including the location closest to downtown Asheville on Tunnel Road. The site is encumbered by sloping topography along the rear perimeter of the property. Therefore, the building was designed to include the loading berths along the south side of the building towards the rear of the property. The applicant has stated that the Ingles distribution center is located approximately 20 minutes from the Brevard Road store and the proximity of the center to the store allows for coordinated deliveries. Given the topography of the site and the proximity of the distribution center, the **staff supports this request.**

This proposal was recommended for approval with conditions by the Technical Review Committee (TRC) on March 7, 2011. No members of the public were present to speak on this project. The staff did receive a phone call sometime after the meeting from a neighbor who lives on Wedgefield Drive who was concerned about trash and debris blowing upward from the existing Ingles store onto adjacent properties.

At their regularly scheduled meeting on May 4, 2011, the Planning and Zoning Commission unanimously approved this project. One neighboring property owner spoke about concerns related to trash and debris blowing onto her property from the Ingles site in the past but expressed positive support for the project moving forward.

City Council must take formal action as set forth in Section 7-5-5(e)(3) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case pursuant to Section 7-16-2(c). Staff's review indicates that all seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the *UDO*, the *Standards and Specifications Manual*, the *North Carolina Building Code* and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**

This project represents the redevelopment of the existing Ingles store into a larger grocery store, gas canopy and retail kiosk.

The residential neighborhood to the rear of the property is separated from this project by sloping topography and a Class "B" bufferyard. The remaining portions of the property are surrounded by similar commercial developments of similar zoning along the Brevard Road corridor.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
As noted in Finding #2, the proposed development is compatible with surrounding commercial uses and the residential nature of the property to the rear of the development will be buffered by additional vegetation, open space and the existing topographical elevation change.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
The site is adjacent to a hotel to the east, a gas station to the west and a number of commercial uses along the Brevard Road corridor including the Biltmore Square Mall, fast food restaurants and other commercial developments. The proposed use is consistent with both the existing zoning and character of the Brevard Road commercial corridor in which it is located while maintaining sensitivity to the adjoining residential neighborhood along Wedgefield Drive behind the proposed store through the use of mitigating factors including additional landscaping, open space and existing topography.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
Elements of the proposal are aligned with the City's goals and objectives as noted in the Compliance with Comprehensive Plan and other Adopted Plans section (listed above). Specifically, the redevelopment and expansion of the store is consistent with the goals of infill development along an established commercial corridor.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
The site is located just off Brevard Rd (NC 191) and is within approximately one (1) mile of an entrance to I-26. A bus shelter is proposed along Brevard Road to accommodate public transportation. Adequate water supply, fire and police protection, waste disposal and similar facilities are verified during the TRC review process.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
A traffic impact study has confirmed that the proposed use will not cause undue traffic congestion or create a traffic hazard along the existing street network. The main access point is currently controlled by an existing traffic signal.

Based on the above findings and the analysis provided in the report, staff finds this request, with conditions noted, to be reasonable.

Pros:

- Provides an opportunity to redevelop and upgrade an existing developed site.
- The project will ultimately provide additional jobs to the local economy.

- An enhanced architectural building and landscaped parking lot will significantly improve the overall appearance of the grocery store making the development more compatible with the surrounding area.

Con:

- None noted

Staff recommends approval of the project as submitted by the applicant, including the modifications supported by the staff.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 6:02 p.m.

The Civil Engineer for the project made himself available for Council questions.

Mayor Bellamy closed the public hearing at 6:04 p.m.

Upon inquiry of Councilman Bothwell, Mr. Pennington said that Ingles has submitted a lighting plan within the 20 foot candle range in accordance with the City requirements.

Councilman Smith felt it may be time for the City to review our parking requirements city-wide as they may be too high.

Councilman Russell moved for the adoption of Ordinance No. 3978, granting a conditional use permit for the project identified as Ingles Markets, Inc., located at 863 Brevard Road, for the construction of a 99,073 square foot grocery store and gasoline fueling station with modifications to off-street loading, off-street parking and retaining wall standards, subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with cut-off fixtures or full cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; and (5) This project will undergo final review by the TRC prior to issuance of any required permits. This motion was seconded by Councilwoman Manheimer and carried unanimously.

**ORDINANCE BOOK NO. 27 – PAGE 38**

**B. PUBLIC HEARING TO CONSIDER A SIGNAGE PLAN FOR A NEW INGLES STORE AND ANCILLARY USES LOCATED AT 863 BREVARD ROAD**

**ORDINANCE NO. 3979 - ORDINANCE APPROVING A SIGNAGE PLAN FOR A NEW INGLES STORE AND ANCILLARY USES LOCATED AT 863 BREVARD ROAD**

Urban Planner Kim Hamel said that this is the consideration of an ordinance approving a signage plan for a new Ingles store and proposed ancillary uses located at 863 Brevard Road. This public hearing was advertised on May 13 and 20, 2011.

The proposed master signage plan is being reviewed concurrently with a Level III, Conditional Use application (also prepared by the applicant) for the redevelopment of the site.

The signs included in this proposal address the attached building signage for the new supermarket, and the signage proposed for a new gasoline sales station.

The project site consists of 8.06 acres, is zoned Regional Business (RB), and is considered a single-tenant development as no other tenant, except for Ingles exists on the site. Single-tenant development signage is permitted for the new supermarket component of the project, and also for the gasoline service station since the use can stand independently from the grocery store and is able to comply with Unified Development Ordinance (UDO) development and design standards as if it were on its own parcel.

As separate single tenants, each tenant is permitted up to 125 square feet of attached signage that could be separated into two separate signs for a cumulative total not to exceed 125 square feet. In addition, a separate free-standing sign is permitted for a total of, again, 125 square feet with a height not to exceed 25 feet.

Signage is requested for each separate service and includes:

- Multiple attached signage for the principal Ingles supermarket
- Attached signage for the retail gasoline service center (Gas Express); and
- One single tenant free-standing pylon sign with a changeable copy panel.

The following table provides a summary of the signage proposed, as well as, what would be allowed under the existing sign code.

| **INGLES MARKET ATTACHED SIGNAGE: (EXHIBIT I)** | **PROPOSED** | **WHAT IS ALLOWED** | **AMOUNT EXCEEDED** |
|---|---|---|---|
| Ingles (Store Sign) | 202.02 s.f. | 1sign @ 125 s.f. (may be split into 2 signs max.) | 77.02 s.f. |
| American Owned | 36.0 s.f. | Not allowed unless part of above | 36.0 s.f. |
| Fresh Foods | 29.46 s.f. | Not allowed unless part of above | 29.46 s.f. |
| Starbuck's | 16.0 s.f. | Not allowed unless not visible from the R.O.W. | 16.0 s.f. |
| Cafe | **8.48 s.f. | Not allowed unless not visible from the R.O.W. | 8.48 s/f/ |
| Pharmacy Drive-Thru | *13.13 s.f. | Wayfinding/directional | allowed |
| **TOTAL ATTACHED SIGNAGE:** | **291.96** | **5 signs versus 2** | **166.96** |
| **FREE STANDING (EXHIBIT II)** | | | |
| Free-standing Pylon | 180.26 s.f. | 1 sign @ 125 s.f | 55.26 s.f |

*The Pharmacy Drive-Thru sign was not included in the total square footage since it is considered wayfinding or directional signage. ** There is also a precedent for exempting the Café sign when reduced in size so as not to be visible from the public right-of-way or adjacent properties.*

*Note: The gas services station and kiosk are treated as a single tenant since the property area can be subdivided to stand on its own as a separate development. **When a free-standing sign*

*is not proposed, (1) additional attached sign is permitted on the building for a total of 3 attached signs (1@ 125 s.f. and 2 signs @ 62.50 s.f)*

| GAS SERVICE STATION AND KIOSK SIGNS (EXHIBIT III AND IV) | PROPOSED | WHAT IS ALLOWED | AMOUNT EXCEEDED |
|---|---|---|---|
| Gas Express and Ingles: Canopy | 36.8 s.f. | 1sign @ 125 s.f. (may be split into 2 signs max.) | Permitted and Complies |
| Ingles, canopy | 19.25 s.f. | Split sign allowance | Permitted and Complies |
| Kiosk Signage | 15.03 s.f. | 3rd attached sign permitted | Permitted and Complies |
| **TOTAL ATTACHED SIGNAGE:** | **71.08 s.f** | 3rd attached sign permitted: No free-standing sign proposed | Permitted and Complies |

As stated above, both the grocery store and gas service station are regarded as separate tenants and are allowed the same single tenant allowances. The attached signs proposed for the grocery store exceeds the number of signs allowed (5 instead of 2) and also exceeds the total square footage allowed (291.96 s.f. instead of 125 s.f.). The free-standing pylon sign for the site also exceeds the total square footage allowed (180.26 s.f. instead of 125 s.f)

The signage for the gas center actually meets the existing sign code requirements since a free-standing ground sign is not proposed for the gas center.

The stated purpose of allowing the consideration of a separate signage plan is as follows:

*The purpose behind this section is to permit creativity in sign design and placement to address site issues and constraints associated with topography, pedestrian-orientation, way-finding and other conditions unique to the subject development.*

In the context of the significant number of applications for signs received daily by the City, it is somewhat difficult to recognize the creativity in the proposed signage plan. Also, when compared to the unique characteristics associated with other larger redevelopment plans presented by Ingles, a signage plan at this site is somewhat more difficult to support given that the redevelopment is on a much smaller parcel and that a multi-tenant component is not included in this application.

We do, however, feel that a precedent has been set through the approval of three other sign packages for Ingles, all of which are substantially similar to the signage included in this report, including one approval for a single-tenant development on Tunnel Road. We also support Ingles proposal to seek only one free-standing sign at this location versus other approvals that permitted two or three free-standing signs at one location.

Pros:

- Provides clear and recognizable signage to a large grocery retailer; and
- Unlike other sign plan approvals for Ingles, only one free-standing sign is proposed for the development.

Cons:

- Exceeds existing standards without creatively addressing pedestrian-orientation or wayfinding;

178

- May continue to set a non-conforming precedent for other stores in Asheville.

Staff recommends that the signage plan for the Ingles development located at 863 Brevard Road be approved as submitted with the following conditions: (1) All signs shall meet the required setbacks, site distance triangles and building code requirements; (2) Window films shall be limited to images only; and (3) All signs shall comply with the proposed standards and no exceptions or variances are permitted.

Mayor Bellamy opened the public hearing at 6:09 p.m., and when no one spoke, she closed the public hearing at 6:09 p.m.

Councilman Smith was concerned that it felt like Council is granting a special exemption to a single company (Ingles). If it's Council's will to have a bigger signage plan for big box stores, he would be open to studying it, but he did not support a standing exemption.

Councilman Bothwell could not support the signage plan as he felt the existing sign regulations are adequate and all businesses should comply.

Vice-Mayor Newman explained that we have a policy that states there are standard signage regulations that anyone is allowed by a use by right. And, if there is a large project, the developer can present a master plan for signage, which is more tailored for that specific site. He disagreed that this is a special exemption for Ingles, as Council has approved several cases where there was a consolidation of signs for a more aesthetically pleasing site. He felt that allowing the signage plan allows a developer to be creative.

There was a brief discussion regarding the City's ability to govern billboards vs. signs.

At the suggestion of Councilman Russell, it was the consensus of Council to have the Planning & Economic Development Committee review the existing sign code requirements.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3979. This motion was seconded by Councilwoman Manheimer and carried on a 5-2 vote with Councilman Bothwell and Councilman Smith voting "no."

**ORDINANCE BOOK NO. 27 – PAGE 43**

**C. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE CONDITIONAL ZONING MASTER PLAN FOR THE PROJECT IDENTIFIED AS BUNCOMBE COUNTY COURTHOUSE LIFE SAFETY ADDITION, LOCATED AT 60 COURT PLAZA, TO ADD PHASE II FOR THE CONSTRUCTION OF A NEW 105,000 SQUARE FOOT BUILDING IDENTIFIED AS BUNCOMBE COUNTY COURTS BUILDING AND STREETSCAPE ENHANCEMENTS ALONG COLLEGE STREET WITH MODIFICATION REQUESTS TO STANDARDS AS FOUND IN SECTION 7-8-18 OF THE UNIFIED DEVELOPMENT ORDINANCE**

**ORDINANCE NO. 3980 - ORDINANCE TO AMEND THE CONDITIONAL ZONING MASTER PLAN FOR THE PROJECT IDENTIFIED AS BUNCOMBE COUNTY COURTHOUSE LIFE SAFETY ADDITION, LOCATED AT 60 COURT PLAZA, TO ADD PHASE II FOR THE CONSTRUCTION OF A NEW 105,000 SQUARE FOOT BUILDING IDENTIFIED AS BUNCOMBE COUNTY COURTS BUILDING AND STREETSCAPE ENHANCEMENTS ALONG COLLEGE STREET**

Urban Planner Jessica Bernstein said that this is the consideration of an ordinance to consider an amendment to the Conditional Zoning master plan for the project identified as Buncombe County Courthouse Life Safety Addition, located at 60 Court Plaza to add Phase II for the construction of a new 105,000 square foot building identified as Buncombe County Courts Building and streetscape enhancements along College Street with modification requests to standards as found in Section 7-8-18 of the Unified Development Ordinance. This public hearing was advertised on May 13 and 20, 2011.

She said that this is a request for review of a proposed amendment to a previously approved Conditional Zoning in the CBD (BP # 10-1957 – Ord. No. 3881) to accommodate the construction of a new courts building adjacent to the Buncombe County Courthouse.

The project area consists of 4 parcels with an approximate area of 1.864 acres. The site is located at the corner of College Street and Davidson Street (closed ROW) and extends eastward along College Street towards the roundabout. This area is zoned Central Business District and is currently vacant – acting as the staging area for the Life Safety Addition currently under construction.

The Life Safety Addition (LSA) approval from 2010 is modified under this proposal, removing the lobby entrance and monumental staircase / hardscaped plaza as shown on those plans. This amendment includes the Phase II building alluded to during the 2010 LSA review, a revised plaza / streetscape design and includes the demolition of the rear portion of 205 College Street.

The proposal is for a new four-story Buncombe County Courts Building which will have 105,000 square feet of gross floor area. The height is shown as 74'4" to the floor of the highest occupied level and 86' to the top of the parapet.

The proposed Courts Building includes the lobby / entry vestibule shown in the original LSA proposal, with upgraded areas for security guards and a separate security office, entry points with two metal detectors and an handicapped accessible gate and an adjacent exit area. All visitors to the historic County Courthouse will use this entry point as well, and will be routed through the new Courts Building to the LSA and then into the historic Courthouse. This consolidated ground level entry/exit lobby enhances security options for the Courthouse in a way to make for more efficient check-in and allows guards to monitor all coming and going from the building(s).

The plaza design from the previous approval is revised under this submittal and will be significantly enhanced and enlarged with benches, increased landscaping, pedestrian pathways and monumental steps. These improvements will aid in providing clear visual direction to pedestrians as to where to access the Courthouse as well as offering public gathering spaces. Sidewalks directly along College Street will be enlarged to 11' in width and street trees are provided along this frontage. The site layout proposes eliminating all on-street parking spaces along College Street for security purposes.

The following modifications require approval by City Council with a recommendation from the Downtown Commission and Planning & Zoning Commission:

1. Pedestrian Entrance – The pedestrian entrance is required to be on a frontage line, however in this design, the lobby is located off of the College Street frontage to face into the plaza / gathering spaces.
2. Fenestration – 70% of the street-level façade is required to be composed of windows, doors and other openings but due to security concerns, there are no openings proposed along the College Street frontage.

180

3. Solid Expanses – Area of opaque wall are not permitted to extend more than 20' in length at the street level without windows, doors or other openings. For security concerns, the entire ground level along College Street is opaque.

The Technical Review Committee (TRC) evaluated this request on April 4, 2011, and it was approved with conditions. No opposition has been received as of the writing of this report.

On April 8, 2011, the Downtown Commission unanimously (9-0) recommended approval of the project and design, including the modifications of pedestrian entrance, fenestration and solid expanses, with the following conditions (1) encourage the applicant to look at the cap and see if there is a way to minimally increase detail; (2) the applicant should look at possibilities to integrate the street furniture (bollards, benches, handrails) from a design standpoint from Pack Square Park into this area; and (3) encourage the application to look at street trees with a more upright growth pattern and higher limb height and (4) try to lessen the number of bollards to minimize visual impact. They also recommended approval of two modifications that were subsequently determined not to be needed: setback and signage.

The Planning & Zoning Commission discussed this proposal at their meeting on May 4, 2011 and unanimously (7-0) recommended approval of the project, including the modifications as described in this report.

Life Safety Addition proposed to be completed by May 2012. Courts Building proposed to be completed by January 2013.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the *UDO*, the *Standards and Specifications Manual*, the *North Carolina Building Code* and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   There are no significant natural or topographic features on the site. There is a slight grade change running along the frontage which is accommodated along College Street through the plaza design and monumental steps leading pedestrians to the entry point.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The development is not expected to injure the value of adjoining or abutting properties. The use enhances and improves the existing government and public safety functions along this block (all adjoining and abutting parcels are owned by the County).

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   The new Courts building is appropriate to the area, which has evolved as a governmental "campus" location for City and County uses. The proposed development is generally

compatible with the Buncombe County Courthouse in design and character by use of like materials, while allowing for a more contemporary vision. Additionally, the changes to the plaza and College Street pedestrian area will greatly enhance the character of the waiting spaces and viewing areas for the various war and fallen officer monuments.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
The *Asheville City Development Plan 2025,* the *Downtown Asheville Center City Plan* and the *Downtown Master Plan* all stress that having a mix of uses – which includes civic (governmental) – is an asset and vital for the strength of downtown. Specifically, the City and County services are essential to bringing people downtown, providing employment and reinforcing downtown's status as the center of the region. The *Center City Plan* states that it is important to consolidate governmental uses to the existing "campus" location (p. 60-61) which this proposal facilitates.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
This proposal is located near major road facilities and along multiple City bus routes in the walkable Central Business District. In addition, basic infrastructure appears adequate and preliminary review by other service providers has not revealed any problems for future service to the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
The proposed project has been reviewed by the City Traffic Engineer and it should not cause undue traffic congestion along the existing street infrastructure. The anticipated traffic is expected to be less than one hundred (100) vehicles per hour during the morning and afternoon peak hours during a typical weekday; no traffic impact statement is needed.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- Provides an upgraded, modernized judicial facility with enhanced security for judges as well as the public, secure access to and from the jail and the layout of the building allows room for future expansion.

- The overall project provides needed safety and access upgrades to the Buncombe County Courthouse building, prolonging the usability of this iconic historic structure.

- Moving courts uses from the Buncombe County Courthouse building creates opportunities for renovation and expansion with the historic structure.

- Enhancements to the plaza and widened sidewalk create greater visibility along College Street as well as a cohesive, designed streetscape experience.

Con:

- Due to the nature of the use, security restrictions result in elimination of on-street parking as well as a non-active ground level façade, which may somewhat lessen the pedestrian experience and activity along College Street in front of the building.

Staff recommends approval of the amendment to the conditional zoning as submitted by the applicant, including the modifications to location of pedestrian entrance, fenestration and expanses of solid wall.

Mayor Bellamy opened the public hearing at 6:24 p.m., and when no one spoke, she closed the public hearing at 6:24 p.m.

Mr. Keith Hargrove, architect for the project, responded to Mayor Bellamy's concerns regarding the materials on the side of the building facing College Street, as that is a gateway into downtown.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Davis moved for the adoption of Ordinance No. 3980, to amend the Conditional Zoning master plan for the project identified as Buncombe County Courthouse Life Safety Addition, located at 60 Court Plaza, to add Phase II for the construction of a new 105,000 square foot building identified as Buncombe County Courts Building including (1) streetscape enhancements along College Street; and (2) modifications to standards as found in Section 7-8-18 of the Unified Development Ordinance, subject to the following conditions (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with cut-off fixtures or full cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (5) This project will undergo final review by the TRC prior to issuance of any required permits; and (6) The applicant is required to record the signed ordinance with the Buncombe County Register of Deeds. This motion was seconded by Councilman Russell and carried unanimously.

**ORDINANCE BOOK NO. 27 - PAGE 50**

**V. UNFINISHED BUSINESS:**

**A. STATE LEGISLATIVE UPDATE**

City Attorney Oast said that this is a review of activity in the 2011 Session of the North Carolina General Assembly.

Council adopted its Legislative Agenda on January 25, 2011. The North Carolina General Assembly convened for the 2011 regular session on January 26. By letter dated February 21, 2011, the City transmitted its legislative agenda and supporting materials to the local delegation. The deadline for submitting local bills to bill drafting and for the introduction of local bills in either house has passed. The next significant deadline in the General Assembly is the "crossover" deadline, now June 9, which is the date by which a bill needs to be adopted in one chamber of the General Assembly in order to "cross over" to the other chamber and remain eligible for consideration during this session.

I. Asheville Requests.

A. Woodfin/Asheville boundary adjustment. We have engaged a surveyor to provide a more precise description of what the new boundary will be. We contacted property owners in the area to let them know what was happening but have heard nothing

back. We will work up final language for inclusion in the bill and provide it to legislative staff. If adopted, law would be effective July 1.

B. Clarification of the Video Service Competition Act. Although there has been much discussion and debate about legislation for cities to engage in fiber-optic service as a public enterprise (popularly known as "municipal broadband"), there has been no discussion of preserving local government I-Nets (or other facilities) that were part of local cable franchises.

C. Financing of local energy improvements. A bill to implement the NC Save$ Energy Program which would provide assistance where needed for energy efficiency improvements to personal residences, has been introduced in the House. Our office provided some assistance to the legislative staff. Senator Nesbitt is also interested in this initiative, and we have supplied information to his office.

II. Other Legislative Matters Affecting Asheville.

A. Annexation. There continues to be much interest in revising the annexation law. A bill has been introduced (HB 845) that would allow annexation to continue, but would require that cities install water/sewer connections within a certain time, and would provide a petition process for residents in the annexation area to opt out. This does not appear to affect current annexations, and is not a moratorium. However, other bills to "undo" specific annexations, including Biltmore Lake, remain in play, and will likely come up for consideration once HB 845 is acted on (adoption seems likely).

B. Greater Asheville Area Regional Airport Authority. On March 30, a bill (HB 552) was introduced to establish the Greater Asheville Regional Airport Authority as an independent authority. The City of Asheville did not request this bill, and had no input into the language of it. The proposal provides for Henderson County, Buncombe County, and Asheville each to have two seats, with the seventh seat to be appointed by the other six, and generally provides for the Authority to have some governmental powers, such as the ability to own real property.

Most if not all of the land on which the airport is situated is owned by the City of Asheville, and leased to the Airport Authority. Of particular concern to the City regarding the legislation is a provision that requires the City to convey its property to the Airport Authority, apparently without compensation. We are investigating what property would be involved, how the property was acquired, who paid for it, and the effect of FAA regulations on our ability to convey the property and receive compensation.

Council had a strong reaction to this bill at last month's meeting, and the members of our delegation have been advised that Council opposes this bill. We are advised that a proposed committee substitute (PCS) is being developed, but have not seen any alternative language.

C. Merger of Water System/Sewer System: To the surprise of practically everyone, a bill was introduced on May 5 (the day after NCLM Town Hall Day) that, though crafted as general legislation, would apply only to the City of Asheville. The bill requires the City to convey the water system to MSD.

This bill has attracted a lot of attention from the League of Municipalities, and other legislators, as well as the local media. Again, this forced conveyance appears to be without compensation, and we are investigating whether this can be legally done. The League of Municipalities has advised us that it will oppose the bill.

III. Other Bills of Interest. With the filing deadlines now passed, the volume of bills being introduced has dropped considerably. Some bills that were covered in my last report have attracted considerable interest, they include:

- HB 687 – Provide that when cities and counties enact ordinances or take administrative actions for which there is no statutory authority, and the ordinance or action is an abuse or authority, a successful plaintiff may recover attorney fees.

- HB 652 – Property Owners Protection Act. Award attorney fees to successful litigants in land use cases against local government.

The issue with these bills is that they could potentially result in the award of attorney fees any time a legal case is resolved against a local government. Under existing law, local governments (and employees and officials) have some ability to exercise professional judgment in carrying out their duties. These laws would have the effect of limiting that ability. This would apply in the administrative (code enforcement) as well as legislative (ordinance policy adoption) contexts. The League of Municipalities strongly opposed these bills.

Upon inquiry of Councilman Bothwell, Mayor Bellamy explained Senate Bill 183. In summary, the legislation would dramatically expand the allowable cutting of trees along public roadways in front of billboards and allow clear cutting in front of existing billboards in our communities. In addition, it would limit our ability as cities and citizens to protect the appearance of our communities. Specifically, trees and vegetation could be cleared in a 380-foot zone around billboards outside of cities and a 340-foot zone in cities along interstates and freeways, an increase from the current 250-foot cut zone. The bill would prohibit enforcement of local tree ordinances in front of billboards along interstates and federally assisted highways. She said that trees and green spaces are more valuable to our community than increasing the prominence of billboards. Protecting our neighborhoods' appearance reflects the values of our citizens and the message we want to project to our businesses and our visitors. She said the Tree Commission has also asked Council to watch this bill carefully. Councilman Bothwell then moved to instruct the City Attorney to watch this legislation and offer the City's opposition to Senate Bill 183. It was the consensus of Council to have City Attorney Oast provide information to Council on this legislation.

At Councilman Smith's request, Councilman Bothwell, liaison to the Sustainable Advisory Committee on Energy & the Environment, said that he would have them review House Bill NC Saves legislation and provide Council with a recommendation.

Councilman Smith expressed concern over House Bills 687 and 652, noting that it will be taxpayer dollars used to defend the City of Asheville.

Mayor Bellamy updated the Council on a motion that passed the Metropolitan Sewerage District (MSD) Board of Directors. She said they voted last week to have the MSD Planning Committee study the issue of whether the City of Asheville's water system should be consolidated with MSD. She did not support the motion, or the legislation. She spoke with Representative Moffitt and he did indicate that he would amend the bill to have it be a study bill; however, that has not happened. He felt it would be appropriate for Council to send a letter to our legislators that we oppose our water system being given to MSD.

Councilman Davis supported sending a letter to our legislators in addition to having an Opinion Editorial in the newspaper.

Councilman Russell, member on the MSD Board, said the reason the Board sent this to the MSD Planning Committee was simply to have the Planning Committee respond back to the Board with what they think about this idea. Board members can speak individually or they can

have the Board come up with a position to say that MSD is not in a position to study consolidation. MSD does not have the funds to purchase and acquire the City's water system. He said the MSD Planning Committee will probably come to the conclusion that we should just watch the bill and see what happens. It is his understanding that the motion was not to MSD study the consolidation, but to have the MSD Planning Committee recommend to the Board their thoughts about the bill.

Mayor Bellamy noted that MSD Chairman Aceto stated that MSD is going to study this issue should the City's water system become a part of MSD, separate and apart of this bill passing, because this has come up previously. She felt City Council needs to take a position that opposes the State taking our water system and consolidating it with another entity, especially with no City input. She felt the City should write a letter to our legislators stating our strong opposition. There are other bills introduced that we did not react to and they are becoming law.

Councilwoman Manheimer felt we need to voice our concern about the bill. She felt Council should consider engaging a lobbyist so we can have someone represent Asheville. It was the consensus of Council to have the Planning & Economic Development Committee study the idea of engaging a lobbyist with information provided by City staff regarding costs, lobbyist recommendations and expectations.

Vice-Mayor Newman said that the letter should point out the City's significant investments made in modernizing the water system; that there are already extensive legislative regulations on the water system to ensure that the revenues to the system are reinvested in the system; that City taxpayers over many decades have invested in the system including the acquisition of over 20,000 acres of land so that the City of Asheville is in the fortunate position of having one of the most pristine drinking water sources in the United States; that the City is open to a range of different ways to work with the County and other partners on service delivery, but that any major study of that should be based on consultations and not outside groups from any level initiating that that single-handedly.

Councilwoman Manheimer moved to authorize Mayor Bellamy to send a letter to our legislators expressing our strong opposition to the bill transferring the City's water system to MSD, with a copy of said letter being sent to MSD. Said letter to include points outlined by Vice-Mayor Newman. This motion was seconded by Councilman Smith and carried unanimously.

Rev. Christopher Chiaronmonte urged Council to oppose this legislation.

**B. ORDINANCE NO. 3981 - ORDINANCE ADOPTING THE FISCAL YEAR 2011-12 ANNUAL OPERATING BUDGET**

Administrative Services Director Lauren Bradley said that this is the consideration of an ordinance adopting the Fiscal Year 2011-12 Annual Operating Budget.

The Fiscal Year 2011/2012 Proposed Annual Budget was formally presented to City Council on April 26, 2011. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, a summary of the Proposed Budget along with a notice of the Public Hearing was published on April 29 and May 6, 2011. City Council conducted a public hearing on the Proposed Budget on May 10, 2011.

***Operating Budget Adjustments***

The net proposed FY 2011/2012 operating budget presented to City Council on April 26th was set at **$132,360,547**, including a General Fund appropriation of **$87,549,955**. Since the Proposed Budget was presented to City Council, there have been three adjustments that have altered the total of the budget that is presented tonight for Council adoption.

1) **Recycling Program Enhancements**: At its May 10, 2011, meeting, Council approved enhancements to the household recycling program that include the purchase of 95 gallon containers and the implementation of a recycling rewards program. The net annual operating cost of these program enhancements is expected to be approximately $213,000. To fund this additional cost, Council approved an increase in the household recycling of $0.65 per month. Since the program enhancements and the fee increase will not take place on July 1, 2011, staff has only included a partial year's worth of revenue and expenses in the FY 2011/2012 operating budget. The amount added to the FY 2011/2012 operating budget totaled **$180,000.**

2) **Funding for the Asheville-Buncombe Regional Sports Commission:** Also at the May 10, 2011, meeting, Council approved the addition of **$45,000** to the FY 2011/2012 operating budget to provide support to the Asheville-Buncombe Regional Sports Commission. This funding will provide the Sports Commission the resources it needs to hire a full time Executive Director that will continue the work of creating, recruiting, and supporting sporting events in the community.

3) **COPS Hiring Program Grant:** After the Proposed Budget was presented to Council, the City received notification that it will receive a grant award under the Fiscal Year 2011 Federal COPS Hiring Program. In a separate action before Council tonight, staff is seeking approval to apply for COPS funding for 5 additional police officers. The COPS funding will pay for 100% of salary and benefit costs for these 5 officers for the first three years of their employment. The City will be responsible for funding the officers beginning in year four. The grant award will be received in October. Staff is proposing that the **$129,000** in funding that was included in the Proposed Budget to hire three additional officers in association with the opening of the Hillcrest Bridge be removed from the Budget at this time pending receipt of the COPS grant funds in October.

The net result of these changes increases the operating budget by **$96,000** to **$132,456,547**, and the General Fund appropriation to **$87,645,955**. It should be noted that neither of the two changes mentioned above altered the proposed property tax rate of $0.42 per $100 of assessed value that was presented to Council on April 26th. Therefore, the property tax rate in FY 2011/2012 will remain the same as the current year tax rate. The proposed General Fund budget also includes no appropriation from the City's fund balance. All essential City services are continued in the Proposed Budget.

***Capital Improvement Program (CIP) Changes***

In association with the recycling program enhancements, staff has added $1.5 million to the FY 2011/2012 CIP to fund the purchase of the 95 gallon containers. This purchase will be debt financed and the debt service expenses are included in the operating budget adjustment mentioned above.

Public Works staff has also updated its cost estimates for two projects that were included in the FY 2011/2012 Proposed CIP that was presented to Council on April 26th. Staff is now anticipating that the Montford Street rebuild project will cost $493,000, and the Wild Cherry bridge replacement will cost $700,000. Both projects will be debt financed, and the new cost estimates do not change the overall CIP budget for FY 2011/2012, but staff wanted to highlight the changes to Council prior to budget adoption.

This action complies with the Fiscal Responsibility focus area of City Council's Strategic Operation Plan: Operate the City of Asheville's organization to the highest fiscal responsibility.

Pros:

- Ensures City's compliance with North Carolina General Statutes that require local governments to adopt a balanced budget ordinance by July 1 of each year.

- Proposed General Fund Budget is balanced with no tax rate increase or fund balance appropriation and all essential City services are continued.

Con:
- None.

As noted above, the Proposed FY 2011/2012 General Fund budget is balanced with no fund balance appropriation. Based on year-end projections for the current fiscal year and the planned expenses for FY 2011/2012, staff is estimating that at the end of FY 2011/2012 fund balance in the General Fund will equal 14.2% of expenses.

Staff requests that Council review the FY 2011/2012 Annual Operating Budget, including the changes noted above, and make necessary recommendations or adjustments followed by adoption of the Budget Ordinance.

Councilman Bothwell moved for the adoption of Ordinance No. 3981. This motion was seconded by Councilwoman Manheimer.

At the request of Councilman Russell, it was the majority consensus of Council to have the Finance Committee quickly review our manufacturing rates regarding water rates to possibly create a manufacturing customer class within our rate structure in order to grow and preserve that section of our economy that is most sensitive.

Councilman Bothwell felt that we also need to discuss the larger concept of if it is appropriate to use water rates in order to attract business and provide jobs. He felt that development is going to find us because we are a great city.

Vice-Mayor Newman said that thinking long-term we are clearly moving towards a more conservation oriented water structure. In the far future, there is the potential that the City might need to construct an additional water treatment plant. He would like for Council to consider making a policy goal that in our long-term management plan, if possible, we want to avoid the need to construct an additional water treatment facility in our region. The two reasons for that goal are (1) water lines themselves will require huge capital investments and building new is extremely expensive; and (2) energy consumption reduction over time as there are enormous electricity demands spent on water production and water distribution.

Councilman Bothwell said that in the short term rates may play a role in whether or not businesses want to come to Asheville, but it is the truth that we are experiencing globally a shortage of fresh water. The fact that we have plentiful water will be an attraction to the many industries in the longer-term future. Nudging businesses toward conservation policy helps us preserve that very valuable resource that businesses will look for.

Councilman Davis felt to not make plans for another site for water production would be a mistake. He felt we need to leave that door open. We may be the region's best supply of water, but as drinkable water becomes more scare, then our assets become more valuable.

Vice-Mayor Newman said his goal is just an idea that Council might want to look at. If the demand is there, it is our responsibility to meet that demand. He just doesn't want it to be a foregone conclusion that we are going to build a new water treatment plan, if we can make some smart decisions and avoid the $40 Million capital expense.

Mayor Bellamy asked the Finance Committee to consider the fact that even though the City's budget runs from July 1 – June 30, most companies do not and when we implement our fees or rate increases mid-year, they are scrambling to keep their budgets intact. She felt we need to let individuals and companies know in advance that the City will increase rates so people can plan and budget for it. She said that she could not support the budget for the following

reasons (1) no salary/cost of living increase for City employees, especially for those who are on the lower end of the salary scale and especially with the heath care cost increase; (2) closure of the East Asheville Community Center will harm our community; (3) even though we have seen a decline in building activity we have not seen the proportionate same decline in the Building Safety budget; (4) studying a trolley system downtown should not be a top priority; (5) it is not transparent to the public of the City's services and the costs for those services; (6) Council's policy is a 15% Fund Balance, but yet another year we are below that threshold at 14.2%; (7) even though the proposed budget shows we are transferring $500,000 from the Parking Fund to Transit and $383,000 from the General Fund to Transit, we are making seniors and those with disabilities (through deletions of routes) have to walk further to catch a bus; and (8) increase of the recycling fee when Asheville is already one of the most successful recycling cities in our State. She felt Council must consider the number of individuals in our community that live below the poverty level and look at our policies and practices on what it costs to live in our community.

Councilman Bothwell felt that only through a tax increase can we address some of the Mayor's concerns and he would lend that support.

Councilman Russell would not support a tax increase.

Vice-Mayor Newman asked for a friendly amendment to the motion to encourage the City Manager to find resources for irrigation system improvements at the Golf Course next fiscal year as he felt it is a cost effective investment that will pay for itself over a short period of time. Councilman Bothwell and Councilwoman Manheimer accepted the friendly amendment.

Mayor Bellamy felt we should look at privatizing the Golf Course.

Councilman Davis was also concerned that City employees will not receive a cost of living increase for the third year in a row. He hoped that if we do see a revenue increase in the upcoming year that a cost of living increase be one of the first things we consider.

Councilman Bothwell said that citizens need to be educated on what can be recycled as they will save on tipping fees.

Councilman Smith said that per capita spending in the City of Asheville is lower today than it was 10 years ago. That speaks a lot to efficiency, innovation and creativity in government. He supported Council's goal of 15% Fund Balance noting that the 14.2% this year reflects the economies realities. Should some of these revenues increase, his top priorities would be (1) return to the 15% Fund Balance; (2) consider City employee salaries; and (3) figure out how to get back to the 2008-09 levels of the Housing Trust Fund ($600,000). Regarding transit, despite rising fuel costs, transit is being funding at about the 2008-09 budget level and that speaks a lot to Transportation Department. They must figure out how to maintain the system despite the fact that gas is $3.85/gallon and the users continue to demand exemplary service. The Transit Master Plan implementation is designed to make whole system more reliable and more convenient and for greatest number of people. As the Plan goes forward, we are going to be able to improve the system noticeably for everyone in Asheville, while keeping the operating costs basically flat. Regarding raising revenue, he is not in favor of a tax increase; however, he is in favor of a more vigorous and robust approach towards helping our legislators understand the need for us to get to the state average on the occupancy tax in Asheville.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

The motion made, and amended, by Councilman Bothwell and Councilwoman Manheimer and carried on a 6-1 vote, with Mayor Bellamy voting "no".

**ORDINANCE BOOK NO. 27 – PAGE 60**

**VI. NEW BUSINESS:**

**A. RESOLUTION NO. 11-104 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE-BUNCOMBE HISTORIC RESOURCES COMMISSION**

Vice-Mayor Newman said that the terms of Diane Duermit and Hillary Cole, as members on the Asheville-Buncombe Historic Resources Commission, expire on July 1, 2011. In addition, there currently exists a vacancy left by Ms. Amanda Warren until June 1, 2012.

At the May 10, 2011, City Council meeting, it was the consensus of Council to interview Brendan Ross, Brian Cook, Allen Currens and Randall Hall. Mr. Hall asked that his name be removed from the consideration at this time.

Also at the May 10 meeting, City Council reappointed Hillary Cole to serve an additional three-year term, term to expire July 1, 2014, or until her successor has been appointed.

After Council spoke highly of the candidates, Brendan Ross received 5 votes, Brian Cook received 6 votes, and Allen Currens received 3 votes. Therefore, (1) Brian Cook was appointed as a member of the Asheville-Buncombe Historic Resources Commission to fill the unexpired term of Ms. Warren, term to expire July 1, 2012, or until his successor has been appointed; and (2) Brendan Ross was appointed to serve a three year term, term to begin July 2, 2011, and expire July 1, 2014, or until her successor has been appointed.

**RESOLUTION BOOK NO. 34 – PAGE 17**

**B. RESOLUTION NO. 11-105 - RESOLUTION APPOINTING A MEMBER TO THE METROPOLITAN SEWERAGE DISTRICT BOARD OF DIRECTORS**

Vice-Mayor Newman, Chairman of the Boards & Commissions Committee, said that the term of Lou Bissette, as a member on the Metropolitan Sewerage District (MSD) Board, expired on January 19, 2011.

The following individual applied for the vacancy on the MSD Board: Barbara Field.

Vice-Mayor Newman said that the Boards & Commissions Committee recommended appointing Councilwoman Esther Manheimer, explaining her qualifications.

Mayor Bellamy pointed out that Mr. Bissette is currently Chairman of the MSD Planning Committee that has been recently directed to study the issue regarding Asheville's water system. Vice-Mayor Newman recalled Council extended Mr. Bissette's term until he finished work on the water extension lines. Since that has happened, the Boards & Commission's Committee felt his replacement is due.

Councilman Russell spoke highly of Mr. Bissette's six years of service to the MSD Board.

Councilman Russell moved to appoint Councilwoman Esther Manheimer to serve a three-year term, term to begin immediately and expire on January 19, 2014, or until her successor has been appointed. This motion was seconded by Councilman Smith and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 18**

**VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:**

Mayor Bellamy said that the Buncombe County Board of Elections has asked the City if they have any suggestions for a location for the early voting site in east Asheville. It was the consensus of Council that they not be involved in the specific location of early voting sites as they don't want to give the appearance of a conflict of interest. They did request that the site be generally convenient. They did note that, as an option suggested by the Board of Elections, Kenilworth Presbyterian is a viable location and amenable to Council.

Dr. Milton Byrd, Mr. Lisa Landis and Rev. Christopher Chiaronmonte spoke to the need of public access via the WNC Community Media Center.

Ms. Dixie Barkdoll was opposed to the auditor who will be performing the Police Department audit.

Mr. Mark Cates commended the Council on their vote for the budget. Council's projection of a 3% increase in sales tax revenue is good news and was pleased that Council believes the economy will improve and grow.

Councilman Bothwell was pleased that the City of Asheville is in good standing regarding the HUD home block grant monies.

Mayor Bellamy reminded the community of Memorial Day activities.

The City was served with a Complaint on May 2, 2011, which is generally described as follows: C&C Business Services, Inc. v. City of Asheville. The nature of the proceeding is a complaint for breach of contract, based on Jeff Coffey's janitorial service contract. This matter will be handled in-house.

**VIII. ADJOURNMENT:**

Mayor Bellamy adjourned the meeting at 7:56 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – May 31, 2011 – 6:30 p.m.
Vance Elementary School

Community Meeting – West Asheville

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

Mayor Bellamy opened the meeting, welcomed the audience and introduced City Council members.

Urban Planner Alan Glines gave a brief overview and history of the process of the Haywood Corridor Plan. Since 2002 the Haywood Road Corridor Committee has focused on opportunities and constraints along the corridor. Broad areas for improvement were identified, such as safety; traffic; road layout; encouraging and preparing for new development; and streetscape improvements. Since then a lot of changes have taken place, increasing the sense of community and the west Asheville identity. In 2006, the Committee sent a survey to property owners, neighbors and business owners to understand their preferences for new development when it comes along the corridor. The results were seeing Haywood Road as a neighborhood and pedestrian friendly local commercial corridor serving the daily need of residents and visitors. People wanted new development to accommodate an expanding pedestrian population. Also along the corridor the interest of bicycle commuting and transit ridership has been noticeably growing. Staff then revisited the effort to organize a plan for Haywood Road in 2009. Because there are two separate areas of the Central Business District along Haywood Road (about 60 parcels), adjustments were made, as most people agreed to limit the height of buildings and also provide for a planted buffer for screening based on the height of the development adjacent to residential zones. The Committee has reconvened to develop a vision plan and initiate zoning changes for the corridor. We hope to have a plan developed by late fall.

Ms. Leslie Faye, representing the Haywood Road Corridor Committee, noted that the Committee has been meeting as a group since 2003 and recently they have set their goals for 2001 to develop a vision plan that could be used as a key tool to help direct future development of the corridor and maintain the authenticity of our community preferences. The Committee is addressing the following issues: zoning; traffic; economic development and sustainability; safety; and historic preservation. She highlighted the following items in their vision plan: (1) zoning and land use; (2) economic development issues; and (3) transportation related issues, such as parking, bike lanes, increased use of public transportation, and pedestrian density. Mr. Dan Kostalec, a transportation planner and west Asheville resident, compiled a draft safety and pedestrian assessment called "Haywood Road and Active Living" for most of Haywood Road. Volunteers from the Bike and Pedestrian Task Force measured the width of sidewalks, cross-slopes of sidewalks, and locations of signs, power poles and street crossings and suggested several solutions. She thanked Mr. Alan Glines for their ultimate success and hoped to be able to retain that leadership until their plan if finalized.

Mr. Hugh Monro, Treasurer of the West Asheville Business Association, explained that the Association's goal is the improvement of the west Asheville community. He explained how they support a variety of community organizations and facilitate meetings to help find common goals and solutions for the entire west Asheville community.

Weed & Seed Initiative Coordinator for the West Riverside Operation Rebecca Byrn gave a brief overview of the Weed & Seed program, which strategy seeks to improve the quality of life of residents in the targeted area by weeding out crime and seeding positive community change through resident leadership, support for youth and job training programs, and the creation of sustainable partnerships. They are heading into their fifth and final year of funding by the U.S. Dept. of Justice. They focus on three components (1) law enforcement/community policing; (2) prevention/intervention/treatment; and (3)

neighborhood restoration. She shared some significant accomplishments, such as (1) reduction of crime in the area (21% decrease in robbery; 34% decrease in violent crime; 14% decrease in aggravated assault; 60% decrease in drug calls for service; and 99 individuals have been charged as habitual felons); (2) two Safe Babysitter Certification trainings through the Red Cross for youth; and (3) seven paid interns for a film project addressing gun violence. Numerous neighborhood restoration projects have also been funded and leveraged by the Weed & Seed initiative. They have leveraged through community partnerships $2.3 Million in funding which has benefited the West Riverside community. They have also supported grassroots organizations that have a significant presence and impact in the community.

Mr. DeWayne Barton, President of the Burton Street Community Association, explained their active association and gave a brief update on their recently completed neighborhood plan.

Ms. Allison Smith, representing the Housing Authority, was pleased to report success stories about Pisgah View Apartments, including the renovation of Building 16 which now operates as a community resource center, peace garden, installation of energy efficient windows, to name a few.

Mr. Isaac Coleman, representing the Housing Authority, was also pleased to report success stories about Deaverview Apartments, including new siding, new windows and new toilets, to name a few.

Director of Transportation Ken Putnam noted some system-wide changes arising out of the Transit Master Plan approved by City Council on October of 2009. Some include branding the system; changing all route to improve on-time performance; combining day and evening service; increasing frequency along five main corridors; eliminating dial-a-ride service; reducing the number of route deviations; streamlining bus stop locations; adding transfer points outside of the downtown area; creating two cross-town routes; and adding two new service areas. Specifically in west Asheville, they are working on (1) increasing frequency along Patton Avenue; (2) increasing frequency along Haywood Road; (3) new cross-town route between Bleachery Boulevard and North Louisiana Avenue; and (4) new service to the Land-of-Sky on Leicester Highway.

Mayor Bellamy then opened up the meeting for questions. Questions/comments responded to consisted of: Friends of Hominy Creek Greenway vision plan; need for better traffic enforcement when cars go straight from the turning lane on Haywood Road/Burton Street intersection; traffic concerns regarding crosswalks; suggestions of one-way streets during specific times of day; need for supervision at Burton Street Community Center; question if Biltmore Estate plans to purchase Pisgah View; need for more bus shelters; bus shelter at Asheville Mall needs windows replaced; history of Sulphur Springs Road; what is the budget for tourism in the City and how much is allocated for west Asheville; appreciation for climbing lane on Clingman Avenue and purchase of The Waller Tract; suggestion to help fund local currency projects; and need for more trash cans along Haywood Road.

Mayor Bellamy was pleased to report some of the major investments in west Asheville, consisting of the new fire station and the purchase of The Waller Tract. She noted the great after-school programs at Pisgah View Apartments, Project March (Make a Right Choice); and programs sponsored by the YWCA. She pointed out that the rezoning of 626 Haywood Road will be coming before Council soon, the single-family homes on the Brotherton site; and urged caution when the Malvern Hills pool opens. She suggested several resources for volunteers to the Friends of Hominy Creek Greenway. She suggested citizens attend the upcoming Citizens Police Academy and consider serving on one of the many City boards & commissions. She also explained how the Buncombe County Tourism Development Authority (TDA) has the responsibility for funding tourism from hotel taxes. Vice-Mayor Newman also suggested the west Asheville community develop a proposal and submit it to the TDA for possible funding, which proposal should benefit the local community and attract tourists (greenways, for example).

Mayor Bellamy and Council members expressed their appreciation for the community involvement.

Mayor Bellamy asked for a moment of silence in memory of former Mayor Richard A. Wood Jr.

At 8:00 p.m., Mayor Bellamy adjourned the meeting.

Magdalen Bourleson
CITY CLERK

MAYOR

Tuesday – June 14, 2011 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

**PLEDGE OF ALLEGIANCE**

Mayor Bellamy led City Council in the Pledge of Allegiance.

**INVOCATION**

Councilwoman Manheimer gave the invocation.

**I. PROCLAMATIONS:**

**A. PRESENTATION OF THE AMERICAN PUBLIC WORKS ASSOCIATION HW KUEFFNER SERVICE AWARD FOR 2011**

Mayor Bellamy said that this award is presented annually by the American Public Works Association – North Carolina Chapter to recognize individuals who are employed in public works in a position below the supervisory level for outstanding achievement in local government service. She introduced Mr. Russell Byrd, Awards Chairman from the City of Winston-Salem, and Mr. Mr. Keith Pugh, Chapter President from the City of High Point, who were pleased to present the American Public Works Association HW Kueffner Service Award for 2011 to Ms. Liz Calloway.

**B. CAROLINA RECYCLING ASSOCIATION AWARD TO CITY OF ASHEVILLE**

Mayor Bellamy said that the City of Asheville is honored to receive the annual Carolina Recycling Association Award in the Local Government category. Through receiving this award, the City of Asheville is being recognized by the Carolina Recycling Association as having one of the most successful local municipality recycling programs where we rank highest in the state with 30% waste stream diverted. The City of Asheville also has highest community participation rate in the state of 80%. The City of Asheville government has increased recycling in City building by 19% increase since program began in 2000 thru 2010. She then introduced Ms. Holly Bullman, Past President of Carolina Recycling Association who presented the Carolina Recycling Association Award to Ms. Rachel Rogers, Sustainability Outreach Specialist.

**C. PROCLAMATION PROCLAIMING JUNE, 2011, AS "NATIONAL LESBIAN, GAY, BISEXUAL, AND TRANSGENDER HISTORY MONTH"**

Mayor Bellamy read the proclamation proclaiming June, 2011, as "National Lesbian, Gay, Bisexual, and Transgender History Month" in the City of Asheville. She presented the proclamation to Mr. James Dye, who briefed City Council on some activities taking place during the month.

**D. PROCLAMATION PROCLAIMING JUNE 27, 2011, AS "NATIONAL HIV TESTING DAY"**

Mayor Bellamy read the proclamation proclaiming June 27, 2011, as "National HIV Testing Day" in the City of Asheville. She presented the proclamation to Mr. Michael Harney and Ms. Jennifer Poore, who briefed City Council on some activities taking place during the day.

**II. CONSENT AGENDA:**

Mayor Bellamy requested that the Consent Agenda include an amendment to the minutes of the April 26, 2011, meeting to include specific comments regarding Fund Balance.

**A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MAY 24, 2011, AND THE COMMUNITY MEETING HELD ON MAY 31, 2011**

**B. RESOLUTION NO. 11-108 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE GRIZZLIES FOOTBALL GAME EVENTS ON JUNE 18, JULY 2, JULY 16 AND AUGUST 13, 2011**

**RESOLUTION NO. 11-109 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE MOUNTAIN SAFARI ON JUNE 23, 2011**

**RESOLUTION NO. 11-110 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT RIVERFEST ON AUGUST 13, 2011**

**RESOLUTION NO. 11-111 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT BEER CITY CUP ON SEPTEMBER 3-4, 2011**

**RESOLUTION NO. 11-112 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE BREWGRASS FESTIVAL ON SEPTEMBER 17, 2011**

**RESOLUTION NO. 11-113 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT BLUE RIDGE PRIDE ON OCTOBER 1, 2011**

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Asheville Grizzlies Football Game Event on June 18, July 2, July 16, and August 13, 2011; the Mountain Safari on June 23, 2011; Riverfest on August 13, 2011; the Beer City Cup on September 3 and September 4, 2011; the Brewgrass Festival on September 17, 2011; and Blue Ridge Pride on October 1, 2011.

- Asheville Grizzlies has requested through the City of Asheville Development Services Center that City Council permit them to serve beer and/or unfortified wine at the Asheville Grizzlies Football Game Event and allow for consumption at this event.

  The Asheville Grizzlies Football Game Event will be held on Saturday, June 18, July 2, July 16, and August 13, 2011 from 5:30 p.m. – 11:00 p.m., within the boundaries of Memorial Stadium as per the event area limits referenced on a site map.

- Friends of the WNC Nature Center has requested through the City of Asheville Development Services Center that City Council permit them to serve beer and/or unfortified wine at the Mountain Safari and allow for consumption at this event.

  The Mountain Safari will be held on Thursday, June 23, 2011 from 5:30 p.m. to 9:30 p.m. within the boundaries of the WNC Nature Center facility as per the event area limits referenced on a site map.

- Riverlink has requested through the City of Asheville Development Service Center that City Council permit them to serve beer and/or unfortified wine at Riverfest and allow for consumption at this event.

  Riverfest will be held on Saturday, August 13, 2011 from 1:00 p.m. to 7:00 p.m. within the boundaries of French Broad River Park, as per the event area limits referenced on a accompanying site map.

- The Western North Carolina Soccer Foundation has requested through the City of Asheville Development Service Center that City Council permit them to serve beer and/or unfortified wine at the Beer City Cup and allow for consumption at this event.

  The Beer City Cup will be held on Saturday, September 3, 2011 from 4:00 p.m. to 10:00 p.m. and Sunday, September 4, 2011 from 11:00 a.m. to 10:00 p.m. within the boundaries of Memorial Stadium as per the area limits referenced on a site map.

- Big Brothers Big Sisters WNC has requested through the City of Asheville Development Services Center that City Council permit them to serve beer and/or unfortified wine at the Brewgrass Festival and allow for consumption at this event.

  The Brewgrass Festival will be held on Saturday, September 17, 2011 from 12:00 p.m. to 7:00 p.m. within the boundaries of Martin Luther King Jr. Park, as per the event area limits referenced on a site map.

- Blue Ridge Pride, Inc. has requested through the City of Asheville Development Services Center that City Council permit them to serve beer and/or unfortified wine at Blue Ridge Pride and allow for consumption at this event.

  Blue Ridge Pride will be held on Saturday, October 1, 2011 from 12:00 p.m. to 6:00 p.m. within the boundaries of Pack Square Park's Roger McGuire Green, Reuter Terrace, the City-County Parking Lot and within a designated area of Spruce Street between the intersections of College Street & Court Plaza, as per the area limits referenced on a site map.

These actions have no direct connection with the City of Asheville Strategic Operating Plan.

Pro:

- Allows fundraising opportunities for the Asheville Grizzlies, Friends of the WNC Nature Center, Riverlink, Western North Carolina Soccer Foundation, Big Brothers Big Sisters of WNC, and Blue Ridge Pride, Inc.

Con:

- Potential for public safety issues

There is no fiscal impact.

City staff recommends City Council adopt the resolutions authorizing the City Manager to approve a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Asheville Grizzlies Football Game Event, the Mountain Safari, Riverfest, the Beer City Cup, the Brewgrass Festival, and Blue Ridge Pride.

**RESOLUTION NO. 11-108 - RESOLUTION BOOK NO. 34 – PAGE 23**
**RESOLUTION NO. 11-109 - RESOLUTION BOOK NO. 34 – PAGE 26**
**RESOLUTION NO. 11-110 - RESOLUTION BOOK NO. 34 – PAGE 29**
**RESOLUTION NO. 11-111 - RESOLUTION BOOK NO. 34 – PAGE 32**
**RESOLUTION NO. 11-112 - RESOLUTION BOOK NO. 34 – PAGE 35**
**RESOLUTION NO. 11-113 - RESOLUTION BOOK NO. 34 – PAGE 38**

**C. RESOLUTION NO. 11-114 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH STARBOARD CONSULTING FOR THE WATER RESOURCES SOFTWARE REPLACEMENT PROJECT**

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Starboard Consulting, in an amount not to exceed $350,000, for the Water Resources software replacement.

Water Resources currently uses Maximo Version 6.1 as the department's Computerized Maintenance Management Software (CMMS). The CMMS is used primarily as a work order system to monitor and maintain the department's assets. This project will consist of: (1) upgrading Maximo from Version 6.1 to 7.1; and (2) improving and/or adding GIS mapping capabilities by upgrading Syclo Mobile Work Manager and implementing Maximo Spatial. The department's need to replace was due its life cycle being completed and to support requirements from IBM, who has been reluctant to provide support until Maximo is upgraded to the current version.

On May 2, 2011, Water Resources received three (3) proposals for the project in response to the Request for Proposals (RFP).

Vendors responding were:

1. Banetti – Miami, Florida
2. EMA, Inc. – Longwood, Florida
3. Starboard Consulting – Longwood, Florida

A review team comprised of Water Resources and Information Technology staff reviewed each proposal and rated them based on eight (8) categories (i.e. qualifications, software support, understanding of scope, cost, and project schedule).

The vendors' average scores were:

1. Banetti – 302.5
2. EMA, Inc. – 314.6
3. Starboard Consulting – 348.8

Starboard Consulting has been selected to implement the system or software replacement based on receiving the highest rating from the review team. It is their project team members' familiarity and knowledge of the department's system configuration that earns them the highest rating. The members of this team were the majority of the project members who installed the department's Maximo system in 2006.

Banetti, although the lowest bidder on the project, was not selected because: (1) of the lack of detail provided in their proposal; and (2) they are not listed as an IBM Tivoli Accredited Business Partner, which raises concern about their level of support and deployment.

This project is part of City Council's strategic plans to maintain and improve city infrastructure.

Pro:
- Approval of the bid award will allow Water Resources to complete the necessary replacement of the work order system in order to ensure its functionality and support from IBM.

Cons:
- If the bid is not awarded, then Water Resources will risk losing product support from IBM.
- The vendor selected is not the lowest bidder, but they are the highest-rated vendor.

Water Resources has $350,000.00 specifically reserved for this project. The proposal submitted by Starboard Consulting, which allows for optional services, is summarized as follows:

| | |
|---|---|
| Project Budget | $350,000.00 |
| Starboard Consulting, Base Bid | $283,808.00 |
| Optional Services | $ 47,200.00 |
| Starboard Consulting Total Bid | $331,008.00 |
| Amount Remaining After Total Bid | $ 18,992.00 |

City staff recommends City Council approval of the City Manager to enter into an agreement with Starboard Consulting, in an amount not to exceed $350,000, for the Water Resources software replacement project.

**RESOLUTION BOOK NO. 34 – PAGE 41**

**D. RESOLUTION NO. 11-114 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN INTERLOCAL AGREEMENT WITH BUNCOMBE COUNTY THAT WILL ALLOW CONSTRUCTION AND MAINTENANCE OF A SIDEWALK ON NORTH LOUISIANA AVENUE IN THE EMMA COMMUNITY**

Summary: The consideration of a resolution authorizing the Mayor to sign an interlocal agreement with Buncombe County that will allow construction and maintenance of a sidewalk on North Louisiana Avenue in the Emma community.

Several years ago, a group of citizens formed a group known as A Safer Walk for Emma, and engaged the City, the county, and the N.C. Dept. of Transportation (NCDOT) in discussions about the need for sidewalks in the Emma community. From the outset, it was clear that partnerships would be needed to construct and maintain sidewalks in the city's extraterritorial jurisdiction (ETJ).

As a follow-up to these discussions, in February 2008 City Council authorized City staff to act as the lead agency to apply for and receive federal grants to construct a sidewalk on North Louisiana Ave. near Emma Elementary School. The City now has all of the grant funds necessary to construct the sidewalk. Planning and design are complete and the project is ready to bid.

Because the sidewalk is outside the City limits, Buncombe County has agreed to accept ownership of the sidewalk, which includes responsibility for maintenance. Buncombe County is scheduled to approve the interlocal agreement this month. At a future date, the County may choose to hire the city to perform the actual maintenance.

To summarize the interlocal agreement, the City will continue to act as lead agency to administer federal funds and oversee construction of the sidewalk. The county will sign the necessary agreements with the NCDOT to accept ownership of the sidewalk once it is complete.

This action complies with the City Council Strategic Operating Plan in that this is a project to improve pedestrian infrastructure in a low-income community using federal funds. North Louisiana Avenue is on the city's pedestrian thoroughfare plan. In addition, this project implements one of the Safe Routes to School projects.

Pros:

- This project serves as an example of effective interlocal cooperation to provide needed infrastructure improvements.
- This construction project is funded with 100% federal funds, with no local match required.

Con:

- Staff time is required to administer the project.

This project requires staff resources to administer the project, but the construction is fully funded by a federal grant and does not require any City funding.

City staff recommends City Council adopt a resolution authorizing the Mayor to sign an interlocal agreement with Buncombe County for maintenance of sidewalk in the Emma community.

**RESOLUTION BOOK NO. 34 – PAGE 43**

**E. RESOLUTION NO. 11 -116 - RESOLUTION ACCEPTING TOWN SQUARE BOULEVARD, THETFORD STREET, WALTERSTONE ROAD AND STAMFORD STREET AS CITY-MAINTAINED STREETS**

Summary: The consideration of a resolution to accept Town Square Boulevard, Thetford Street, Walterstone Road, and Stamford Street as city-maintained streets.

Code of Ordinances sec. 7-15-1(f)(4)a requires that streets dedicated for public use be accepted by resolution of the City Council. The developer submitted a written request on April 21, 2011 asking the City to accept the subject streets as city-maintained streets.

- Town Square Boulevard from Thetford Street to Schenck Parkway is a developer-constructed street that has an average street width of 42 feet (center median) with 24-inch curb and gutter, a length of 0.18 mile, and a variable right-of-way width of 19 feet to 32 feet.

- Thetford Street from Stamford Street to Schenck Parkway is a developer-constructed street that has an average street width of 23 feet with 24-inch curb and gutter, a length of 0.33 mile, and a variable right-of-way width of 23 feet to 45 feet.

- Walterstone Road from Thetford Street to Stamford Street is a developer-constructed street that has an average street width of 22 feet with 24-inch curb and gutter, a length of 0.14 mile, and a variable right-of-way width of 22 feet to 39 feet.

- Stamford Street from Thetford Street to Schenck Parkway is a developer-constructed street that has an average street width of 22 feet with 24-inch curb and gutter, a length of 0.17 mile, and a variable right-of-way width of 22 feet to 36 feet.

Typically a street right-of-way includes the entire street footprint including sidewalks (for example, in the central business district, the right-of-way would extend from back of sidewalk or building edge to back of sidewalk or building edge). In this case, the variable right-of-way for all four streets is essentially curb to curb and only includes the actual street footprint. The sidewalks will be privately-maintained. A 5-foot maintenance easement is provided along the frontage of the right-of-way boundaries for public utility purposes.

Transportation Department staff and Public Works Department staff inspected the subject streets and determined that they were constructed according to current standards as indicated in the City of Asheville's Standard Specifications and Details Manual. In addition, the developer's engineer has furnished a signed and sealed letter verifying that the subject streets were constructed to current City of Asheville standards.

Following City Council's approval of this resolution, the subject streets will be added to the official Powell Bill List.

This action complies with the City Council 2010-11 Strategic Operating Plan within the Sustainable Focus Area by accepting street infra-structure to help support the healthy growth of the City.

Pros:

- The City of Asheville will receive Powell Bill Funds from the North Carolina Department of Transportation (NCDOT) to help maintain the streets.
- The streets provide access and connectivity in a residential/commercial community.

Con:

- Powell Bill Funds will not cover 100% of the total cost to maintain the streets.

There will be no initial financial impact to the City, although the responsibility of maintenance belongs to the Public Works Department. The City will receive Powell Bill Funds in the future to help maintain the streets. Based on current allocation rates, the City will receive approximately $1,200 in Powell Bill Funds from these streets.

Staff recommends that City Council accept Town Square Boulevard, Thetford Street, Walterstone Road, and Stamford Street as city-maintained streets.

**RESOLUTION BOOK NO. 34 – PAGE 44**

**F. ORDINANCE NO. 3982 - BUDGET AMENDMENT TO REIMBURSE FIRE DEPARTMENT OVERTIME BUDGET**

Summary: The consideration of a budget amendment, in the amount of $94,282, to receive reimbursement from the N.C. Dept. of Crime Control and Public Safety and Asheville Buncombe Technical Community College (AB Tech) for overtime expenditures, which are related to the Asheville Fire Department's Regional Hazardous Materials Team and our partnership with AB Tech's Fire Academy.

The Asheville Fire Department has received reimbursement funds from the North Carolina Department of Crime Control and Public Safety and AB Tech. These funds have been received in FY 2011. The department utilizes General Fund money to pay for overtime for hazardous materials training and emergency responses throughout the Western North Carolina region as well as for instructors in AB Tech's Fire Academy. The North Carolina Department of Crime Control and Public Safety reimburse the City of Asheville for these expenditures related to regional hazardous materials responses. AB Tech reimburses the City of Asheville for expenditures related to AFD instructors in their fire academy. These funds that have been

received will be used to reimburse the overtime expenditures that have come out of the General Fund.

This action complies with the City Council Strategic Operating Plan in that it helps to proactively pursue funding opportunities through state and federal economic stimulus packages.

Pro:

- This action allows for reimbursement of overtime expenditures without utilizing city tax funds.

Con:

- None identified

These funds, which have been obtained through reimbursement payments from the North Carolina Department of Crime Control and Public Safety and AB Tech will be used to offset Fire Department overtime expenses.

City staff recommends City Council approve the budget amendment to receive these reimbursement funds.

**ORDINANCE BOOK NO. 27 – PAGE 66**

**G. ORDINANCE NO. 3983 - BUDGET AMENDMENT TO SUPPORT THE CAPACITY OF HOMELESS INITIATIVE PROJECT**

Summary: The consideration of a budget amendment, in the amount of $12,000, from Buncombe County to support the capacity of Homeless Initiative project.

In order to accommodate for the growing needs of the Homeless Initiative, Buncombe County has offered the project $12,000 to pay for AmeriCorps*VISTA and other contracted services. The positions would be dedicated to increasing the capacity of the Homeless Initiative and strengthening projects of the Homeless Coalition and Homeless Initiative Advisory Group.

The following outcomes would need to be met if funding is accepted:

*Retain AmeriCorps workers (or other workers) for up to 1,200 hours to support the Asheville-Buncombe Homeless Initiative, providing services for projects such as the SOAR disability project, Homeless Coalition, etc.*

This project meets the affordability goal objective to support initiatives to end homelessness. Accepting this funding will help the Homeless Initiative support the 10-Year Plan to End Homelessness process and collect data that can be used by the City Council when evaluating initiatives designed to end homelessness.

Pro:

- In tight budget times, funds to further the work of the Homeless Initiative can enhance the services it offers to the community.

Con:

- No apparent cons.

This will add $12,000 to the Homeless Initiative Budget. These additional funds will fully support the costs of the AmeriCorps or work-study personnel.

City staff recommends City Council adopt a budget amendment for, accepting the $12,000 awarded to the Homeless Initiative by Buncombe County for capacity building.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Russell moved for the adoption of the Consent Agenda, along with the amendment to the April 26, 2011, minutes. This motion was seconded by Councilman Davis and carried unanimously.

**III. PRESENTATIONS & REPORTS: None**

**IV. PUBLIC HEARINGS:**

**A. CONTINUATION OF PUBLIC HEARING TO CONSIDER CLOSING SEVERAL PORTIONS OF UNOPENED RIGHTS-OF-WAY AND CITY STREETS WITHIN THE MONTFORD COMMONS DEVELOPMENT AREA**

Mayor Bellamy said that she has received a request from Mr. Kyle Evans, representing Montford Commons, LLC, requesting a continuance until August 9, 2011, as they are still waiting for their HUD funding commitment. Therefore, Councilman Russell moved to continue this public hearing until August 9, 2011. This motion was seconded by Councilman Davis and carried unanimously.

**B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING A MODIFICATION THAT WOULD ESTABLISH THE PLANNING & ZONING COMMISSION AS THE FINAL APPROVAL AUTHORITY FOR ANY LEVEL II PROJECT OR MAJOR SUBDIVISION**

**ORDINANCE NO. 3984 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE REGARDING A MODIFICATION THAT WOULD ESTABLISH THE PLANNING & ZONING COMMISSION AS THE FINAL APPROVAL AUTHORITY FOR ANY LEVEL II PROJECT OR MAJOR SUBDIVISION**

Mayor Bellamy opened the public hearing at 5:24 p.m.

Planning & Development Director Judy Daniel said that this is the consideration of a wording amendment to Chapter 7, Articles 3 and 5 of the Unified Development Ordinance (UDO), changing the approval body for Level II Projects and Major Subdivisions from the Technical Review Committee to the Planning and Zoning Commission. This public hearing was advertised on June 3 and 10, 2011.

This report outlines the changes to the UDO that are required to change the final approval of Level II projects and Major Subdivisions from the Technical Review Committee (TRC) to the Planning and Zoning Commission (Commission). This change has been discussed for over a year, and complements a similar change implemented for Level II projects in the downtown Central Business District (CBD) in conjunction with the recommendations of the Downtown Master Plan.

The proposal has been presented to a range of community and business groups, affected city departments, and boards and committees. There has been general support for the change, given the pressure sometimes put on technical staff to reflect public concerns about moderately large development projects. There has also been acknowledgement that this is a substantially expanded role for the Commission.

With this change, the TRC would cease to be the location for public discussion, but would continue to provide the vital technical reviews and conditions to the Commission. The TRC would continue to be open to the public, but public comment would be reserved for the Commission hearings. The staff report to the Commission would include the staff recommendations from the various departments. In practice, staff from most of those departments would very rarely need to attend the Commission meetings. Generally, Planning, Transportation and Stormwater staff members are the most regularly questioned by developer or residents who have concerns about a project.

The Commission would hold the required public hearing where the developer or members of the public could question the staff recommendations. The Commission would then determine whether to approve the subdivision or project, approve it with conditions outlined in the TRC staff report, possibly add conditions, or deny approval. Appeals to decisions of the Commission for Level II projects would be to the Board of Adjustment while appeals of Major Subdivisions and Subdivision Modifications would go to Superior Court.

One modification has been made as a result of the discussion at the Planning and Zoning Commission. The language has been updated to specify that changes would apply only to applications received after adoption, not to pending applications. The specific changes include:

**Sec. 7-3-5(a). Technical Review Committee.**
The changes are to sections 2, 3, and 5. With these changes the TRC will:

- Review and provide recommendations for (no longer approve or deny) preliminary plats for major subdivisions; as that role is delegated to the Planning and Zoning Commission (see below Sec. 7-5-8);

- Review and provide recommendations for (no longer approve or deny) requests for modifications to the subdivision standards; as that role is delegated to the Planning and Zoning Commission (see below Sec. 7-5-8 (c));

- Review and provide recommendations for (no longer approve or deny) site plans for proposed developments subject to Level II site plan review; as that role is delegated to the Planning and Zoning Commission (see below Sec. 7-5-9(b)).

**Sec. 7-5-8 (a). Major Subdivision Approvals.**
In changes (to section "d", "e", and "f") the role of the TRC is changed to a review for compliance with any applicable regulations and recommendation to the Planning and Zoning Commission. Appeals would be from the Commission to the Superior Court instead of from the TRC to the Commission. Permits approvals would be issued by the Commission (rather than the TRC) and still valid for two years from the date of approval.

**Sec. 7-5-8 (c). Subdivision Modifications.** In changes to sub-section "1" (approval authority) and "3" (conditions) requests for modifications to approved major subdivisions would continue to be reviewed by the TRC, but their recommendations would be forwarded to the Commission for action.

**Sec. 7-5-8(b). Plan approvals for Level II Site Plans.** In changes to section "4c" (action by TRC) the role of the TRC is changed to that of review for compliance, with forwarding to the Commission for action. In section "6" (formal review) a formal review of Level II site plans at the

Commission is established. In section "8" (appeals) the appeal of Level II decisions is made from the Commission to the Board of Adjustment, rather than from the TRC.

Pro:

- Moves the public comment element from technical staff review to a body of appointed officials, reducing the potential for political pressure on staff technical reviews.

Con:

- Adds a small amount of extra time to the approval process.

The Planning and Zoning Commission reviewed this modification at their May 4 meeting. After substantial discussion they voted 5-2 in support of the recommended changes. One general area of concern was the lack of a clause clarifying that the change would be applicable only to projects received after adoption of the change.

There is no discernable fiscal impact. Will result in a small decrease in work load for Development Services Center Planning staff, and add a small increase in work load for City Hall Planning staff (due to shift in the advertisement requirements for public hearings).

The staff recommends support for these changes to the zoning regulations.

Mr. Steve Rasmussen spoke in support of the amendment and urged Council to appoint a genuinely diverse range of people to the Planning & Zoning Commission.

Mayor Bellamy closed the public hearing at 5:32 p.m.

Councilman Bothwell noted that City Council will be holding an open interview process of Planning & Zoning Commission candidates.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Smith moved for the adoption of Ordinance No. 3984. This motion was seconded by Vice-Mayor Newman and carried unanimously.

**ORDINANCE BOOK NO. 27 – PAGE 70**

**C. PUBLIC HEARING TO CONSIDER REZONING A PORTION OF 36 MONTFORD AVENUE FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY AND OFFICE DISTRICTS, WITH A HEAD OF MONTFORD OVERLAY, TO COMMUNITY BUSINESS I DISTRICT WITH NO OVERLAY**

**ORDINANCE NO. 3985 - ORDINANCE REZONING A PORTION OF 36 MONTFORD AVENUE FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY AND OFFICE DISTRICTS, WITH A HEAD OF MONTFORD OVERLAY, TO COMMUNITY BUSINESS I DISTRICT WITH NO OVERLAY**

Mayor Bellamy opened the public hearing at 5:33 p.m.

Urban Planner Alan Glines said that this is the consideration of an ordinance to rezone a portion of 36 Montford Avenue from RM-8 Residential Multi-Family Medium Density and Office Districts, with a Head of Montford Overlay, to Community Business I District with no Overlay. This public hearing was advertised on June 3 and 10, 2011.

The Chamber of Commerce moved to its new location on Montford Avenue in 2000 after assembling properties on Montford Avenue, Hill Street, and Gudger Street and constructing a

new office building and surface parking lot. The assembled parcels collectively included a variety of zoning districts including Residential Multi-family, Medium Density District (RM-8), Office, and Community Business I (CB-I). The differing zoning districts would not support a single office development that was envisioned for the Chamber and Conditional Use Rezoning was not widely used. The remedy at that time was to adopt and apply a special overlay limiting allowed uses, building size, building orientation, and site development, ensuring the community that the new Chamber development would be compatible with the rest of the historic Montford community. The site was developed using those Head of Montford Overlay District standards and the underlying zoning was not changed.

Recently the Chamber of Commerce has been approached by community members who would like to move an existing local farmer's market to this site in order to increase accessibility, size, and offerings at this more central location. The market currently operates on Wednesday afternoons at the French Broad Co-op parking lot and would retain the same operating schedule. The staff recognizes the merits of this opportunity and realized that the zoning should be consistent across the site to permit the farmer's market.

As a part of this proposal staff is recommending that the Head of Montford Overlay be removed from the parcel because it had a very specific purpose for the development of the new Chamber building. The overlay allows a much larger building in terms of square footage than would be allowed under CB-I. In addition, the overlay provides a limited list of land uses which is unusual because overlay districts typically describe the form and scale of buildings and not uses since that is covered in the underlying zoning district. Staff met with members of the Montford Neighborhood Association (MNA) who were initially concerned about removing the Head of Montford Overlay, and expressed their desire to bring the entire parcel under the Montford Historic District boundary. Currently only the portion of the parcel with the existing building is subject to the historic district standards. Due to the time constraints facing the Farm Market, the MNA determined to support the market, and pursue expansion of the Historic District separately. The neighborhood will be approaching the Chamber and the Historic Resources Commission about expanding the Montford Historic District as a part of a separate action. As an alternative to expanding the Historic District, revisions to the existing overlay could also be considered separately.

The proposed zoning change to CB-I for the entire site matches the zoning in place for the portion of the parcel where the Chamber of Commerce building is located. The intent of that zoning district is to provide areas for medium density business and service uses serving several residential neighborhoods. The zoning area may serve as a workplace for nearby residents and be sensitive to significant pedestrian activity.

The CB-I district is recommended over the two other existing districts which are more restrictive and allow fewer uses. Additionally, neither the Office, nor the RM-8 district allows farmer's markets. The Office District was developed to provide areas for small-scale office uses adjacent to residential uses; and may serve as a transition when residential areas convert to other uses or between residential and commercial areas. The Residential Multi-family, Medium Density District (RM-8) was set aside for a wide variety of medium density residential uses and limited non-residential development such as institutional uses normally found in residential areas.

Based on the above findings and the analysis provided, the staff finds this request to be reasonable because the area supports this type of zoning and development pattern.

This rezoning request was recommended for approval by a 5-0 vote by the Planning and Zoning Commission meeting on June 1, 2011. Four people spoke at the P&Z meeting; most speakers were supportive of the zoning change.

Pros:

- Provides consistent zoning for this single parcel.

- Proposed zoning will be compatible with trends and changes to zoning on nearby parcels.
- The zoning change is consistent with the goals of the neighborhood which by a future and separate action may include the Montford Historic District overlay.

Con:

- (Temporarily) removes a limited number of design standards from the property.

Staff supports the request to rezone the property to CB-I because the area supports this zoning pattern.

Mayor Bellamy closed the public hearing at 5:37 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Newman moved for the adoption of Ordinance No. 3985. This motion was seconded by Councilman Bothwell and carried unanimously.

**ORDINANCE BOOK NO. 27 – PAGE 76**

**V. UNFINISHED BUSINESS:**

**A. STATE LEGISLATIVE UPDATE**

City Attorney Oast said that since his last legislative update to Council (May 24), the following developments have occurred with respect to legislation that affects Asheville:

**1. House Bill 925**: Merger of water and sewer systems. As reported earlier, a bill was introduced on May 5 that would have required the City to convey its water system to MSD. While written as a general law, Asheville is the only City in the State as far as we know to which the bill applied. At Council's request, a letter was prepared and sent to Representative Moffitt, who introduced the bill, expressing the City's concerns with it. We learned later that the bill had been converted to a "study bill" and passed out of the house. If passed by the Senate, the issue will be referred to the Legislative Research Commission to study the issue specified in the study bill.

**2. House Bill 552**: Establishing Greater Asheville Regional Airport Authority. As covered in previous reports, this bill was introduced on March 30. The City did not request introduction of this bill. In essence, the bill would establish the Greater Asheville Regional Airport Authority as an independent authority, with certain governmental powers and duties. The current Asheville Regional Airport Authority is an agency formed by an interlocal agreement between Asheville and Buncombe County. HB 552 would reduce the City and County seats on the Authority from three to two, and would give Henderson County two seats, with a seventh member of the board to be elected by the other six. Currently, Henderson County has no dedicated seat, but does have representation on the board by appointment as the seventh member.

The property on which the airport is located is substantially, if not entirely, owned by the City and leased to the Authority. The initial acquisition in 1958 consisted of 780 acres, acquired by the City with funds from its general fund, and a 50 percent federal match. Subsequent property acquisitions over the years have been much smaller in size; most if not all of them were with airport funds and a larger (usually 90 percent) FAA match. The bill that has been introduced would also require the City, Buncombe County, and Henderson County to convey to the new authority "all of its right, title, and interest to the property known as the Asheville Regional Airport." This also applies to Buncombe County and Henderson County, but any interest those entities have in property at the airport is far smaller than the City's.

By letter dated May 15, 2011, the City expressed its strong objections and concerns about this bill, and those concerns have also been expressed in individual conversations with members of the local delegation. Those concerns include the reduction in the City's representation on the board, the eligibility requirements for appointment to the board, and the legality of the forced conveyance of property to the Authority, apparently without consideration.

Although the bill has been amended, those amendments have done little to address the City's concerns. The bill was passed out of the House on June 6, and is in the Senate where it has been passed on first reading and referred to the Senate Committee on State and Local Government.

**3. House Bill 562**: Woodfin/Asheville Boundary Adjustment. The survey work undertaken to clarify the precise location of a proposed common boundary between Asheville and Woodfin has been substantially completed. The description of the new line has been incorporated into the proposed legislation, and has been submitted to the legislative bill drafting office. This bill affects only State-owned properties; private properties in the area would have the option of remaining in their current jurisdiction, or voluntarily annexing into the other jurisdiction, with approval by both governments. Though not a perfect solution, this should help with jurisdictional and service issues in the UNC-A area, the US 19-23/Broadway interchange, and the proposed roundabout at the entrance to Reynolds Mountain. The surveyor was not able to complete the work in time for us to include it in the bill; therefore, Representative Fisher felt that it might be better to wait until the Short Session next year to get it done properly.

**4. Other Bills**:

- House Bill 845: Annexation. Of the several annexation reform bills introduced in this year's session of the General Assembly, this is the one that has gotten the most traction. It is a comprehensive bill, affecting practically every aspect of annexation law. Some key features of the bill are the requirement for cities to connect individual properties to water and sewer, and the establishment of a process whereby property owners in the annexed area could defeat or undo the annexation by a petition. This bill was passed out of the House, and is now in the Senate. Action on other bills to "undo" individual annexations are awaiting the final outcome of House Bill 845. The bill to appeal the Biltmore Lake annexation, House Bill 236, was passed out of the House on April 4, and is in the Senate where it has passed first reading and been referred to the Senate Committee on Rules and Operations.

- House Bill 307: Electronic Notices. This bill would permit local governments to use electronic means for certain required legal advertisement, such as public hearing notices. This is a local bill, but applies to 14 counties and the municipalities in those counties. Buncombe County asked to be included among the counties to which this bill applies, and Asheville has agreed.

- House Bill 308: An Act to Reform the Process of Ticketing, Selling, and Reselling Admission Tickets. This bill affects venues which accommodate more than 1,000 persons such as the Civic Center and as proposed, could have serious, negative financial consequences for the Civic Center. The bill imposes new public notice requirements regarding the availability of tickets for each event, as well as a requirement to establish a special toll-free number to answer inquiries regarding ticket sales, which could be costly as well as demanding of staff time. The bill also requires that in the case of a cancellation, the venue would be responsible for the refund of not only the face value of the ticket sold, but also any fees charged in connection with the purchase such as processing fees, shipping and handling charges, convenience fees charged by online ticketing process such as Ticketmaster. This would mean that the Civic Center would have to refund money that it had not actually received since most of these types of charges are paid by purchasers to Ticketmaster for the ability to purchase online tickets.

Moreover, the bill has stringent penalties ($100 per ticket sold at the event up to $100,000) for failure to comply with any of the requirements. HB 308 has been formally opposed by The NC Travel & Tourism Coalition as well as performance venues around the State. He said this bill failed to meet the cross-over deadline and is not eligible for consideration in this session.

**5. Developments on other matters of interest to municipalities**: He provided Council with the newsletter from the North Carolina League of Municipalities. As always, information on the bills noted above, or on any other matters of interest, is available.

Councilman Russell asked City Attorney Oast for list of members, with contact information, on the Senate Committee on State and Local Government so that Council members can contact them individually regarding House Bill 552.

Councilman Bothwell said that Senate Bill 108 (unique to Asheville and two other cities in North Carolina) has a provision for a referendum in the state on marriage. Included in bill is a provision that would remove the ability for Asheville to provide domestic partner benefits to our employees. When he asked if Council would be interested in taking a position on that, Vice-Mayor Newman noted that he did strongly oppose to that legislation; however, there are a lot of commendable and horrible bills to voice our opinion on but was unsure how many positions we should take on state-wide bills. In addition, if there was a reference on the issue, there would be a chance for people to weigh on what they agree with or what they don't agree with.

Councilman Davis felt that because we did implement domestic partner benefits, we should express our feelings. On the other hand, the Civic Center Commission adopted a resolution expressing their discontent of House Bill 308. At the Civic Center Commission meeting, City Attorney Oast advised the Commission that with the velocity of items we are making known our unhappiness or pleasure with, once it gets to a certain amount, it diminishes itself. If Senate Bill 108 or House Bill 308 are not being considered at this time, we might not be doing ourselves a favor.

Councilman Bothwell agreed that if Senate Bill 108 makes the cross-over deadline we may be able to raise the issue next year.

Regarding House Bill 552, Mayor Bellamy said we received an update from Rep. Moffitt regarding our official position. He said a couple of amendments had been made but after our review, they did not affect the provisions that Council was most concerned with. In order to keep an open communication with him, she asked for Council's concurrence that we have staff draft a letter for her signature stating that we still have the same concerns expressed in our letter dated May 15. Personally, she would not support the bill even if amendments were made. She was concerned about state government telling us that we must give our property over to an authority and then diminishing our representation on the board from 3 City of Asheville appointees to two appointees. She has contacted the Secretary of Transportation to voice her concern with the FAA ruling provided to her to say that they could not compensate us. She also called the White House to state her discontent with the FAA in this process because she didn't feel it is satisfactory for us to be told by the state that we can't get any compensation at current market value for the investment City taxpayers made into the Airport.

Vice-Mayor Newman agreed that none of the concerns addressed during the City's discussion were addressed in the amendment to the bill. He felt we need to continue to express our concerns via letter and Council communication individually.

It was the consensus of Council to have staff draft another letter to Rep. Moffitt reaffirming Council's strong objections and concerns regarding House Bill 552 and to also copy our state senate side of the legislature.

Councilwoman Manheimer reiterated her concern regarding the method of communicating with our legislators about our concerns about House Bill 552. Having worked at the legislature four years, she can tell you that it's not effective to just send a letter. We need to communicate with our legislators. It seems to be something of an inevitability that House Bill 552 requiring Asheville to transfer the property it owns to the Airport Authority will get passed and she felt we are missing our opportunity to have a seat at the table to have a discussion about how that works. We have voiced our opposition and disappointment with the requirement to transfer the property, but there might be an opportunity to negotiate some compensation. Otherwise all we are left with is a bill that is enacted that leaves us in a position of having to file a lawsuit to make a takings claim. That is a gray area of the law and she would be concerned about paying an attorney to get involved in for some extended litigation that may or may not pan out. She suggested meeting with Senator Apodoca and Rep. Moffitt to see if we can build into the bill some way to provide us compensation if they insist on including this provision that requires us to transfer the property.

Mayor Bellamy said that was fine but we also have to take into consideration that the Airport Authority is saying the FAA is not permitting them to do that. That is why she feels it's important to go to the FAA and demand that they pay us the fair market value of what the investment that the City of Asheville taxpayers put in for the Airport. Even if our legislators say we can be compensated, and the FAA says no, we are at a standstill. She felt we need to also contact the FAA to say we want our compensation.

Councilwoman Manheimer agreed with Mayor Bellamy, noting that the bill is silent as to compensation to the City. The state can do their part and put in a provision that keeps the door open for some fair compensation for the property. She felt that going forward we need to think about our methodology in terms of interacting with the legislature.

Mayor Bellamy hoped all of Council is contacting our legislators to not only talk about House Bill 552 but other legislation as well.

Councilman Davis felt we have made it clear that we are not happy with House Bill 552. He wondered if there has been any contact by anyone to us responding to our opposition and it might be appropriate to arrange a meeting with Senator Apodaca and Sen. Moffitt, as well as those others who have been in support of Asheville. Mayor Bellamy responded that she has received verbal communication from Rep. Fisher and Rep. Keever who said they were taking their names off the bill as co-sponsors. She also heard from Charles Thomas from Rep. Tillis' office about other ways the City can address this issue. She has also talked to Senator Apodaca who said he would see it in the Senate side before he could make changes.

Councilwoman Manheimer e-mailed Rep. Moffitt with the idea of compensation and provided some numbers based on Asheville's investment. He responded that he would look into the issue. She felt we have an opportunity to try to negotiate some language in there about compensation. The Mayor has raised an issue about the FAA's position about compensation for the land. We need that investigated to see they would compensate the City for some legal reason.

City Attorney Oast said that the bill does provide for any conveyance from the City to the Airport Authority to be with the FAA's approval. He did not know what their position is on compensation.

Vice-Mayor Newman felt this is not just a debate between us and our legislatures, since there are very large national policies around investments in aviation facilities where the FAA is

involved. A completely different solution might be instead of requiring transfer of the title, the legislation could simply say that the Airport has a long-term lease for $1 a year. There is another way to effect the creation of an independent Authority that would simply set aside the issue of the title transfer property. If Senator Apodaca wanted to address our concerns, they could pull the title transfer piece out of the bill and let some other parts of it move forward.

In response to Councilman Bothwell, City Manager Jackson said there is no financial compensation regarding the Airport property being leased to the Airport Authority.

Mayor Bellamy said that House Bill 925 is now a study bill directing the Legislative Research Committee to study the merger of water and sewer systems. She said that Rep. Moffitt has also suggested that a local group look at this issue from Asheville's prospective. City Attorney Oast said that Council can suggest the Legislative Research Commission seek input from local sources. Mayor Bellamy felt it would also behoove us to look at the 12 issues outlined in the bill from Asheville's standpoint. We should not leave it to a Raleigh commission to determine the fate of our water system.

Councilman Bill reviewed the 12 issues from the bill to be examined and felt there would have to be members of the City Water Department and members of the Metropolitan Sewerage District on this research committee or least for them to be contacted to provide the information. He would prefer we have individuals from the City and MSD on this study commission.

In response to Councilwoman Manheimer, City Attorney Oast felt the Legislative Research Committee is a fixed group. He did feel that a mechanism could be incorporated into the bill to structure some input from a local study group.

Mayor Bellamy felt it would be more appropriate to have a local group review the issues in depth and report their findings. Regardless of what happens in Raleigh it is our water system. She would support the local study group including representatives from MSD to look at the 12 issues from our eyes, not just a group from Raleigh and their staff. This will impact the future of our water system.

Vice-Mayor Newman suggested that if House Bill 925 is enacted, then we would ask the staff to prepare some information for Council to consider about how this process will work and how we can be constructively engaged in responding to it to make sure Asheville's prospective is presented as part of this discussion.

City Manager Jackson said that in Mayor Bellamy's letter to Rep. Moffitt, we posed several questions about the structure, the scope, how they will get professional advice, how it will be performing it's analysis, etc. To add to our understanding, hopefully we will get some response back from the author of the bill.

**B. SIX-MONTH UPDATE ON HILLCREST PEDESTRIAN BRIDGE RE-OPENING**

Interim Police Chief Wade Wood said that City Council requested a six-month update on the re-opening of the Hillcrest Pedestrian Bridge.

This report details a six-month time frame from the re-opening of the Hillcrest Pedestrian Bridge crossing I-240 from both the Hillcrest Apartments and the Westgate Shopping Center. City Council directed the bridge opening following traffic fatalities as persons crossed I-240 on foot.

- The N.C. Dept. of Transportation (NC DOT) completed their initial required work and the bridge opened in December 2010.
- Crime prevention efforts, through increased police presence were implemented immediately.

- Increased presence included on duty officers from all three Police Districts, Community Resource Officers as well as the Drug Suppression Unit. The Asheville Police Department (APD) and Buncombe County Sherriff's Office (BCSO), working secondary through the Asheville Housing Authority, were also involved.
- Charts show high police activity from December 2010 through March 2011.
- A rash of vandalism occurred as cabling and infrastructure were being installed at Hillcrest for improved exterior lighting and cameras.
- Vandalism prompted the housing authority to increase secondary employment of APD and BCSO for April, May and June of 2011 for security of this installation.
- The Drug Suppression Unit partnered with Criminal Investigations to determine those responsible for the vandalism. Total damage and repair costs were in excess of $5000.
- Vandalism prompted the housing authority to close the Hillcrest Gate access to the bridge for a short period of time. The gate has since re-opened.
- Two suspects have been charged with the acts of vandalism.
- Extra checks by Patrol Personnel were not conducted during the time of the increased secondary employment of off duty officers by the Asheville Housing Authority (AHA).
- City applied for a COPS grant for five officers, three of which would be dedicated to Drug and Gang Suppression efforts with some focus on Hillcrest.

Partnering with City of Asheville Transportation and Public Works Departments and NC DOT has produced the following work:

- In April, tore out the fence at the end of the Westgate walkover and replaced it with a ten foot fence. Done to greatly reduce or eliminate the pedestrian traffic that was crossing the interstate that could simply step on the railing and climb over the small fence. Even after the bridge was open, pedestrian traffic was noted crossing I-240.
- Raised the sidewalk that was completely under mud and added an additional small section of fence just outside of the Hillcrest entrance to prevent further trespassing on NC DOT property.
- No trespass signs were erected under the I-240 bridge.
- Installation of two gates one at the corner of the pedestrian bridge at the top closest to Hillcrest and one on the other side under the bridge next to the end of the Smoky Park Bridge. The NC DOT is fabricating iron gates similar to the one on the Hillcrest side, as soon as they are completed they will be installed.
- Plans are for clearing the wooded area on the west side of the walkover. This will be conducted by City of Asheville Public Works, based on Crime Prevention Through Environmental Design (CPTED) evaluation and community input.
- City staff are working with Progress Energy for the installation of street lights to illuminate the sidewalk.
- The City plans to coordinate a community event towards the end of August 2011 to recognize the work our partnerships have accomplished and to reconnect the neighborhoods on either side of the bridge. This will be handled by the Neighborhood Coordinator Marsha Stickford.

This action ties in with the Strategic Operating Plan for safer communities within Asheville.

Pros:

- No Pedestrian Traffic Deaths or Crashes with Pedestrians during this 6 month period on or near I-240.
- Calls for Police Service within Hillcrest have decreased while police presence has increased.
- APD has not seen an increase in calls for service related to the opening of the walkover bridge.

Cons:

- Increased police presence has created increase tension with some residents of Hillcrest.
- Damage to infrastructure which supports higher levels of security through lighting and cameras.

The majority of the increased police presence has been conducted by on duty personnel or through housing authority secondary employment resulting in minimal fiscal impact.

City staff recommends City Council continue to support the re-opening of the Hillcrest Pedestrian Bridge. Additional requests for crime prevention and suppression will come in future staff reports.

Interim Chief Wood responded to some questions raised by Councilman Smith.

**C. RESOLUTION NO. 11-117 - RESOLUTION TO ASSIGN FEDERAL FAIR HOUSING INVESTIGATION SERVICES TO THE NORTH CAROLINA HUMAN RIGHTS COMMISSION**

Community Development Director Jeff Staudinger said that this is the consideration of a recommendation to have the North Carolina Human Rights Commission conduct all US Department of Housing and Urban Development (HUD) Fair Housing Compliance Investigations in the City of Asheville.

Every HUD grantee, as part of their responsibility to affirmatively further fair housing, needs to ensure that possible violations of the federal fair housing law are properly investigated and resolved. Such services are typically performed by governmental agencies at local and state levels that have been determined by HUD to have investigative capacity and fair housing regulations "substantially equivalent" to HUD.

These services have historically been provided to residents of Asheville and Buncombe County by the Asheville Buncombe Community Relations Council. HUD has provided Fair Housing Assistance Program (FHAP) funding to the City for this purpose. The City has passed through 100% of this funding to ABCRC to support staff and other costs of providing this service. Additionally, for many years the City has provided CDBG funding to ABCRC annually as additional support for these HUD-required services. It should be noted that CDBG program funding nationally has now been cut substantially, resulting in substantial reductions to funds available for distribution to local organizations.

This spring, in response to reorganization issues at ABCRC, the City staff investigated the options available to the City for conducting these investigations. Research revealed that most communities in the state have this service performed by the NC Human Rights Commission (NCHRC). When the Commission performs this service, the HUD Fair Housing Assistance Program (FHAP) funding is paid directly to that agency. The Commission does not require that its services be supported with other local funding.

If the City switches these reviews to the NCHRC the change in service would affect fair housing investigation of federal fair housing violations only. Local fair housing concerns would still need to be addressed locally. ABCRC is preparing a revised proposal for City Outside Agency funding to support this local service.

This proposal would support the City Council Strategic Goal of Affordable, by supporting access for safe, sufficient and affordable housing for Asheville residents.

Pros:

- The provision of this service by the NC Human Rights Commission will ensure that federal fair housing laws are enforced in the City;

- HUD has assured the City that no loss in the quality of the investigations would result from this change;

- The change would enable the CDBG funds formerly allocated for this service to be used for other community development purposes.

Con:

- Marketing and other provisions to ensure that Asheville residents are aware of and can easily access these services will need to be made.

The service has been supported in the past with Community Development Block Grant funding and with HUD FHAP funding passed through the City to ABCRC. If the service is provided through NCHRC, those CDBG funds will be distributed for other eligible uses. The City will no longer have the responsibility for administering the FHAP pass-through process; the City received no funding for that service.

The Housing and Community Development Committee has positively reviewed the proposal to transfer the FHAP program responsibilities and funding to the North Carolina Human Rights Commission. Staff recommends that City Council approve the proposal.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 11-117. This motion was seconded by Councilman Davis and carried on a 6-1 vote, with Mayor Bellamy voting "no."

**RESOLUTION BOOK NO. 34 – PAGE 46**

**D. RESOLUTION NO. 11-118 - RESOLUTION ESTABLISHING AN AFFORDABLE HOUSING ADVISORY COMMITTEE**

Community Development Director Jeff Staudinger said that this is the consideration of a resolution establishing an Affordable Housing Advisory Committee.

In 2007, the Mayor gathered a broad community study group to address the issues of housing affordability in Asheville. The group met for several months and submitted a comprehensive Affordable Housing Plan for the City of Asheville, which was accepted by the Asheville City Council on June 24, 2008. A working group continued to meet with City staff to develop specific implementation steps, including amendments to the Unified Development Ordinance, Housing Trust Fund, and other key strategies. Last fall this working group proposed to the Housing and Community Development Committee that an Affordable Housing Advisory Committee be established, with specific duties to advise the Mayor, the City Council, the Housing and Community Development Committee, and City staff. The HCD Committee has completed their evaluation of that request and now proposes the formation of the Committee.

*Purpose of the Advisory Committee:*

Through a public-private partnership, the Affordable Housing Advisory Committee will work in conjunction with City leadership and staff to implement the 2008 Affordable Housing Plan. The specific functions will be –

- To consider affordable housing policy issues and advise City leadership about those policies;

- To develop concrete action steps to implement the highest priorities of the Affordable Housing Plan, and to update that plan as appropriate over time.
- To advise City leadership and staff regarding affordable housing priorities for the investment of City-controlled funds.

*Membership:*

The Affordable Housing Advisory Committee should not exceed 9 members and ideally will have as members Asheville residents who have housing experience, including:

- A non-profit developer of affordable housing
- A for-profit housing developer
- An affordable housing advocate
- An architect
- A real estate agent
- A neighborhood association representative
- A resident of affordable housing
- A representative of the housing authority
- A representative of the private philanthropic community

This project directly meets the affordability goal of the 2011-2012 Council Strategic Plan which has the objective to "create an affordable housing standing group or commission to advise City Council on matters related to affordable housing consisting of a diverse stakeholder group."

Pro:

- Formal citizen consideration of affordable housing issues will bring renewed effort to addressing Asheville's affordable housing needs;

Con:

- It may be difficult to maintain a good balance of interests on such a committee between affordable housing advocates and those representing broader interests.

There will be no direct fiscal impact of establishing an Advisory Committee. The Committee will require staffing resources, provided by the Community Development Division.

City staff, supported by the Housing and Community Development Committee, recommends City Council establish an Affordable Housing Advisory Committee.

Upon request of Mayor Bellamy, it was the consensus of Council to include a person from the disabled community.

In response to Councilman Bothwell, Vice-Mayor Newman said that the Committee will not specifically be made up of each one of those representatives, but that Council will be committed to try to recruit those specific people to the Committee.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Davis moved for the adoption of Resolution No. 11-118, with the amendment to the membership to include a person from the disability community. This motion was seconded by Councilman Smith and carried unanimously.

## VI. NEW BUSINESS:

### A. RESOLUTION NO. 11-119 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A UTILITY CUT ENTERPRISE FUND REPAIR AGREEMENT WITH METROPOLITAN SEWERAGE DISTRICT

Public Works Director Cathy Ball said that this is the consideration of a resolution authorizing the City Manager to enter into a Utility Cut Enterprise Fund Repair Agreement with Metropolitan Sewerage District (MSD).

Several utility companies have requested that the City repair all street and sidewalk cuts they make within the City limits. City staff have evaluated this request and proposed a financial structure that would allow the City to perform these services without an increase in cost to the City's General Fund. Currently the City Water Department, Stormwater Enterprise Fund and MSD participate in the program. MSD would like to begin their participation effective July 1, 2011. Progress Energy has also indicated some interest participating in the program.

Under this agreement, the City would make all asphalt or concrete repairs to trenches cut and backfilled by MSD. MSD will not be required to obtain permits but will be required to notify the City within 24 hours of any cuts made. The City will utilize a nuclear density gauge to determine the compaction of the trench and if acceptable will make the repair. MSD will no longer have a warrant period for the cut.

The MSD Board unanimously approved this agreement at their May Board meeting.

The Street Utility Cut Enterprise Fund was approved by City Council as part of the FY 2011 Budget. The action supports several of Council's Strategic Goals by leveraging internal and external partnerships as well as improving the affordability of water and stormwater rates.

Pros:

- All cuts and repairs will be made in accordance with the City of Asheville Standards and Specifications Manual.
- MSD will not be required to obtain street cut permits.
- The program will be more efficient due to number of cuts the City will be repairing.
- Repairs will be more consistent.
- Due to the structuring of the program, the City has minimal risk in this agreement.

Con:

- Contractors that have been performing this work for MSD will no longer be contracted to perform these repairs inside the City limits. We have met with the contractor and have asked him to submit bids on other work for the City. While we cannot guarantee his company the work, we will make sure he gets the necessary information to submit bids.

The City's ability to provide these services, based on the previous five years data, would cost approximately $1.6 million. A review of the amount of permits over the past five years indicates that approximately 55% of the permits were obtained from the Water Department, 35% of the permits were obtained by MSD, 5% from PSNC and 5% to the City's Stormwater. The cost of the program is broken down as follows:

| Agency | % of cuts | % of cost |
|---|---|---|
| Water Department | 55 | $880,000 |
| MSD | 35 | $560,000 |
| PSNC | 5 | $80,000 |
| Stormwater | 5 | $80,000 |

| | | |
|---|---|---|
| Total | 100 | $1,600,000 |

The program will be reviewed annually. In the event that actual cost exceeds 10% of the budget, MSD will be required to pay the difference between the budgeted amount and the actual amount. In the event that actual cost is 10% less than the budgeted amount, the City will reimburse MSD the difference between the budgeted amount and the actual amount.

City staff recommends City Council authorize the City Manager to enter into a Utility Cut Enterprise Fund Repair Agreement with MSD.

Councilman Russell said that the Finance Committee reviewed this last year and recommended approval.

When Councilman Russell asked if we are working with other utilities, Ms. Ball said that Progress Energy is interested and we are working to come up with a proposal for them. At this point AT&T has shown no interest in the program, but they are open to including more utilities.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Russell moved for the adoption of Resolution No. 11-119. This motion was seconded by Councilman Bothwell and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 49**

**B. RESOLUTION NO. 11-120 - RESOLUTION AUTHORIZING APPROVAL OF THE 2012 OUTSIDE AGENCY GRANTS**

Community Development Director Jeff Staudinger said that this is the consideration of a resolution approving of the recommendations of the Housing & Community Development (HCD) Committee for the 2012 Outside Agency Program.

The HCD Committee received applications from 12 eligible organizations for Outside Agency funding for 2012. The Committee considered these applications at their meeting of May 19, 2011, and now recommends 11 applications for funding. The recommendations are:

| **Agency** | **Funding Support Purpose** | **2011 Recommended Funding** |
|---|---|---|
| Child Abuse Prevention Services, Inc. | General operating support targeted to parenting education and outreach | $ 5,000 |
| Children First /Communities in Schools | Project MARCH: after-school safe-haven program at three housing complexes in the City | $17,800 |

| | | |
|---|---|---|
| Design Center | Small Business Assessment Pilot Program in cooperation with COA's Community Development, Economic Development and Development Services Departments. | $ 4,000 |
| Homeward Bound of Asheville-AHOPE | A HOPE Day Center outreach, intake and support for homeless persons, support for weekend operations. | $20,000 |
| One Youth at a Time | Provides mentoring, job training and placement assistance to at-risk students | $ 5,600 |
| YWCA of Asheville and WNC | Future Vision daily afterschool program and summer camp program. | $ 8,000 |
| Housing Authority-Youthful HAND | The Youthful HAND (YH) Afterschool Program serving children in grades K-8 who reside in the Lee Walker Heights (LWH) housing development. | $ 4,000 |
| Kids Voting Buncombe County | Kids Voting provides a K-12 civics curriculum to area educators, offers students a voting experience, and offers a community service opportunity for High School Students. | $ 1,000 |
| Governor's Western Residence Association | GWR requests one-time funding to replace or refurbish old and worn out furniture, drapes, bedding and rugs. | $ 5,000 |
| Economic Development Coalition | EDC seeks operation funding to market economic development assets and services which will lead to job creation in the City. | $40,000 |
| Asheville Greenworks | Enhance the environment and quality of life through awareness building, community activities and partnerships. | $ 8,000 |
| Total | | $118,400 |

Additionally, Council heard a report from and conceptually approved funding for the Asheville-Buncombe Regional Sports Commission on May 10, 2011. The Outside Agency budget has been increased by $45,000 to support this agency; future requests will be addressed through the annual Outside Agency program funding process.

This action complies with the City Council Strategic Operating Plan in (1) Fiscal responsibility, by identifying resources for strategic partnerships and creating meaningful performance measures for programs and services; (2) Job Growth and Community development, by participating in effective partnerships to achieve goals in health and wellness, workforce development and sustainable economic development; and (3) Safe, by supporting recreation and employment alternatives for youth at risk of gang exposure.

Pros:

- Approval of Outside Agency Grants provides operating support to Asheville-based organizations that are providing direct services for Asheville residents.
- Reflects the carefully considered recommendations of the City's Housing & Community Development Committee.

Con:

- Budget constraints continue to curtail the availability of funds; supported organizations will need to find alternate sources of program support.

Outside Agency Grants are funded from the City's general fund. The funding recommendations are within the fiscal limits developed by Council during the budget working sessions. No increase in organizational funding is recommended. One-time funding for the Western Carolina Governors Residence is recommended this year. First-time funding for the Asheville-Buncombe Regional Sports Commission is also included.

The HCD recommends approval of the 2012 Outside Agency Program grants as presented.

Mr. Staudinger responded to Mayor Bellamy's question of the Design Center's function. This would help inexperienced entrepreneurs in the community who are seeking to renovate space and who are finding the permit process difficult to navigate. Entrepreneurs can receive levels of assistance in their permit needs and when they need professional assistance. Staff will not make recommendation on professionals to use, but just help them understand what the technical requirements are. The Design Center has proposed to develop a comprehensive checklist of permits needed in collaboration with the Building Services Department and then to pilot a technical assistance program, as permit applicants come into the City, to help them understand what their needs are.

Councilman Davis misunderstood the pilot program and could not be supportive of allocating $4,000 for this function.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Smith moved for the adoption of Resolution No. 11-120. This motion was seconded by Vice-Mayor Newman and carried on a 6-1 vote with Councilman Davis voting "no."

**RESOLUTION BOOK NO. 34 – PAGE 51**

**C. ORDINANCE NO. 3986 - BUDGET AMENDMENT TRANSFERRING RESOURCES FROM THE GENERAL FUND TO THE FESTIVAL FUND**

Administrative Services Director Lauren Bradley said that this is the consideration of a budget amendment, in the amount of $1,550,000, from the General Fund for the purpose of transferring resources to the Festival Fund to close the fund out as recommended by the City's external auditors.

The Festival Fund was established in 1990. For the majority of that decade, portions of the programs' expenditures were recorded in both the General Fund and the Festival Fund with the majority of the revenues accounted for in the Festival Fund. Beginning in 2002, in an effort to improve transparency and provide for greater cost accounting of the festival activities, the General Fund program expenditures were realigned over a period of several years to the Festival Fund.

As the City Council is aware, the Festival Fund has been classified as an enterprise fund on the City's financial statements. The external auditors have commented previously on the appropriateness of that classification given that the activities accounted for in the Festival Fund generally do not have the characteristics associated with enterprise activities (such as, fees charged to users, self-supporting, State laws requiring separate funds, pricing policies designed to recover operating and capital costs). As a result of the auditor's comments in connection with the 2010 audit, City staff prepared the 2012 budget by folding the operations of the Festival Fund in the General Fund. The City will still be able to track festival revenues and expenditures separately; but will simply do so within the General Fund.

The City combines or pools a majority of its cash and investments of the various accounting funds to improve investment performance and to limit the need to transfer funds among separate bank accounts. Each accounting fund's position in the combined pool is reflected as an asset (cash and investments) on the balance sheet. Sometimes an individual accounting fund overdraws its share of pool cash and investments – as with the Festival Fund due to its negative net asset position. When this situation occurs, the overdraft is reflected as an interfund liability (due to another fund) rather than a negative cash amount in the pool. Likewise, an equivalent amount of some other accounting fund's position in the pool is then reclassified as an interfund receivable – in this case the General Fund. These accounting transactions are, in essence, a form of temporary cash loan to cover the negative cash position.

Over the years, the Festival Fund's negative cash and investment position has grown due to expenses exceeding revenues and formal transfers in from the General Fund. As previously mentioned and reflected in the table below, the growing negative net asset position arose as a result of an effort to reflect the costs of the festival program in the enterprise fund and revenues falling short of budget estimates. While there have been several formal General Fund transfers made since 2002, those transfers were generally not sufficient to cover the loss for the year. Additionally, beginning in 2002 when there was an increased effort to reflect all the festival program costs in the Festival Fund, there were no transfers which resulted in a rapid increase in the negative financial position of the Festival Fund.

| Fiscal Year | Budget | Expenses | Revenues | Transfer In | Net Income (Loss) | Cumulative Net Assets |
|---|---|---|---|---|---|---|
| 2010 | $796,449 | $(757,766) | $637,965 | $184,726 | $64,925 | $(1,556,517) |
| 2009 | 1,121,064 | (1,106,424) | 770,903 | 162,675 | (172,846) | (1,621,442) |
| 2008 | 1,230,544 | (1,169,695) | 860,135 | 253,922 | (55,638) | (1,448,596) |
| 2007 | 1,346,878 | (1,314,846) | 868,327 | - | (446,519) | (1,392,958) |
| 2006 | 1,249,413 | (1,269,793) | 1,032,524 | 100,000 | (137,269) | (946,439) |
| 2005 | 1,100,360 | (1,067,019) | 701,097 | - | (365,922) | (809,170) |
| 2004 | 1,533,026 | (1,121,437) | 787,812 | - | (333,625) | (443,248) |
| 2003 | 913,727 | (801,385) | 725,855 | - | (75,530) | (109,623) |
| 2002 | 823,740 | (786,762) | 694,351 | - | (92,411) | (34,093) |
| 2001 | 976,907 | (574,469) | 574,473 | - | 4 | 58,318 |

Because the accounting and financial reporting regulations require negative cash and investment positions to be offset in other funds, the General Fund's cash and investment position has been reduced in a like amount. The amount is reflected on the General Fund balance sheet as "due from other funds" and in fund balance as "reserved by State Statute". Because cash and investments represent the beginning point for the calculation of available fund balance, the General Fund's undesignated fund balance position already reflects the impact of the negative cash position in the Festival Fund. Therefore, the financial impact of the Festival Fund closeout on the General Fund's undesignated fund balance has already been reflected in the City's financial statements. The closeout will impact the "State statute" reservation which is not part of the City's 15% fund balance policy objective.

In connection with the 2011 audit and the current fiscal year, the City will be closing down the Festival Fund. Because the Festival Fund has not been self-supporting over the years, the net assets of the fund were a negative $1,556,517 at June 30, 2010. City staff believes that the financial performance of the Festival Fund in 2011 will be break even; so the cumulative net asset amount of negative $1.556 million will likely be unchanged.

In order to closeout the Festival Fund, the City must formally transfer resources to the Festivals Fund through a budget amendment to eliminate the interfund liability described previously.

This action complies with City Council's Strategic Operating Plan of operating the City of Asheville's organization to the highest fiscal responsibility.

Pro:
• Conforms the City's financial statements with generally accepted accounting and reporting standards.

Con:
• None noted.

General Fund undesignated fund balance at June 30, 2010, already reflected the financial impact of the interfund receivable from the Festival Fund, therefore this amendment has no impact on the General Fund's available fund balance. The transfer in 2011 permits the City to close out the Festival Fund. Staff adjusted the festivals expenditure budget in FY 2010 to more closely align with anticipated revenues. As a result, the Festivals Fund has shown improved financial performance over the last two years. Net income totaled $64,925 in FY 2010, and the Festivals Fund is expected to break even in FY 2011. As noted earlier in the report, festivals expenses and revenues are budgeted in the General Fund in FY 2012.

City staff recommends City Council approve the budget amendment appropriating $1,550,000 from the General Fund for the purpose of formally transferring resources to the Festival Fund to eliminate the interfund liability.

Ms. Bradley clarified several points raised by Mayor Bellamy.

Mayor Bellamy wanted to make sure that Council can still easily identify festival revenues and expenses, and how much taxpayer dollars are subsidizing festivals.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3986. This motion was seconded by Councilman Smith and carried unanimously.

**ORDINANCE BOOK NO. 27 - PAGE 79**

**D. BOARDS & COMMISSIONS**

**CIVIC CENTER COMMISSION**

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Civic Center Commission. .

The terms of John West, Carol Ann McLendon and James Richards will expire on June 30, 2011.

The following individuals have applied for vacancies: Saul Chase, Christopher James Bradford, Flora Marr, Heather Hunter, Elizabeth Franks and Karl R. Katterjohn.

It was the consensus of Boards & Commissions Committee to (1) reappoint Mr. West and Ms. McLendon to each serve a three-year term respectively, terms to expire June 30, 2014, or until their successors have been appointed; and (2) recommend interviewing Ms. Flora Marr and Ms. Elizabeth Franks.

Vice-Mayor Newman moved to (1) reappoint John West and Carol Ann McLendon to each serve a three-year term respectively, terms to expire June 30, 2014, or until their successors have been appointed; and (2) instruct the City Clerk to arrange interviews for Ms. Flora Marr and Ms. Elizabeth Franks. This motion was seconded by Councilman Russell and carried unanimously.

**PUBLIC ART BOARD**

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Public Art Board. .

The terms of Kenn Kotara, Jaan Ferree, Julie Calhoun-Roepnack and Barry Pate will expire on June 30, 2011.

The following individuals have applied for vacancies: William F. Meller, Richard G. Lee, Susanne Hackett, Leslie Shaw, Ami Worthen, Gwynn Rukenbrod, Jessica McCuan, Leslie Klingner and Jennifer Gordon.

It was the consensus of Boards & Commissions Committee to (1) reappoint Ms. Ferree and Ms. Calhoun-Roepnack to each serve a three-year term respectively, terms to expire June 30, 2014, or until their successors have been appointed; (2) appoint Ms. Suzanne Hackett to serve a three-year term, term to expire June 30, 2014, or until her successor has been appointed; and (3) recommend interviewing Ms. Jennifer Gordon and Ms. Leslie Klingner.

After a brief discussion, Vice-Mayor Newman moved to (1) reappoint Jaan Ferree and Julia Calhoun-Roepnack to each serve a three-year term respectively, terms to expire June 30, 2014, or until their successors have been appointed; and (2) instruct the City Clerk to arrange interviews for Ms. Susanne Hackett, Ms. Ami Worthen, Ms. Gwynne Rukenbrod, Ms. Jessica McCuan, Ms. Jennifer Gordon and Ms. Leslie Klingner. This motion was seconded by Councilman Smith and carried unanimously.

Councilman Russell noted that there is a Finance Committee scheduled at 3:30 p.m. on June 28, but due to the number of board/commission interviews taking place on that date, he would contact staff to re-schedule the Finance Committee meeting.

**RESOLUTION NO. 11-121 - RESOLUTION APPOINTING MEMBERS TO THE CITIZENS-POLICE ADVISORY COMMITTEE**

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Citizens-Police Advisory Committee.

The terms of Carol Rogoff Hallstrom (North representative), Bob Smith (Central representative), Allen Brailsford (West representative) and Charlie Hume (South representative) will expire on June 30, 2011.

The following individuals have applied for vacancies: Gabriela Volkomer, Sarah Nunez (who is currently serving as an ad hoc voting member), Nancy M. Baker, Jay Lively, and Marie-Line Germain.

The Boards & Commission Committee recommended (1) reappointing Ms. Hallstrom, Mr. Brailsford and Mr. Hume; and (2) appointing Marie-Line Germain.

Vice-Mayor Newman moved to reappoint Carol Hallstrom (North), Allen Brailsford (West) and Charlie Hume (South), as members of the Citizens-Police Advisory Committee to each serve a three-year term respectively, terms to expire June 30, 2014, or until their successors have been appointed. This motion was seconded by Councilman Bothwell and carried unanimously.

Vice-Mayor Newman moved to appoint Marie-Line Germain (Central) to serve a three-year term, term to expire June 30, 2014, or until her successor has been appointed. This motion was seconded by Councilman Russell and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 53**

**RESOLUTION NO. 11-122 - RESOLUTION APPOINTING A MEMBER TO THE CRIME-STOPPERS BOARD OF DIRECTORS**

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Crime-Stoppers Board of Directors. .

The terms of David Herbert and Michele McClure will expire on June 30, 2011.

No individuals have applied for the vacancies.

The Boards & Commissions Commission recommended reappointing Mr. Herbert and re-advertising for the other seat.

Vice-Mayor Newman moved to (1) reappoint David Herbert to serve an additional three-year term, term to expire June 30, 2014, or until his successor has been appointed; and (2) re-advertise for the other seat. This motion was seconded by Councilman Bothwell and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 54**

**RESOLUTION NO. 11-123- RESOLUTION APPOINTING MEMBERS TO THE RECREATION BOARD**

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Recreation Board. .

The terms of Mildred Nance-Carson, Lonnie Gilliam, Geoffrey Ferland and Will Callaway will expire on June 30, 2011. In addition there currently exists a vacancy left by Sara Manual until June 30, 2012.

The following individuals have applied for vacancies: Todd M. Dunnuck and Josh O'Conner.

The Boards & Commission Committee recommended (1) reappointing Ms. Nance-Carson and Mr. Gilliam to each serve a three-year term respectively, terms to expire June 30, 2014, or until their successors have been appointed; (2) appointing Todd Dunnuck and Josh O'Conner; and (3) re-advertising for the vacancy left by Ms. Manual.

Vice-Mayor Newman moved to (1) reappoint Ms. Nance-Carson and Mr. Gilliam to each serve a three-year term respectively, terms to expire June 30, 2014, or until their successors have been appointed; and (2) re-advertise for the vacancy left by Ms. Manual. This motion was seconded by Councilman Bothwell and carried unanimously.

Vice-Mayor Newman moved to appoint Todd Dunnuck and Josh O'Conner to each serve a three-year term respectively, terms to expire June 30, 2014, or until their successors have been appointed. This motion was seconded by Councilwoman Manheimer and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 55**

**RESOLUTION NO. 11-124 - RESOLUTION APPOINTING A MEMBER TO THE SUSTAINABLE ADVISORY COMMITTEE ON ENERGY & THE ENVIRONMENT**

Vice-Mayor Newman, Chairman of the Boards & Commissions Committee, said that Ms. Sasha Vrtunski, member on the Sustainable Advisory Committee on Energy & the Environment (SACEE) has resigned, thus leaving an unexpired term until December 31, 2012.

Vice-Mayor Newman said that the Boards & Commissions Committee recommended appointing Torin Kexel due to a recently advertised vacancy.

Councilman Bothwell moved to appoint Torin Kexel to serve the unexpired term of Ms. Vrtunski, term to expire December 31, 2012, or until his successor has been appointed. This motion was seconded by Councilman Russell and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 56**

**PLANNING & ZONING COMMISSION**

Vice-Mayor Newman said that the Boards & Commissions Committee recommends that five-six candidates be interviewed for the upcoming Planning & Zoning Commission vacancies. Each candidate will have a 20-minute televised interview in the Council Chamber. At the August 9 meeting, the Boards & Commissions will make recommendations to the Council for the interviews.

Council's existing policy is that if any one member of Council who wants to interview a candidate for a given board, that candidate is interviewed. In light of the fact that we are allocating 20 minutes for each interview, the Boards & Commissions Committee suggested that if there are additional candidates Council wants to interview, that it would require 2 members of Council to request that person go through the full interview process.

Because this is similar to School Board appointments, Mayor Bellamy asked when the City Council questions would be due. City Clerk Burleson she said that the request for Council

questions would be sent out on July 1, with all questions to be returned one week from them. The Boards & Commissions Committee, at their July 26 meeting, would then narrow down the questions to five.

Mayor Bellamy recalled from prior School Board appointments that the entire City Council narrowed the questions down. Due to the elevated process of these appointments, she felt all of Council should have the opportunity to narrow the questions down.

Vice-Mayor said that Council can choose to have more than five essay questions so that each member of Council has at least one of their most top priority questions responded to in an essay fashion.

Councilman Davis said that the Boards & Commissions Committee recommended requesting three questions from each Council member and then the Committee would narrow the questions to five. Because there would be 21 questions, Vice-Mayor Newman felt there would be helpful that the Committee narrow the questions and on July 26 Council could confirm those would be the ones for essay responses. Councilman Smith noted that Council will still have the opportunity to ask any individual or follow-up questions in the 20-minute open interviews.

Councilman Russell and Councilwoman Manheimer would like for the Boards & Commissions Committee to recommend five questions and then Council can review them at their July 26 meeting.

At the request of the majority of Council, City Clerk Burleson would provide City Council with all questions received on July 22, noting that the Boards & Commissions Committee would narrow them down to five at their July 26 meeting. At the formal meeting on July 26, the Committee will provide Council with their five recommended questions.

**VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:**

Dr. Milton Byrd offered his service to work with the City of Asheville in mediating in moving forward with public access regarding television, as well as addressing some of the URTV issues. Councilman Russell noted that the Finance Committee will be meeting on this issue and the matter will be coming back to Council in the very near future. Because Dr. Byrd would be requesting a meeting with the Mayor, Mayor Bellamy suggested he first attend the Finance Committee and the Council meeting where this will be discussed, as she does not have any information to share. Mayor Bellamy asked City staff provide Council and Dr. Byrd with information from the Finance Committee that outlines the broad details for an Request for Proposals process (which is scheduled before Council on June 28), staff recommendations which were approved by the Finance Committee, and a timeline of URTV funding and management decisions. Mayor Bellamy also noted that the City had a management contract with URTV that they have been adhering to all along, while addressing the issue with URTV leadership.

Rev. Lisa Landis felt didn't feel that someone from the outside that has never been to URTV, viewed the studios and operations to see how it works, or to see the programming will have the best ideas on how to fix it.

Rev. Christopher Chiaronmonte felt that Buncombe County should pay URTV the money owed to it.

Mr. John Kleckner explained that he has been keeping the streets clean to help raise money for a film project he would like to do, noting that the community is supportive of his efforts.

At the request of Councilman Bothwell, City Manager Jackson said that he would provide Council with information on the last evaluation of the performance and effectiveness of the Council sound system.

Councilman Davis said that concern has been expressed about comments made by Councilman Bothwell regarding the Conservancy's work on Pack Square Park. Asheville has received a wonderful gift from the Conservancy, even though the financing by the Conservancy did not happen like we wanted. The process to construct restrooms in the Park was a long process and the Buncombe County Tourism Development Authority has provided the funding; however, merchants nearby the Park requested the construction be delayed until after the summer season. Personally, he is appreciative of the Park and even though the financing didn't work out the way we all wanted it to, he was glad of those things that did work out.

Councilman Bothwell said that the Conservancy's failure to start the restrooms in March, as announced, being delayed until November was what concerned him. The felt Pack Square Park represents a major calamity in the City and requested an accounting of the money. He pointed out several design failures. He is very disappointed in the Park as it has turned out, especially in the amount of money spent, including taxpayer money which they were told initially would never be spent.

Councilman Russell respected everyone's opinion; however, he requested that any future correspondence by an individual member of Council be signed by them only and not titled as Asheville City Council.

Mayor Bellamy said that officials from other cities around North Carolina have commented on how they wish they had this Park in their respective city. Beauty is in the eye of the beholder and she sees a beautiful Park. She acknowledging mistakes were made, but we can continue to fight over what is wrong with it, or work together to fix it and make it better for our community. It is a wonderful City asset.

Mayor Bellamy requested City Clerk Burleson provide Council with the audits of the Pack Square Conservancy, along with the Buncombe County audit.

**Claims**

The following claims were received by the City of Asheville during the period of May 13 – June 9, 2011: Walter Goggans (Transit), Sandra Griffin (Police), Aaron Pienta (Water), John Houser (Transit), Marjorie Coleman (Streets), Craig/is Ltd (Streets), Carol Keleher (Streets), Robert Miller (Streets), Debra Penland (Water), AT&T (Sanitation), AT&T (Water), Progress Energy (Water), Donnie McCaslin (Water) and Eastwood Village Apts (Water). These claims have been referred to Asheville Claims Corporation for investigation.

**VIII. ADJOURNMENT:**

Mayor Bellamy adjourned the meeting at 7:42 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – June 28, 2011 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilman Cecil Bothwell (out of town)

**PLEDGE OF ALLEGIANCE**

Mayor Bellamy led City Council in the Pledge of Allegiance.

**INVOCATION**

Councilman Russell gave the invocation.

**I. PROCLAMATIONS:**

**A. RECOGNITION OF THE DECORATIVE RESTORATION PROGRAM AT A-B TECHNICAL COMMUNITY COLLEGE**

Mayor Bellamy read the recognition of the Decorative Restoration Program at A-B Technical Community College. She said that the Program was founded in 1988 as a cooperative venture with the Biltmore Estate. Students have come from as far away as Alaska and Vermont to take advantage of the only full-time program of its kind in the country, which will be graduating its last class this year. The program has graduated nearly 300 students, all skilled artisans, a number of whom have begun thriving restoration businesses all across the country and have worked on the restoration of historic artifacts and buildings, churches and cathedrals. Still other graduates have become designers, decorative painters, and film producers.

Two passionate and visionary teachers have guided the Decorative Restoration program during its twenty-three years: Derick Tickle, a master craftsman who previously taught for London's distinguished City & Guilds, arrived from England in 1989 and directed the program until his retirement in 2005 when Tim Hanlon, a 1997 graduate of the program, took over its leadership.

We have these two instructors and their students to thank for the beautifully restored jewel-like ceiling of the County Courthouse, which took six years to complete, and for the uniquely decorative foyer and Council Chamber of City Hall. Visitors to the Biltmore House are awed by total effect of 17,500 pieces of gold-leaf covering the walls of George Vanderbilt's bedroom and the distinctive touches elsewhere in the house, evidence of a long-time collaboration between neighbors A-B Tech and the Biltmore Estate.

We appreciate the program's philosophy that the greenest building is the one already built. The Decorative Restoration Program has helped keep Asheville's heritage intact for today and tomorrow. Through its contributions, Asheville's citizens learn to appreciate our historic buildings, their decoration and construction, and to preserve them for future generations.

Mr. Jack Thomson, Executive Director of the Preservation Society of Asheville and Buncombe County, also expressed their appreciation for the work of the students from the Program, as the Program has promoted Asheville as the place to learn the importance of historic resources through professional appreciation and craftsmanship. He strongly encouraged the

current administration at A-B Tech to work with the preservation community in Asheville to develop a re-tooled restoration program.

**II. CONSENT AGENDA:**

At the request of Councilman Smith, Consent Agenda Item "D" was removed from the Consent Agenda for discussion and/or an individual vote.

**A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JUNE 14, 2011**

**B. RESOLUTION NO. 11-125 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SUBMIT AN APPLICATION TO THE N.C. DEPT. OF COMMERCE FOR NEW URBAN PROGRESS ZONES WITHIN THE CITY OF ASHEVILLE**

Summary: The consideration of a resolution authorizing the City Manager to submit an application to the North Carolina Department of Commerce for new Urban Progress Zones within the City of Asheville.

In July of 2006 the NC General Assembly passed legislation (House Bill 2170) that created a new business tax credit program, replacing the William S. Lee credits, which were repealed for business activities that occurred on or after January 1, 2007. The newer program is called Urban Progress Zones.

On July 24, 2007, Asheville City Council passed a resolution authorizing the City Manager to submit an application for state designation of Urban Progress Zones (UPZs).

The application was successful and two zones were designated, and renewed the following year. In 2010, City staff performed a review of the effectiveness of the designated UPZs and found that very few businesses were taking advantage of it. Staff proposed that to increase effectiveness of the program and stimulate economic development 1) new zones should be created that expand the number of eligible businesses in the zones and 2) staff should collaborate with area economic development partners on a marketing initiative for the UPZ program. The action requested of Council today is to support proposal #1, the creation of new zones. Staff in the Information Technology Department provided the technical resources to create zones that better leverage the State of North Carolina's requirement that only fifteen percent of a municipalities land area can be used as an Urban Progress Zone. As a result, businesses that were formerly not located in the City of Asheville's zones, specifically those in East Asheville/Tunnel Road and West Asheville/Haywood Road and Patton Avenue, will now be eligible for the credit , providing they meet the NAICS coding and other requirements established by the State. Staff notes that the final Central and Western UPZ may or may not include the Westside Industrial Business Park located at 150 Westside Drive. The Industrial Park is shown as included in the current map; however as it is part of the City's jurisdiction but not within the City's primary jurisdictional area, the City will have to request that the Secretary of Commerce allow this interpretation of the Urban Progress Zone guidelines.

The Urban Progress Zone designation is compliant with the 2010-2011 Strategic Plan in the following areas: (1) Job Growth and Community Development: Support a strong local economy by continuing to implement sustainable growth; and (3) Fiscal Responsibility: Hold the line on taxes and support tax and fee relief. In addition, this action is in alignment with the City's adopted 2020 Plan, specifically as it applies to supporting Smart Growth and Infill Development.

Pro:

- This action will provide incentives for business growth and investment within targeted commercial and mixed use communities.

Con:

- Must reapply or renew each year.

Urban Progress Zones do not require city investment beyond identification of eligible zones and preparation or renewal of application. Credits are applied only to state taxes.

City staff recommends City Council approve a resolution authorizing the City Manager to submit an application to the North Carolina Department of Commerce for two new Urban Progress Zones within the City of Asheville.

Councilman Davis noted that with these Urban Progress Zones come some tax opportunities for businesses in these zones.

**RESOLUTION BOOK NO. 34 – PAGE 57**

**C. RESOLUTION NO. 11-126 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AMENDED ADOPT-A-PARK AGREEMENT WITH JUST FOLKS**

Summary: The consideration of a resolution authorizing the City Manager to sign an amended Adopt-a-Park Agreement with Just Folks to include a waiver for park use fees for Triangle Park for Fiscal Year 2011-2012.

Just Folks is a local non-profit organization whose primary purpose is to support community-building activities in the Eagle/Market Street area. The members of the Board of Directors are all residents who grew up in the area and are actively engaged in efforts to improve the environment in Triangle Park by providing more positive uses of the park. Their focus on Triangle Park began seven years ago when they were encouraged to produce cultural events in the park by a past City of Asheville Cultural Arts Superintendent. They have received support from the City in the form of park use fee and permit waivers for the past seven years for events that have included music festivals, community cookouts and other community-building events in the park May to December on Saturdays and Sundays. The events are free and open to visitors and community members.

In addition, they have a presence in the park at other times and organize workdays to clean up the park. This past spring, they signed an Adopt-a-Park agreement with the Parks, Recreation, and Cultural Arts Department to formalize their partnership with the City to adopt the park year round. As part of that agreement, the group agreed to:

- Conduct regular clean-ups
- Weed and maintain the planted beds
- Mulch paths and planting beds
- Provide volunteers to participate in these and other projects
- Provide the tools and materials to carry out regular maintenance and special approved projects

Just Folks is currently in the process of partnering with the Asheville Design Center and the city to develop a planting plan and carry out a mural project and other improvements in the park. Their presence and activities in the park have contributed to the reduction of nuisance behaviors in and around the park and improved the appearance of the park, thereby making it more attractive to downtown visitors and community members and meeting specific City Council goals for economic and community development

In Fiscal Year 2011-12, Just Folk is planning to hold two events each weekend during the course of the year. These include music events and community cookouts which are free

and open to everyone in the community. They are interested in holding events year round in the park and anticipate a total of 45 events for approximately 195 hours of programming.

Because of the group's partnership agreement with the City, and the direct relationship of their efforts to City Council goals and objectives, staff is recommending that the City amend its Adopt-a-Park agreement with Just Folks to include the waiver of park usage fees for the programming described. The nature of the group's programming meets a public purpose and the City's stated goals to partner with "sister agencies" to extend public programming in targeted areas.

This recommendation was presented to the Council Finance Committee at their May 24 meeting. Members of the Finance Committee unanimously supported the recommendation and approved its consideration with the full City Council.

This action complies with the City Council Strategic Operating Plan to be one of the safest and most secure communities compared to similar cities.

Pros:

- The events held by Just Folks in Triangle Park proactively promote positive community interactions in the area and have significantly improved public safety in "The Block".
- Strategic partnerships allow the city to leverage programming and events to reach a wider and more diverse audience.
- Provides additional quality cultural programming and diversity in a park that is generally not used for this type of event.
- Reduces staff time in processing fee wavier requests related to this group's events.
- This action is consistent with other partnerships the City has entered into for park programming in key community development areas.

Cons:

- The reduction in permit fees result in lost revenue for the city; however, the city has not budgeted for this revenue in Fiscal Year 11-12.

The estimated value of the waived park usage fees is $2,500; however, this revenue has not been included in the Fiscal Year 11-12 budget.

Staff recommends that City Council authorize the City Manager to sign an amended Adopt-a-Park Agreement with Just Folks to include a fee waiver for park usage fees associated with programming in Triangle Park.

**RESOLUTION BOOK NO. 34 – PAGE 60**

**D. RESOLUTION TO SUPPORT THE N.C. DEPT. OF TRANSPORTATION IN FUNDING, DESIGNING, AND CONSTRUCTING A SIDEWALK ALONG US 70 (TUNNEL ROAD) FROM THE VA HOSPITAL TO THE VETERAN'S QUARTERS IN EAST ASHEVILLE**

This item was removed from the Consent Agenda for discussion and/or an individual vote.

**E. RESOLUTION NO. 11-128 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CHANGE ORDER FOR PATTON CONSTRUCTION GROUP, LLC, FOR THE VIEWMONT ACRES WATER SYSTEM EXTENSION PROJECT**

230

Summary: The consideration of a resolution authorizing the City Manager to execute a change order in the amount of $23,413.24 to increase the construction contract for Patton Construction Group, LLC, from $294,950.00 to $318,363.24 for the Viewmont Acres Water System Extension Project.

On June 8, 2010, City Council awarded the construction contract to Patton Construction Group, LLC, for the Viewmont Acres Water System Extension Project. The City of Asheville has received a grant from N.C. Dept. of Environment and Natural Resources (NCDENR) to replace the existing, private, failing water system at the Viewmont Acres Mobile Home Park. Upon completion of the water system improvements project, the City of Asheville will own and maintain this new water system. The project consists of the construction and installation of approximately 2,850 Linear Feet of a new 8-inch waterline, fire hydrants, valves, and other appurtenances as well as the installation of five (5) private residential booster pump stations.

In order to complete the construction and close out the project, a change order is needed to increase the contract amount by an additional $23,413.24 for a total contract amount of $318,363.24. The change order is needed because of overruns to the original quantities estimated and to cover changes to the scope of the work, which were requested through work change directives issued by the Water Resources Department. These work change directives were necessary to accommodate unknown conditions, which were discovered during construction. There is sufficient budget within this project to fund the needed change order, so no budget amendment is required.

This project is part of City Council's strategic plans to improve city infrastructure.

Pros:

- Approval of the change order will allow the city to complete construction of the water system and close out the project, which will provide twenty-three (23) customers with a safe reliable drinking water source and much improved fire protection.
- The contract amount is fully reimbursable by the committed grant money, including the change order amount.

Con:

- If the change order is not approved, it would lead to forfeiture of part of the NCDENR grant funds and the existing failing private water system would not be upgraded.

The Water Resources Department will initially fund the construction cost of $318,363.24 (includes the change order amount) for this project until full reimbursement is received from the State. Funds for these upfront costs are already included in the Water Resource's Capital Improvement Program budget. Cost summary until reimbursement:

| | |
|---|---|
| Viewmont Acres Construction Budget | $582,171.00 |
| Original Construction Amount | $294,950.00 |
| Amount Remaining in Const. Budget | $287,221.00 |
| Change Order Amount | $ 23,413.24 |
| Amount Remaining After Change Order | $ **263,807.76** |

After the project is completed and closed out, the remaining funds will be returned to the Water Resource's Capital Reserve Fund for reallocation to a current or future capital project. Staff will seek Council approval on any future reallocation of these funds.

City staff recommends City Council approval of the resolution authorizing the City Manager to execute a change order in the amount of $23,413.24 to increase the construction contract for Patton Construction Group, LLC, from $294,950.00 to $318,363.24 for the Viewmont Acres Water System Extension Project.

**RESOLUTION BOOK NO. 34 – PAGE 62**

**F. RESOLUTION NO. 11-129 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CHANGE ORDER FOR T&K UTILITIES INC. FOR THE RICEVILLE FOREST TANK PROJECT**

**ORDINANCE NO. 3987 - BUDGET AMENDMENT FOR RICEVILLE FOREST TANK PROJECT**

Summary: The consideration of a resolution authorizing the City Manager to execute a change order in the amount of $35,470.00 to increase the construction contract for T&K Utilities, Inc., from $289,535.06 to $325,005.06 for the Riceville Forest Tank project; and the associated budget amendment in the amount of $10,006 from existing water capital project funds.

Review: On October 26, 2010, City Council awarded a construction contract to T & K Utilities, Inc., for the Riceville Forest tank project, located in the Riceville Forest Subdivision in East Asheville off of Riceville Road. The work consists of the demolition and disposal of the existing 19,000 gallon steel ground storage reservoir, construction of a new 97,000 gallon glass fused to steel reservoir, installation and operation of a 21,000 gallon temporary water storage tank with temporary booster pumping system for 3 existing residences, and construction and installation of approximately 370 linear feet of 6-inch ductile iron pipe with related appurtenances.

In order to complete construction and close out the project, a change order is needed to increase the contract amount by $35,470.00 for a total contract amount of $325,005.06. The change order is needed because of overruns to the original quantities estimated and to cover changes to the scope of the work, which were requested through work change directives issued by the Water Resources Department. These work change directives were necessary to accommodate unknown conditions, which were discovered during construction. To provide the necessary budget authorization for this change order, the project budget for the Riceville Forest Tank project will need to be increased by $10,006.

This project is part of City Council's strategic plans to improve city infrastructure.

Pro:

- Approval of the change order will allow the city to complete construction of the new water tank and close out the project.

Con:

- If the change order is not approved, the project will not be completed and it could incur more costs due to time delays.

Fiscal Impact: The Water Resources Department has a Riceville Forest Tank capital project in which funds are specifically reserved for this project. A budget amendment is needed to increase the project budget in order to cover the additional funds needed. The additional funds needed for the change order will be reallocated from the Reynolds Mobile Home Park Water System Improvement project, which was recently completed and closed out.

| | |
|---|---|
| Riceville Forest Tank Construction Budget | $315,000.00 |
| Original Construction Amount | $289,535.06 |
| Amount Remaining | $ 25,464.94 |
| Change Order Amount | $ 35,470.00 |
| Budget Amendment Needed | $- 10,005.06 |

Recommendation: City staff recommends City Council approval of the resolution authorizing the City Manager to execute a change order in the amount of $35,470.00 to increase the construction

contract for T&K Utilities, Inc., from $289,535.06 to $325,005.06 for the Riceville Forest Tank project, and the associated budget amendment in the amount of $10,006 from existing water capital project funds.

**RESOLUTION BOOK NO. 34 – PAGE 63**
**ORDINANCE BOOK NO. 27 - PAGE 81**

**G. RESOLUTION NO. 11-131 - RESOLUTION AUTHORIZING THE CITY MANAGER TO DELY THE IMPLEMENTATION OF THE RECENTLY APPROVED FEE CHANGE FOR TRANSIT PASSENGER FARE TICKET BOOKS**

Summary: The consideration of a resolution authorizing the City Manager to delay the implementation of the recently approved fee change for transit passenger fare ticket books.

The passenger fare structure for the Asheville Transit System consists of a $1.00 per ride option and various pre-paid, discounted options including ticket books, monthly passes, annual passes, and bulk fares. Typically, passenger fares provide about 15% of the total annual operating budget.

The current ticket book includes 11 tickets and costs $9.00 per book, which equates to $0.82 per ticket. The change for Fiscal Year 2011-12, which was approved by City Council on April 12, 2011, includes 10 tickets at a cost of $9.00 per book. The change equates to $0.90 per ticket. Please note that the actual price of the ticket book is not changing, only the number of tickets included in each book.

Shortly after the change was approved, staff learned that a fare increase analysis is required by the Federal Transit Administration to ensure compliance of Title VI of the Civil Rights Act. Staff is asking that the subject fare increase be delayed until the Federal Transit Administration reviews and approves it. Once the fare increase is approved by the Federal Transit Administration, staff will then implement it.

This action complies with the current City Council Strategic Operating Plan by enhancing the affordability of the Asheville Transit System's passenger fare structure.

Pros:

- The City would comply with Title VI of the Civil Rights Act as it relates to the Federal Transit Administration policies.
- The Transit Master Plan recommends bringing discount fares closer to industry standards.

Con:

- Maximum potential monthly revenue loss is about $102 (based on current customers that purchase ticket books).

Since the actual price of a ticket book would not change, it is difficult to predict the actual fiscal impact. The maximum potential monthly revenue loss is about $102 (based on current customers that purchase ticket books).

Staff recommends that City Council approve a resolution authorizing the City Manager to delay the implementation of the recently approved fee change for transit passenger fare ticket books.

**RESOLUTION BOOK NO. 34 – PAGE 65**

**H. RESOLUTION NO. 11-132 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A LEASE AGREEMENT WITH USCOC OF GREATER NORTH CAROLINA, LLC FOR AN IN-HOUSE REPEATER AT 70 GASHES CREEK ROAD, ASHEVILLE, N.C.**

Summary: The consideration of a resolution authorizing the City Manager to execute a Lease Agreement with USCOC of Greater North Carolina, LLC for antennas at 70 Gashes Creek Road, Asheville, N.C.

The City of Asheville operates a Facilities Maintenance Division at the building located at 70 Gashes Creek Road. The cellular coverage at that location is poor, and USCOC of Greater North Carolina, LLC (aka US Cellular) has offered to install up to four antennas, one donor antenna and one repeater at that site to boost the cellular signal. The antennas will be placed on the building rooftop and in the interior ceiling of the building. USCOC has offered to enter into a lease agreement for a term of five years, with a five year renewal at no cost.

The Notice of Intent to enter into a Lease Agreement with USCOC was published on June 28, 2011, in the Asheville Citizen-Times. Ten days have passed since the publication and authorization to execute the Lease Agreement is being requested.

This action complies with the City Council Strategic Operating Plan by contributing to fiscal responsibility. By allowing USCOC to place their equipment in a portion of the building for these antennas, the City will improve the cellular signal for employees without purchasing any additional equipment.

Pro:

- Enhanced cellular signal for city employees at Gashes Creek Road

Con:

- None

No consideration contemplated for this lease, due to the direct benefit to the City. Avoids city expenditure on cellular equipment needed to boost signal.

City staff recommends City Council adopt a resolution authorizing the City Manager to execute the lease agreement with USCOC of Greater North Carolina, LLC for antennas at 70 Gashes Creek Road, Asheville N.C.

**RESOLUTION BOOK NO. 34 – PAGE 66**

**I. ORDINANCE NO. 3988 - BUDGET AMENDMENT TO MOVE THE PURCHASE OF A FIRE AERIAL LADDER TRUCK FROM THE GENERAL FUND TO THE GENERAL CAPITAL PROJECTS FUND**

Summary: The consideration of a technical budget amendment, in the amount of $1,200,000, to move the purchase of a fire aerial ladder truck from the General Fund to the General Capital Projects Fund.

As a part of the FY 2010-11 Adopted Budget, City Council approved a budget of $1,200,000 for the replacement of a twenty-year old fire aerial ladder truck, with funding for the purchase coming from the issuance of debt proceeds. A formal bid was conducted in the current year, and Pierce Manufacturing Inc. was awarded the bid as the lowest responsive responsible bidder; however, the truck will not be delivered until FY 2011-12. Therefore, the City will not be issuing the debt associated with the purchase of the truck until after the start of the new fiscal year.

Since this transaction will be spanning two fiscal years, staff is recommending that the budget for the aerial ladder purchase be moved out of the General Fund and into the General Capital Projects Fund, which is a multi-year fund that is more appropriately designed for these types of transactions.

This action complies with the City Council Strategic Operating Plan goal of "Operate the City of Asheville to the highest levels of fiscal responsibility."

Pros:

- Provides the required budget authorization for the purchase of the fire aerial ladder to be made out of the multi-year General Capital Projects Fund.

Con:

- None.

This technical budget amendment moving the budget from one fund to another has no overall fiscal impact to City.

City staff recommends City Council adopt the technical budget amendment in the amount of $1,200,000 to move the purchase of a fire aerial ladder truck from the General Fund to the General Capital Projects Fund.

**ORDINANCE BOOK NO. 27 - PAGE 83**

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Smith moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Manheimer and carried unanimously.

**ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES**

**D. RESOLUTION NO. 11-127 - RESOLUTION TO SUPPORT THE N.C. DEPT. OF TRANSPORTATION IN FUNDING, DESIGNING, AND CONSTRUCTING A SIDEWALK ALONG US 70 (TUNNEL ROAD) FROM THE VA HOSPITAL TO THE VETERAN'S QUARTERS IN EAST ASHEVILLE**

Summary: The consideration of a resolution to support the N.C. Dept. of Transportation in funding, designing, and constructing a sidewalk along US 70 (Tunnel Road) from the VA Hospital to the Veteran's Quarters in East Asheville.

The N.C. Dept. of Transportation (NCDOT) and the City of Asheville have been working together during the past year to construct sidewalks and install pedestrian crosswalks and signals along US 70 (Tunnel Road) in the East Asheville area.

A project to install sidewalk along the north side of Tunnel Road between Avon Road and Governor's View Road and to install pedestrian signals and crosswalks at the intersection of Tunnel Road and Beverly Road was completed during December 2010. Currently, City forces are constructing a sidewalk along the north side of Tunnel Road between New Haw Creek Road and Avon Road and the subject project should be completed by July 2011. The NCDOT is currently constructing a sidewalk along the south side of Tunnel Road between the Asheville Mall

and New Haw Creek Road with a private contractor and it should be completed during July 2011. The NCDOT will also install pedestrian signals and crosswalks at the intersection of Tunnel Road and Crocket Avenue/New Haw Creek Road to connect the two sidewalks.

Monies are included in the City's Capital Improvement Plan for Fiscal Year 2011-12 to construct a sidewalk along the north side of Tunnel Road between Governor's View Road and Maple Springs Road and the NCDOT is currently seeking a "Safe Routes to School" grant to fund a sidewalk along the north side of Tunnel Road between Maple Springs Road and Craig Circle. Once all of these projects are completed, which should be by the end of Fiscal Year 2011-12, there will be a pedestrian network connecting downtown Asheville to the Veteran's Quarters (assuming the subject project is approved).

This action complies with the City Council 2010-11 Strategic Operating Plan within the Fiscal Responsibility Area by leveraging internal and external partnerships for pursuing capital improvements and infra-structure projects. In addition, the subject action will enhance the pedestrian experience by providing a safe place to walk.

Pros:

- The NCDOT will fund, design, and construct the sidewalk.
- Increases the City's inventory of completed sidewalk.
- Eliminates a "goat trail".
- Satisfies a need for a group of our well deserved veterans.

Con:

- The City will be responsible to maintain the sidewalk after it is constructed.

There will be no initial financial impact to the City, although the responsibility of maintaining sidewalks belongs to the Public Works Department. Funds are budgeted every fiscal year for sidewalk maintenance.

Staff recommends that City Council approve a resolution supporting the efforts of the NCDOT in funding, designing, and constructing a sidewalk along US 70 (Tunnel Road) from the VA Hospital to the Veteran's Quarters in East Asheville.

Councilman Smith emphasized the fantastic partnership among the City, NC DOT and the community to make this a high priority for the City.

Councilman Smith moved to adopt Resolution No. 11-127. This motion was seconded by Councilman Russell and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 61**

## III. PRESENTATIONS & REPORTS:

### A. ASHEVILLE AREA RIVERFRONT REDEVELOPMENT COMMISSION UPDATE

Mr. Ricky Silver, Chairman of the Asheville Area Riverfront Redevelopment Commission (AARRC) said that the purpose of this update is to provide an overview of the AARRC's first year in operation and to provide the Commission's first general recommendations to City Council.

The AARRC (the City-initiated Commission charged with promoting the sustainability and continued development of the riverfront) has been meeting for a period of one year. Mr. Silver presented the following information to City Council: an explanation of membership; an overview of their study area; the nature and direction of their research and other work during their first year; and what to expect from the Commission in the future.

Chairman Silver then presented the following recommendations for consideration by Council:

1) Strengthen the City's physical investment in the Riverfront District. In addition to recognizing the need to support sustainable development via focused and coordinated investments in infrastructure like sidewalks and water lines, consider locating appropriate City employment centers or offices within the district to support the Riverfront District as a great place to work. Additionally, consider playing a leadership role in a public private partnership for a redevelopment or rehabilitation project.
2) Hire a consultant to perform a review of regulations and policies affecting redevelopment in the riverfront. This person, who should be an expert or have substantial experience in urban waterfront redevelopment, can provide the City and her partners with an overview of what helps and what hurts the community's vision implementation.
3) Acknowledge that a larger, more professionally driven redevelopment effort will eventually be needed to implement the community's vision for the riverfront. The AARRC, as a volunteer driven, City created advisory board will not be the appropriate structure to best manage and coordinate twenty to thirty years of complex development projects totaling hundreds of millions of dollars. The Commission expects (over the course of the next two years) to build the trust and partnerships needed to provide a successful base for a riverfront specific development company (or other type of organization) led by an executive director and other professional staff.

Recommendations one and two strongly align with the Job Growth and Community Development section, specifically, to support the riverfront redevelopment partnership and formation of a dedicated office, and to promote sustainable, high-density, infill growth that makes efficient use of existing resources. Recommendation three is in alignment with the Fiscal Responsibility section, specifically, to explore alternatives for enhancing the city's long-term financial commitment to master plan implementation, infrastructure maintenance, capital improvements, and public facilities.

Pro

- AARRC recommendations are in alignment with national best practices in urban waterfront revitalization programs; adopting them will further progress in the City's own program.

Con:

- AARRC recommendations require identification of funding.

Costs to support implementation of recommendations vary and can be explored based on the interest level of Council.

Council could indicate which recommendation(s) staff should pursue.

Councilman Davis, liaison to the AARRC, spoke about this very active Commission and was excited about what they have accomplished in one year.

In response to Councilman Smith, Mr. Silver said that the AARRC will work through staff to bring a plan forward to Council regarding hiring a consultant to perform a review of regulations and policies affecting redevelopment in the riverfront.

In response to Mayor Bellamy on what next steps the community can expect, City Manager Jackson said that he would provide Council with a compilation of AARRC's work plans so they can see the depth of work being accomplished.

When Mayor Bellamy asked about the fence being taken down and the re-alignment and re-naming of the road, Mr. Silver said that RADTIP will be making a recommendation and they have been very involved in that process. He said there are a lot of small projects happening in the area without their intervention and they don't want to get in the way of those projects.

On behalf of City Council, Mayor Bellamy thanked Mr. Silver and the entire AARRC for their hard work and efforts on this very important Commission.

**IV. PUBLIC HEARINGS:**

**A. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF PROPERTY LOCATED ON 626 HAYWOOD ROAD FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT AND COMMUNITY BUSINESS II DISTRICT TO COMMUNITY BUSINESS II DISTRICT/CONDITIONAL ZONING FOR THE EXPANSION OF THE EXISTING RESTAURANT SITE TO ACCOMMODATE ADDITIONAL PARKING AND DUMPSTER LOCATION WITH A MODIFICATION REQUEST TO LANDSCAPE BUFFER WIDTH**

**ORDINANCE NO. 3989 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED ON 626 HAYWOOD ROAD FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT AND COMMUNITY BUSINESS II DISTRICT TO COMMUNITY BUSINESS II DISTRICT/CONDITIONAL ZONING FOR THE EXPANSION OF THE EXISTING RESTAURANT SITE TO ACCOMMODATE ADDITIONAL PARKING AND DUMPSTER LOCATION WITH A MODIFICATION REQUEST TO LANDSCAPE BUFFER WIDTH**

Mayor Bellamy opened the public hearing at 5:30 p.m.

Urban Planner Nate Pennington said that this is the consideration of an ordinance to conditionally zone property located on 626 Haywood Road from RM-16 Residential Multi-Family High Density District and Community Business II District to Community Business II District/Conditional Zoning for the expansion of the existing restaurant site to accommodate additional parking and dumpster location with a modification request to landscape buffer width. This public hearing was advertised on June 17 and 24, 2001.

Mr. Pennington said that the applicant is requesting a Conditional Zoning for one (1) parcel zoned Community Business II (CB II) and RM-16 Residential Multi-Family High Density to (Community Business II/Conditional Zoning (CB II/CZ) for the expansion of the Sunny Point Café site in accordance with Section 7-7-8 of the UDO.

The project site consists of one split zoned parcel comprising 0.66 acres according to the submitted site plan. The existing Sunny Point Café is located on the corner of Haywood Road and State Street with an off-street parking lot located behind the restaurant and accessed via State Street. The restaurant and main parking lot were permitted in 2002 and a permit was issued in 2009 to cover the outdoor seating area along the State Street side of the restaurant. A single-family residence is also located on the property to the south (behind) the restaurant. This home, while located on CB-II property, has historically been used for residential purposes and is not a commercial structure. To the south of the residence is an unpermitted gravel parking lot created (primarily) for employee parking. The dumpster for the restaurant was located within this gravel lot as well. As part of the conditional zoning request, the applicant is seeking to legitimize the parking lot, allow for the relocation of the dumpster as recommended by the Planning and Zoning Commission (see below) and establish an office in the residence.

The property owner was issued a Notice of Violation by the Planning Department Code Enforcement Staff on March 24, 2011 for failure to secure zoning and building permits for 1) the

use of the vacant single-family residence as an office and, 2) the use of the RM-16 zoned portion of the property for an off-street parking lot and dumpster location (the dumpster was previously located behind the restaurant). To remedy this violation, the owner was informed to either cease commercial operations on the residentially zoned property or apply for a conditional zoning. As an interim measure, the restaurant temporarily ceased parking on the gravel lot and relocated the dumpster to the southern side of the residence on the commercial portion of the property.

Vehicular access to the existing and proposed parking lots is gained via State Street. Pedestrian access to the site is provided along both Haywood Road and State Street where sidewalks currently exist.

According to the site plan and the information provided by the applicant, a minimum of 27 off-street parking spaces are required including the necessary accessible spaces. The CB-II district allows for a 20% reduction to off-street parking, resulting in a minimum of 22 spaces required. The site plan illustrates the minimum 22 spaces required which will be brought into compliance with parking standards if the conditional zoning request is approved. A bike rack capable of accommodating 5-6 bikes already exists onsite and satisfies the required bicycle parking standards.

Street trees currently exist along Haywood Road and a portion of State Street. Three additional street trees will be installed along State Street and additional parking lot landscaping will be required in the area of the proposed parking lot to the west and south of the single-family residence. A 20' wide type "A" vegetative bufferyard is required along the southern and western perimeter of the portions of the property where the new parking lot and dumpster pad have been sited. A modification request to this standard is being sought (see below).

The open space requirement for this type of development is 5% of the total site size; a total of 1,437 square feet for this site. The site plan illustrates that 1,438 square feet has been reserved to meet this requirement.

The applicant is requesting a total of one (1) modification to the site plan which must be approved by City Council. The staff supports the request.

1. *Property Line Buffer* – Section 7-11-3(d)(1) of the UDO requires bufferyards to be installed for proposed developments adjacent to dissimilar zoning designations to provide a transition between districts of varying intensities. In this case, a 20 foot wide bufferyard will be required along the southern and western perimeter of the portion of the property where the new parking lot and dumpster pad have been sited. Sunny Point Café utilizes a large majority of undeveloped property for gardening in order to produce fruit, herbs and vegetables for the restaurant. Given this scenario, the applicant is requesting reduced buffer widths so as not to shade out the areas used for gardening. In lieu of not providing a full 20 foot buffer width, the alternative proposed is to provide a ten (10) foot buffer with a solid six (6) foot fence facing the adjoining properties. **The staff supports the request to reduce the landscape buffer due to the passive use of the garden and the distance between the parking area and adjoining property.**

This proposal was recommended for approval with conditions by the Technical Review Committee on May 16, 2011. A neighboring property owner expressed concerns regarding the location of the dumpster, proposed dumpster screening, parking, buffer width, the size of required plantings and outdoor lighting (no lighting is proposed).

At their regularly scheduled meeting on June 4, 2011, the Planning and Zoning Commission reviewed this project and was advised of the staff's concern about the potential negative impact the applicant's preferred location of the dumpster (originally proposed within the newly created parking area) may have on the adjacent condominium development located to the south of the parking area. (Refer to finding #4 below).

The Commission also heard public comment from a neighboring property owner who echoed staff's concerns regarding the proposed dumpster location and also had questions regarding the "no parking" signs that were installed along State Street and asked if they could be replaced by signs that would limit parking to specific hours. The staff directed the property owner to contact the City traffic engineer regarding this matter and the request is currently being explored by the traffic engineering staff.

Upon consideration of the concerns expressed about the dumpster location, both the applicant and the Commission agreed upon a new location for the dumpster and unanimously approved the project with the following additional conditions:

- The location of the dumpster is to be placed next to the single-family residence.
- The use of the dumpster is limited to non-food waste.
- The enclosure (screening in accordance with all UDO requirements) is to be large enough to accommodate the dumpster and the composting bins.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.** The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the *UDO*, the *Standards and Specifications Manual*, the *North Carolina Building Code* and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** The project proposes the adaptive reuse of a single-family residence as well as a parking lot that would bring the property into compliance with off-street parking standards, given recent expansions in operations. The restaurant is compatible with the surrounding businesses along the Haywood Road corridor and has a pedestrian orientation along Haywood Road.

   The residential units to the southern and westernmost extent of the property will be buffered with a Class "A" bufferyard. While the bufferyard width would be reduced by ten (10) feet if the modification request is approved, a privacy fence will be installed facing the neighboring property owners and the parking lot would be further separated from the neighbors by the surrounding gardens and open space.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** As noted in Finding #2, the proposed development is compatible with surrounding commercial uses and the residential nature of the property to the south and west of the parking lot will be buffered by additional vegetation, open space and gardens. There is concern, however, about the proposed location of the dumpster and the potential for negative impacts (noise, pests, commercial pick-up activity and odor) it may have on adjacent residential uses.

   The Planning & Zoning Commission approved the plan with the dumpster relocated to the south side of the converted residence with added conditions and this location should sufficiently address the potential impacts. This location also is satisfactory to the

residents to the south, as that development is more than 100 feet from the dumpster enclosure and will be buffered by vegetation and a solid privacy fence.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** The site is located within the Haywood Road commercial corridor. The restaurant itself is oriented towards Haywood Road and is consistent with both the existing zoning and character of the Haywood Road commercial corridor in which it is located. The restaurant structure includes a small second story residence. The existing single-family detached residence that will adjoin the staff parking lot and a garden is proposed to be converted from a residence to an office. The preservation of the character of the existing single family residence combined with the limited impact/activity of a small restaurant office also helps to provide a transition from the busy commercial activity to the nearby residential uses. While additional parking is proposed along State Street, the parking lot is small in nature (6 spaces) and will be mitigated by factors including additional vegetation, a fence and garden/open space areas separating the adjacent residential properties.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** Elements of the proposal are aligned with the City's goals and objectives as noted in the Compliance with Comprehensive Plan and other Adopted Plans section (listed above). Specifically, the expansion of uses associated with the restaurant is consistent with the goals of infill development along an established commercial corridor. However, these goals must be balanced against other goals related to the preservation of the character of Asheville's working class neighborhoods which tend to be more vulnerable to commercial encroachment.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** The site is located at the intersection of Haywood Road and State Street and is within approximately .25 miles of an entrance to I-240. A City of Asheville bus stop is located next door in front of the Lucky Otter restaurant to accommodate public transportation at the intersection of Haywood Road and Nevada Avenue. Adequate water supply, fire and police protection, and other city services are verified during the TRC review process.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** The subject project will not adversely impact the surrounding street network from a traffic engineering perspective.

Based on the above findings and the analysis provided in the report, staff finds this request, with conditions noted, to be reasonable.

Pros:

- Provides an opportunity to mitigate a split zoned commercial property and bring the site into compliance with UDO standards.
- Provides an opportunity to rehabilitate and adaptively re-use a single-family residence located in a commercially zoned district.

Con:

- There is no perfect location for the dumpster in this fairly urban location as it would need to be closer to adjacent residences to the west or to the south, or closer to the restaurant outdoor seating area.

Staff recommends approval of the project as submitted by the applicant and modified by the Planning and Zoning Commission, including the modification to reduce the bufferyard width.

Mr. Tony Hauser, representing the owner, was available to answer questions.

Ms. Emily Harrell urged Council to support the expansion as Sunny Pointe Café is an integral part of west Asheville.

A west Asheville homeowner supported the conditional zoning as the Café creates goodwill in the community.

Ms. April Moon, speaking on behalf of Sunny Pointe Café, spoke in support of the conditional zoning in that it was never their intent to be out of compliance. She asked that the modification be granted as more landscape buffering would destroy their garden.

Mayor Bellamy closed the public hearing at 5:39 p.m.

City Attorney Oast reminded Council that if the property is conditionally zoned it may not always be Sunny Pointe Café on that property.

In response to Mayor Bellamy regarding the possible odor of the composting drifting into the residential neighborhood, Ms. Moon said that a local business picks up their compost three times a week and the composting is covered. She had heard no complaints from neighbors at this time.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Smith moved for the adoption of Ordinance No. 3989, to conditionally zone property located on 626 Haywood Road from RM-16 Residential Multi-Family High Density District and Community Business II District to Community Business II District/Conditional Zoning for the expansion of the existing restaurant site to accommodate additional parking and dumpster location with a modification request to landscape buffer width. subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with full cut-off fixtures (including wall packs) and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application (single family structure must retain its residential character). Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (5) This project shall undergo final review by the TRC prior to issuance of any required permits; (6) The use of the dumpster is limited to non-food waste; and (7) Dumpster enclosure shall be large enough to accommodate covered compost containers. This motion was seconded by Councilman Russell and carried unanimously.

**ORDINANCE BOOK NO. 27 - PAGE 85**

**B. PUBLIC HEARING TO CONSIDER REZONING 380 LONG SHOALS ROAD AND 6 SCHENCK PARKWAY FROM CENTRAL BUSINESS DISTRICT TO HIGHWAY BUSINESS DISTRICT**

**ORDINANCE NO. 3990 - ORDINANCE REZONING 380 LONG SHOALS ROAD AND 6 SCHENCK PARKWAY FROM CENTRAL BUSINESS DISTRICT TO HIGHWAY BUSINESS DISTRICT**

Due to a conflict of interest, Councilman Russell moved to recuse Councilwoman Manheimer from participating in this matter. This motion was seconded by Councilman Davis and carried unanimously. At this time, Councilwoman Manheimer left the Chamber.

Mayor Bellamy opened the public hearing at 5:41 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance to rezone 380 Long Shoals Road and 6 Schenck Parkway from Central Business District to Highway Business District. This public hearing was advertised on June 17 and 24, 2011.

The subject properties are prominently located at the beginning of Schenck Parkway (the entrance to Biltmore Park Town Square), and represent the first developed site one encounters on the north side of Long Shoals Road when heading east from the I-26 interchange. The relevant history of construction and zoning around the site goes back more than ten years.

The site was developed with a gas station, convenience store, and restaurant in 2000. At that time, the applicant (and operator of these businesses) owned a leasehold for the site of this development, but the land was owned by Biltmore Commercial Properties, LLC. None of the site was then in the City of Asheville's zoning jurisdiction; a portion was in the Buncombe County Limestone Township zoning area—zoned Commercial Services, and a part was not zoned.

In 2001, the City of Asheville expanded its ETJ, and the unzoned portion of the land came into the City's zoning jurisdiction. CBD zoning was applied to the area west of Schenck Parkway as this most closely resembled the existing Town Center buildings already developed under the County's jurisdiction. (The City's Urban Village zoning district did not yet exist.)

In February 2006, the Master Plan and related zoning change (to Urban Village) for the Biltmore Park Town Square west of Schenck Parkway was approved. The subject properties were not included, as the plans did not effect any changes thereon.

In 2007, the subject properties were part of an annexation by the City of Asheville. The annexation became effective in late 2007, and discussions ensued about assigning a zoning district for the portion of the site which had been in the Buncombe County zoning area. City staff proposed zoning a 10+ acre area, including the entire site, to Highway Business, to be consistent with the other three corners at the intersection. The landowner (Biltmore Commercial Properties, LLC), however, preferred to maintain the pre-existing CBD zoning, as it provided more options (e.g. building height, residential density) for a future extension of higher impact uses consistent with the nearby urban village, without having to submit a master plan. The CBD zoning became effective for the entire site in early 2009.

Meanwhile, by summer of 2008, the applicant's gasoline sales operation had been affected by the widening of the Long Shoals Road right-of-way taking place as part of the construction of the new interchange. The pumps and canopy had to be removed from the southern edge of the site. When investigating the potential for relocating the pumps, the applicant learned that the CBD zoning not only doesn't ordinarily allow retail gasoline sales, but has building design and setback requirements that would preclude the type of construction he sought to pursue. In 2009, the applicant successfully applied for and received variances to allow the placement of pumps and a canopy on the east side of the site. (The construction of this part of the project was completed earlier this year.)

In December 2010, the 10+ acre parcel on which the site is located was subdivided, and the subject properties were sold to the applicant. Now as the owner (not simply the leaseholder) of the property, the applicant has requested rezoning of his properties to Highway Business. If approved, the rezoning would eliminate most, if not all, of the design-related and use-related nonconformities that currently exist. The applicant would also be able to obtain a permit for the

sort of pylon sign he would like to erect, and would be able to redevelop or adapt the site with similar highway-oriented uses without having to seek special approvals from the Board of Adjustment.

As is mentioned above, staff feels that Highway Business would be the most appropriate zoning for the subject properties, together with the 8+ acres of area to the north and west that are also zoned CBD. The owner of the neighboring CBD properties (Biltmore Commercial Properties, LLC) was contacted about expanding the area of this proposed rezoning to include their property as well. Their representative, Paul Szurek, indicated willingness to support such an expansion, but only if conditions could be added to the rezoning. Because the standard rezoning application submitted by the applicant (unlike a conditional zoning petition) does not allow the imposition of special conditions, the neighboring properties were not included.

As such, the proposed rezoning, if approved, would leave a remnant of the CBD zoning wrapped around the back of the subject properties zoned Highway Business. The placement of a district promoting urban, multi-story, high-density, pedestrian-friendly design tucked behind an area (at the corner of a major intersection) with a suburban corridor zoning district and developed with suburban, single-story automobile-oriented businesses is not an ideal outcome. Neither, however, is the existing situation, where a property owner is burdened by a zoning district incompatible with his legally established uses while his neighbors at the other three corners of the same intersection enjoy the type of development standards he seeks.

Additionally, the proposed rezoning would strand a small area zoned CBD on the east side of the subject area. Owned by the Biltmore Park Commercial Association, Inc. (affiliated with the Biltmore Commercial Properties, LLC), and about 0.03 acres in size, this parcel exists for the purpose of a sign, and its zoning is considered to be of less significance to staff. Further, the owner has indicated that they do not wish to participate in a rezoning at this time.

Staff's view is that the likely development opportunities for the entire 10+ acre area zoned CBD will be more in keeping with the HB standards, and staff is hopeful that the owners of the CBD-zoned properties adjacent to the subject area will also soon request a rezoning to HB.

At their June 1, 2011, meeting, the Planning and Zoning Commission voted unanimously to recommend approval of the rezoning. Other than the petitioner's agent, there was no comment from citizens at the public hearing, and staff has not received any communication from the public on this matter.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- HB zoning is highly compatible with the surrounding development and road system.
- Would alleviate multiple hardships for property owner.

Cons:

- Would create an adjacent zoning district in an awkward position with little potential for compliant development.

Staff feels that the proposed rezoning would unquestionably be an improvement for the subject property, however, it would clearly result in a less desirable situation on the adjacent property. Recognizing that the owner of the adjacent property relinquished ownership of the subject property, with knowledge of the development pattern that was in place, staff feels a case can be made for approval of the request.

Mr. Craig Justus, representing Henderson Oil Company, emphasized that this is the most appropriate zoning for the property. He asked Council to support the rezoning.

Mayor Bellamy closed the public hearing at 5:45 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3990. This motion was seconded by Councilman Davis and carried unanimously (Councilwoman Manheimer recused).

At this time, Councilwoman Manheimer re-entered the meeting.

**ORDINANCE BOOK NO. 27 – PAGE 89**

**V. UNFINISHED BUSINESS:**

**A. STATE LEGISLATIVE UPDATE**

City Attorney Oast said that the General Assembly adjourned from its 2011 Regular or "Long" Session on Saturday, June 18. It will reconvene on July 13 to consider a limited agenda, primarily including redistricting, but also to consider any ratified bills that were vetoed by Governor Perdue. He provided Council with a copy of the adjournment resolution.

He provided Council with a summary of some of the legislation of importance to municipalities generally has been prepared by the N.C. League of Municipalities. In the coming weeks, we will receive more detailed information from the League, the School of Government, and various professional organizations, and will report that information to Council as necessary.

**General Laws**

Among the laws that will have an effect on City operations are the following:

(a) Annexation. HB 845 was the bill that substantially revised the general annexation law. This will affect all future annexations. Significant changes include (1) a requirement that annexing cities install water and sewer connections to individual properties, and (2) a requirement that any annexation be subject to a "petitioned denial" process, whereby the property owners in the annexed areas can defeat the annexation with a petition from the owners of 60 percent of the parcels in the area. The Governor is expected to sign this bill.

(b) Required use of "E-verify." This law, HB 36, requires the use of "e-verify" by public employers. The City already requires "eligibility to work" verification, so this should not affect our hiring practices much. This will apply to local governments beginning October 1 of 2011. It also will apply to private employers, including our contractors, but implementation is delayed for at least a year. We will need to consider the implications for our contract process. The State Department of Labor has been given enforcement responsibility, and a complaint process is prescribed in the law, so the law helpfully addresses those persistent issues.

(c) Building Inspections. SB 683 affects the ability of cities to conduct regular inspections of some buildings on a programmatic basis. We are reviewing this law for its effect on the City of Asheville's inspection program.

**Local Laws**:

Developments of particular interest to the City of Asheville are summarized below:

(a) Local Annexations. HB 36 and SB 27. These are two other annexation laws that retroactively require that certain annexations in process (or even completed) be subject to the "petitioned denial" process outlined in the general law. This affects the Biltmore Lake annexation. This does not mean that the Biltmore Lake annexation is automatically undone yet; the petition process still has to be followed, and the necessary percentage must still be obtained. The Board of Elections is tasked with running that process, and it will start soon. The City must reimburse the costs of the petition process.

(b) Woodfin/Asheville Boundary Adjustment. As reported previously, we got pretty far with the bill that would adjust the boundary of Asheville and Woodfin in the UNC-A, 19-23/Broadway, and Reynolds Mountain entrance areas. However, the survey work revealed more issues that needed clearing up than we anticipated, and we ran out of time to finalize the surveys and descriptions before the General Assembly adjourned. This will be taken up again next year, and we can use all the work that we have done in that process.

(c) Asheville Airport. HB 552. This is the bill that would establish the Airport Authority as an independent authority, and require the conveyance of the Airport property (owned by the City; leased to current authority), without compensation. Council has discussed this at length, and has expressed its concerns to the legislature. This bill passed out of the House and is in the Senate, where it was referred to Committee. It remains eligible for consideration in the 2012 "Short" Session.

(d) Water System – MSD Merger. HB 925. This is the bill that would have required the City to convey the water system to MSD. After objection by Council, this bill was converted to a study bill, and passed out of the House. The Senate amended the bill and it was sent back to the House for concurrence, but the House failed to concur prior to adjournment. The study bill remains eligible for concurrence in the session that will convene on July 13.

Due to discussion regarding establishing a relationship with our legislators, Councilman Davis and Councilwoman Manheimer briefed Council on a meeting they had with Representative Moffitt last week. They talked about all the legislation that affects Asheville and our greater area. They brought forth Council's thoughts and believed that everyone left the meeting with a better understanding of each other. Other meetings with other legislators are being planned. They felt it was good to have Council reach out to our legislators.

Mayor Bellamy said that she will be travelling to Washington, DC, on an unrelated matter, and is in the process of arranging meetings with representatives at the White House and the Federal Dept. of Transportation to discuss the Federal Aviation Administration ruling as it relates to not paying the City due compensation for our Airport property. She is not supportive of the City not being fairly compensated if the Airport is going to leave our ownership.

**VI. NEW BUSINESS:**

**A. RESOLUTION NO. 11-133 - RESOLUTION AUTHORIZING THE MAYOR TO ACCEPT THE CONVEYANCE OF REAL PROPERTY LOCATED AT 14 RIVERSIDE DRIVE FROM THE PUBLIC SERVICE COMPANY OF NC SUBJECT TO A N.C. DEPT. OF ENVIRONMENT & NATURAL RESOURCES BROWNFIELDS AGREEMENT**

Ms. Stephanie Monson, Urban Planner for Economic Development, said that this is the consideration of a resolution authorizing the Mayor to accept the conveyance of real property

located at 14 Riverside Drive, from the Public Service Company of NC ("PSNC") subject to a North Carolina Department of Environment and Natural Resources Brownfields Agreement.

The Public Service Company of NC ("PSNC") owns real property at 14 Riverside Drive that includes 0.29 acres of River District-zoned land and a one story brick building that is a contributing structure to the Riverside Industrial National Historic District. The property is now vacant, however at one time, the building served as the operations office for a manufactured gas plant. This parcel is adjacent to the 30 Riverside Drive parcel to the north, which the City accepted as a donation of real property from Progress Energy in June 2008, after a lengthy environmental assessment and cleanup process in effort to mitigate the remnants of the gas manufacturing process.

Given the historical use, this property is an ideal candidate for the State of North Carolina's Brownfields Program. In October 2009, when the donation was first evaluated by staff, the City enrolled the PSNC building in the Brownfield Program. The required environmental assessments for the PSNC building are now complete and PSNC and Progress Energy have arranged for any needed clean up on the site. Once the clean up is completed the State will create a Brownfields Agreement for the site that absolves the City of any liability from previous environmental contamination. This agreement will be recorded as a deed restriction regarding potential uses for the site. The successful execution of said Agreement, in addition to the completion of a current parcel survey and title search being coordinated by the City's Legal Department, is considered by staff to be the remaining due diligence required before the City is prepared to accept the proposed donation of property.

The proposed acquisition of 14 Riverside Drive is part of the City's strategy to develop a continuous park/open space amenity along the west side of Riverside Drive as conceptualized in the Wilma Dykeman RiverWay Master Plan and other City-adopted plans. City staff has coordinated Brownfield Program efforts with RADTIP (River Arts District Improvement Project; Preliminary Engineering for a 2.2. mile section of the Wilma Dykeman RiverWay Master Plan) planning activities over the past twelve months. If Council agrees to accept this donation of property subject to completion of due diligence, staff intends to pursue the following actions in the area:

- Removal of the chain link and razor wire fence surrounding both the City-owned property at 30 Riverside Drive and the PSNC building;
- Planning and development of a low impact trail along City-owned and other properties on the west side of Riverside Drive to support pedestrian activity and safety in the area until the new (RADTIP) multimodal roadway is built;
- Phase II of Between the Bridges public involvement process for an expanded group of stakeholders.

This action complies with the City Council Strategic Operating Plan by contributing to fiscal responsibility - the partnership between the City, PSNC and the State Brownfields Program allows each entity to leverage assets to activate a vacant property along an emerging corridor. This action aligns with the goal of Green and Sustainable, furthering the City's opportunity to integrate and implement a multi-modal transportation plan that includes sidewalks, bike paths, signal preemption, transit, greenways, and other system improvements. This action also directly supports the implementation of the Wilma Dykeman RiverWay Master Plan and aligns with Parks Recreation and Greenways Master Plan and the City's 2020 Master Plan.

This item has been reviewed by the Asheville Area Riverfront Redevelopment Commission on May 19, 2011, and has received the Commission's endorsement.

Pros:

- The public ownership of this property improves the City's planning and implementation efforts to support the City's Riverfront Redevelopment Program, including the development of the Wilma Dykeman RiverWay and the Greenway system in general.
- The City will be absolved of liability through a completed Brownfield Agreement with the State of North Carolina

Con:

- An addition to the City's real property assets will require additional resources for development and maintenance.

No monetary consideration required for the conveyance. Any additional due diligence costs, including survey and title work, will be absorbed into the Economic Development Budget. The cost of removing the fence is estimated under $5,000 and will be done through a local contractor with budgeted funds. Any future impact regarding redevelopment is unknown; however the City is eligible for federal funding to support the planning and future rehabilitation of the building for public purposes. Any redevelopment options for the PSNC building will come before Council as part of the public process.

City staff recommends that City Council adopt the resolution authorizing the Mayor to accept real property located at 14 Riverside Drive (PIN # -96-7846-00000) from the Public Service Company of NC subject to a N.C. Dept. of Environment and Natural Resources Brownfields Agreement.

When Mayor Bellamy asked for public comments, none were received.

Councilman Davis said that his father worked the bulk of his adult life in that building and provided Council with some historical information of the property.

Mayor Bellamy thanked PSNC and Progress Energy for their partnership with the City of Asheville.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Russell moved for the adoption of Resolution No. 11-133. This motion was seconded by Councilman Davis and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 67**

**B. RESOLUTION NO. 11-134 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A PROFESSIONAL SERVICES CONTRACT WITH MCGILL ASSOCIATES FOR ENGINEERING SERVICES FOR THE LAKE CRAIG PROJECT**

Public Works Director Cathy Ball said that this is the consideration of a resolution authorizing the City Manager to complete negotiations and sign a contract with McGill Associates for the engineering services necessary for completion of Phase I of the Lake Craig Project.

The City of Asheville has the opportunity to provide improved access to the Azalea Park along Azalea Road, provide a much needed water connection to the John B. Lewis Soccer Complex and to provide additional flood protection to Biltmore Village.

Azalea Park is a regional attraction that hosts a major soccer complex. This complex draws a wide range of the public which increases the traffic along Azalea Road. The City is proposing to widen and improve the roadway in this section. The City proposes to combine flood

control recommendations and utilize material from floodplain fill removal for the roadway improvements.

The City also plans to provide a much needed water supply connection to the Park. Currently, the pavilion does not provide a potable water source. The project will include connection to the City's water system.

The Hurricane Recovery Act of 2005 (Senate Bill 7) allocated funds for planning and implementation of projects to aid in flood damage reduction for North Carolina communities hardest hit by the 2004 hurricane season. Through a study performed by Brown and Caldwell, the Lake Craig Project has shown potential to provide significant flood reduction benefits. The flood control features of the project include stream relocation and restoration, removal of floodplain fill and flood bench restoration and the rehabilitation or replacement of an existing dam.

Within the scope of the project, McGill Associates will perform the engineering services necessary to provide improved roadway connections to the John B. Lewis Soccer Complex, provide a much needed connection to the City of Asheville water system, and to provide flood mitigations to the properties down stream of the Lake Craig Dam which will include the evaluations of the existing dam. The Lake Craig Project was the highest priority in the Swannanoa Flood Risk Management Project which was accepted by City Council on May 10, 2011.

On May 26, 2009, by Resolution No. 09-108, the City Manager was authorized to enter into a Feasibility Cost Share Agreement for the Swannanoa Flood Risk Management Project with the Army Corps of Engineers to provide professional services for a feasibility study for reducing flood damage in the Swannanoa River Watershed. That resolution will allow the City Manager to modify the existing agreement with the US Army Corps of Engineers allowing engineering services performed by McGill Associates to be utilized as matching work in kind funds for the Corps Feasibility Cost Sharing Agreement.

This action complies with the City's plans and commitments to administer $2.5M of Senate Bill 7 funding consistent with a contract executed with the North Carolina Division of Water Resources on April 1, 2007. In addition, this project has complied with the Council's Strategic to provide a safe community for our citizens.

Pros:

- Implements the priority objective of the Swannanoa Flood Risk Management Project
- Provides safe access for the citizens that visit this area
- Provides water to the soccer complex
- Priorities are set for expending the remainder of state flood mitigation funding and for pursuing future state and federal grant funding for this project.

Con:

- The City of Asheville currently does not have the funding to complete the construction phase of project. Construction/rehabilitation of the dam will require the involvement and funding of the US Army Corps of Engineers or the North Carolina Division of Water Resources.

Staff has budgeted $1,263,206 for the engineering services necessary to complete Phase I of the Lake Craig Project. Funding for this engineering services contract will come from a combination of remaining Senate Bill 7 money and capital funds made available from the water funds for work associated with the installation of water line infrastructure as permitted by state statute which are already budgeted in the Azalea Road capital improvement project. The total estimated cost for Phase I of this project, which includes the engineering services as well as the roadway, utilities, and river relocation construction is $4.15 million. The chart below shows the projected budget for Phase I. City Staff is working with the Army Corps of Engineers as well as

the North Carolina Division of Water Resources to identify future funding for the completion of the Dam construction which will be associated with Phase II of this project. These sources would require matching contributions from the City in order to secure these funds.

Typical engineering contracts range from 10 to 15 percent of the total project cost; the engineering services for this project are higher due to the need to determine the structural stability of the existing dam. The analysis of the dam will determine what design is required under the future Phase 2 of this project. There is also additional cost associated with the engineering services for the project due to detailed coordination with various agencies including the Army Corps of Engineers and FEMA.

City staff recommends City Council approve a resolution authorizing the City Manager to complete negotiations and sign a contract with McGill Associates for the engineering services necessary for completion of Phase I of the Lake Craig Project for up to $1,263,206.

Ms. Ball reviewed the following Lake Craig Project objectives (1) flood damage reduction in Biltmore Village (a) Restore/replace dam; (b) remove sediment/fill from floodplain; and (c) qualify project for additional Corps funding; (2) improve roadway access to Azalea Park/Gashes Creek neighborhood; (3) extend water service to John B. Lewis Soccer Complex; (4) relocate Swannanoa River to more efficient hydraulic alignment; and (5) identify future recreational/educational enhancements.

She then showed the conceptual plan. Lake Craig agency coordination included US Army Corps of Engineers; Federal Emergency Management Agency; N.C. Division of Emergency Management; N.C. Division of Water Resources; N.C. Division of Water Quality; and N.C. Dept. of Transportation.

Ms. Ball then used pie charts to explain the project expenditures and revenues.

Mr. Joel Storrow, representing McGill Associates and Project Manager of the Lake Craig Project, outlined the Lake Craig Project team consisting of McGill Associates – Project management, roadway, utilities; Schnabel Engineering – Dam investigation; Dewberry – Flood modeling; Equinox Environmental – Environmental/recreation; Wolf Creek Engineering – River relocation; LandDesign – Public input; and John Morris – Corps of Engineers/Funding liaison.

He said the Lake Craig Project elements include (1) dam investigation and recommendations; (2) hydraulic and hydrologic modeling; (3) Azalea Road improvements; (4) waterline extension to soccer complex; (5) Swannanoa River relocation; and (6) Corps of Engineers coordination.

Regarding dam investigation (1) key elements (a) structural analysis; (b) geotechnical evaluation; and (c) spillway adequacy; (2) cost estimates; (3) recommendation (a) rehabilitate; and (b) replace; and (4) Corps of Engineers' oversight.

Regarding hydraulic & hydrologic modeling (1) detailed survey (a) topography and (b) cross-section; (2) flood modeling; (3) refine benefit/cost ratio; and (4) Corps of Engineers' oversight.

He then reviewed the roadway improvements and waterline extension. He outlined the advantages to the roadway improvements.

Regarding the Swannanoa River relocation (1) shift river away from Azalea Road embankment; (2) remove sediment from floodplain; (3) restore floodplain bench; and (4) environmental permitting.

Regarding Recreation Park enhancements, they will develop recommendations for future upgrades for greenway linkages; river access; historic landmarks/markers; parking; and outdoor classrooms.

He envisioned the project timeline as follows (1) Notice to proceed – July 2011; (2) Dam investigation/Flood modeling – July-October 2011; (3) Swannanoa River relocation, Azalea Road and waterline design – September-December 2011; (4) Agency review and permitting – January-March 2012; (5) construction bidding – April-May 2012; and (6) construction begins – Summer 2012.

Mayor Bellamy questioned why other City departments (e.g., Public Works Department and the Parks & Recreation Department) are not contributing to this project as the project has more implications than just the waterline. She felt we could do more with the funds permitted by state statute. Ms. Ball responded that when we originally looked at the project, this was the opportunity we had to be able to utilize those to make improvements that probably would have come from other funds, but in this case it is in conjunction with improving the roadway. There is not a waterline now to the Pavilion.

When Mayor Bellamy asked for public comments, none were received.

Due to a conflict of interest, Councilman Russell moved to recuse Councilwoman Manheimer. This motion was seconded by Councilman Smith and carried unanimously.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Russell moved for the adoption of Resolution No. 11-134. This motion was seconded by Councilman Davis and carried unanimously (Councilwoman Manheimer recused).

**RESOLUTION BOOK NO. 34 – PAGE 68**

**C. MOTION TO PARTNER WITH BUNCOMBE COUNTY TO ISSUE A REQUEST FOR PROPOSALS TO EVALUATE OPTIONS FOR COMMUNITY MEDIA DEVELOPMENT, SMALL BUSINESS AND JOB GROWTH OPPORTUNITIES, AND PUBLIC EDUCATION SERVICES RELATED TO MEDIA TECHNOLOGY**

Director of Administrative Service Lauren Bradley said that this is the consideration of a Request for Proposals to evaluate options for community media development, small business and job growth opportunities, and public education services related to media technology.

In May 2011, public access studio space provided by a third-party organization closed as a result of funding challenges. Due to the status of the organization, the City decided not to renew or extend its recently expired contract for public access management services.

Given this transition, the City Council Finance Committee directed staff to work with Buncombe County to develop a Request for Proposals (RFP) for community media development services, projects or initiatives with an emphasis on the following components:

- **Community development:** Creating a vision of a County and a City that is ahead of other communities in building a media network and resources that are progressive and green, and one that places the power of new media in the hands of local citizens;
- **Economic and workforce development:** Creating a strategy that connects government, education, community, and business in a proactive economic and workforce development movement;

- **Industry development:** Further developing the media arts industry in Asheville and Buncombe County such that it creates new jobs and opportunities for the community; and
- **Training and education:** Training for the 21st Century media world where a small investment can buy you a studio, post production resources and a door to a career.

The expansion of traditional and non-traditional distribution channels as well as community-based initiatives supporting the arts, economic development and education makes this an optimal time to seek proposals for new types of services. As a result, the RFP does not require the provision of a public access channel, although proposals can be submitted for those services. Instead, the scope of the RFP has been broadened to encourage further innovation and community partnerships to ensure the success of media technology development initiatives into the future.

If approved, the RFP would be issued by July 1, 2011, with responses due by August 1, 2011. The Housing & Community Development Committee (H&CD Committee) would receive staff evaluations of proposals at its meeting in August. A final recommendation to award the contract would be brought forward for County Commission and City Council consideration in September 2011.

Production equipment purchased by the former public access management entity is the property of the City of Asheville. Some or all of those assets could be included within the context of the contract award. However, staff will not have a complete and verified inventory of equipment by July 1. As such, the equipment could be added as an addendum to the RFP in the near term or included as a matter of negotiations if the selected proposal would benefit from those assets.

The structure of the funding contemplated in the draft RFP intended to provide seed funding to enable a new community media development initiative to achieve financial independence and sustainability within three years. Proposals will be required to include plans for maintaining the services, program or project once the funding period for implementation has ended. These documents must include an overall business plan and forecasting of future revenues and expenditures.

During the three year award period, funding will be provided according to the following schedule:

- Year 1 (Sept. 2011-Sept. 2012): $60,000
- Year 2 (Sept. 2012-Sept. 2013): $40,000
- Year 3 (Sept. 2013-Sept. 2014): $20,000
- After three years, funding would be discontinued.

Buncombe County and the City of Asheville would split the funding allocation each year, whereby each government would provide $30,000 in year 1, $20,000 in year 2, and $10,000 in year 3.

In the FY 11-12 budget, the City has allocated $30,000 for community media services. These funds were originally budgeted to continue public access management services. If the selected proposal does not incorporate public access, staff recommends that the City use the full allocation of PEG funding for the City's government channel, as allowed by State statute. The City could then use $30,000 of General Fund dollars currently allocated to the government channel for the award of this contract.

The RFP criteria would include policy goals (30%); performance measures (15%); partnerships (10%); public participation (10%); applicability to mission (5%); ability document and evaluate results (5%); and budget, resources and likelihood of success (25%).

Pros:

- Broadens the scope of possible services and initiatives such that capital-intensive studios, production facilities and staffing may longer be a challenge.
- Incorporates an emphasis on economic development, job creation, and workforce training.
- Proposes a funding model that encourages self-sufficiency within three years.

Con:

- With the expansion of the scope, the RFP does not require the provision of a public access channel, although submissions may include one. Once the public access channel is not operational for 120 days, it could be challenging to resume a channel in the future.

Staff recommends City Council approve a motion to partner with Buncombe County to issue a Request for Proposals to evaluate options for community media development, small business and job growth opportunities, and public education services related to media technology.

Vice-Mayor Newman suggested that instead of the H&CD Committee evaluating the proposals, the Finance Committee continue to follow-through as there would be learning curve for the H&CD Committee and the Finance Committee has valuable knowledge of the process. Councilman Russell, Chair of the Finance Committee, said the Finance Committee would be happy to evaluate the proposals prior to them coming to City Council.

Councilman Russell moved to (1) authorize City staff to partner with Buncombe County to issue a Request for Proposals to evaluate options for community media development, small business and job growth opportunities, and public education services related to media technology; (2) issue the RFP by July 1, 2011, with responses due by August 1, 2011; and (3) have the Finance Committee receive staff evaluations of proposals with a final recommendation to award the contract being brought forward for County Commission and City Council consideration in September 2011. This motion was seconded by Councilman Smith.

When Mayor Bellamy asked for further clarification on the RFP as she felt we needed to be clearer on what we are trying to get, Ms. Bradley said that the RFP was drafted to be intentionally broad enough to where there could be innovative, creative proposals brought forward - maybe even approaches we haven't even thought of because we don't work in new media now that could further the economic development and job creation goals, etc. Because that industry in Asheville has grown so much in the last decade we wanted to allow some flexibility to have some of those entrepreneurial ideas to come forward to be measured against Council's high level policy goals. It is intentionally broad because we don't know what the ideal vehicle is to achieve these goals would be but wanted to allow the opportunity for them to come forward outside of just the model of public access management.

In response to Councilman Davis, Ms. Bradley said it's the County's desire that the RFP be written broadly so that it could include a public access channel but that it's not required to include a public access channel. She believed they would reconsider their participation if we draft the RFP otherwise.

Based on previous Council discussion, Mayor Bellamy understood we were going to issue an RFP for a management company to run a public access channel, but the draft RFP does not require the provision of a public access channel.

Ms. Bradley responded to Mayor Bellamy in that there is no proposal in mind that the RFP was written for. There are a lot of opportunities in our community from educational institutions and other organizations that work in media development. If the proposal did not include public access, staff would recommend that the City use the full allocation of PEG funding for the City's government channel.

Councilwoman Manheimer said the Finance Committee discussed the RFP being very broad concept because there might be innovative ideas we hadn't conceived of yet. We didn't want to limit proposals to just being the model of a television channel.

Councilman Russell also noted that the Finance Committee wanted to be open-minded because what the PEG funds were intended to do in 1989 might not be the same in 2011.

In response to Mayor Bellamy regarding our equipment, Ms. Bradley said we are in the process of inventorying and obtaining that equipment from the former location. At this time, we don't have an inventory that could be included as part of the RFP; however, if a proposal for the management of public access or any other proposal that came forward that could use that type of equipment, we could as a part of negotiations of a contract consider some allocation of that equipment if it were a good fit for the proposal that came forward.

Mayor Bellamy questioned if there is a benchmark or scoring checklist associated with how the different options in the RFP are going to be evaluated. Ms. Bradley responded that staff will come up with a scoring sheet that will weight the point system based on the merits of the project. The RFP criteria is outlined in the RFP. Staff looked at best practices of other RFP processes that were run similar to this, like the National Endowment of the Arts and other types of federal agencies. Staff tried to model ours as closely after their process to make sure we had a transparent and fair process given that this is more of a creative proposal competition, than one where you would be bidding on a specific service for building something based on a specification provided.

Councilman Davis said he was very supportive of public access television several years ago with it being a good use of PEG funds. However, during this economy he wasn't sure if the money wouldn't be better spent for other economic development pieces.

Councilwoman Manheimer said we can use the $30,000 for our government channel. One option would be to abandon the project altogether since we don't have a lot of money and use the PEG money on a public access function we are already performing– which is the government channel. Another option is we might want to see the City support something but are not sure what it would be. Personally she is not open to going through this exercise because we don't have $30,000 and we already have the government channel.

Councilman Smith said this is a partnership with the County and they are matching us dollar for dollar on whatever comes forth. As far as economic development, we have an opportunity to partner with the County on something that may end up being very innovative. If nothing comes forward that meets Council's goals in September, we still have the opportunity to vote against it. He is willing to see what proposals come in.

Vice-Mayor Newman agreed with Councilman Smith in that if there are no strong proposals that merit that type of investment, Council can vote it down.

Mr. Steve Holland said in an effort to keep the public access channel alive, he asked Mr. Joe Scott from Intellisound to submit a proposal for an interim professional management of Public Access Television Channel 20 on a six month basis during the time that the City and County develops an RFP, solicits and evaluates responses to it and selects a proposal. The Intellisound proposal was submitted to City and County staff on June 6. Since that time he was made aware that Buncombe County has not certified the Public Access Channel with the North Carolina

Department of Revenue and does not intend to do so by the July 15 deadline. That provides the opportunity for the City to certify the channel and receive the Supplemental PEG funding (estimated at $36,000 annually) that would otherwise be lost and redistributed to other counties and cities in North Carolina. By having a Channel Operator in place by June 30, the channel will meet all the requirements for certification with the North Carolina Department of Revenue. He asked that Council consider approving an interim Management Agreement with Intellisound, Inc. to operate the channel on a six month basis. He provided Council some information, along with a draft management agreement with Intellisound, Inc.

Mr. John Blackwell understood the purpose of this RFP was to have a successful management of the public access channel. He supported Intellisound's interim proposal for management of the public access channel.

Mr. Tim Peck pointed out that one of Council's policy goals in the RFP states "...building a creative economy that is progressive ..." If that means pushing a particular political ideology he objected and urged Council to strike that item as a goal for this initiative.

A gentleman spoke in support of the draft RFP process and was looking forward to writing a proposal that would focus more on tourism and economic development.

Dr. Milton Byrd, URTV producer, said that the access of public television is 100% public participation. The fact that the content of the television shows that are produced are the responsibility of the producers, not the management organization. There is a clear separation for the public to have that freedom of speech through that media. He hoped we can all work together to solve the problem.

Rev. Christopher Chiaronmonte said that Asheville controls the content on the government channel and the public won't have free press in Asheville anymore if there is no public access channel.

The Director of the Asheville Area Arts Council said there are a lot of incredible artists in Asheville that use multi and digital media of all different types and supported issuing the RFP.

Rev. Lisa Landis, URTV producer, said URTV was a model for the nation and urged Council to continue the public access channel so their voices can be heard.

In response to Mayor Bellamy, Councilman Russell clarified that his motion included the policy goals in the staff report.

It was the consensus of Council to have Ms. Bradley change the wording in the RFP from "progressive" to "innovative" or "forward thinking" to remove any inkling of political slanting.

When Mayor Bellamy noted that the percentage criteria of 10% for public participation pretty much gives the indication that there's not going to be a public access channel. Ms. Bradley responded that the intent was not to weight the criteria such that it would negatively impact proposals that came forward with a public access channel. That criteria was put in there to encourage public participation in terms of the creation of the proposal and then the implementation of the initiative. With Council's direction, she can re-vamp the criteria if they feel it does restrict public access television.

Mayor Bellamy would be in support of seeing the percentage for public participation increased in whatever form presented. He hoped this will be a transparent process.

The motion made by Councilman Russell and seconded by Councilman Smith carried on a 5-1 vote, with Councilman Davis voting "no."

**D. RESOLUTION NO. 11-130 - RESOLUTION APPOINTING MEMBERS TO THE CIVIC CENTER COMMISSION**

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Civic Center Commission. .

The terms of John West, Carol Ann McLendon and James Richards will expire on June 30, 2011.

The following individuals have applied for vacancies: Saul Chase, Christopher James Bradford, Flora Marr, Heather Hunter, Elizabeth Franks and Karl R. Katterjohn.

On June 14, 2011, Vice-Mayor Newman moved to reappoint John West and Carol Ann McLendon to each serve a three-year term respectively, terms to expire June 30, 2014, or until their successors have been appointed; and (2) instruct the City Clerk to arrange interviews for Ms. Flora Marr and Ms. Elizabeth Franks. This motion was seconded by Councilman Russell and carried unanimously.

On June 28, 2011, City Council interviewed Ms. Flora Marr. Ms. Franks was unable to attend the interview.

There was a brief discussion on whether to wait to interview Ms. Franks or continue with the appointment process. Some members of the Civic Center Commission who were present during the interviews expressed encouragement for proceeding with an appointment.

Councilman Smith moved to appoint Ms. Flora Marr as a member of the Civic Center Commission to serve a three year term, term to expire June 30, 2014, or until her successor has been appointed. This motion was seconded by Councilman Davis and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 64**

**E. RESOLUTION NO. 11-135 - RESOLUTION APPOINTING MEMBERS TO THE PUBLIC ART BOARD**

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Public Art Board. .

The terms of Kenn Kotara, Jaan Ferree, Julie Calhoun-Roepnack and Barry Pate will expire on June 30, 2011.

The following individuals have applied for vacancies: William F. Meller, Richard G. Lee, Susanne Hackett, Leslie Shaw, Ami Worthen, Gwynn Rukenbrod, Jessica McCuan, Leslie Klingner and Jennifer Gordon.

It was the consensus of Boards & Commissions Committee on June 14, 2011, to (1) reappoint Ms. Ferree and Ms. Calhoun-Roepnack to each serve a three-year term respectively, terms to expire June 30, 2014, or until their successors have been appointed; (2) appoint Ms. Suzanne Hackett to serve a three-year term, term to expire June 30, 2014, or until her successor has been appointed; and (3) recommend interviewing Ms. Jennifer Gordon and Ms. Leslie Klingner.

After a brief discussion on June 14, 2011, Vice-Mayor Newman moved to (1) reappoint Jaan Ferree and Julia Calhoun-Roepnack to each serve a three-year term respectively, terms to expire June 30, 2014, or until their successors have been appointed; and (2) instruct the City Clerk to arrange interviews for Ms. Susanne Hackett, Ms. Ami Worthen, Ms. Gwynne Rukenbrod,

Ms. Jessica McCuan, Ms. Jennifer Gordon and Ms. Leslie Klingner. This motion was seconded by Councilman Smith and carried unanimously.

On June 28, City Council interviewed Ms. Ami Worthen, Ms. Gwynne Rukenbrod, Ms. Jessica McCuan, Ms. Jennifer Gordon and Ms. Leslie Klingner. Ms. Hackett was unable to attend the interview date and time; however, she expressed interest in serving on the Board.

Vice-Mayor Newman clarified that the Public Art Board was recently expanded from seven members to nine members.

After Council spoke highly of the candidates, Ms. Worthen received 2 votes, Ms. Rukenbrod received 4 votes, Ms. McCuan received 1 vote, Ms. Gordon received 4 votes, and Ms. Klingner received 1 vote. Therefore, Gwynne Rukenbrod and Jennifer Gordon were appointed as members to the Public Art Board to each serve three-year terms respectively, terms to expire June 30, 2014, or until their successors have been appointed.

Mayor Bellamy suggested the Board be expanded to 11 because there is a lot of interest and the caliber of candidates speaks a lot about our community and their commitment to public art. Vice-Mayor Newman said that the Boards & Commissions Committee will review the size of the Board. He asked Councilman Smith, liaison to the Public Art Board, to get their thoughts on membership size as well.

**RESOLUTION BOOK NO. 34 – PAGE 69**

**VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:**

Rev. Lisa Landis recited some of the Constitution regarding free speech. She will fight for her First Amendment.

Dr. Milton Byrd spoke about leadership and management.

Rev. Christopher Chiaronmonte spoke about the need for Asheville to work more to alleviate homelessness.

**Lawsuit**

The City was served with a Complaint from Nationwide Mutual Insurance Company on an unknown date. The Complaint for judgment is in excess of $10,000 – Meter gasket failed causing excessive pressure in the waterline to property of Jean Sponseller at 2 Bent Tree Drive. The Risk Management Division has referred the matter to the City's Third Party Administrator. The Third Party Administrator will assign to counsel outside the office.

**Closed Session**

At 7:31 p.m., Councilman Smith moved to go into closed session for the following reasons: (1) To discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session. The statutory authorization is N.C. Gen. Stat. sec. 143-318.11(a)(4); and (2) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Russell and carried unanimously.

At 7:53 p.m., Councilman Davis moved to come out of closed session. This motion was seconded by Councilman Russell and carried unanimously.

**VIII. ADJOURNMENT:**

Mayor Bellamy adjourned the meeting at 7:53 p.m.

Magdalen Bullerson
CITY CLERK

MAYOR

Tuesday – July 26, 2011 - 5:00 p.m.

Regular Meeting

Present: Vice-Mayor Brownie W. Newman, Presiding; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; Acting City Manager Cathy Ball; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Mayor Terry M. Bellamy

Due to the absence of Mayor Bellamy, Councilman Russell moved for Vice-Mayor Newman to preside over the meeting. This motion was seconded by Councilwoman Manheimer and carried unanimously.

**PLEDGE OF ALLEGIANCE**

Vice-Mayor Newman led City Council in the Pledge of Allegiance.

**INVOCATION**

Vice-Mayor Newman gave the invocation.

**I. PROCLAMATIONS:**

**A. PROCLAMATION PROCLAIMING JULY 27, 2011, AS "NATIONAL KOREAN WAR VETERANS ARMISTICE DAY"**

Vice-Mayor Newman proclaimed July 27, 2011, as "National Korean War Veterans Armistice Day" in the City of Asheville.

**B. ANNOUNCEMENT OF STRIVE NOT TO DRIVE WINNERS**

Vice-Mayor Newman recognized Keith Bamberger who explained the Strive Not To Drive Program. He then was pleased to recognize the following award winners: (1) Wendy Hendl has been selected by the Strive Not To Drive Committee to receive the Strive Not To Drive Golden Wheel Award. The Golden Wheel Award recognizes individuals who make a choice be multi-modal by commuting by bus, bike, and shoe. Wendy Hendl has a car and a young child. Even though her car would be the more convenient and easy way to save time, she chooses to be multi-modal – taking the bus, walking, and biking. Ms. Hendl shows how to get things done without using a car, and that is why she is receiving the 2011 Strive Not To Drive Golden Wheel Award; (2) Mr. Anders Joura has been selected by the Strive Not To Drive Committee to receive the Strive Not To Drive Golden Sneaker Award. He has impressed his co-workers with his humble dedication to walking as his chosen mode of transportation. As a student at UNCA, he commutes on foot from the Haw Creek Neighborhood every day – a round trip of ten miles. He also has walked to work every day; (3) Gary Cummings has been selected by the Strive Not To Drive Committee to receive the Strive Not To Drive Golden Spoke Award. The Golden Spoke Award recognizes individuals who make a choice commute by bike. Even though Gary Cummings has been committed to riding a bike to and from work for decades, it was not until 2008 he choose to rid himself of a car. He now makes every trip out of the house into an adventure. The most important equipment he rides with is for safety. Both his bike and his riding attire are equipped with high visibility reflectors and lights, and he diligently follows all the rules of the road; and (4) David Tindall has been selected by the Strive Not To Drive Committee to receive the Strive Not To Drive Leadership Award. The Leadership Award recognizes individuals who make it possible for others to commute without being alone in a car. The Mellow Mushroom provides lockers for employees who Strive Not To Drive. The lockers give the employees with

peace of mind about their commuting gear while working. Mr. Tindall provides inspiration and guidance for those who want to live car free, by sharing his knowledge about how to commute, his hints about where to get gear and equipment for those on a budget, advice on how to be prepared to commute in all types of weather, and most importantly encouragement and support for those who choose to Strive Not To Drive.

He then announced the winners of the Strive Not To Drive Workplace Challenge Winners: 2-10 employees - Western North Carolina Alliance; 11-30 employees - Liberty Bikes; 31-50 employees – REI; and 50+ employees - Evergreen Community Charter School. Buncombe County was the winner of the Passport Program.

**II. CONSENT AGENDA:**

At the request of Councilman Davis, Consent Agenda Items "C" and "H" were removed from the Consent Agenda for discussion and/or individual votes.

**A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JUNE 28 2011**

**B. RESOLUTION NO. 11-136 - RESOLUTION RATIFYING THE SALE AND DISPOSAL OF SURPLUS WATER METERS TO BILTMORE IRON AND METAL COMPANY**

Summary: The consideration of a resolution ratifying the sale and disposal of surplus water meters to Biltmore Iron and Metal Company (herein "Biltmore Iron").

Water Maintenance identified water meters removed from service as obsolete and has requested the disposal of these meters. Per N.C.G.S. 160A-266, Sale and Disposal of Property, and Resolution 07-118, the City's Purchasing office has authority to dispose of personal property valued at less than $30,000 by private negotiation and sale. The value for this lot of meters was estimated at less than $30,000; bids were solicited and received from several potential purchasers, in accordance with Resolution No. 07-118. Due to higher market pricing, the high bid came in at $32,000, and the meters were sold to the high bidder, Biltmore Iron. It is not clear whether Purchasing has the authority to dispose of personal property under these circumstances (estimate below $30,000 threshold; bid above) without Council action, so ratification of this action by Council is requested.

Pros:

- Promotes City of Asheville fiscal responsibility by disposing of surplus property which generates revenue
- Space utilization eliminates the need to store large, bulky, unused equipment
- Competitive process yielded market price, as statute contemplates
-

Con:

- None

The fiscal impact is $32,000 in revenue in the Water Resources Fund.

City staff recommends City Council adopt a resolution approving the sale and disposal of surplus water meters to Biltmore Iron, and ratifying previous staff action to award the contract as described.

**C. RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A LEASE AGREEMENT WITH BELLSOUTH TELECOMMUNICATIONS, INC., d/b/a AT&T NORTH CAROLINA FOR PART OF THE SURFACE PARKING LOT LOCATED AT 25 O.HENRY AVENUE**

This item was removed from the Consent Agenda for discussion and/or an individual vote.

**D. RESOLUTION NO. 11-138 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH ASHEVILLE HUMANE SOCIETY FOR ANIMAL SHELTER SERVICES FROM JULY 1, 2011 – JUNE 30, 2012**

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Asheville Humane Society for animal shelter services within territorial limits of the City of Asheville.

Buncombe County has required the City of Asheville pay for animal shelter services through the Asheville Humane Society who has contracted with the County to run the animal shelter. The cost for the shelter to the City for FY 2011-2012 will be $11,116.88 per month for animal shelter services by AHS for a FY year total of $133,402.56. This not an increase from the cost of last years' service. This cost is included in the Asheville Police Department's budget. The City and the Humane Society need to enter into this agreement for the shelter services for the term of July 1, 2011 through June 30, 2012.

The City of Asheville continuing its animal shelter contract through the Asheville Humane Society ties directly back through the City Council's Strategic Operating Plan, specifically the focus area of safe by actively enforcing animal control laws.

Pro:

- The City will not have to pay for construction and operation of its own animal shelter to take care of its animal sheltering needs and the Humane Society will be responsible for the care of all animals brought to the shelter.

Con:

- The City has to pay out of its general fund for shelter services where Buncombe County provides the same services to all other non-incorporated county residents at no additional costs except through county taxes.

The 2011-2012 contract amount remains the same as the 2010-2011 contract of $133,402.56. Funding for the contract is budgeted in the Police Department's FY 2011-12 budget.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with Asheville Humane Society for Animal Shelter Services for the term of July 1, 2011, through June 30, 2012.

**RESOLUTION BOOK NO. 34 – PAGE 72**

**E. RESOLUTION NO. 11-139 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A LEASE RENEWAL AGREEMENT WITH ONTARIO INVESTMENTS, INC. FOR GOLD CARTS AND MAINTENANCE EQUIPMENT AT THE ASHEVILLE MUNICIPAL GOLF COURSE**

Summary: The consideration of a resolution authorizing the City Manager to enter into a lease renewal agreement with Ontario Investments, Inc. for golf carts and maintenance equipment at the Asheville Municipal Golf Course.

In 2009, the City of Asheville entered into a one-year lease agreement with an option to renew for one additional year with Ontario Investments at a cost of $123,158 for golf carts and maintenance equipment at the Asheville Municipal Golf Course. In 2010, the City entered in a one-year renewal of the lease at a cost of $92,369. The City wishes to renew the lease an additional ten months at a cost of $57,150 while the option to outsource golf course operations is explored.

This action complies with the City's Strategic Operating Plan in that it supports enhancing the city's commitment to infrastructure maintenance and public facilities. It is also consistent with the Parks, Recreation, Cultural Arts and Greenways Master Plan in that it provides ongoing maintenance and care for the City's park system.

Pros:

- Investment to maintain and care for the Asheville Municipal Golf Course, a City-owned asset.
- Provide quality service for ongoing, core facility maintenance services.
- Fulfill commitment for maintenance of the golf course.

Cons:

- None

The 2011 ten-month lease renewal will cost $57,150. The funds to support the lease renewal is budgeted in the FY 2011-2012 operating budget in the Parks, Recreation and Cultural Arts Department in the Golf Course Fund for the leased golf carts and maintenance equipment.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a lease renewal agreement with Ontario Investments Inc. for golf course carts and maintenance equipment at the Asheville Municipal Golf Course not to exceed $57,150.

**RESOLUTION BOOK NO. 34 – PAGE 73**

**F. RESOLUTION NO. 11-140 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH IRWIN TELESCOPIC SEATING COMPANY FOR THE INSTALLATION OF NEW SEATING RISERS IN THE ASHEVILLE CIVIC CENTER ARENA**

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Irwin Telescopic Seating Co., located in Altamont, Illinois, in the amount of $ 775,746 for the installation of new seating risers in the Asheville Civic Center arena.

The replacement and reconfiguration of the arena lower bowl seating is one of the most integral elements of the Civic Center renovation plans. The new risers will allow for placement of new seats and allow patrons to have an improved view of the arena floor during concerts and sporting events. The design of the risers on the West side of the Arena will allow additional points of access/egress to and from the arena floor from the concourse area.

The Seating Risers are part of the overall renovations in preparation to host the Southern Conference Basketball Tournament beginning in March 2012 and through 2015.

This action complies with the City Council Strategic Operating Plan's Fiscal Responsibility goal of developing strategic partnerships to leverage resources for infrastructure and Capital Improvement Plan projects. This action also complies with the Civic Center

Commission Master Plan that encourages continuing renovations for the facility, and supports the goal of developing new partnerships.

This action has been reviewed and recommended by the Civic Center Commission.

Pros:

- Project allows new seating configuration and improved sight lines for patrons.
- Risers will be less maintenance intensive.
- Project bid is below budget.

Cons:

- None noted.

Funding for this contract is included in the Civic Center Capital Fund as part of the budget for the Southern Conference renovations.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with Irwin Telescopic Seating Co. for $ 775,746 for the installation of new seating risers in the Asheville Civic Center arena.

**RESOLUTION BOOK NO. 34 – PAGE 74**

**G. MOTION APPROVING THE BOARD OF ALCOHOLIC BEVERAGE CONTROL'S TRAVEL POLICIES ADOPTED JUNE 28, 2011**

Summary: Recent changes in Commission rules require ABC Boards across the state to adopt a travel policy that mirrors the travel policy of their appointing authority effective this year. The rule change mandates that the appointing authority "approve" the ABC Board's travel policy and then the appointing authority must send a copy of that approval to them within 30 days of the approval action.

The Asheville Board of Alcoholic Beverage Control adopted and approved policies modeled after the City's policies at their meeting on June 28, 2011. The Asheville Board of Alcoholic Beverage Control respectfully requests City Council formally approve the policies for the Asheville ABC Board and their employees.

**H. RESOLUTION AUTHORIZING A PUBLIC HEARING TO BE HELD ON AUGUST 9, 2011, TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT FOR LINAMAR CORPORATION VIA INTER-LOCAL GOVERNMENT AGREEMENT WITH BUNCOMBE COUNTY**

This item was removed from the Consent Agenda for discussion and/or an individual vote.

**I. ORDINANCE NO. 3991 - ORDINANCE ENACTING OR CHANGING SPEED LIMITS TO 25 MPH ON PROVIDENCE ROAD, WILSHIRE DRIVE, WILBURN ROAD, WILBURN PLACE, CARLTON PLACE, AND LUTHER STREET IN THE WILSHIRE PARK NEIGHBORHOOD IN WEST ASHEVILLE**

Summary: The consideration of an ordinance to enact and/or change a speed limit on Providence Road, Wilshire Drive, Wilburn Road, Wilburn Place, Carlton Place, and Luther Street in the Wilshire Park neighborhood in West Asheville.

According to state law (NCGS # 20-141), the statutory speed limit in North Carolina is 35 mph inside municipal corporate limits for all vehicles and 55 mph outside municipal corporate limits for all vehicles except for school buses and school activity buses.

Furthermore, local authorities may authorize by ordinance higher speeds or lower speeds than the statutory 35 mph speed limit on locally-maintained streets provided that the higher speed limit cannot exceed 55 mph. Speed limits authorized by local authorities are effective when the appropriate signs are erected.

City staff recently completed an engineering and traffic investigation and determined that a 25 mph speed limit would be reasonable and safe on Providence Road from Johnston Boulevard to Wilburn Place. In addition, since the Wilshire Park neighborhood is also served by Wilshire Drive, Wilburn Road, Wilburn Place, Carlton Place, and Luther Street and the entire neighborhood only has three access points, it is reasonable to place a 25 mph speed limit within the entire neighborhood. The subject streets primarily serve residential properties in a well established neighborhood as well as Emmanuel Lutheran School, a private Christian school serving infants through the eighth grade. Daily traffic volumes are less than 500 vehicles per day and the 85$^{th}$ percentile speed ranges from 23.3 mph to 29.6 mph.

This action complies with the City Council Strategic Operating Plan in the Safety focus area by improving the "street experience" for all users including pedestrians, bicycles, and motorists in a primarily residential corridor.

Pros:

- City staff has been able to respond favorably to a neighborhood request.
- Based on the 85$^{th}$ percentile speed, most drivers would adhere to a 25 mph posted speed limit.

Cons:

- The initial cost to install the appropriate speed limit signs is about $1,500.
- Typically, speed limit signs have a serviceable life of five to seven years.

The initial cost to install the appropriate speed limit signs is about $1,500 and is included in the current operating budget for the Transportation Department.

City staff recommends that City Council approve an ordinance enacting and/or changing a 25 mph speed limit on Providence Road, Wilshire Drive, Wilburn Road, Wilburn Place, Carlton Place, and Luther Street in the Wilshire Park neighborhood in West Asheville.

**ORDINANCE BOOK NO. 27 – PAGE 91**

**J. RESOLUTION NO. 11-142 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH CAROLINA MANAGEMENT TEAM FOR THE WATER RESOURCES WATER STORAGE TANK AND PIPE COATING AND MAINTENANCE PROJECT**

**ORDINANCE NO. 3992 - BUDGET AMENDMENT FOR THE WATER RESOURCES WATER STORAGE TANK AND PIPE COATING AND MAINTENANCE PROJECT**

Summary: The consideration of a resolution by City Council authorizing the City Manager to enter into an agreement with Carolina Management Team in an amount not to exceed $400,000 for the Water Resources Water Storage Tank and Pipe Coating and Maintenance Project; and a budget amendment in the amount of $200,000 from existing capital improvement funds.

On May 11, 2011, the Water Resources Department issued a Request for Proposals (RFP) for the Water Storage Tank and Pipe Coating and Maintenance Project. The scope of the project is for the maintenance, rehabilitation, repair, and repainting of water storage tanks and

pump station piping at various sites in the water distribution system. The project locations include: Spivey Mountain Tank and Pump Station Piping, West Asheville / Candler Knob Tanks 1 and 2, Beaverdam Tank & Pump Station Piping, South Buncombe Tank, and Ridgeview Tank.

On June 8, 2011, Water Resources received three (3) proposals for the project in response to the RFP. Companies responding were:

1. Carolina Management Team – Enka, NC; $389,857.50 total bid
2. Southern Corrosion Incorporated – Roanoke Rapids, NC; $441,347.75 total bid
3. Superior Industrial Maintenance – Concord, NC; $552,470.00 total bid

The total bid includes: the base work to rehabilitate, repair, and repaint the aforementioned project locations; the cost to add three (3) additional sites; and crack / spall repair. A review team comprised of Water Resources staff reviewed each proposal and rated them based on seven categories (i.e. qualifications, understanding of project scope, cost, and project schedule).

The total scores for each company are:

1. Carolina Management Team – 478.0
2. Southern Corrosion Incorporated – 419.5
3. Superior Industrial Maintenance – 348.5

Carolina Management Team (CMT) has been selected for the project based on receiving the highest rating from the review team. It is CMT's qualifications and cost that earns them the highest rating. In order to stay within the $400,000.00 budget, the three additional sites quoted in the proposal will not be included in the project scope.

This project is part of City Council's strategic plan to maintain and improve city infrastructure and provide local companies with labor opportunities.

Pros:

- Approval of the project will allow Water Resources to complete necessary maintenance on various water storage tanks and pump station piping in need of rehabilitation and repair. The project will also make these sites more aesthetically pleasing.
- The project will provide a local company with work for at least the next year.

Con:

- If the project is not approved, the water storage tanks and pump station piping on the list to be rehabilitated and repaired with continue to degrade, which may eventually jeopardize the system's water quality.

Water Resources has a Water Storage Tank Maintenance capital project in which $200,000 is currently budgeted for this project. The contract with Carolina Management Team will be for a not to exceed amount of $400,000. A budget amendment in the amount of $200,000 is needed to increase the project budget in order to cover the additional funds needed. The additional funds needed for the project will be reallocated from the Hendersonville Road Capital Improvement Project, which was completed under budget.

| | |
|---|---|
| Current Tank Maintenance Budget | $200,000.00 |
| Carolina Management Team Bid (excludes add'l sites) | $346,957.50 |
| Contingency (~15%) | $ 53,042.50 |
| Revised Project Budget (Not to Exceed) | $400,000.00 |

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into an agreement with Carolina Management Team in an amount not to exceed $400,000

for the Water Resources Water Storage Tank and Pipe Coating and Maintenance Project; and a budget amendment in the amount of $200,000 from existing capital improvement funds.

**RESOLUTION BOOK NO. 34 – PAGE 76**
**ORDINANCE BOOK NO. 27 – PAGE 92**

**K. RESOLUTION NO. 11-143 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH PRAXAIR, INC. FOR THE PURCHASE OF LIQUID OXYGEN AND THE CONTINUED LEASE OF TWO STORAGE TANKS FOR THE MILLS RIVER WATER TREATMENT PLANT**

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Praxair, Inc. for the purchase of liquid oxygen and the continued lease of two storage tanks for the Mills River Water Treatment Plant.

There are a limited number of vendors who supply liquid oxygen. Since the Mills River Water Treatment Plant went online in 1999, Water Resources has used Praxair, Inc. to supply liquid oxygen to generate ozone for destruction of organics and the disinfection process. Due to legal and insurance requirements and restrictions on the use, storage, and transport of liquid oxygen, Praxair also leases two storage tanks to Water Resources that are specifically designed to safely contain the liquid oxygen. It would be costly, cumbersome, and potentially hazardous to remove Praxair's existing tanks and change to another vendor, who would have to install their company's own storage tanks. Mills River may need to be offline in order to switch over to another vendor's tanks since the generation of ozone can not be completed without the liquid oxygen.

Water Resources is recommending that the purchase of liquid oxygen and lease of the storage tanks continue through Praxair since standardization or compatibility is the overriding consideration per G.S. 143-129 (e) (6). In addition, Praxair has agreed to lower the cost of liquid oxygen and the lease of the tanks for the next two fiscal years. At the current rate, it will cost Water Resources a total of $75,057.18 for the first year and $80,311.18 for the second year. Praxair is proposing a 15.74% reduction in the total cost for the next two years, which equates to a savings of $24,446.65 should Water Resources continue with Praxair as the supplier. Water Resources is considering an 8-year agreement with Praxair with the option to renew on an annual basis after the initial agreement. Department staff will continue to work with the Purchasing Division to use a pricing index to ensure Praxair maintains competitive pricing.

This project is part of City Council's strategic plan to maintain city infrastructure and to operate the City of Asheville to the highest levels of fiscal responsibility.

Pros:

- Liquid oxygen is needed for the ozone generation process at the Mills River Water Treatment Plant. Praxair has the apparatus, equipment, and storage tanks already in place.
- The City will save $24,446.65 in a 2-year period by the continuation of Praxair as the supplier.

Con:

- If Water Resources changes vendors, the current storage tanks would have to be removed and replacement tanks installed by the new vendor. That would be costly, difficult, and possibly hazardous due to the volatile nature of liquid oxygen.

Liquid oxygen is budgeted in Water Resource's annual operating budget. Entering into an agreement with Praxair, Inc., for the liquid oxygen and lease of the storage tanks will save Water Resources $24,446.65 in a 2-year period.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into an agreement with Praxair, Inc. for the purchase of liquid oxygen and lease of storage tanks for the Mills River Water Treatment Plant.

**RESOLUTION BOOK NO. 34 – PAGE 78**

**L. RESOLUTION NO. 11-144 - RESOLUTION DECLARING THE INTENT OF THE CITY TO REIMBURSE ITSELF FOR CAPITAL EXPENDITURES INCURRED IN CONNECTION WITH THE ACQUISITION, CONSTRUCTION AND IMPROVEMENT OF VARIOUS CAPITAL PROJECTS AND THE ACQUISITION OF VEHICLES AND EQUIPMENT FROM THE PROCEEDS OF AN INSTALLMENT FINANCING CONTRACT TO BE EXECUTED AND DELIVERED IN FISCAL YEAR 2012**

Summary: The consideration of a Resolution declaring the intent of the City to reimburse itself for capital expenditures incurred in connection with the acquisition, construction and improvement of various capital projects and the acquisition of vehicles and equipment from the proceeds of an Installment Financing Contract to be executed and delivered in Fiscal Year (FY) 2012.

Several debt issuances are currently being planned for FY 2012: (1) the issuance of "new money" for Council approved capital projects authorized as part of the FY 2012 and FY 2011 Budgets, (2) the takeout of the interim note on the 51 Biltmore Parking Deck project and (3) the refinancing of some existing debt to achieve financial savings. Each category is further described below.

**(1) FY 2011 and FY 2012 Capital Projects**
City Council adopted the FY2012 Budget in June 2011. The FY2012 Budget contains several capital projects, vehicles and equipment that are to be funded from the proceeds of the issuance of tax-exempt debt. The FY2011 Budget contains two projects (Sardis and Airport Roads sewer) and a fire aerial ladder apparatus that will also be funded from the proceeds of debt issuance. These capital projects, vehicles and equipment total approximately $17.8 million for the two fiscal years with $15.3 million relating to the FY2012 Budget and $2.5 million relating to the FY2011 Budget.

**(2) Permanent Financing for 51 Biltmore Parking Deck**
Several months ago, City Council authorized the issuance of an interim credit facility (a short term borrowing somewhat similar to a temporary construction loan) for the 51 Biltmore Parking Deck project. As this project continues to progress through the coming months, City staff anticipates securing the permanent financing for this project in the January – March 2012 timeframe.

**(3) Refinancing of existing debt**
A portion of the City's outstanding debt (1997 COPs and 2006 installment financing contract) presently bears interest at the rates of 3.92% and 5.10%. The collateral for these projects are, in part, the Municipal Buildings and two fire stations. A refunding of this debt, at current market rates, could potentially produce about $1 million in cash flow savings through 2021.

There are significant advantages in 'pooling' these three, disparate project financings into a single transaction and include minimizing separate issuance cost transaction fees (banks, bond counsel, corporation counsel), consolidating financing calendars and review by the Local Government Commission and improving the efficiency of the collateral pledge.

Because of later timing of the 51 Biltmore project takeout, a consolidated, single financing will not occur until the January – March 2012 time period. In the interim, City staff anticipates proceeding with the design, construction and purchase of some or all of the 2012 and 2011

capital projects, vehicles and equipment. The purpose of the Reimbursement Resolution is to provide the City with the ability to move forward with the projects and reimburse its accounts upon the issuance of the debt.

The Resolution does not specifically authorize the issuance of the debt. Those resolutions will be drafted in connection with the debt issuance in early 2012. Additionally, as a number of the projects, vehicles and equipment are bid, the actual size of the new money financing can be further refined.

Pro:

- Enables the City to begin spending money on the Council's approved capital projects, vehicles and equipment that were to be financed from debt proceeds.
- Proceeding with the construction projects now, in a 'soft market' may result more aggressive bidding and lower costs.

Con:

- Lost opportunity to earn interest (although at very low interest rates in the range of 1/10 of 1% to 1/4 of 1%) on the City's unrestricted cash and investments which are temporarily diverted to pay for the capital projects pending reimbursement from the debt issuance.

The Reimbursement Resolution will result in some minimal loss of interest income. Bidding and proceeding with the authorized capital projects may result in better pricing thus lower the actual amount of the debt financing. The repayment of the "new money" debt issuance is incorporated in the debt management plan through the capacity being generated by the retirement of existing debt.

Staff recommends City Council adopt the resolution declaring the intent of the City to reimburse itself for capital expenditures incurred in connection with the acquisition, construction and improvement of various capital projects and the acquisition of vehicles and equipment from the proceeds of an Installment Financing Contract to be executed and delivered in FY 2012.

**RESOLUTION BOOK NO. 34 – PAGE 79**

**M. RESOLUTION NO. 11-145 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A SERVICES CONTRACT WITH BUNCOMBE COUNTY FOR THE PROVISION OF PARATRANSIT SERVICES**

Summary: The consideration of a resolution authorizing the City Manager to enter into a services contract with Buncombe County for the provision of paratransit services.

The American with Disabilities Act of 1990 (ADA) and Federal Transit Administration (FTA) require fixed route transit systems such as the Asheville Transit System to provide paratransit services. Paratransit services are special public transportation options for senior citizens and persons with disabilities. Buncombe County Mountain Mobility has provided these services to Asheville Transit System since the 1990's when the American with Disabilities Act was created.

Buncombe County Mountain Mobility also provides service at the county level, mainly towards the rural areas. Mountain Mobility works cooperatively with Asheville Transit to provide fixed route service in Black Mountain and Candler extending transit accessibility into the county. They also provide public transportation for a large number of non-profit and governmental agencies such as the Council on Aging, Industries for the Blind, and the Buncombe County Health Department.

Mountain Mobility has recently contracted administrative and planning services with Land of Sky Regional Council and operation of transportation services with McDonald Transit

Associates. In order to help cover the costs of fuel and other expenses, the Buncombe County Board of Commissioners approved a contract rate increase for Mountain Mobility services from $1.25 to $1.30 per service mile plus 10% of the gross cost for administration, effective July 1, 2011. The contract rate does not cover the fully allocated costs of providing services; costs are significantly subsidized by county, grant, and other local funding sources. Fares for general public transportation services will not increase at this time. Each party may cancel the contract with 30 days advance notice.

This action complies with the City Council Strategic Operating Plan by supporting the affordable and fiscal responsibility focus areas, specifically by offering a standard of living that is affordable and attainable for people of all incomes, life stages and abilities and making smart investments that produce tangible results.

Pros:

- Enables the City to provide required paratransit service without a large capital investment.
- Provides a comparable standard of transportation services for all persons.
- Furthers intergovernmental cooperation in achieving a common goal of increasing mobility for all persons.
- Complies with the Americans with Disabilities Act of 1990.

Con:

- The City is responsible for the local match of $150,000.

The total cost of the subject project to the City of Asheville for FY 2011-12 is about $350,000. The City will be reimbursed about $200,000 of the project cost from the Federal Transit Administration which equates to 10% of the annual Federal allocation under Section 5307. The remaining balance of $150,000 represents the local match and is provided by the City. These funds are budgeted in the current fiscal year in the Transit Services Fund.

City staff recommends that City Council approve a resolution authorizing the City Manager to enter into a services contract with Buncombe County for the provision of paratransit services.

**RESOLUTION BOOK NO. 34 – PAGE 81**

**N. RESOLUTION NO. 11-146 - RESOLUTION AUTHORIZING THE MAYOR TO ACCEPT AN EASEMENT FROM HOLY TRINITY GREEK ORTHODOX CHURCH THROUGH 227 CUMBERLAND AVENUE FOR THE PURPOSE OF CONSTRUCTING STORM DRAINAGE AS PART OF REED CREEK GREENWAY, PHASE II**

Summary: The consideration of a resolution to accept an easement from Holy Trinity Greek Orthodox Church through 227 Cumberland Avenue (PIN # 9649141078) for the purpose of constructing storm drainage as part of Reed Creek Greenway, Phase II.

In 2002 City Council authorized the acceptance of a donation of 0.49 acres of land from Holy Trinity Greek Orthodox Church for use as a portion of the Reed Creek Greenway. As part of the donation agreement, the City agreed to correct erosion issues on church property adjacent to the greenway caused by storm water discharge from a City storm drain, which also impacts the Reed Creek Greenway. The agreement authorizes the City to remedy the erosion problems using whatever engineering means necessary. Staff determined a storm water pipe is needed which will be installed as part of Reed Creek Greenway, Phase II construction. Per the storm water policy, a permanent drainage easement is required where the new pipe will be installed for maintenance purposes.

The Holy Trinity Greek Orthodox Church has agreed to donate a .051-acre easement to the City for the purpose of storm water drainage. The permanent easement will allow the City to meet its obligations to the church as stated in the donation agreement dated September 11th, 2002; and will benefit the infrastructure of the Reed Creek Greenway. The storm water issues will be corrected immediately and construction on Reed Creek Greenway Phase II has already begun with completion expected by the end of November 2011.

This action complies with the City of Asheville Strategic Plan 2011-2012 Multimodal Transportation goal in that it will promote multimodal transportation by investing in greenway infrastructure and leveraging a private partnership. This action also complies with the Parks, Recreation, Cultural Arts, and Greenways Master Plan in that it will enable the development of a new greenway.

Pros:

- Acquisition of the easement will allow the city to meet its obligations to the Holy Trinity Greek Orthodox Church as stated in the donation agreement dated September 11th, 2002.
- The subsequent storm water drainage will benefit the Reed Creek Greenway infrastructure.

Con: None

No fiscal impact since the easement will be donated to the City at no cost.

City staff recommends City Council adopt a resolution authorizing the Mayor to accept an easement from Holy Trinity Greek Orthodox Church at 227 Cumberland Avenue for the purposes of constructing storm water drainage in association with the Reed Creek Greenway, Phase II.

**RESOLUTION BOOK NO. 34 – PAGE 82**

**O. RESOLUTION NO. 11-147 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE 2011 BELE CHERE FESTIVAL**

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 2011 Bele Chere Festival.

The following organizations: Asheville Ski Club, Benevolent Patriotic Order of the Does, Phi Beta Lambda –AB Tech, Cataloochee Ski Patrol, Wild South, St. Johns Episcopal Church, Asheville Area Paralegal Association, Green Opportunities, Asheville Biltmore Rotary Club, and The Mediation Center have requested through the Asheville Parks, Recreation and Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at 2011 Bele Chere Festival and allow for consumption at this event.

The 2011 Bele Chere Festival area will be open on Friday, July 29, 2011 from 12:00 p.m. to 10:00 p.m.; Saturday, July 30, 2011 from 10:00 a.m. to 10:00 p.m.; and Sunday, July 31, 2011 from 12:00 p.m. to 6:00 p.m.

The sale of malt beverages and/or unfortified wine will end at 9:45 p.m. in all instances; however, the possession of open containers of malt beverages and/or unfortified wine or consumption of malt beverages and/or unfortified wine will only be allowed during the periods as follows:

Friday, July 29, 2011, from 12:00 p.m. to 10:00 p.m.
Saturday, July 30, 2011, from 10:00 a.m. to 10:00 p.m.

There will be no sales and/or consumption of malt beverages and/or unfortified wine permitted on Sunday July 31, 2011.

Pros:

- Allows for fundraising opportunities

Cons:

- Potential for public safety issues

The fiscal impact would be staffing of City of Asheville police officers as required.

City staff recommends City Council adopt a resolution authorizing the City Manager to approve a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 2011 Bele Chere Festival.

**RESOLUTION BOOK NO. 34 – PAGE 83**

**P. RESOLUTION NO. 11-148 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT A GRANT FROM THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES TO PURCHASE OUTDOOR RECYCLING RECEPTACLES**

**ORDINANCE NO. 3993 - BUDGET AMENDMENT FROM THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES TO PURCHASE OUTDOOR RECYCLING RECEPTACLES**

Summary: The consideration of (1) a resolution authorizing the City Manager to accept a grant from the N.C. Dept. of Environmental and Natural Resources (DENR) to purchase outdoor recycling receptacles made from recycled materials to be installed in city parks and (2) a budget amendment, in the amount of $30,000, accepting the funds.

The City of Asheville has been awarded a second Community Waste Reduction and Recycling Grant from DENR to install permanent recycling receptacles at city parks to support community solid waste reduction efforts. In 2010, temporary recycling receptacles were installed in all city parks and collection services were contracted with Waste Pro through the Parks, Recreation and Cultural Arts. These grant funds will pay for the purchase of permanent recycling receptacles. The receptacles will be installed by staff and collected under the existing contract between PRCA and Waste Prot. Through this grant the recycling infrastructure in parks will be upgraded from temporary plastic bins to durable, long term receptacles made from recycled materials. Staff anticipates this long term investment made possible through this grant will divert 35% of the waste collected in city parks from the landfill.

This action complies with City Council's Strategic Operating Plan in that it implements ways to reduce city-wide solid waste

Pro:

- Reduce landfill waste by 35% or 5,500 tons through recycling

Con:

- Requires $6,000 in matching funds from the City

The $6,000 in matching funds are already budgeted in the approved FY 2011-12 General Operating Budget of the Parks, Recreation and Cultural Arts Department.

City staff recommends City Council (1) adopt a resolution authorizing the City Manager to enter an agreement with the North Carolina Department of Environment and Natural Resources

to purchase recycling receptacles; and (2) adopt the budget amendment in the amount of $30,000.

**RESOLUTION BOOK NO. 34 – PAGE 88**
**ORDINANCE BOOK NO. 27 – PAGE 94**

**Q. ORDINANCE NO. 3994 - BUDGET AMENDMENT TO PURCHASE A STREET MILLING MACHINE**

Summary: The consideration of a budget amendment in the General Capital Projects Fund, in the amount of $120,000, from debt service proceeds to purchase a street milling machine.

As part of its annual street maintenance program, Public Works has typically contracted out milling services. The milling services contract is a significant part of the overall cost of the street resurfacing program. Based on the current Capital Improvement Program, Public Works staff estimates that it would spend approximately $1.6 million over the next five years for milling contracts. Rather than spend this amount on contracting, Public Works and Finance staff have determined that it would be more cost effective to purchase the milling equipment and hire an operator. Based on our analysis, purchasing the equipment and hiring an operator would save around $900,000 over the next five years when compared to contracting out for the services.

In order to be able to purchase the milling equipment, which will cost $320,000, in the current fiscal year, staff is requesting that Council amend the adopted General Capital Projects Fund budget by $120,000. This $120,000 amendment represents the difference between the amount that was going to be contracted for milling in that fund ($200,000) and the purchase price ($320,000) of the milling equipment. The purchase of the milling equipment will be funded with debt proceeds with a likely repayment schedule of five years.

This action complies with the City Council Strategic Operating Plan by allowing consistent levels of service at a more efficient cost, implements a more fiscally responsible program, and creates an additional job within the City.

The program also has the potential to create more collaborative and effective working partnerships between the City of Asheville and other key organizations, particularly other municipalities and utilities, as this service is proportionately even more expensive for smaller entities to offer. Specifically, the program can be sublet to other municipalities and utilities for a minimal fee, which can even further maximize the return on this investment.

Pros:

- Savings of $900,000 over the next five years
- Creates an additional job
- Provide significant operational flexibility advantages regarding scheduling and applications of the service
- Can be used to support smaller allied entities

Cons:

- Realized savings would come at the expense of formerly contracted services
- Procuring equipment would require acquiring additional debt

As noted above, the expected savings over the next five years is approximately $900,000. The budget amendment is needed in the current fiscal year because the purchase price of the milling equipment will exceed the amount budgeted in the General Capital Project Fund for the milling contract. The purchase will be funded with debt proceeds, with an estimated annual debt service of $73,000 over five years.

City staff recommends City Council adopt a budget amendment in the General Capital Projects Fund, in the amount of $120,000, from debt service proceeds to purchase a street milling machine.

Councilman Smith was pleased to note the expected savings of $900,000 over the next five years.

**ORDINANCE BOOK NO. 27 – PAGE 96**

Vice-Mayor Newman asked for public comments on any item on the Consent Agenda, but received none.

Vice-Mayor Newman said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Russell moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Bothwell and carried unanimously.

**ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES**

**C. RESOLUTION NO. 11-137 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A LEASE AGREEMENT WITH BELLSOUTH TELECOMMUNICATIONS, INC., d/b/a AT&T NORTH CAROLINA FOR PART OF THE SURFACE PARKING LOT LOCATED AT 25 O.HENRY AVENUE**

Summary: The consideration of a resolution authorizing the Mayor to execute a lease agreement between Bellsouth Telecommunications, Inc., d/b/a AT&T North Carolina and the City of Asheville for part of the surface parking lot located at 24 O.Henry Avenue.

The 2008 City of Asheville Comprehensive Parking Plan identified a deficit of available public parking during a typical weekday in downtown Asheville. In order to supply additional parking in Zone B, one of the deficit zones, the City has offered to enter into a lease with AT&T North Carolina for part of the surface parking lot located at the corner of O.Henry Avenue and Haywood Street (identified as PIN # 9649-20-5843-00000). The proposed lease area would provide 47 public parking spaces in proximity to the Asheville Civic Center, Grove Arcade, and 2the Haywood Street retail and business corridor.

The proposed term for the subject lease is five years, at an annual rental rate of $31,020 ($55 per parking space per month times 47 parking spaces times 12 months). City staff has performed analysis of monthly parking rates in downtown and found this price point to be consistent with those numbers. The City will also be responsible for paying for improvements to the parking lot to modify it for public parking including a pay-by-space machine, at an anticipated cost of $57,000. Assuming the up-front costs are annualized over the 5-year lease term and anticipating a conservative revenue stream, City staff believes that revenues will exceed expenses by $41,000 per year.

Given the responsibilities of a public utility, AT&T North Carolina has requested to reserve the right to use 20 of the 47 spaces in the event of an emergency, with rent to be abated if the use by AT&T exceeds 7 days.

This action complies with the City Council Strategic Operating Plan by supporting the Council goals: (1.) Establish relationships with outside partners in order to leverage community assets for public benefit; in this instance, partnering with AT&T North Carolina allows for the supply of much needed parking in a high demand area of downtown and (2.) Fiscal responsibility - incorporating public parking into existing private surface lots is an effective and efficient use of Parking Fund dollars. This action also complies with the 2008 City of Asheville Comprehensive

Parking Study by supplying an additional 47 spaces in one of the deficit zones in downtown Asheville.

Pros:

- Optimum location for downtown public parking
- Secured area with fencing
- Utilizing existing private un-used surface parking for public benefit
- Annual revenues should exceed annual expenses by $41,000

Con:

- Up-front costs of $57,000 and annual lease payment of $31,020.

The subject lease agreement includes up-front costs of about $57,000 and an annual lease payment of $31,020. The up-front costs can initially be absorbed in the current operating budget of the Parking Enterprises Fund and city staff anticipates that the annual revenues would exceed annual expenses including the annualized up-front costs by $41,000 per year.

City staff recommends City Council adopt a resolution authorizing the Mayor to execute the lease agreement with Bellsouth Telecommunications, Inc., d/b/a AT&T North Carolina on behalf of the City of Asheville.

Councilman Davis was pleased to recognize this important step for parking in the downtown area.

Director of Transportation Ken Putnam said that in approximately 90 days, we will have about 40-45 parking spaces available in what will be a pay by space lot.

Councilman Davis moved for the adoption of Resolution No. 11-137. This motion was seconded by Councilman Russell and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 71**

**H. RESOLUTION NO. 11-141 - RESOLUTION AUTHORIZING A PUBLIC HEARING TO BE HELD ON AUGUST 9, 2011, TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT FOR LINAMAR CORPORATION VIA INTER-LOCAL GOVERNMENT AGREEMENT WITH BUNCOMBE COUNTY**

Summary: The consideration of a resolution authorizing a public hearing to be held on August 9, 2011, to consider an economic development incentive grant for Linamar Corporation via inter-local government agreement with Buncombe County.

Linamar Corporation is a world-class designer and diversified manufacturer of precision metallic components and systems for the automotive industry, energy and mobile industrial markets. The company is proposing new, taxable, capital investment of $125,000,000 for location of a manufacturing facility to be located in the former Volvo facility in the City of Asheville. Linamar has requested consideration for a performance based incentive grant under the City of Asheville Economic Development policy. Further, the company has agreed that the incentive should be paid to Buncombe County through an inter-local agreement, to assist the County's purchase the Volvo property for use by Linamar. The City of Asheville is considering offering a performance-based grant totaling $2,200,000.

North Carolina state law requires a public hearing be held before an incentive grant can be officially awarded.

Pros:

- Performance driven grant that is distributed after job and investment is achieved;

- Supports job creation and capital investment in manufacturing in Asheville;
- Supports development of an identified economic cluster in the City; and,
- Supports regional and state cooperation in the project.

Cons:

- Grant is formulated based on use of 90% of value of new incremental machinery and equipment tax revenue for a 5 year period.

The project has a positive fiscal impact on property tax revenues received by the city. Initially (during the grant period), the City will receive approximately 10% of the new incremental M/E property tax revenues from the project. After 5 years, the City will henceforth receive 100% of the new city M/E taxes.

The economic development incentive grant for Linamar through the inter-local agreement with Buncombe County supports the City Council's Strategic Operating Plan as it addresses multiple focus areas. Under the Job Growth and Community Development focus area, the project supports the Goal of creating more collaborative and effective working partnerships between the COA, the business community, and other key organizations to effectively manage the city's regulatory environment while accomplishing economic development goals by meeting the objective to support diversified job growth and small business development. It supports the goal of supporting a strong local economy by continuing to implement sustainable growth and development policies by promoting sustainable, high density infill development that makes efficient use of existing resources.

City staff recommends Council approve a resolution authorizing a public hearing to be held on August 9, 2011, on an economic development incentive grant and inter-local government agreement with Buncombe County to support the location of Linamar Corporation.

Councilman Davis was pleased to recognize this important opportunity and partnership with the Economic Development Coalition and Buncombe County in bringing good jobs to our community.

Councilman Davis moved for the adoption of Resolution No. 141. This motion was seconded by Councilman Russell and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 75**

**III. PRESENTATIONS & REPORTS:** None.

**IV. PUBLIC HEARINGS:**

**A. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF A PORTION THE TRINITY UNITED METHODIST CHURCH (EXCLUDING THE STAND-ALONE PARKING LOT ON THE WEST SIDE OF THE PLACE OF WORSHIP), LOCATED AT 587 HAYWOOD ROAD, FROM COMMUNITY BUSINESS II DISTRICT AND RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO COMMUNITY BUSINESS II DISTRICT/ CONDITIONAL ZONING**

**ORDINANCE NO. 3995 - ORDINANCE TO CONDITIONALLY ZONE A PORTION THE TRINITY UNITED METHODIST CHURCH (EXCLUDING THE STAND-ALONE PARKING LOT ON THE WEST SIDE OF THE PLACE OF WORSHIP), LOCATED AT 587 HAYWOOD ROAD, FROM COMMUNITY BUSINESS II DISTRICT AND RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO COMMUNITY BUSINESS II DISTRICT/ CONDITIONAL ZONING**

Vice-Mayor Newman opened the public hearing at 5:20 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to conditionally zone a portion of the Trinity United Methodist Church (excluding the stand-alone parking lot on the west side of the place of worship), located at 587 Haywood Road, from Community Business II District and RM-8 Residential Multi-Family Medium Density District to Community Business II District/Conditional Zoning for the purpose of using the existing education building as a school. This public hearing was advertised on July 15 and 22, 2011.

Ms. Fields said that the Trinity United Methodist Church, located at 587 Haywood Road in West Asheville, is seeking conditional zoning approval for a portion of the parcel identified as PIN 9643.35-4182 (excludes the stand-alone parking lot on the west side of the place of worship) from CBII (Community Business II) and RM-8 (Residential Multi-Family Medium Density District) to CBII CZ (Conditional Zoning) to allow for the use of the existing church education building for a K-8 school.

The current educational building for the church, located to the rear (north) of the principal church building, is proposed to be utilized for the school. This building contains approximately 17, 220 square feet of space in a two-story building with a basement. Sixteen (16) classroom are in the building which, when combined with the needs of the church itself, per the City's Unified Development Ordinance, would require a minimum of 127 parking spaces (32 for the school and 95 for the church). 103 total spaces are available on site and in the adjoining church parking lot to the west. Planning Department Staff has determined that the existing parking is adequate as shared parking (per Section 7-11-2(e) of the UDO) due to the offset schedule of usage for the school and church.

As the buildings and parking areas are existing site features and due to the space limitations on the site, modifications for landscaping are being requested. These modifications are as follows:

1. Modifications for the intrusions of the existing educational and church buildings into the required property line buffer to the east (20 foot buffer). At the northeast corner of the educational building, the building is 18.93' from the boundary so a 1.07' modification is being requested. At the northeast corner of the principal church structure, the building is 8' from the boundary so a 12' modification is being requested. The applicant is proposing to move a storage shed that sits beside the church structure and put in plantings and a privacy fence to provide a buffer between the property and the adjacent residents.
2. A modification is sought for the required buffer plantings along the northern end of the site where the property is adjacent to RM-8 zoning. That end of the site contains over 50 large to medium sized trees with a credit value (per the UDO) of 83 trees. There is also a fence and other undergrowth in an undisturbed condition. Because of the density of the existing vegetation and existing visual screening, the applicant is requesting that this satisfy the property line buffer requirements in this area.
3. A modification is similarly being sought for the required buffer along the eastern border of the property where the property is adjacent to three homes zoned RM-8. The property (along that border) has a mix of fencing, leyland cypress, evergreen trees, and other existing smaller vegetation. The applicant is proposing to plant as many of the required plantings as is possible along that border, along with adding a 6' wooden privacy fence that will connect to the existing wooden fence in place along a portion of that property line. Due to the physical constraints in this area, the applicant is requesting a modification to allow the proposed and existing plantings and the privacy fence to satisfy the property line buffer requirements in this area.
4. Along Martin Avenue, street trees and street parking buffer would be required per the UDO if this were a site without existing constraints. Along the northeast property line the property slopes between the existing open space and Martin Avenue and contains a vegetative cover and along the parking area a small change in street buffer would be

required to meet the standards set forth in the UDO. At both property line areas there are existing trees and shrubs; they not fully compliant with all requirements of the UDO.

Staff is supportive of these modifications as the site conditions are existing ones and the applicant is proposing to plant as many of the required additional plantings as is practicable. Schools are permitted in both the CBII and RM8 Districts but this application is being submitted due to the needed modifications. The applicant is maintaining significant existing vegetation already on site.

The applicant is also seeking approval for phasing on this project related to cost and time constraints. They are proposing to complete all site improvements within a three year period (from permit issuance) as follows:

- Year 1 – All fencing and landscaping along property lines adjacent to residentially-zoned properties will be in place. The storage shed will be moved. Handicapped parking and walkways from the fire escape will be provided.
- Year 2 – New street trees and street buffer will be put in along Balm Grove Avenue.
- Year 3 – New building impact and vehicular use area landscaping will be planted.

Staff and the Planning and Zoning Commission are supportive of this phasing plan.

The Technical Review Committee reviewed this proposal on June 20, 2011, and recommended approval with conditions. The applicant has already submitted revised plans addressing these conditions.

At their meeting on July 6, 2011, the Asheville Planning and Zoning Commission reviewed and recommended approval of this rezoning 7-0. Only one person, other than the applicant, commented on this matter, to support the adaptive reuse of the church building and others along Haywood Road. The use of underutilized church buildings and parking has been discussed at recent meetings of the Haywood Road Vision Plan Committee.

The applicant has held meetings with the neighboring property owners and staff has not been contacted concerning this rezoning proposal.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. That the proposed use or development of the land will not materially endanger the public health or safety.
   The applicant is proposing to use the current church educational building on weekdays for a K-8 school. The project, if approved, must meet the technical standards set forth in the City's Unified Development Ordinance and all other applicable standards.

2. That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.
   Existing vegetation on the site is being maintained and no grading (except associated with additional landscaping) is required. While modifications are being sought for landscaping, the applicant is proposing to plant as many of the required plantings as is practicable.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.
Schools are a permitted use in the CBII and RM8 districts. Another K-8 school is located across Haywood Road.

4. That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.
No new construction is occurring as a result of this application. The application is to allow for additional use of a currently underutilized structure. The building in which the school would be housed is located behind the principal church structure which is located on Haywood Road, a major street in West Asheville on which a number of different uses are located.

5. That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.
The proposed use of the church building for educational purposes supports the statement found in the comprehensive plan that appropriately scaled non-residential uses that serve residents of an area should be permitted in appropriate locations.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.
The proposed use is located off of Haywood Road in West Asheville. Haywood Road is serviced by Transit Route 1 of the City's Transit System. The project has received approval from the City's Technical Review Committee concerning issues of water, fire, and police protection.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.
The City's Transportation Department has reviewed the plans for the traffic expected with this proposal and feels that it will not cause undue traffic congestion or create a traffic hazard.

Pro:

- The proposed use supports the City's goal that appropriately scaled non-residential uses that serve residents of an area should be permitted in appropriate locations.
- The proposal provides for more complete use of an existing building.

Con:

- None noted.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable and recommends approval of the conditional zoning request with the modifications concerning landscaping as requested and with the conditions set forth in the TRC report and the standards conditions listed below. At their meeting on July 6, 2011, the Asheville Planning and Zoning Commission unanimously (7-0) recommended approval of this conditional zoning.

Mr. Russell Davis, Civil Engineer representing the applicant, felt that this action zoning should have happened a long time ago and urged Council for their support. He said they have met with neighbors who are all supportive of this change.

The Pastor of Trinity United Methodist Church read a letter of support from a neighborhood representative Ms. Leigh E. Hillard.

Vice-Mayor Newman closed the public hearing at 5:32 p.m.

City Attorney Oast noted that even though the Church doesn't plan to use all 16 classrooms, there is nothing in the ordinance that would prohibit them from doing that. In addition, he reminded the Council that this rezoning is not limited to the current owner of the property and if it is rezoned it will be available for that use for anyone who might own it subsequently.

Vice-Mayor Newman said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Smith moved for the adoption of Ordinance No. 3995, to conditionally zone a portion of the Trinity United Methodist Church (excluding the stand-alone parking lot on the west side of the place of worship), located at 587 Haywood Road, from Community Business II District and RM-8 Residential Multi-Family Medium Density District to Community Business II District/Conditional Zoning subject to the modifications and phasing plan as recommended, and subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with cut-off fixtures or full cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; and (5) This project will undergo final review by the TRC prior to issuance of any required permits. This motion was seconded by Councilman Russell and carried unanimously.

**ORDINANCE BOOK NO. 27 - PAGE 98**

**B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE CONDITIONAL USE PERMIT FOR SUNSET PARK, LOCATED AT 2 SUNSET DRIVE**

Due to a legal advertising error this public hearing would be held on August 23, 2011.

## V. UNFINISHED BUSINESS:

**A. CONFIRMATION OF QUESTIONS TO BE SUBMITTED TO ALL PLANNING & ZONING COMMISSION CANDIDATES**

Vice-Mayor Newman said that each Council member had the opportunity of submitting three questions they wanted the Planning & Zoning Commission candidates to respond to in writing. The Boards & Commissions Committee narrowed all questions to arrive at a recommended five.

After a short discussion, Councilman Russell moved to send all candidates the following questions: (1) What is your vision for growth and development in Asheville; (2) Do you believe Asheville has taken an approach that is too "pro-growth" or "anti-growth" over the past 5-6 years? Please share your reasons; (3) How strictly should interpretation and application of the Unified Development Ordinance be applied?; (4) Name one Planning & Zoning Commission decision in the last 18 months you've agreed with and one you've disagreed with or would have struggled with. Please explain your rationale for each.; and (5) What are some of the positive or negative effects of Asheville's zoning regulations. This motion was seconded by Councilman Bothwell and carried unanimously.

## VI. NEW BUSINESS:

**A. RESOLUTION NO. 11-149 - RESOLUTION TO ENTER INTO A MEMORANDUM OF UNDERSTANDING WITH THE HOUSING AUTHORITY OF THE CITY OF ASHEVILLE IN A HUD CHOICE NEIGHBORHOODS PLANNING GRANT APPLICATION**

Community Development Director Jeff Staudinger said that this is the consideration of resolution to enter into a Memorandum of Understanding with Housing Authority of the City of Asheville in a HUD Choice Neighborhoods Planning Grant application.

The Housing Authority has been exploring for some time the possibilities of using US Department of Housing and Urban Development (HUD) HOPE VI funds to transform its public housing communities. The HOPE VI program (and earlier iterations) has awarded significant grants to housing authorities resulting in the restructuring of some of the most economically distressed public housing in the country. Program hallmarks have included creating mixed income housing where there was none, creating new opportunities for homeownership, revitalizing neighborhoods and reducing the concentration of lowest income households living in isolation and deteriorated physical and social conditions. The current administration has renamed this program "Choice Neighborhoods," and has broadened the scope beyond housing replacement to programmatically address neighborhood and social issues up front, with a focus on education, neighborhood stability and housing choice.

The Asheville Housing Authority performed a study in 2007-2008 to assess the physical condition of each of its public housing developments and determine which was the most physically distressed. The criteria of age, overall appearance, vacancy rates and police calls for service were used to rank the public housing developments in terms of HOPE VI threshold requirements. The report was released in October, 2008, and concluded that Aston Park Towers and Garden Apartments, Lee-Walker Heights and Pisgah View Apartments were candidates for HOPE VI funding. Since that time, HACA has invested significantly in the Aston Park development and has determined that Aston Park will not qualify for HOPE VI or Choice Neighborhoods funding under current guidelines for these programs. Lee-Walker Heights and Pisgah remain candidates for HOPE VI/Choice Neighborhoods funding, and they are the oldest and next-to-oldest public housing developments in the City, respectively.

HUD announced funding availability this summer for Choice Neighborhoods planning funding, with an application deadline of August 8, 2011. Approximately 20 Planning Grants of $300,000 each will be awarded. This planning grant would enable housing authorities to take the next steps in HOPE VI/Choice Neighborhood development by moving beyond assessment to development planning. These activities include resident and neighborhood engagement, architectural and engineering site and facility planning. The result of that planning activity would result in a proposed redevelopment of the public housing community and funding proposals for implementation.

Threshold criteria for grant consideration include the completed physical assessment, neighborhood crime rates, and vacancy rates. HACA has determined that Lee-Walker Heights and surrounding neighborhood appears to best meet the current criteria for consideration for Choice Neighborhood funding, and intends to submit an application for the planning grant. The selection of Lee Walker Heights is based on a neighborhood poverty rate that exceeds 40% and the highest per capita violent crime rate of any public housing development in the City, both of which are key factors in the HUD competition. He provided Council with a map of the proposed Choice Neighborhoods planning area. The grant program requires that a leadership team be identified, with the capacity to undertake the planning activities, oversee the work of consultants, and move the project to implementation. After consideration of the criteria, HACA believes that a team of Housing Authority and City staff meet the leadership team requirements. In support of the application, HACA is requesting that the City enter into a Memorandum of Understanding with

the Housing Authority to support the grant application, and if the application is successful, team with HACA in the Choice Neighborhood planning process.

The City has already made a financial commitment to this process. Council approved a CDBG grant of $40,038 in this year's annual action plan to support the anticipated planning process.

This project directly addresses the Strategic Plan objective to collaborate with the Housing Authority on HOPE VI or other strategies to revitalize public housing.

Pros:

- This opportunity continues the work of HACA towards public housing revitalization
- City partnership will enhance HACA's application

Con:

- City staff level of effort in support of the project will need to be assessed.

There is no immediate fiscal impact. CDBG funding has been allocated to the planning project. If the planning work leads to a HOPE VI (or similar) redevelopment project, significant resources for development will be needed. Funding available through the City, such as CDBG and HOME funding, and Housing Trust funds, would likely be requested. It is also possible that the proposed development/redevelopment would require assistance with infrastructure (roads, water, storm drainage). However, until the pre-development work is completed, it is impossible to know what those requests will look like. The planning period will be at least two years from grant award, probably commencing around the first of the year.

Staff recommends entering into a Memorandum of Understanding with the Housing Authority to participate in the HUD Choice Neighborhoods Planning Grant process.

Mr. David Nash, representing the HACA, noted the major investment in Aston Park Towers is yet to come and they are very close to completing the design. The grants are expected to be awarded in November or December and there would be a two-year planning period. He explained how they have looked at the three aspects of planning required by HUD – housing development that is the target of the application; people and neighborhood. He said that the map around Lee Walker Heights might be slightly modified as a result of meeting with the residents – the line on the east side would be at Biltmore Avenue (instead of going across Biltmore Avenue). In bringing the neighborhood component into the planning makes it essential that the City Planning Department be a part of this process. He asked that the resolution be amended slightly to say that the City of Asheville will participate as a co-applicant with the Housing Authority. That will allow HUD to consider the expertise of the City Planning Department in that neighborhood planning process.

In response to Councilman Bothwell, Mr. Nash said that the component of home ownership is not necessarily included, but it would be considered in the planning process.

Rev. Christopher Chiaronmonte commented about Aston Park Towers being sold to the rich.

Mr. Staudinger responded that this project is not for Aston Park Towers. Mr. Nash also responded that Aston Park Towers will continue to be available to low income residents in our community.

Vice-Mayor Newman said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Bothwell moved for the adoption of Resolution No. 11-149, as amended to have the City be a co-applicant with the HACA, and that the map be slightly amended to reflect the east side line being Biltmore Avenue. This motion was seconded by Councilman Davis and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 89**

**VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:**

Rev. Christopher Chiaronmonte spoke the Asheville's treatment of the homeless.

Rev. Lisa Landis questioned the reasoning why the City issued a Request for Proposals for running a public access channel as she felt the URTV model was already in use and was a pilot for other public access stations.

Dr. Milton Byrd spoke about leadership and management.

**Claims**

The following claims were received by the City of Asheville during the period of June 20-30, 2011: Evelyn Oswell (Water), Nancy Cole (Streets), AT&T (Water), AT&T (Water), Kyle English (Parking Services) and Lisa May (Streets). These claims have been referred to Asheville Claims Corporation for investigation.

The following claims were received by the City of Asheville during the period of July 1 – 21, 2011: Enrique Romero (Sanitation), Anne F. Kaufman (Sanitation), Eddie Miller (Sanitation), The Bayshore Co. (Water), Alta Foster (Streets), Antonio Ripley (Transit), James Honey (Sanitation), Wilbur Neely Thomas (Police), Cythia Whatley (Transit), Jailateef Williams (Streets) and Eric Hutzler (Water). These claims have been referred to Asheville Claims Corporation for investigation.

**Closed Session**

At 6:06 p.m., Councilman Smith moved to go into closed session for the following reasons: (1) To discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session. The statutory authority is contained in G.S. 143-318.11 (a) (4); (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including a lawsuit involving the following parties: City of Asheville; J. Jerome Jensen, et al (Biltmore Lake Annexation). The statutory authorization is N.C. Gen. Stat. sec. 143-318.11(a) (3); and (3) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Russell and carried unanimously.

At 6:44 p.m., Councilman Smith moved to come out of closed session. This motion was seconded by Councilman Davis and carried unanimously.

**VIII. ADJOURNMENT:**

Vice-Mayor Newman adjourned the meeting at 6:44 p.m.

Magdalen Burkson
CITY CLERK

MAYOR

Tuesday – August 9, 2011 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilwoman Esther E. Manheimer (participated during speaker phone during portion of meeting)

**PLEDGE OF ALLEGIANCE**

Mayor Bellamy led City Council in the Pledge of Allegiance.

**MOMENT OF SILENCE FOR FIRE CAPTAIN JEFFREY SCOTT BOWEN**

Mayor Bellamy asked for a moment of silence for Captain Jeffrey Scott Bowen who died on July 28, 2011, as a result of injuries sustained fighting a fire at 445 Biltmore Avenue, Asheville, N.C.

Mayor Bellamy read Capt. Bowen's obituary and said that community really suffered a loss on July 28. On behalf of City Council, she thanked the many who helped hold the arms up of the family members and the members of the Asheville Fire Department. She thanked the Public Works Department staff who helped the Asheville Fire Department on the day of the fire. She also thanked the various municipal and volunteer fire departments, Sheriff Departments, etc. across North Carolina who pitched in to support the Asheville Fire Department. Because she was out of town, she thanked Councilman Davis for stepping in and representing City Council during the City Employee Memorial Service for Capt. Bowen. She also expressed her sincere condolences to the Bowen family noting that Capt. Bowen served his community and family well.

Those members of Council who wished expressed their sympathy to the family of Capt. Bowen and also thanked all those who put their lives on the line for us every day.

City Council also expressed their deepest sympathy to the family of Mr. John Mark Crowe, a Metropolitan Sewerage District worker who was killed on duty on August 1, 2011.

**INVOCATION**

Councilman Bothwell gave the invocation.

**I. PROCLAMATIONS:**

**A. EMPLOYEE RECOGNITIONS**

City Manager Jackson recognized (1) Eric Hagen, Facilities Maintenance Division Manager in Building Safety Department. He successfully completed a nine month program at North Carolina State University and awarded an Energy Management Diploma for the University on June 6, 2011; (2) Sara McHone, Safety & ISO Compliance Coordinator - Water Resources Department Re-Certification of ISO 14001 Environmental Management Program; (3) Stephanie Monson, Urban Planner II. Ms. Monson received the American Institute of Certified Planners (AICP) certification in May 2011; (4) Randy Shaw, Recreation Center Director II - 2010 Distinguished Therapeutic Recreation Department; and (5) Wanda Burgess, Jeff Reble, Tim Reimers, Gilbert Domingo, Steven Frey, Joe Robinson, John Kutscher, James Allen, Robert

Clark, Steve Brown and Tony Rathbone – Their work in obtaining the GMIS Best Practices Award.

Mayor Bellamy thanked the employees on what they do on behalf of the City of Asheville and City Council. She was proud of City staff and looked forward to highlighting more accomplishments.

**B. INTRODUCTION OF VALLADOLID DELEGATION**

Mayor Bellamy introduced Mr. Rick Lutovsky, President of Asheville Sister Cities, and Mr. Russ Martin, Co-Chair of Valladolid Committee. Mr. Martin introduced a member of the Valladolid delegation. He said that Asheville Sister Cities will be planning a trip to Valladolid in November and hoped to have representation from the City of Asheville.

Mayor Bellamy read a proclamation proclaiming August 9, 2011, as "Asheville Sister City/Valladolid Day" in the City of Asheville.

**II. CONSENT AGENDA:**

Councilman Russell asked for discussion on Consent Agenda Item "G".

**A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JULY 26, 2011**

**B. ORDINANCE NO. 3996 - ORDINANCE REDUCING THE SPEED LIMIT ON ARNOLD ROAD IN EAST ASHEVILLE FROM 35 MPH TO 25 MPH**

Summary: The consideration of an ordinance to enact and/or change a speed limit on Arnold Road in East Asheville.

According to state law (NCGS # 20-141), the statutory speed limit in North Carolina is 35 mph inside municipal corporate limits for all vehicles and 55 mph outside municipal corporate limits for all vehicles except for school buses and school activity buses.

Furthermore, local authorities may authorize by ordinance higher speeds or lower speeds than the statutory 35 mph speed limit on locally-maintained streets provided that the higher speed limit cannot exceed 55 mph. Speed limits authorized by local authorities are effective when the appropriate signs are erected.

City staff recently completed an engineering and traffic investigation and determined that a 25 mph speed limit would be reasonable and safe on Arnold Road from US 70 (Tunnel Road) to its dead-end. The subject street provides access to about 15 residential properties in an established neighborhood. Daily traffic volumes are less than 200 vehicles per day and the 85$^{th}$ percentile speed is 24.2 mph.

This action complies with the City Council Strategic Operating Plan in the Safety focus area by improving the "street experience" for all users including pedestrians, bicycles, and motorists in a primarily residential corridor.

Pros:

- City staff has been able to respond favorably to a citizen's request.
- Based on the 85$^{th}$ percentile speed, most drivers would adhere to a 25 mph posted speed limit.

Cons:

- The initial cost to install the appropriate speed limit signs is about $200.

- Typically, speed limit signs have a serviceable life of five to seven years.

The initial cost to install the appropriate speed limit signs is about $200 and is included in the current operating budget for the Transportation Department.

City staff recommends that City Council approve an ordinance enacting and/or changing a 25 mph speed limit on Arnold Road from US 70 (Tunnel Road) to its dead-end in East Asheville.

**ORDINANCE BOOK NO. 27 – PAGE 103**

**C. RESOLUTION NO. 11-150 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH CAPTURION NETWORK LLC FOR THE INSTALLATION OF NEW SCOREBOARDS AND VIDEO BOARDS IN THE ASHEVILLE CIVIC CENTER ARENA**

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Capturion Network, LLC. in the amount of $ 254,715 for the installation of new scoreboards and video boards in the Asheville Civic Center arena.

The replacement of the existing scoreboards is another integral element of the Civic Center renovation plans. The new scoreboards will allow patrons to have an improved view of the score during sporting events from virtually anywhere within the arena. The addition of Video Screens in the Concourse area will allow patrons to follow the action while they are visiting the concessions areas.

The following bids were received:

| | |
|---|---|
| Capturion Network LLC, Laurel, MS | $254,715 |
| Daktronics Inc., Concord, NC | $293,055 |
| Everbrite, LLC, Pardeeville, WI | $293,000 |

The replacement of the scoreboards is part of the overall renovations in preparing to host the Southern Conference Basketball Tournament beginning in March 2012 and through 2015.

This action complies with the City Council Strategic Operating Plan's Fiscal Responsibility goal of developing strategic partnerships to leverage resources for infrastructure and CIP projects. This action also complies with the Civic Center Commission Master Plan that encourages continuing renovations for the facility, and supports the goal of developing new partnerships. It has been reviewed and recommended by the Civic Center Commission.

Pros:

- Project allows replacement of obsolete scoreboards.
- New scoreboards are much brighter and easier to see for the patrons.
- Project bid is below budget.

Con:

- None noted.

Funding for this contract is included in the Civic Center Capital Fund as part of the budget for the Southern Conference renovations.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with Capturion Network LLC for $ 254,715 for the installation of new scoreboards and video boards in the Asheville Civic Center arena and concourse.

**RESOLUTION BOOK NO. 34 – PAGE 90**

**D. RESOLUTION NO. 11-151 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH SPL INTEGRATED SOLUTIONS (AVI-SPL, INC.) FOR THE INSTALLATION OF A NEW SOUND REINFORCEMENT SYSTEM IN THE ASHEVILLE CIVIC CENTER ARENA RESOLUTION BOOK NO. 34 – PAGE**

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with SPL Integrated Solutions (AVI-SPL, Inc), in the amount of $ 368,233.71 for the installation of a new Sound Reinforcement System in the Asheville Civic Center arena.

The replacement of the existing sound reinforcement system is another integral element of the Civic Center renovation plans. The new sound system will allow patrons to better hear announcements during sporting events and other events anywhere within the arena. This new system will also allow for better communication to patrons in the event of an emergency.

The following bids were received:

| | |
|---|---|
| SPL Integrated Solutions, Columbia, MD | $368,233.71 |
| Musicraft Inc., Roebuck, SC | $425,675.00 |
| Daktronics Inc., Concord NC | $497,680.00 |

The replacement of the sound reinforcement system is part of the overall renovations in preparing to host the Southern Conference Basketball Tournament beginning in March 2012 and through 2015.

This action complies with the City Council Strategic Operating Plan's Fiscal Responsibility goal of developing strategic partnerships to leverage resources for infrastructure and CIP projects. This action also complies with the Civic Center Commission Master Plan that encourages continuing renovations for the facility, and supports the goal of developing new partnerships. It has been reviewed and recommended by the Civic Center Commission.

Pros:

- Project allows replacement of an obsolete sound system.
- New sound system will create a much clearer sound experience during events.
- Project bid is below budget.

Con:

- None noted.

Funding for this contract is included in the Civic Center Capital Fund as part of the budget for the Southern Conference renovations.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with SPL Integrated Solutions (AVI-SPL, Inc), for $ 368,233.71 for the installation of new sound reinforcement system in the Asheville Civic Center arena and concourse.

**RESOLUTION BOOK NO. 34 – PAGE 91**

**E. RESOLUTION NO. 11-152 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION ON A BI-ANNUAL BASIS FOR THE RE-INSPECTION OF BRIDGES ON THE MUNICIPAL STREET SYSTEM**

Summary: The consideration of a resolution authorizing the Mayor to enter into a municipal agreement with the N.C. Dept. of Transportation (NCDOT) on a bi-annual basis for the re-inspection of bridges on the Municipal Street System.

In 1983 the Federal Highway Administration developed the Federal Off-System Bridge Replacement Program. The program is funded 80% through federal funds and 20% through City funds and administered by the NCDOT. To remain eligible for replacement funds and avoid penalties, it is required that all public bridges are inspected every two years. The NCDOT offers three options for meeting the bi-annual inspection requirements – (1) do the inspection with City forces; (2) the City to hire a consultant to do the inspections; (3) the City to allow NCDOT to do the inspections through a qualified private engineering firm.

Since 1983 the City has elected to execute an agreement with NCDOT to accomplish the required inspection thorough their personnel or engineering consultants. This process allows high numbers of bridges to be inspected under one contract or operation, and therefore, results in minimum inspection cost per bridge. It is anticipated the inspections cost to be $2,600 per bridge for the upcoming inspections. The City has 31 bridges requiring inspection this year, which brings the cost to $80,600. The City's share of 20% is $16,120. Funds for the City's share are budgeted in the Public Work's Professional Services budget line.

This action complies with City Council's Strategic Operating Plan in the Focus Areas – Fiscal Responsibility and Safe

Pros:

- Lower cost of bridge inspection due to high volume.
- Use of qualified engineering firms through DOT.
- Fulfills requirement for bi-yearly bridge inspections.
- Indicates areas for repair for PW staff.

Con:

- None identified

The fiscal impact is an expenditure of $16,120, budgeted in Public Work's Professional Services.

City staff recommends adoption of the resolution authorizing the Mayor to execute a municipal agreement with NCDOT for inspection of bridges.

**RESOLUTION BOOK NO. 34 – PAGE 92**

**F. RESOLUTION NO. 11-153 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A NEW ENTERPRISE LICENSE AGREEMENT WITH ESRI, INC. FOR GEOGRAPHIC INFORMATION SYSTEMS SOFTWARE**

Summary: The consideration of a resolution authorizing the City Manager to sign a new Enterprise License Agreement with ESRI, Inc. in the amount of $150,000 over 3 years payable in $50,000 yearly installments for Geographic Information Systems (GIS) software.

The City of Asheville has used ESRI GIS software for 13+ years as a keystone software information system. Many internal processes including asset management, code enforcement, public safety dispatch, stormwater utility billing, infrastructure maintenance, sanitation service, development services, etc., rely on GIS expertise and software. Citizens also rely on GIS for Internet information portals such as the mapAsheville applications (Development Mapper, Crime Mapper, and Priority Places, etc). City Council also relies on the City's GIS via planning and development decision visualizations.

The existing contract has held maintenance flat for the past 3 years. Typical increases in such software maintenance contracts average approximately 5% per year. With the execution of another 3 year contact, we will be able to hold our maintenance costs at $50,000 per year for next 3 years. Annual maintenance payments are required in order to keep software in a reliable and supported state. This contract also means that the City may provide unlimited staff installations as well as server software installation of this software thus saving money on additional licensing fees as a result of expanded services.

Specific City Council Strategic Operating Plan priority areas with goals that are supported by GIS technology include Community Building, Critical Services & Infrastructure, Natural & Built Environment, Economic Development, and Growth, Development & Land Use

Pros:

- Increased support of departmental business requirements via greater options for GIS software licensing.
- Ability to install additional software without additional purchases.
- Hold the line on increasing software maintenance costs.

Con:

- If continued funding for future years is not appropriated, some staff will lose ability to utilize some GIS software.

The first year cost of $50,000 was included in the adopted FY2011-2012 General Fund budget.

City staff recommends City Council adopt a resolution authorizing the City Manager to sign an Enterprise License Agreement with ESRI, Inc.

**RESOLUTION BOOK NO. 34 – PAGE 93**

**G. RESOLUTION NO. 11-154 - RESOLUTION APPROVING REVISIONS TO THE CITY COUNCIL STRATEGIC OPERATING PLAN**

Summary: On June 14, the City Manager provided Mayor Bellamy with a draft of the 2011-2012 Strategic Operating Plan. Upon her review, she identified the need for multiple revisions.

Councilman Russell expressed concern on two of the following revisions: (1) Under Affordable, he personally liked the original wording of "Hold the line on taxes and support tax and fee relief" instead of Mayor Bellamy's revision to "Hold the line on taxes and minimize fees."; and (2) Under Job Growth & Community Development, he personally liked the original wording of "Support businesses through reductions in taxes, fees, and regulations" opposed to Mayor Bellamy's revisions of "Support business through limited taxes, fees, and regulations."

Mayor Bellamy felt the revised language is more reflective of what is happening.

Vice-Mayor Newman is overall very supportive of these broad goals. We are not going to be able to achieve these goals over the next few years.

Councilman Russell moved to approve the revisions as suggested by Mayor Bellamy, except under Fiscal Responsibility the original language in Goal I, Objective 2 "Sustain at least a 15% Fund Balance" remain the same. This motion was seconded by Vice-Mayor Newman.

Mayor Bellamy supported her revised language to "Increase fund balance towards the 15% threshold" as our Director of Finance & Management said that it would not happen this fiscal year. Councilman Russell responded that it would be Council's goal to make it happen.

Vice-Mayor Newman said the Strategic Operating Plan is not strictly tied to a fiscal year so theoretically the goals would influence the current budget and next year's budget. He would hope that over the next two budget cycles we can achieve that goal.

Mayor Bellamy has repeatedly said we need to be at the 15% in Fund Balance and was pleased that Council wants to achieve that goal.

Because this item is under the Consent Agenda and a motion has not been made to adopt the entire Consent Agenda at this time, Councilman Russell withdrew his motion.

**RESOLUTION BOOK NO. 34 – PAGE 94**

**H. RESOLUTION NO. 11-155 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT YAPPY HOUR ON AUGUST 11, 2011**

**RESOLUTION NO. 11-156 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE RANGE ROVER EVOQUE LAUNCH ON AUGUST 25, 2011**

**RESOLUTION NO. 11-157- RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE LEXINGTON AVENUE ARTS & FUN FESTIVAL ON SEPTEMBER 3 AND 4, 2011**

**RESOLUTION NO. 11-158 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ORGANICFEST ON SEPTEMBER 10, 2011**

**RESOLUTION NO. 11-159 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT ASHEVILLE CITIZEN-TIMES HALF MARATHON & 5K ON SEPTEMBER 17, 2011**

**RESOLUTION NO. 11-160- RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT OKTOBERFEST ON OCTOBER 8, 2011**

**RESOLUTION NO. 11-161- RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE SYMPHONY IN THE PARK ON SEPTEMBER 5, 2011**

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at Yappy Hour on August 11, 2011; the Range Rover Evoque Launch on August 25, 2011; the Lexington Avenue Arts & Fun Festival on September 3 and September 4, 2011; OrganicFest on September 10, 2011; Asheville Citizen-Times Half Marathon & 5K on September 17, 2011; Oktoberfest on October 8, 2011; and Symphony in the Park on September 5, 2011.

- Asheville Humane Society has requested through the City of Asheville Development Services Center that City Council permit them to serve beer and/or unfortified wine at Yappy Hour and allow for consumption at this event.

Yappy Hour be held Thursday, August 11, 2011, from 6:00 p.m. – 8:00 p.m., within the boundaries of Pack Square Park's Roger McGuire Green as per the event area limits referenced on a site map.

- Jaguar Land Rover Asheville has requested through the City of Asheville Development Services Center that City Council permit them to serve beer and/or unfortified wine at the Range Rover Evoque Launch and allow for consumption at this event.

  The Range Rover Evoque Launch will be held on Thursday, August 25, 2011, from 6:00 p.m. to 8:00 p.m. within the boundaries of North Pack Square and Pack Square Park's raised lawn as per the event area limits referenced on a site map.

- Arts2People has requested through the City of Asheville Development Service Center that City Council permit them to serve beer and/or unfortified wine at the Lexington Avenue Arts & Fun Festival and allow for consumption at this event.

  The Lexington Avenue Arts & Fun Festival will be held on Saturday, September 3, 2011, from 11:00 a.m. to 11:00 p.m. and Sunday September 4, 2011, from 11:00 a.m. to 9:00 p.m. within the boundaries of Lexington Avenue between the intersections of College Street and the I-240 overpass, Walnut Street between Lexington Avenue and Carolina Lane, as per the event area limits referenced on a site map.

- OrganicAthlete has requested through the City of Asheville Development Service Center that City Council permit them to serve beer and/or unfortified wine at OrganicFest and allow for consumption at this event.

  OrganicFest will be held on Saturday, September 10, 2011, from 10:00 a.m. to 8:00 p.m. within the boundaries of Pack Square Park's Roger McGuire Green as per the area limits referenced on a site map.

- Lend-a-Hand Foundation has requested through the City of Asheville Development Services Center that City Council permit them to serve beer and/or unfortified wine at the Asheville Citizen-Times Half Marathon & 5K and allow for consumption at this event.

  The Asheville Citizen-Times Half Marathon & 5K will be held on Saturday, September 17, 2011, from 5:30 a.m. to 12:00 p.m. along various streets with alcohol restricted to a portion of Otis Street, as per the event area limits referenced on a site map.

- The Asheville Downtown Association has requested through the City of Asheville Development Service Center that City Council permit them to serve beer and/or unfortified wine at Oktoberfest and allow for consumption at this event.

  Oktoberfest will be held on Saturday, October 8, 2011, from 12:00 p.m. to 6:00 p.m. within the boundaries of Wall Street between Otis Street and Battery Park Avenue, additionally extending into one lane of Battery Park Avenue at Wall Street as per the area limits referenced on a site map.

- The Pack Square Conservancy has requested through the City of Asheville Development Service Center that City Council permit them to serve beer and/or unfortified wine at Symphony in the Park and allow for consumption at this event.

  Symphony in the Park will be held on Monday, September 5, 2011, from 7:00 p.m. to 9:30 p.m. within the boundaries Pack Square Park's Roger McGuire Green, Reuter Terrace, City-County Parking Lot, and Spruce Street between College Street and Court Plaza as per the area limits referenced on a site map.

These actions have no direct connection with the City of Asheville Strategic Operating Plan.

Pro:

- Allows fundraising opportunities for the Asheville Humane Society, Jaguar Land Rover Asheville, Arts2People, OrganicAthlete, Lend-a-Hand Foundation, Asheville Downtown Association and the Pack Square Conservancy.

Con:

- Potential for public safety issues

There is no fiscal impact.

City staff recommends City Council adopt the resolutions authorizing the City Manager to approve a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at Yappy Hour, Range Rover Evoque Launch, Lexington Avenue Arts & Fun Festival, OrganicFest, Asheville Citizen-Times Half Marathon & 5K, Oktoberfest, and Symphony in the Park.

**RESOLUTION NO. 11-155 - RESOLUTION BOOK NO. 34 – PAGE 98**
**RESOLUTION NO. 11-156 - RESOLUTION BOOK NO. 34 – PAGE 101**
**RESOLUTION NO. 11-157 - RESOLUTION BOOK NO. 34 – PAGE 104**
**RESOLUTION NO. 11-158 - RESOLUTION BOOK NO. 34 – PAGE 107**
**RESOLUTION NO. 11-159 - RESOLUTION BOOK NO. 34 – PAGE 110**

**RESOLUTION NO. 11-161 - RESOLUTION BOOK NO. 34 – PAGE 116**

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Russell moved for the adoption of the Consent Agenda with an amendment to Consent Agenda Item "G" to reflect under Fiscal Responsibility the original language in Goal I, Objective 2 "Sustain at least a 15% Fund Balance" remain the same. This motion was seconded by Councilman Davis Vice-Mayor Newman and carried unanimously.

## III. PRESENTATIONS & REPORTS:

## IV. PUBLIC HEARINGS:

**A. PUBLIC HEARING TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT FOR LINAMAR CORPORATION VIA AN INTERLOCAL GOVERNMENT AGREEMENT WITH BUNCOMBE COUNTY**

**RESOLUTION NO. 11-162 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A $2,200,000 ECONOMIC DEVELOPMENT INCENTIVE GRANT FOR LINAMAR CORPORATION VIA AN INTERLOCAL GOVERNMENT AGREEMENT WITH BUNCOMBE COUNTY**

Mayor Bellamy opened the public hearing at 5:36 p.m.

Economic Development/Civic Center Director Sam Powers said that this is the consideration of a resolution authorizing the City Manager to enter into a $2,200,000 economic development incentive grant for Linamar Corporation via an interlocal government agreement with Buncombe County. This public hearing was advertised on July 29, 2011.

Linamar Corporation is a world-class designer and diversified manufacturer of precision metallic components and systems for the automotive industry, energy and mobile industrial markets. The company is proposing new, taxable, capital investment of $125,000,000 for location of a manufacturing facility to be located in the former Volvo facility substantially all of which is located in the City of Asheville. Linamar has requested consideration of a performance based incentive grant under the City of Asheville Economic Development policy. Further, the company has agreed that the incentive should be paid to Buncombe County through an inter-local agreement, to assist the County's purchase the Volvo property for use by Linamar. The City of Asheville is considering offering a performance-based grant totaling $2,200,000.

The City of Asheville proposes to reimburse Buncombe County for a portion of the County's payments to Linamar. The performance-based grant will be paid over a five (5) year period. Payments begin after the investment is made, taxes are paid and verified, and the County requests payment. The first such payment is anticipated to be made no later than March 1, 2013, with subsequent payments to be made annually through and including 2017, together with a Job Creation payment. The payment schedule is set forth in the Inter-local Agreement. The amount of the annual payment will take into consideration the estimated annual property tax revenue attributable to the capital improvements, and each annual payment is projected to equal no more than approximately 90% of said estimated revenue.

The economic development incentive grant ties into City Council's Strategic Operating Plan as it addresses multiple focus areas of the Plan. Staff believes that the project will improve the economic position of the City and the area.

Pros:

- Performance driven grant that is distributed after job and investment is achieved;
- Supports job creation and capital investment in manufacturing in Asheville;
- Supports development of an identified economic cluster in the City; and,
- Supports regional and state cooperation in the project.

Con:

- Grant is formulated based on use of up to 90% of value of new incremental property tax revenue for a five year period.

The project has a positive fiscal impact on property tax revenues received by the city. Initially (during the grant period), the city will receive approximately 10% of the new incremental property tax revenue from the project. After five years, the City will henceforth receive 100% capture of new taxes.

City staff recommends Council approve the resolution authorizing an economic development incentive grant for Linamar Corporation via Inter-local government agreement with Buncombe County, not to exceed $2,200,000.

Rev. Lisa Landis felt that government has become corporate and raised several questions regarding whether the company would hire locally or from outside western North Carolina.

Mayor Bellamy said that this will result in 400 new jobs, not the company transferring their current employees to this area. They will be hiring at all levels and they are using A-B Technical Community College to train people to perform some of the tasks. This is a wonderful opportunity for our community to grow.

When City Attorney Oast handed out a missing exhibit from Council's on-line package of agenda materials (the County's agreement with Linamar), Councilman Bothwell was troubled that this information was not available to the citizens to comment on and that Council didn't know ahead of time what they were voting on. He agreed that it's good that our community is getting

new jobs; however, he does not support how communities and states have to compete for corporations to locate in their area. He could not support using our current taxpayer dollars to support a corporation that will be making millions of dollars.

In response to Mayor Bellamy, City Attorney Oast said this is a performance based contract, which means we don't make any economic development incentive payment until the tax revenue to be generated by this investment has been received by the City.

In response to Councilman Bothwell, City Attorney Oast said that the City will be providing the full range of municipal services during the 5-year period.

Vice-Mayor Newman wished we could compete purely on which community has the best schools, best infrastructure, best quality of life, but that is not reality. That is not the way economic development works. For companies that have the ability to locate anywhere in the country, we do have to compete based on many factors. If we are not willing to complete, we will not be able to attract new economic development projects. He felt that Linamar is an outstanding corporation and looked forward to a long partnership between Linamar and the City of Asheville.

Mayor Bellamy said that in the last 3-5 years our community has lost a lot of jobs and this action will add 400 new jobs, allowing some of our unemployed to get off food stamps, have health insurance and a steady income. Our people need jobs and we need to try to make that happen. In addition, the City's partnership with Linamar may lead to other businesses that supply Linamar products to want to locate here.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Russell moved for the adoption of Resolution No. 11-162. This motion was seconded by Vice-Mayor Newman and carried on a 5-1 vote, with Councilman Bothwell voting "no."

**RESOLUTION BOOK NO. 34 – PAGE 119**

**B. CONTINUATION OF PUBLIC HEARING TO CONSIDER CLOSING SEVERAL PORTIONS OF UNOPENED RIGHTS-OF-WAY AND CITY STREETS WITHIN THE MONTFORD COMMONS DEVELOPMENT AREA**

Mayor Bellamy said that she has received a request from Mr. Kyle Evans, representing Montford Commons, LLC, requesting a continuance until October 11, 2011, as they are still waiting to receive the final funding commitment from HUD required to move the project forward. A representative from Frontier Syndicate explained that HUD continues to ask for information about their project and all arrows indicate that they should be approved soon. Therefore, Councilman Russell moved to continue this public hearing until October 11, 2011. This motion was seconded by Vice-Mayor Newman and carried unanimously

**V. UNFINISHED BUSINESS:**

**A. REVIEW OF PACK SQUARE PARK RATE STRUCTURE**

Director of Building Safety Director Robert Griffin said that this is a report on the rental fees for Pack Square Park after one year of operation.

The City of Asheville permits events and festivals with Pack Square Park through the Development Service Center. Coordination with all applicable departments assures the organizer

and the City the event or festival meets the applicable Building Codes and City of Asheville Ordinances that would specifically apply for the event or festival within Pack Square Park.

The first event reserving Pack Square Park was in May 2010 with full access in the summer of 2010. During the fiscal year of July 1, 2010 – June 30, 2011, the Park had 82 events scheduled within the boundaries. July – December had 48 events and January through June had 34 events. Many of these were in one of the three sections of the Park rather than the entire Park. The three sections that can be reserved for an event are the Roger McGuire Green, Reuter Terrance, and the raised lawn in front of the Biltmore Building. Some expansion of these areas can occur through the additional closure of Spruce Street to seamlessly connect the Roger McGuire Green with Reuter Terrace, the closure of North Pack Square to include the Vance Monument median in conjunction with reservation of the raised lawn, and the closure of South Pack Square to utilize the full Park as a continuous event site. At no point can Market Street be closed due to the need for emergency vehicle access for Police and Fire from the Municipal Building to College Street.

The reservation policy for the Park in July 2010 would allow only one event per day to be scheduled within any one section of the Park. This allowed the Park grounds to mature and for staff to assess the Park abilities. In early 2011, the Parks, Recreation, and Culture Arts Department and Building Safety Department reviewed the experiences and agreed to allow multiple events per day, per section of the Park, provided there is sufficient turnaround time for pre and post event logistics between activities. Consideration must also be made based on event type, scale, and impact of simultaneous events within close proximity such as with amplified sound, combined temporary infrastructure and attendance maximums.

The rental fees for Pack Square Park during the period of July 1, 2010, through June 30, 2011, were $100 for three hours with an additional $25 per hour for the raised lawn and $500 for three hours with an additional $100 per hour for the Reuter Terrace and Roger McGuire Green. The Terrace and Green had to be reserved as one unit. Many events reserved the combination of the Terrace and Green but only utilized one or the other based upon their activity. Many organizers asked that consideration be given to separating these areas for events. The Fees and Charges approved with the fiscal year beginning July 1, 2011, added a fee for Reuter Terrace at $100 for three hours with an additional $25 per hour. The rental fee for Roger McGuire Green kept the fee established at $500 for three hours. Beginning in July 2010 all events by a 501(c)3 non-profit organizations received a 75% reduction in Park fees. During the fiscal year ending June 30, 2011, $25,368.75 in discounts applied. Another change in the Fees and Charges beginning July 1, 2011, applied to the non-profit discount. After six events within a 12 month period the non-profit would no longer be eligible for the 75% reduction in fees.

In meetings with stakeholders, event organizers, the Downtown Commission, and others the fees for Pack Square Park appear to be appropriate and the process is producing few operating issues or conflicts. Operating issues and conflicts do arise but those are confined to specific issues associated with that event or circumstance rather than be directly related to fees and processes.

This action complies with the City Council Strategic Operating Plan by contributing to fiscal responsibility.

Pro:

- Provides enhanced use of Pack Square Park for events

Con:

- None

There is no fiscal impact with the policies in place and approved by Council.

City staff provides the staff report as information to City Council and requests confirmation or direction if they feel appropriate.

At the request of Councilman Davis, it was the consensus of Council to have City Manager Jackson provide Council with information regarding rental from previous years as a way to benchmark going forward.

At this time, Councilwoman Manheimer was contacted and participated in the following portions of the meeting via speaker phone.

**B. RESOLUTION NO. 163 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AMENDED CONTRACT WITH CURBSIDE MANAGEMENT TO PROVIDE RECYCLING FOR 95 GALLON RECYCLING CONTAINERS**

**ORDINANCE NO. 3997 - ORDINANCE AMENDING THE FEES & CHARGES MANUAL TO ESTABLISH THE RECYCLING FEE AT $3.50**

Director of Public Works Cathy Ball said that this is the consideration of (1) a resolution authorizing the City Manager to enter into an amended agreement with Curbside Management, Inc. (CMI) for the provision of recycling collection and related services for City of Asheville residences and facilities; and (2) an ordinance amending the Fees and Charges Manual such that the Recycling Fee will be $3.50 effective January 1, 2012.

Per Council's approval on May 10, 2011, to proceed with the implementation of a citywide residential single-stream recycling program with 95 gallon roll carts, an amendment to the current curbside residential recycling contract with CMI was drafted. The amended agreement allows for the provision of 95 gallon roll carts by the City of Asheville and requires CMI to service the roll carts, ensuring contents are recycled. The contract is at the same cost that we are paying now with a CPI index for a 10-year period of time. The contract also allows for the expansion of recyclable materials to include: additional plastic containers (e.g., yogurt containers, margarine tubs, clam shells, lids, etc.), gable top containers (e.g., juice and milk cartons), and aseptic containers (e.g., juice boxes). The collection frequency will remain unchanged with residential recyclables collected every other week. Staff estimates that the increase in materials recycled from the single-stream program will lead to an estimated disposal savings of $105,000 per year.

If approved, CMI will need six months to procure the necessary equipment to collect the roll carts and be ready to implement single-stream recycling. During those six months, the city would procure roll carts and all necessary equipment, implement a community education initiative, and deliver roll carts citywide.

Staff has evaluated entering into a contract with RecycleBank and is recommending that we delay any action on this item for a two year period. After recent efforts to benchmark with communities that have implemented RecycleBank, they have shared the difficulty in determining the impact the RecycleBank program has when it is implemented in conjunction with other changes such as the 95 gallon contain, single stream recycling and increased material collection.

Staff is recommending a fee increase from $2.95 per month to $3.50 per month effective January 1, 2012. The additional $0.55 would be used to cover cost outlined in the table below.

| Item | Description | Annual Cost | Monthly Cost per customer |
|---|---|---|---|
| 1 | Cost of debt service for 95 gallon recycling cart | $200K - $105 K (savings in tipping fee) = net **$95K** | $0.29 |
| 2 | Increase in CMI's Contract effective July 1, 2011 (per the current contract terms) | $16,500 | $0.05 |

| | | | |
|---|---|---|---|
| 3 | Increase in CMI's contract effective July 1, 2012 (CPI)(3.5% estimated) | $33,000 | $0.10 |
| 4 | Education/Outreach | $20,000 | $0.06 |
| 5 | Cart Maintenance | $17,000 | $0.05 |
| | TOTAL | $181,500 | $0.55 |

This action promotes the City's strategic priorities to be a leader in environmental sustainability initiatives by reducing waste and encouraging recycling.

Pros:

- Reduction of land filled solid waste
- Increased awareness of recycled material for residents
- Supports Council's sustainability goals

Cons:

- City pays the cost of roll carts and their maintenance ($217 K/year).
- CMI may pass to City fuel cost expenses in excess of $5.50 per gallon for fuel used for the collection of recycling material.

CMI's cost per household went up $0.05 July 1, 2011, per the current contract. Per the proposed contract, they would get a CPI adjustment every year for the length of the contract. We have conservatively estimated the CPI for FY 12 to be 3.5% and included that amount in the proposed rate increase. The total annual cost to the city for the CMI contract is $955,000 with pricing subject to adjustment based on the Consumer Price Index each year on July 1st. The term of the contract is for ten years. The fiscal impact of purchasing and maintaining the 95 gallon recycling carts and the education and outreach, along with the reduction in tipping fee expenses, is summarized in the chart above.

City staff recommends City Council adopt (1) a resolution authorizing the City Manager to enter into a contract amendment with Curbside Management, Inc. to provide curbside recycling collection programs and related services at an annual estimated cost of $955,000 for residential and City facility collections, as amended; and (2) an ordinance amending the Fees and Charges Manual such that the Recycling Fee will be $3.50 effective January 1, 2012.

Rev. Christopher Chiaronmonte spoke against the recycling fee.

Councilman Davis was glad we were delaying action on the rewards program. He acknowledged it is difficult to raise the fee; however, the more recyclables we can take out of the waste stream going to the landfill will reduce our tipping fees.

In response to Councilman Davis, Ms. Ball explained that we need at least six months to get the equipment and begin the educational program. They hoped to have a March implementation date

In response to Mayor Bellamy, Ms. Ball said that people can keep the smaller green cans or they can be placed inside the blue 95-gallon containers to be recycled. She said that as part of Curbside Management's contact, they provided the small Curbie recycle containers. When the City asked Curbside Management for a price on them providing the 95-gallon containers, we were able to do it a lot cheaper than for them to include that as part of their package.

When Mayor Bellamy confirmed that Curbside Management provided the smaller Curbie containers as part of their contract, but now we have to pay 100% of the new containers for them to pick up our recyclables. Ms. Ball said that they are allowing residents to keep the smaller Curbie containers. When staff evaluated this, there was no cost increase in costs, other than

provisions for a 10-year contract and a cost of living adjustment. They will be ordering new trucks and revamping and changing their system in order to accommodate the 95-gallon containers. Initially, if they had to do that and purchase the containers, there was going to me more of an increase in costs than us just providing the 95-gallon containers ourselves.

When Mayor Bellamy asked questions about how long it took the City to pay off the 95-gallon green containers, Ms. Ball said that the program began in 1998 and was phased in over a 3-4 period of time. The debt has been paid off. There were some areas served initially first and then we would add onto the fleet because we didn't buy all the automated trucks at the same time. By the time the program was fully implemented, it was probably 2001-02. Those green containers are the City's and we budget each year a certain amount of money for replacement and maintenance.

Mayor Bellamy could not support these actions as she felt this is not a good time to increase fees especially since we already have 80% of our residents already recycling. While 55-cents a month per bill does not seem a lot, but that is on top of an increased water rate and other changes to the water bill.

When Mayor Bellamy asked if we could add another recycle bin instead of going with the 95-gallon container at no cost to the City, Ms. Ball said we probably could, but staff didn't explore that option. Staff's concern when they originally had discussions about it was that it takes 7 of the smaller containers to fit into one 95-gallon container and at what point would you have issues of trash blowing off, etc. If someone calls and requests an extra bin, we do provide that to them now. We did not look at what impact it would be if we provided it City-wide.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolution and ordinance and they would not be read.

Councilman Bothwell moved for the adoption of Resolution No. 11-163. This motion was seconded by Councilman Russell and carried on a 6-1 vote, with Mayor Bellamy voting "no" (with Councilwoman Manheimer participating via speaker phone).

**RESOLUTION BOOK NO. 34 – PAGE 127**

Vice-Mayor Newman moved for the adoption of Ordinance No. 3997. This motion was seconded by Councilman Bothwell and carried on a 6-1 vote, with Mayor Bellamy voting "no" (with Councilwoman Manheimer participating via speaker phone).

**ORDINANCE BOOK NO. 27 – PAGE 104**

**C. DETERMINATION OF INTERVIEWS FOR PLANNING & ZONING COMMISSION**

The following individuals have applied for vacancies on the Planning & Zoning Commission and submitted required written responses: Joseph Minicozzi, Kenneth Fulford, Mark Mathews, Bruce Greene, David Mosrie, Jeremy Goldstein, Dustin Pulliam, Jane Gianvito Mathews, Kristy Carter, Jeff McGahee, Pete Hildebrand, Terry Meek, Abigail Emison, Ellen Nutter and Steve Rasmussen.

Vice-Mayor Newman said that the Planning & Zoning Commission is one of the City's most important citizen volunteer boards that we work with. They play a very important role in making recommendations to City Council on land use policies, as well as rezonings and major project. We had 15 great candidates who applied for the three vacancies. He reviewed the process leading up to this point, which included all candidates responding to written questions developed by City Council. City Council was very impressed by the outstanding and thoughtful answers that all candidates submitted. City Council asked the Boards & Commissions

Committee (Committee) to come up with recommendations of 5-6 candidates to be interviewed for 20 minutes in an open, televised session. The Committee asked each member of Council to identify the five candidates they would most like to interview. The Committee recommended interviewing 6 candidates, 5 of which are the candidates that received the largest number of votes requested by Council to be interviewed. The Committee recommended Abigail Emison, Jane Mathews, Jeremy Goldstein, Mark Mathews, Bruce Green and Kristy Carter be interviewed. Any two members of City Council can add any other applicants to the interview list.

Mayor Bellamy felt this process, which was agreed upon by City Council on November 9, 2010, was supposed to similar to the School Board process, being all Council members state their names at this formal meeting and the City Clerk would tabulate them to find the highest scorers for interviews. She questioned if her candidates would not be considered since she did not identify her five candidates prior to this meeting.

After a short discussion about the process, Vice-Mayor Newman said the intent on the process asking for the five top names prior to this formal meeting was due to the large number of applicants each receiving 20 minutes for interviews. The process was also that whatever recommendation comes from the Committee is still open to full deliberation by City Council. It is up to City Council on whether to accept their recommendation. He asked Mayor Bellamy for her five candidates which would be added to the existing list of candidates to determine the top 5.

Mayor Bellamy was not supportive of this process, whether it was decided in the Boards & Commissions Committee and discussed at the July City Council meeting as this process is contrary to any process used before. Traditionally we have put our names forward at the formal meeting, the names are tabulated and the top candidates move forward. Her top interview choices were Abigail Emison, Terry Meek, Joe Minicozzi, David Mosrie and Ellen Nutter.

Vice-Mayor Newman moved that Council interview Abigail Emison, Jane Mathews, Jeremy Goldstein, Mark Mathews, Bruce Green, Kristy Carter, Joe Minicozzi and Davis Mosrie. This motion was seconded by Councilman Smith.

Mayor Bellamy read into the minutes from the November 9, 2010, meeting the following updated process for appointing members to the Planning & Zoning Commission: "Vice-Mayor Newman, Chairman of the Boards & Commissions Committee, said that the Committee recommended City Council adopt an updated process for appointing members to the Planning & Zoning Commission, similar to the process used for School Board appointments, with interviews in Council Chamber, televised. Councilman Smith moved to use an appointment process, similar to the School Board appointments, for the appointments to the Planning & Zoning Commission. This motion was seconded by Councilwoman Manheimer and carried unanimously." That process included the City Clerk to send all applications and responses to City Council on August 5; City Council to determine who to interview on August 9; City Clerk to call and arrange interviews on August 10; and interviews and appointment made on August 23. After that unanimously agreed upon process, it changed. She was under the impression that City Council was following that process and would determine who to interview at this meeting.

When Vice-Mayor Newman felt the November 2010 meeting was not the last time this process was discussed, Mayor Bellamy read an excerpt of the June 14, 2011, minutes which read: "At the request of the majority of Council, City Clerk Burleson would provide City Council with all questions received on July 22, noting that the Boards & Commissions Committee would narrow them down to five at their July 26 meeting. At the formal meeting on July 26, the Committee will provide Council with their five recommended questions." In addition, she read from the July 26 Committee meeting as follows: "Clerk to e-mail all Council on Friday, August 5 all Planning & Zoning Commission candidates and ask them to e-mail me by 5:00 p.m. on Monday, August 8, their top five people they would like to interview in order of their preference. Those names will be complied by the Clerk and will be used as information by the Boards & Commissions Committee to narrow the interview down to five, for Council consideration at the

formal meeting on August 9." She noted that she was not present at the July 26 Council meeting and was operating under original process.

Mayor Bellamy was puzzled on why we needed two Council members to add another person to the interview list. She didn't mind sitting in the interviews for 3-4 hours listening to people talk about the future of our City and how it's going to grow. Vice-Mayor Newman said this was different in that we are allowing so much more time with each candidate.

Councilman Smith also felt that there should be some minimum of support for any candidate moving forward so that we don't want to have them go through the interview process needlessly if it's clear they would not be able to gain support of the majority of Council.

The motion made by Vice-Mayor Newman and seconded by Councilman Smith carried unanimously.

At the request of Councilman Bothwell, with the support of Mayor Bellamy, Steve Rasmussen was added to the interview list.

Vice-Mayor Newman said that all interviews will take place on the afternoon of August 23, 2011, with final appointments being made at the formal meeting later that evening.

At this time, Councilman Smith moved to recuse Councilwoman Manheimer from participating in the remainder of the meeting. This motion was seconded by Councilman Davis and carried unanimously. Councilwoman Manheimer hung up on the speaker phone.

**VI. NEW BUSINESS:**

**A. RESOLUTION NO. 11-164 - RESOLUTION TO NAME THE NEW COMMUNITY CENTER AT LIVINGSTON AND DEPOT STREET AS DR. WESLEY GRANT SR. SOUTHSIDE CENTER**

Assistant Parks & Recreation Director Debbie Ivester said that this is the consideration of a resolution to name the new community center at Livingston and Depot Street as Southside Community Center dedicated to Reverend Dr. Wesley Grant, Sr.

The City of Asheville is nearing the completion of the new community center located at the corner of Livingston and Depot Street, which is expected to be complete in late summer with a grand opening in the fall 2011. As part of the construction and preparation to open the new center, the Recreation Advisory Board appointed the Blue Ribbon Panel to lead the public process to name the new center. Panel members included Wanda Hawthorne and Wayne Wheeler of the Recreation Advisory Board; and Dee Robertson and Sherman Williams of the Reid Center Advisory Board.

The public was invited to submit suggestions of potential center names during May 1-June 20, 2011, via an online survey, phone hotline and mail. The purpose of public input was to gage the general public's interest in the center's name. She provided the Council with a list of center names acquired in the public process.

On June 29, 2011, the Blue Ribbon Panel convened to select its recommendation for the center name. The Panel's intent was to recommend a name that has the most significant meaning for the greatest number of people in Asheville, and take into consideration names submitted via public input. The Panel made the following recommendations to the Recreation Advisory Board:

1. Southside Community Center
2. Livingston Street Community Center

The Recreation Advisory Board considered the Panel's recommendation at its meeting on July 11, 2011. After review of the Panel's recommendation, review of all names submitted via public input, the Board chose to preserve the Southside name, and recognize Reverend Dr. Wesley Grant, Sr.'s contribution to Asheville and the African American community. The Board recommends naming the new center the Southside Community Center dedicated to Reverend Dr. Wesley Grant, Sr.

Pros

- This action complies with the City of Asheville's parks and recreation facility naming policy.
- The Southside name recognizes a significant part of Asheville's history and its African American community, and has meaning for a large segment of people who live in Asheville and their families.
- Dedicating the facility to Reverend Dr. Wesley Grant, Sr. honors a significant and well-respected community leader who greatly affected the African American community and Asheville.

Con:

- None

The Recreation Advisory Board recommends City Council to adopt a resolution naming the new community center at Livingston and Depot Street as Southside Community Center dedicated to Reverend Dr. Wesley Grant, Sr.

Councilman Bothwell moved to name the new community center "Southside Community Center." This motion died for lack of a second.

Councilman Russell moved to name the new community center "Southside Community Center dedicated to Reverend Dr. Wesley Grant, Sr." This motion was seconded by Vice-Mayor Newman.

Mayor Bellamy asked for a friendly amendment to name the new community center "The Reverend Dr. Wesley Grant Sr. Community Center dedicated to the Southside Community." Councilman Russell did not accept the friendly amendment because we create Boards & Commissions to hash through the different issues and come to a recommendation.

The following individuals spoke in support of naming the new community center more significantly for Dr. Wesley Grant Sr. (suggestion of Wesley Grant Center) because he was a significant and well-respected community leader who greatly affected the African American community as well as the entire City of Asheville; and also due to the number of votes cast from a survey in favor of naming the new center after him:

Rev. Louis Grant, son of Dr. Wesley Grant Sr.
Rev. Christopher Chiaronmonte
Rev. L.C. Ray
Dr. John H. Grant
Rev. Lisa Landis
Ms. Priscilla Ndiaye
Ms. Mildred Nance-Carson, Southside resident, member of the Recreation Board & Chair of the W.C. Reid Advisory Board
Mr. Fred English, east Asheville resident
Ms. Belinda Grant
Dr. Milton Byrd
Mr. Roy Harris
Rev. Otis Ware

Ms. Teresa Rogerson agreed for a name to be attached to the new community center, but we still live in a world where we have to receive funding. The name of the center needs to be something that can get the most funding so the center can service its constituents. She felt that perhaps if it was named "Grant Center" it would not be able to get as much funding.

When Councilman Russell asked Councilman Bothwell for his input since he is liaison to the Recreation Board, Councilman Bothwell felt the Recreation Board process was not open and fair, stressing he means no ill will towards Dr. Grant. He felt the survey was more of a concerted campaign and not a community poll. He felt if it's going to be a community naming, then it should be put on a ballot this fall and let people vote. He was given a list of 36 names of other prominent people in the community that deserve recognition as well. He stressed that he is not opposed to naming it for Dr. Grant, but he is opposed to the process used.

Councilman Russell is a believer in a good, fair process and as such, withdrew his motion.

Councilman Davis said building the new center was a long process and fairly high cost and was discouraged to see the community divided over naming it.

Councilman Davis moved to name the new community center the "Dr. Wesley Grant Sr. Community Center dedicated to the Southside Community." This motion was seconded by Councilman Smith.

Councilman Russell asked for a friendly amendment to name the new center the "Dr. Wesley Grant Sr. Southside Community Center." Councilman Davis and Councilman Smith accepted the friendly amendment.

In response to Mayor Bellamy, Ms. Ivester explained the process used, noting that they didn't expect people to solicit a specific name, but to allow the opportunity for the community to submit names.

Mayor Bellamy said that when we put Blue Ribbon Committees in place, they make recommendations only. The process was opened up for input and it was received. If we ask for community input, then we need to pay attention to it. It seems to her that there is a large volume of people supporting the name of Dr. Wesley Grant and she supported that name. If the community also wants the Southside community included in the name, she would support that as well.

Councilman Bothwell said the Blue Ribbon Committee also recommended that the main hall of the new community center have a hall of fame of the many who contributed to the Southside area. He felt that was a great idea and supported naming the new center after Dr. Grant, as the motion was stated.

Rev. Ware felt the new center did not need to include any reference to the Southside just because it happens to be in that part of the City. He used the example of the existing W.C. Reid Center, named after Mr. Reid who was not from the Southside area and who focused most of his attention in the Hillcrest area.

Pastor Spencer Hardaway supported the name, but expressed concerns with the process.

Rev. L.C. Ray thanked City Council for naming the community center for Dr. Grant as it means a lot to the community.

The amended motion made by Councilman Davis and seconded by Councilman Smith to name the new community center the "Dr. Wesley Grant Sr. Southside Community Center" carried unanimously.

Councilman Davis said that it was his intention to name the new community center "Dr. Wesley Grant Sr. Southside Center". Therefore, he moved to amend his original motion to name the new community center the "Dr. Wesley Grant Sr. Southside Center." This motion was seconded by Councilman Smith and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 128**

**B. BOARDS & COMMISSIONS**

Regarding the Asheville-Buncombe Crime-Stoppers Board of Directors, the following individual applied for the vacancy: Princess Adams, Lynda Bell Haynes, Karl Katterjohn, Allen Brailsford and Daniel Ater. At the recommendation from the Boards & Commissions Committee, Vice-Mayor Newman moved to interview Princess Adams and Karl Katterjohn. This motion was seconded by Councilman Bothwell and carried unanimously.

Regarding the Recreation Board, the following individuals have applied for the vacancy: Barry Mundt, Richard Warren, John Parrish, Robert Pierce and John Broadbooks. At the recommendation of the Boards & Commissions Committee, Vice-Mayor Newman moved to interview John Parrish, Barry Mundt and Robert Pierce. This motion was seconded by Councilman Bothwell and carried unanimously.

Regarding the Buncombe County Tourism Development Authority, the following individuals have applied for the vacancy: John W. Ellis, Cesar A. Romero, Ruth T. Summers and Chris Bubenik. At the recommendation from the Boards & Commissions Committee, Vice-Mayor Newman moved to interview John W. Ellis, Ruth T. Summers and Chris Bubenik. This motion was seconded by Councilman Bothwell. Mayor Bellamy spoke in support of the work by Ms. Summers with the Grove Arcade and moved to appoint Ms. Summers. This motion was seconded by Councilman Davis. Because Councilman Russell felt this was a very important board and was interested in interviewing the three candidates, Mayor Bellamy withdrew her motion. It was the consensus of Council to interview the three candidates recommended by the Boards & Commissions Committee.

**RESOLUTION NO. 11-165 - RESOLUTION APPOINTING MEMBERS TO THE AFFORDABLE HOUSING ADVISORY COMMITTEE**

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Affordable Housing Advisory Committee.

On June 14, 2011, City Council established the Affordable Housing Advisory Committee.

The following individuals have applied for vacancies: Allison Bond, Anthony Goodson Jr., William Irby, David Dills, M. Mae Creadick, Brian K. Alexander, Richard Warren, Barber Melton, Scott Dedman, Lindsey Simerly and Paul Reeves.

He said the Council has identified several groups who have housing experience that they would like to appoint to this new Committee. The Boards & Commissions Committee recommended appointing Scott Dedman, William Irby, Allison Bond, Brian Alexander, Barber Melton, Lindsey Simerly and Anthony Goodson Jr. They also recommended Council interview Paul Reeves, M. Mae Creadick, David Dills and Richard Warren.

Councilman Bothwell felt that Mr. Dedman is certainly an expert in the non-profit affordable housing area; however, he indicated on his application that he had no conflict of

interest. He felt there would be an obvious conflict of interest, since Mountain Housing Opportunities is the largest recipient of City funding for affordable housing, and he would have to recuse himself from voting on matters affecting his employer.

Vice-Mayor Newman said that the Boards & Commissions Committee discussed the conflict of interest issue. He said this is a new committee and how they end up spending their time and what issues they focus on is to be determined. Council has given them a broad charge, but how they choose to prioritize their time will be up to them to decide. It is our general intent that the group will focus on broad policy recommendations to City Council as it relates to affordable housing needs in Asheville, opposed to more specific recommendations on allocation of Community Development Block Grant funding or Housing Trust Fund dollars. There is nothing in the current mission charge for them that strictly precludes them from that; however, that will be discussed at a future Housing & Community Development Committee meeting to perhaps let them know that is not what we are looking for them to do. It would be more broad policy recommendations. Certainly if there was a recommendation regarding funding, any member of the Committee would have to recuse themselves with a disclosed conflict of interest.

Councilman Davis said that the conflict of interest issue can be raised by Brian Alexander, with Homeward Bound, as well. We will have to clarify the mission and role of the Committee.

Councilman Russell moved to support the recommendation of the Boards & Commissions Committee and (1) appoint Scott Dedman, William Irby, Allison Bond, Brian Alexander, Barber Melton, Lindsey Simerly and Anthony Goodson Jr. to each serve a three-year term, or an initial two-year term respectively, until their successors have been appointed; and (2) interview Paul Reeves, M. Mae Creadick, David Dills and Richard Warren. This motion was seconded by Councilman Bothwell and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 129**

**RESOLUTION NO. 11-166 - RESOLUTION APPOINTING A MEMBER TO THE POLICE OFFICERS AND FIREFIGHTERS DISABILITY REVIEW BOARD**

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing a member to the Police Officers and Firefighters Disability Review Board.

Mr. James Lewis has resigned from the Police Officers and Firefighters Disability Review Board, thus leaving an unexpired term until July 19, 2012.

The following individual has applied for this vacancy: Christopher James Bradford.

The Boards & Commissions Commission recommended appointing City Clerk Magdalen Burleson.

Vice-Mayor Newman moved to appoint Magdalen Burleson to serve the unexpired term of Mr. Lewis, term to expire July 19, 2012, or until her successor has been appointed. This motion was seconded by Councilman Davis and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 130**

**RESOLUTION NO. 11-167 - RESOLUTION APPOINTING A MEMBER TO THE RIVER DISTRICT DESIGN REVIEW COMMITTEE**

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing a member to the River District Design Review Committee.

The term of Mark Allison will expire on September 1, 2011.

The following individuals have applied for the vacancy: Darren Green, Chase Brugh, Philip Ellis, Jay Marino, Laurie K. Miller, Tadd Clarkson, Stuart Smith, Michael McDonough and Leslie McCormick.

The Boards & Commissions Commission recommended reappointing Mr. Mark Allison.

Vice-Mayor Newman moved to reappoint Mark Allison to serve an additional three-year term, term to expire September 1, 2014, or until his successor has been appointed. This motion was seconded by Councilman Davis and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 131**

**VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:**

Mr. Jim MacKenzie suggested working with the City on trying to get tourists to volunteer one or two days with a non-profit. Under direction from Council, City Manager Jackson said that he would contact Mr. MacKenzie and have him contact the City's Neighborhood/Volunteer Coordinator.

Rev. Christopher Chiaronmonte spoke about the homeless issue in Asheville.

Rev. Lisa Landis spoke about the shutting down of URTV and why no one will tell her why they were denied funding.

Mr. Chris Oaks was opposed to street preachers using amplification in the downtown area. Mayor Bellamy noted that City Attorney Oast is researching that issue.

Mr. Fred English thanked Vice-Mayor Newman for his service with the City of Asheville.

**Lawsuits**

A civil action has been commenced in Superior Court on July 13, 2011, regarding Marc Tickle vs. City of Asheville and Randall S. Rhodes. The nature of the proceeding is a complaint for negligence. This matter will be handled by an attorney outside the City Attorney's Office.

The City was served with a Complaint on August 1, 2011, from Fannie Bishi vs. City of Asheville and Ivan Petrovich Dariy. The Complaint is for negligence. This matter will be handled by an attorney outside the City Attorney's Office.

**Closed Session**

At 8:08 p.m., Councilman Smith moved to go into closed session for the following reasons: (1) To discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session. The statutory authority is contained in G.S. 143-318.11 (a) (4); (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including a lawsuit involving the following parties: City of Asheville; J. Jerome Jensen, et al (Biltmore Lake Annexation). The statutory authorization is N.C. Gen. Stat. sec. 143-318.11(a) (3); and (3) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the

information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Russell and carried unanimously. This motion was seconded by Councilman Davis and carried unanimously.

At 8:34 p.m., Councilman Russell moved to come out of closed session. This motion was seconded by Councilman Davis and carried unanimously.

**VIII. ADJOURNMENT:**

Mayor Bellamy adjourned the meeting at 8:34 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – August 23, 2011 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

**PLEDGE OF ALLEGIANCE**

Mayor Bellamy led City Council in the Pledge of Allegiance.

**INVOCATION**

Councilman Davis gave the invocation.

**I. PROCLAMATIONS:**

**A. PRESENTATION TO CITY OF ASHEVILLE FROM EMPLOYEES WHO ARE ACTIVE MILITARY RESERVISTS**

Senior Firefighter Barnaby Raikes and other military reservists presented a plaque to City Manager Jackson thanking the City of Asheville for its support to activated military employees. The plaque reads "Presented to the City of Asheville for its continuing support of your employees who serve in the Armed Forces of the United States, we thank you".

Mayor Bellamy thanked City Manager Jackson for making sure that our military employees have a job when they come back. On behalf of City Council, she said we are proud of everything our military employees do.

**B. PROCLAMATION PROCLAIMING AUGUST 27, 2011, AS "TRANSITION ASHEVILLE DAY"**

Mayor Bellamy read the proclamation proclaiming August 27, 2011, as "Transition Asheville Day" in the City of Asheville. She presented the proclamation to Mr. Stan Corwin, Ms. Kathy Scott, Mr. Chas Jansen and Ms. Jeanie Martin, who briefed City Council on some activities taking place during the day.

**II. CONSENT AGENDA:**

At the request of Councilwoman Manheimer Consent Agenda Items "G" was removed from the Consent Agenda due to a conflict of interest.

At City staff's request, Mayor Bellamy added (with the consensus of Council) an item on the Consent Agenda which will rescind Resolution No. 11-151 due to an accounting error, and authorize the City Manager to execute a contract with SPL Integrated Solutions for the installation of a new sound reinforcement system in the Asheville Civic Center arena.

**A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON AUGUST 9, 2011**

**B. RESOLUTION NO. 11-168 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH BRANTLEY CONSTRUCTION COMPANY LLC FOR RENOVATIONS OF THE ASHEVILLE CIVIC CENTER**

**ORDINANCE NO. 3998 - BUDGET AMENDMENT FOR CIVIC CENTER RENOVATIONS**

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Brantley Construction Company, LLC in the amount of $ 4,077,921 for renovations of the Asheville Civic Center, and a budget amendment in the amount of $4,105,000 from debt proceeds and box office revenue.

This contract incorporates major components of the overall renovation of the arena, locker rooms, concourse, banquet hall, museum area and concessions areas are some of the most integral elements of the Civic Center renovation plans. The overall renovations are being done in preparation to host the Southern Conference Basketball Tournament beginning in March 2012 and through 2015. These renovations will give patrons and promoters a much improved experience when attending or scheduling concerts, sporting events and other special events throughout the years to come. The improvements will also provide a much better experience for the athletes and entertainers when they come to compete and entertain. The overall renovations will provide a much brighter and inviting venue for many years to come.

The following bids were received:

- Melloul Blamey Construction SC Ltd., Greenville, SC: $4,548,000
- The Harper Corporation, Greenville, SC: $4,491,220
- Kearey Builders, Inc., Statesville, NC: $4,450,070
- H & M Constructors, Asheville, NC: $4,346,800
- Brantley Construction Company, LLC, Canton, NC: $4,077,921

By approving this contract, total project expenses under contract to date will be $6,126,382. The table below summarizes existing contracts in place along with the construction contract under consideration.

| **Funding Uses/Project Components** | **Amount** |
|---|---|
| Design | $ 480,000 |
| Seating Replacement | $ 775,000 |
| Scoreboard Replacement | $ 255,000 |
| Sound System | $ 418,461 |
| Technology Upgrades and Asbestos Abatement | $ 120,000 |
| Construction | $4,077,921 |
| TOTAL | $6,126,382 |

In order to fund this contract, staff is also seeking approval of a budget amendment in the amount of $4,105,000 to budget revenue from debt proceeds and the Civic Center box office. Approval of this budget amendment will bring the total budget for Civic Center renovations to $6,975,000. The table below summarizes the project budget including the proposed budget amendment.

| FY 2012 CIVIC CENTER PROJECT BUDGET | |
|---|---|
| **EXISTING BUDGET** | |
| **Funding Sources** | **Amount** |
| Tourism Development Authority | $ 1,750,000 |
| Buncombe County | $ 320,000 |
| City of Asheville Capital Contributions | $ 800,000 |
| **Total Existing Budget** | **$ 2,870,000** |
| **PROPOSED BUDGET AMENDMENT** | |
| **Funding Sources** | **Amount** |
| Civic Center Box Office Proceeds | $ 580,000 |
| Debt Proceeds | $ 3,525,000 |
| **Total Budget Amendment** | **$ 4,105,000** |
| **TOTAL PROJECT BUDGET PENDING** | **$ 6,975,000** |

The remaining project budget is anticipated to be used for additional design fees and the procurement of equipment and furnishings such as folding chairs, concession equipment, etc.

The remaining scope of the project is contingent upon continued partnership funding and could include stage and seating improvements, mezzanine improvements, mechanical system upgrades, and exterior and lobby renovations. Discussions with funding partners are ongoing.

This action complies with the City Council Strategic Operating Plan's Fiscal Responsibility goal of developing strategic partnerships to leverage resources for infrastructure and CIP projects. This action also complies with the Civic Center Commission Master Plan that encourages continuing renovations for the facility, and supports the goal of developing new partnerships. It has been reviewed and recommended by the Civic Center Commission.

Pros:

- Project provides for a much better experience for the athletes and patrons alike.
- Energy efficiency improvements to existing lighting system will meet national television broadcast standards while creating cost savings.
- Improved flow of patron traffic to and from the arena floor through the use of a new elevator and additional access points from the concourse area.
- Improved concession revenues through increased number of concession points of sale and improvements to existing locations.
- Much needed improvements to the locker rooms for athletes and officials.
- Much needed improvements to the Banquet Hall.
- Increase in useable space with the renovation of the Museum area located under the Thomas Wolfe Auditorium.
- Enhancements to safety equipment such as Smoke Exhaust system upgrades and fire suppression upgrades around the concourse.
- Project bid is below budget.

Con:

- None.

Based on current estimates, the annual debt service for the $3.525 million in loan proceeds will be approximately $307,000 beginning in FY 2012-13. Payments will likely extend over 20 years with the annual debt service amount decreasing over this time. The funding for this

debt service will come from the annual capital contribution that the General Fund makes to the Civic Center.

The current favorable construction climate, the ability to leverage partnerships, and capital already raised has created opportunities for additional funding and partnerships to address remaining important components of the renovations. These components include additional energy improvements and components to increase the ability of the venue to be a tourism destination. These currently unfunded items are approximately two million dollars.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with Brantley Construction Company, LLC for $4,077,921 for the Renovation of the Asheville Civic Center arena, and a budget amendment in the amount of $4,105,000 from debt proceeds and box office revenue.

**RESOLUTION BOOK NO. 34 – PAGE 132**
**ORDINANCE BOOK NO. 27 - PAGE 106**

**C. RESOLUTION NO. 11-169 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A LEASE AGREEMENT WITH THE EAST ASHEVILLE YOUTH ACTIVITIES BOOSTER CLUB INC. FOR THE PROPERTY LOCATED AT NEW HAW CREEK ROAD AND BELL ROAD, KNOWN AS THE CHARLIE BULLMAN PARK**

Summary: The consideration of a resolution authorizing the City Manager to execute a Lease Agreement between the East Asheville Youth Activities Booster Club, Inc. and the City of Asheville for real property located at New Haw Creek Road and Bell Road.

The subject property (PIN # 9659-92-4876-00000) at New Haw Creek Road and Bell Road is owned by the East Asheville Youth Activities Booster Club, Inc. and has been utilized by the City for many years as Charlie Bullman Park. This park is approximately 5.27 acres containing three ball fields and a parking area.

The proposed term for this lease is five years, at a rental rate of $1.00 per year. The City will also be responsible for paying related tenant expenses, including utility bills and upkeep.

This action complies with the Parks, Recreation, Cultural Arts and Greenways Master Plan in that it maximizes the level of service available to the community by using partnerships as a way to offer parks and recreation services.

Pro:

- Continue a community partnership as an affordable means to provide a public park

Con:

- None

Funding for utilities and upkeep of the park are included in the Parks, Recreation, and Cultural Arts FY 2011-12 budget.

City staff recommends City Council adopt a resolution authorizing the City Manager to execute the lease agreement with the East Asheville Youth Activities Booster Club, Inc. on behalf of the City of Asheville.

**RESOLUTION BOOK NO. 34 – PAGE 133**

**D. RESOLUTION NO. 11-170 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR THE 2011 FEDERAL TRANSIT**

**ADMINISTRATION APPORTIONMENT AND FOR THE MAYOR TO EXECUTE SAID GRANT**

Summary: The consideration of a resolution authorizing the City Manager to apply for the 2011 Federal Transit Administration (FTA) apportionment in the amount of $1,958,256; and for the Mayor to execute said grant.

The City of Asheville is going to apply for the 2012 annual apportionment using a Federal Transit Administration apportionment under the Department of Defense and Full-year Continuing Appropriations Act 2011. The annual apportionment (Section 5307) authorizes Federal funding for capital and in some cases, for operating assistance, and planning activities for transit in urbanized areas. The City was reclassified as Urbanized Area, as part of the 2000 Census and therefore restricted in its ability to use operating assistance. However, the City, among others, will be allowed to use part of this year's allocation in operating assistance, in the amount of $484,022.

As part of the reclassification Henderson County's Apple Country became part of the transit systems in the Metropolitan Area. As such the City and the County share the federal allocation. The County will receive approximately $440,000 of the total allocation. The City and the County had signed a Sub-recipient Agreement in which it is specified how the funds are disbursed as well as the oversight of these funds. The city is responsible before FTA of the use of these funds and owns all the capital items Henderson County purchases with the allocation.

The City intends to use these funds for FY 2012 expenses, such as operating assistance, and for capital items allowed under the Master Agreement, such as preventive maintenance, Americans with Disabilities Act (ADA) service, and for other minor capital items (automated vehicle location system, small equipment for the buses, etc.). One percent of the allocation must be used for security purposes.

This action complies with the City Council Strategic Operating Plan by supporting the fiscal responsibility focus area, specifically operating the City of Asheville to the highest levels of fiscal responsibility.

Pros:

- These funds were budgeted in the FY 2012 City Budget and will offset costs related to operations, preventive maintenance and ADA services.

Con:

- The city has to contribute with 20% of the capital items, including preventive maintenance and ADA services; and 50% of the operational expenses.

The total amount of FTA transit funding available to the City in FY 2012 will be $1,958,256. Approximately $440,000 of this amount will be allocated to Henderson County, leaving $1,518,256 for City transit expenses. The FTA transit apportionments are already included in the FY 2012 adopted budget.

City staff recommends City Council authorizing the City Manager to apply for the 2011 Federal Transit Administration apportionments in the amount of $1,958,256; and for the Mayor to execute said grant.

**RESOLUTION BOOK NO. 34 – PAGE 134**

**E. RESOLUTION NO. 11-171 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO A LICENSE AGREEMENT WITH RIDING PARTNERS INC. (D/B/A BIOWHEELS RTS) FOR THE PURPOSE OF INSTALLING AND OPERATING AN ELECTRIC VEHICLE CHARGING STATION ON A PORTION OF CITY-OWNED PROPERTY AT 161 S. CHARLOTTE STREET**

Summary: The consideration of a resolution authorizing the Mayor to execute a License Agreement with Riding Partners, Inc. (dba BioWheels RTS) for the purpose of installing and operating a solar-powered electric vehicle charging station on city-owned real property at 161 S. Charlotte Street, Asheville, NC.

Riding Partners, Inc. was awarded an NC Green Business Fund Innovation Grant in early 2011 to develop and install three prototype solar powered electric vehicle charging stations in Western North Carolina. This innovation infrastructure increases the benefits of electric vehicles by providing fuel from renewable energy sources. Riding Partners approached the city to solicit a public private partnership to locate one station through a public property land lease (license agreement). Through the NC Green Business Fund Innovation Grant and public private partnerships, Riding Partners intends on refining a sustainable business model for electric vehicle fueling infrastructure.

The proposed License Agreement will enable Riding Partners to install a 31.5' x 16.5' solar PV awning at the corner of S. Charlotte and Eagle Streets. The roof will include 20 solar panels that will generate 4.9 KW of electricity for the station. At the base of the support piers for this awning, Riding Partners, Inc. will install 3 electric vehicle charging units, with access to these charging units available from six adjacent parking spaces within the city parking lot. Riding Partners, Inc. will have the ability to sell "charge events" (i.e. fueling events) to electric powered vehicles and will be fully responsible for the ongoing maintenance for the equipment. The term of the agreement is proposed for ten years total, with a 5 year initial period, with the option to renew for an additional 5 years.

At present, it is recognized that there is strong demand for employee and customer parking during the normal business hours of the Public Works Department and Development Services Center. Therefore, during the initial two years of the license agreement, parking in the six spaces adjacent to the electric vehicle station will be open use and non-exclusive. In year three of the license agreement, it is contemplated that there will be an increased demand for designated access for these spaces, as electric vehicle parking only. Based on industry metrics, the license agreement will include language that provides for one of the six spaces to be designated as "Electric Vehicle Parking Only" at the point that there are 50 such vehicles registered in Buncombe County. Designating additional spaces will be reviewed each additional year of the license agreement, using the same metric (e.g. 2 designated spaces per 100 registered electric vehicles, etc.) Additionally, City staff notified the operators of the downtown farmer's market, Appalachian Sustainable Agriculture Project (ASAP), of this proposed use and there are no conflicts with the electric vehicle charging station and the ongoing use of the parking lot for the downtown City Market.

The City and Riding Partners, Inc. agreed to set the rental rate a $1 per year in order to support development of this fueling infrastructure and commit public leadership to renewable energy and alternative transportation. As an in-kind service, Riding Partners, Inc. has proposed to allow City employee and fleet vehicles free electric charge events for the first two years of operation, and a 20% reduced rate thereafter.

The Notice of Intent to enter into a License Agreement with Riding Partners, Inc. was published on August 12, 2011, in the Asheville Citizen-Times. Ten days have passed since the publication and authorization to execute the License Agreement is being requested.

This action complies with the City Council Strategic Operating Plan Objectives to work with regional partners to create incentives for green building, energy conservation and energy independence.

Pros:

- Demonstrates continued national leadership in developing the electric vehicle market through providing fueling infrastructure.

- This maximized the use of public land for the purpose of local renewable energy production.

Con:

- Commits a portion of the Public Works parking lot for a minimum of five years.

No expenses or in-kind services are required of the city for this license agreement. The city will receive no rental income from this lease. In- kind service provided to the city through this lease agreement includes: free charging events for municipal fleet vehicles for the first two years after which point municipal fleet vehicles will receive a 20% discount on charge events.

City staff recommends City Council adopt a resolution authorizing the Mayor to execute a License Agreement with Riding Partners, Inc. (dba BioWheels RTS) for the purpose of installing and operating a solar-powered electric vehicle charging station on city-owned real property at 161 S. Charlotte Street, Asheville, NC.

**RESOLUTION BOOK NO. 34 – PAGE 135**

**F. RESOLUTION NO. 11-172 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE LAND-OF-SKY REGIONAL COUNCIL OF GOVERNMENTS TO OVERSEE THE COMPLETION OF THE LONG RANGE TRANSPORTATION DEMAND MANAGEMENT STUDY**

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the Land of Sky Regional Council of Governments (COG) to oversee the completion of the Long Range Transportation Demand Management Study.

The Long Range Transportation Demand Management (TDM) study is the application of policies and strategies that attempt to optimize existing transportation resources and infrastructure by mitigating single occupancy vehicle use in a defined area. TDM programs have the potential to deliver better environmental outcomes, lower parking demands, improved public health, stronger communities, and a more prosperous and livable city.

The TDM program was hosted by the city from FY2005 until FY2011, focusing on promoting alternatives to single occupancy vehicles mainly inside the City limits. The program was paid by the city (50%) and the N.C. Dept. of Transportation (NCDOT – 50%). NCDOT expressed the need to set regional goals to improve the quality of life for the citizens of Western North Carolina by providing education, support and resources that enhance and promote alternatives to driving alone. In order to evaluate the adequacy of these goals and to continue the program, the NCDOT wants to perform an analysis, the Long Range TDM study, and provide new strategies that will allow TDM to grow accordingly to regional needs.

Due to the regional nature of the study, the NCDOT recommended the COG to manage the study. The COG will hire a consultant to develop this study and will be responsible for completion. The estimated cost is $100,000 and will be funded by Section 5307 of the Federal Transit Administration (FTA), with existing funding that will otherwise be lost, in the amount of $80,000. The 20% or $20,000 match is provided by NCDOT.

The City, as designated recipient, will be responsible for overseeing the use of these funds according to FTA and NCDOT regulations. This task will require the use of city resources, mainly staff.

This action complies with the City Council Strategic Operating Plan by supporting the fiscal responsibility and green and sustainable focus areas, specifically operating the City of Asheville to the highest levels of fiscal responsibility, leveraging funding from Federal and State

agencies; and setting and developing a plan for implementing a community energy reduction goal.

Pros:

- The project will be funded by the FTA in the amount of $80,000 and the NCDOT in the amount of $20,000.
- This plan will address NCDOT and City concerns about the future of the TDM program.
- This plan will provide guidance for future TDM initiatives regarding regional needs.

Con:

- The City oversees the project and uses city resources, mainly staff time to do so.

The total project cost is $100,000; 80% of this total will be paid by the FTA and 20% by the NCDOT. The city will seek reimbursement from both agencies. The budget for this project was approved by City Council in January 2011.

City staff recommends City Council to adopt a resolution authorizing the City Manager to enter into an agreement with the Land of Sky Regional Council of Governments to oversee the completion of the Long Range TDM Study.

**RESOLUTION BOOK NO. 34 – PAGE 136**

**G. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH TAYLOR & MURPHY CONSTRUCTION CO. INC. FOR THE EAST OAKVIEW ROAD BRIDGE REPLACEMENT PROJECT**

**BUDGET AMENDMENT FOR THE EAST OAKVIEW ROAD BRIDGE REPLACEMENT PROJECT**

This item was removed from the Consent Agenda due to a conflict of interest by Councilwoman Manheimer.

**H. RESOLUTION NO. 11-174 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CHANGE ORDER WITH PATTON CONSTRUCTION GROUP LLC, FOR THE VIEWMONT ACRES WATER SYSTEM EXTENSION PROJECT**

Review: The consideration of a resolution authorizing the City Manager to execute a change order in the amount of $4,484.35 to increase the construction contract for Patton Construction Group, LLC, from $318,363.24 to $322,847.59 for the Viewmont Acres Water System Extension Project.

On June 8, 2010, City Council awarded the construction contract to Patton Construction Group, LLC, for the Viewmont Acres Water System Extension Project. The City of Asheville has received a grant from NCDENR to replace the existing, private, failing water system at the Viewmont Acres Mobile Home Park. Upon completion of the water system improvements project, the City of Asheville will own and maintain this new water system. The project consists of the construction and installation of approximately 2,850 linear feet of a new 8-inch waterline, fire hydrants, valves, and other appurtenances as well as the installation of five (5) private residential booster pump stations.

An initial change order #1 was needed to increase the contract amount by an additional $23,413.24 for a total contract amount of $318,363.24 because of overruns to the original quantities estimated and to cover changes to the scope of the work, which were requested

through work change directives issued by the Water Resources Department. In order to complete the construction and close out the project, a second change order is needed to increase the contract amount by an additional $4,484.35 for a total contract amount of $322,847.59 to cover additional changes to the scope of the work as requested through work change directives issued by the Water Resources Department. There is sufficient budget within this project to fund the needed change order, so no budget amendment is required.

This project is part of City Council's strategic plans to improve city infrastructure.

Pros:

- Approval of the change order will allow the city to complete construction of the water system and close out the project, which will provide twenty-three (23) customers with a safe reliable drinking water source and much improved fire protection.
- The contract amount is fully reimbursable by the committed grant money, including the change order amount.

Con:

- If the change order is not approved, it would lead to forfeiture of part of the NCDENR grant funds and the existing failing private water system would not be upgraded.

The Water Resources Department will initially fund the construction cost of $322,847.59 (includes the change order amount) for this project until full reimbursement is received from the State. Funds for these upfront costs are already included in the Water Resource's Capital Improvement Program budget. Cost summary until reimbursement:

| | |
|---|---|
| Viewmont Acres Construction Budget | $582,171.00 |
| Original Construction Amount | $294,950.00 |
| Amount in Const. Budget Before Changes | $287,221.00 |
| Change Order Amount 1 | $ 23,413.24 |
| Change Order Amount 2 | $ 4,484.35 |
| Amount Remaining After Change Order | $ **259,323.41** |

After the project is completed and closed out, the remaining funds will be returned to the Water Resource's Capital Reserve Fund for reallocation to a current or future capital project. Staff will seek Council approval on any future reallocation of these funds.

City staff recommends City Council approval of the resolution authorizing the City Manager to execute a change order in the amount of $4,484.35 to increase the construction contract for Patton Construction Group, LLC, from $318,363.24 to $322,847.59 for the Viewmont Acres Water System Extension Project.

**RESOLUTION BOOK NO. 34 – PAGE 138**

**I. RESOLUTION NO. 11-175 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AGREEMENT WITH DR. PAUL MARTIN MD FOR PHYSICIAN SERVICES PROVIDED THROUGH THE CITY'S HEALTH SERVICES DIVISION**

Summary: The consideration of a resolution authorizing the City Manager to sign an agreement for physician services provided through the City's Health Services division.

In January 1995, Council authorized the City Manager to enter into an agreement for part-time physician services in the Health Services division. Dr. Paul Martin entered into a contractual agreement with the City of Asheville to provide three clinic days to City employees and their families. These clinic days have been very successful for Health Services.

This action complies with the Fiscal Responsibility prong of the City of Asheville's Strategic Operating Plan for 2010-11. By offering city employees clinic hours and complimentary health services for non-critical issues, Heath Care funds are saved in unnecessary doctor and emergency room visits, maintaining the city's long term financial commitment to high levels of fiscal responsibility.

Pros:

- The Health Services Clinic and Health Services Satellite Clinic provides on-site care for non-critical health needs
- Onsite care and services for employees saves the City of Asheville money in expenses that are not paid in unnecessary doctor and emergency room visits
- Dr. Martin is a trusted member of the Health Services staff team

Con:

- There are no foreseen cons for these services

This is a one year $120,000 contract, and funds have been budgeted and will be encumbered from the Health Care Fund to cover the cost of this contract.

City staff recommends City Council adopt a resolution authorizing the City Manager to sign an agreement for physician services with Dr. Paul Martin, MD to continue to provide physician services to employees and their families.

**RESOLUTION BOOK NO. 34 – PAGE 139**

**J. RESOLUTION NO. 11-176 - RESOLUTION AUTHORIZING CONVEYANCE OF EASEMENT TO PROGRESS ENERGY ACROSS CITY RIGHT-OF-WAY ON RIVERVIEW CHURCH ROAD**

Summary: The consideration of a resolution authorizing Progress Energy to cross a City right of way, with an electric service line

Progress Energy Carolinas, Inc. (herein "PEC"), needs to relocate an electric service line to a residence on Riverview Church Road, out near Richmond Hill Park. In order to do this with the least amount of disruption, and to get the service line off of the actual travelled road, PEC proposes to extend the line from an existing pole on private property and cross the City's right of way to the service point.

The City does not own the fee interest in the property, but has a right of way acquired back in 1951. Primary access to Richmond Hill is from Richmond Hill Drive, on the other side of the park. A field inspection indicates that the right of way in question is not improved, is heavily forested, and in no obvious use. The proposed use by PEC would not interfere with any current use by the City. Provided the line is installed to a sufficient height, it would not interfere with any use that the City is able to make of the right of way. This condition can be incorporated in the instrument of conveyance.

This action complies with the City's plans in that it removes a segment of power line from the travelled portion of a public right of way.

Pro:

- Will marginally improve public safety.

Con:

- Will cross the City's (unused) right of way

Adoption of the resolution is recommended.

**RESOLUTION BOOK NO. 34 – PAGE 140**

**K. RESOLUTION NO. 11-177 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AMENDED CONTRACT WITH KIMLEY-HORN AND ASSOCIATES INC. TO PROVIDE ADDITIONAL CONSTRUCTION INSPECTION/MANAGEMENT SERVICES FOR THE PARKING GARAGE AT 51 BILTMORE AVENUE**

Summary: The consideration of a resolution authorizing the City Manager to execute an amended contract with Kimley-Horn and Associates, Inc. in the amount of $175,000 to provide additional construction inspection/management services for the parking garage at 51 Biltmore Avenue.

The City of Asheville contracted with Kimley-Horn and Associates, Inc., in the amount of $42,000 to evaluate the feasibility of constructing a parking garage at 51 Biltmore Avenue in July 2008. In October 2008, the City amended the contract to include design review, value engineering and construction inspection/management of the project. The approved amendment was in the amount of $215,000 for a total contract amount of $257,000. The total amount of the contract including this increase would be $432,000.

Staff is recommending an additional amendment in the amount of $175,000 for the following purposes:

1. The original contract did not account for the lag in the design period and the start of construction. During this period of time, Kimley Horn provided services necessary to secure the financing of the project.
2. The contract with Kellogg and Kimsey, Inc. (the contractor) provides for the release of the 5% retainage of several items in the contract at the completion of that item, as opposed to the final completion. The purpose for releasing the retainage sooner was to get better pricing from the sub-contractors on these items. In efforts to make sure these items were constructed in accordance with the design, we requested Kimley-Horn provide weekly site inspections as opposed to monthly inspections as stated in the original contract. We also asked them to provide additional oversight as needed to sign off on each pay application request.
3. We have requested that Kimley-Horn provide a formal maintenance plan for the parking garage to increase the life of the garage and reduce major maintenance costs.

This action complies with the City Council Strategic Operating Plan in Job Growth and Community Development by supporting a dynamic and robust local economy with balanced and sustainable growth. This project also complies with the City's Parking Action Plan.

Pros:

- Insures that proper oversight and inspection is performed by qualified professionals and in the best interest of the City.
- Reduces liability in releasing the retainage on the project.
- Documented maintenance plan provides for the extended life of the parking facility.

Con:

- Additional cost of $175,000.

The parking garage portion of the project is approximately 35% complete. We have paid $2.6 million of the $7.5 million contract amount. To date we have approved $12,000 in change

orders (less than 0.2%). The budget includes a 10% contingency as part of the project cost. This increase will reduce the amount of contingency from $738,000 to $563,000. We do not anticipate any significant change orders on this project. This amendment will not increase the budget for the entire project.

Staff recommends that City Council authorize the City Manager to execute an amended contract with Kimley-Horn and Associates, Inc. in the amount of $175,000 to provide additional construction inspection/management services for the parking garage at 51 Biltmore Avenue.

**RESOLUTION BOOK NO. 34 – PAGE 142**

**L. RESOLUTION NO. 11-178 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AMENDED CONTRACT WITH AMEC (PREVIOUSLY MACTEC) TO PROVIDE SPECIAL INSPECTION AND CONSTRUCTION MATERIALS TESTING FOR THE PARKING GARAGE AT 51 BILTMORE AVENUE**

Summary: The consideration of a resolution authorizing the City Manager to execute an amended contract with AMEC (previously MACTEC) in the amount of $27,500 to provide additional special inspection and construction materials testing for the parking garage at 51 Biltmore Avenue.

The City of Asheville contracted with AMEC (formally MACTEC) in the amount of $46,000 to perform special geotechnical and material inspections as well as testing. Since that time, we have encountered some issues on the site that have increased the need for additional geotechnical testing and inspections. These issues include additional fill material on the site that required additional excavation. Additional testing had to be performed to make sure the sub-surface was compacted. In the same vain, the soil wall had to be extended. This required additional soil nail installation and inspection. Finally, due to the compressed schedule of the project, more overtime hours are required to perform these inspections. Some of these overtime cost will be reimbursed by the contractor in a change order deduct. The total amount of the contract including this increase would be $73,500.

This action complies with the City Council Strategic Operating Plan in Job Growth and Community Development by supporting a dynamic and robust local economy with balanced and sustainable growth. This project also complies with the City's Parking Action Plan.

Pros:

- Insures that proper oversight, inspection and testing are performed by qualified professionals and in the best interest of the City.
- Reduces liability in releasing the retainage on the project.

Con:

- Additional cost of $27,500.

The parking garage portion of the project is approximately 35% complete. We have paid $2.6 million of the $7.5 million contract amount. To date we have approved $12,000 in change orders (less than 0.2%). The budget includes a 10% contingency as part of the project cost. The increase in the Kimley-Horn amendment will reduce the amount of contingency to $563,000. This amendment will decrease the contingency to $535,500. We do not anticipate any significant change orders on this project. This amendment will not increase the budget for the entire project.

Staff recommends City Council authorize the City Manager to execute an amended contract with AMEC (previously MACTEC) in the amount of $27,500 to provide additional special inspection and construction materials testing for the parking garage at 51 Biltmore Avenue.

**RESOLUTION BOOK NO. 34 – PAGE 143**

**M. RESOLUTION NO. 11-178 - RESOLUTION SUPPORTING SUBMISSION OF THE HUD SUSTAINABLE COMMUNITY CHALLENGE PLANNING GRANT**

Summary: The consideration of a resolution that the City of Asheville submit an application for the HUD Sustainable Community Challenge Planning Grant in the amount not to exceed $3 million.

HUD just announced a second year of availability of *Sustainable Community Challenge Planning Grants.* These grants are available for local efforts that "foster reform and reduce barriers to achieving affordable, economically vital and sustainable communities." HUD funds of $28.6 million are available this year. Unlike last year, when HUD and DOT combined their grant programs in one application round, this is a HUD opportunity only. The City was awarded $850,000 from the DOT TIGER II pool of funds last year. Our proposed application this year would build on the activities funded by DOT in the East of the Riverway, with special emphasis on those activities not funded, although proposed, in last year's competition.

The East of the Riverway target area is roughly bounded by the French Broad River to the west, Patton Avenue (but including Hillcrest) to the north, the CBD and McDowell Street to the east and the Swannanoa River to the south. We propose adding the Lee Walker Heights public housing community to the target area, to actively support the City's collaboration with the Housing Authority in their Choice Neighborhoods grant application.

Like last year, the proposed project outcomes are to complete pre-development activities that will lead to an increase in the supply and diversity of housing in that area, and to create new economic opportunities and job creation in the target area. The goal is to advance projects to the point of being "shovel ready."

Specific activities to be proposed this may include:

- Create "form-based" zoning for the area;
- Building on the Energy Plan to be developed using TIGER II funds, support the advancement of legislation or other governmental rules that will enable Asheville to employ public financing tools to achieve large scale community participation in energy conservation and alternative energy. Examples of tools needing enablement include PACE and Energy Utility creation.
- Fund land purchases for affordable housing development in the City's East of the Riverway area; this is the only "implementation" activity that is an eligible use for Challenge Grant funding;
- Support planning for increased sustainable economic development, including market analysis, business plan development, entrepreneurial training and other activities to increase neighborhood commercial activity, support for the arts-based economy and the provision of healthy food products in the target area;
- Continue to Involve the community- especially residents, property owners and businesses operators in the area- in determining the direction of development there;
- Continue to support a broadly representative and effective partnership to perform the work under the grant, including City departments, non-profit organizations, the Riverfront Redevelopment Commission, Housing Authority and others

The Housing and Community Development Committee will review this recommendation at their August 22 meeting.

This opportunity will support the following goals and objectives of Council's Strategic Plan: (1) Affordable: this project will (a) Help create and preserve affordable housing by creating UDO and other code reforms to encourage and align affordable housing with access to transit; (b) Explore opportunities for public/private partnerships and innovative financing for affordable housing; and (c) Support the Housing Authority to pursue redevelopment of public housing; (2) Fiscal Responsibility: This project will explore alternatives for master plan implementation and position the City to proactively seek funding opportunities for infrastructure maintenance and capital improvements; (3) Green, Sustainable: This project will create opportunities to work with regional partners to create incentives for green building, energy conservation and energy independence; and (4) Job Growth and Community development: This project will (a) Expand partnerships in economic development around common goals of sustainable economic development; and (b) Support local and regional Sustainable Community Initiatives and seek investments in target areas, such as the East of the Riverway.

Pros:

- This grant seeks funding for already articulated community needs that were not funded initially;
- The practical partnership being formed will lead to projects that are comprehensive and coordinated;
- Targeting the East of the Riverway area will lead to "transformational investment" that will create new opportunities for people already living there, as well as incentivize new housing and economic development that will spur the sustainable reuse of existing property, including property now owned by the City;
- This grant will support the activities of the Riverfront Redevelopment Commission to further sustainable economic activity;
- The opportunity to fund the acquisition of land for future affordable housing development will enhance the ability of our partners to plan development that will be accessible to jobs, training and services, and for the City to plan for the efficient use of its resources to support that development.

Cons:

- Although the nature of this grant lends itself to a targeted focus, targeting one area of the City may cause concern that other City areas are not being treated fairly;
- New resources can create expectations of immediate future funding; although HUD and other agencies have implied that this funding will be available, it will depend on the federal (and state and local) budget processes and constraints;
- New development brings inherent conflicts between competing interests. The success of any planning activity will be the ability to create win-win relationships.

The City must provide evidence of commitment of 20% matching funds. Some federal funds are eligible (such as CDBG and HOME); in-kind contributions are also eligible. Staff is confident that the proposed activities either already have sufficient matching commitments from other federal funds or staff, or that the match will be provided by project partners who originally committed their leverage to the last year's application. No new funding is requested from the City to meet these match requirements.

Because no new funding is requested from the City, and existing City staff are preparing the application, there is no immediate fiscal impact. If awarded, the City will assess the benefit and impact of accepting funding. We expect the City to be better positioned to leverage future state and federal funding, especially in very competitive funding environments.

Staff recommends making application for funding as described above.

**RESOLUTION BOOK NO. 34 – PAGE 144**

**N. ORDINANCE NO. 4000 - TECHNICAL BUDGET AMENDMENT TO SUPPORT THE HIRING OF AN ADDITIONAL CUSTOMER SERVICES REPRESENTATIVE POSITION**

Summary: The consideration of a technical budget amendment in the Water Resources Fund in the amount of $45,000 for funds being transferred from the Stormwater Fund to support the hiring of an additional Customer Services Representative position.

Beginning with the start of the 2011-12 fiscal year, stormwater charges are now included on the bi-monthly water utility bills. As such, staff anticipated an increase in the volume of stormwater-related customer service inquiries and issues. To accommodate this additional workload, funding of $45,000 was included in the adopted FY 2011-12 budget in the Stormwater Fund to pay for additional staffing in the Customer Services Division of Water Resources. Even though this expenditure was included in the Stormwater Fund adopted budget, the transfer could not be completed until the budget became effective and thus was not included in the Water Resources Fund budget. The additional Customer Services Representative (CSR) position was not requested until the funds were available. This technical amendment will correct that oversight. The full-time employee (FTE) position count in the Customer Services Division will also be adjusted from 22 to 23.

This project is part of City Council's strategic plan to provide excellent service and to operate at the highest levels of fiscal responsibility.

Pros:

- Establishes correct revenue and expenditure budgets in the Water Resources Fund.
- Allows for the addition of one FTE in Customer Services to help cover the call volume and reduce call wait times for customers.

Con:

- None.

As noted above, the $45,000 in funding is already included in the adopted FY 2011-12 Stormwater Fund budget; therefore there is no fiscal impact to this action.

City staff recommends City Council adopt a technical budget amendment in the Water Resources Fund in the amount of $45,000 for funds being transferred from the Stormwater Fund to support the hiring of an additional Customer Services Representative position.

**ORDINANCE BOOK NO. 27 – PAGE 110**

**O. ORDINANCE NO. 4001 - TECHNICAL BUDGET AMENDMENT AFFECTING ONE OF THE CITY'S SPECIAL REVENUE FUNDS, THE GENERAL CAPITAL PROJECTS FUND AND THE STORMWATER CAPITAL PROJECTS FUND**

Summary: The consideration of a technical budget amendment affecting one of the City's Special Revenue Funds, the General Capital Projects Fund and the Stormwater Capital Projects Fund in the amount of $5,612,369, $5,157,869 and $454,500, respectively.

The Governmental Accounting Standards Board (GASB) is the independent organization that establishes and improves standards of accounting and financial reporting for U.S. state and local governments. The GASB has issued a new statement, GASB 54 that has revised the governmental fund type definitions. Statement 54 makes clear that, for financial reporting purposes, a special revenue fund may only be established around one or more revenue sources

that are restricted or committed to purposes other than capital projects or debt service. In order to comply with this statement's new fund definitions, the City needs to move several special revenue projects out of the Grants Program Special Revenue Fund into either the General Capital Projects Fund or the Stormwater Capital Projects Fund because the projects are principally capital in nature or are funded from unrestricted revenue sources.

Currently and for years the City has correctly reported some capital projects in the Grants Program Special Revenue Fund largely due to the fact that the majority of the projects were to be funded by special and/or restricted revenue sources. With the new GASB 54 special revenue fund definition, the ability to continue this practice has been eliminated. In order to comply with the new standard, the City will need to move some of these projects out of the Grants Program Special Revenue Fund and into the more appropriate funds.

The FY11 budget amendment identifies the aforementioned projects contained in the Grants Program Special Revenue Fund which require realignment into either the General Capital Projects Fund or the Stormwater Capital Projects Fund.

This action complies with the City Council Strategic Operating Plan goal of "Operate the City of Asheville to the highest levels of fiscal responsibility."

Pro:

- Compliance with GASB 54

Con:

- None.

There is no fiscal impact; project budgets that have been previously approved by City Council are simply being moved from the Special Revenue Fund into either the General Capital Projects Fund or the Stormwater Capital Projects Fund. Since this amendment will affect the overall budgets in each fund, meaning the amendment crosses funds, City Council's approval is required.

City staff recommends City Council adopt the technical budget amendment affecting the City's Grants Program Special Revenue Fund, the General Capital Projects Fund and the Stormwater Capital Projects Fund in the amount of $5,612,369, $5,157,869 and $454,500, respectively.

**ORDINANCE BOOK NO. 27 – PAGE 112**

**P. ORDINANCE NO. 4002 - BUDGET AMENDMENT FOR THE BLACK MOUNTAIN TRAILBLAZER PROJECT, OPERATED BY MOUNTAIN MOBILITY**

Summary: The consideration of a budget amendment, in the amount of $96,881, from the Federal Transit Administration, to set up the project budget for the Job Access and Reverse Commute project Black Mountain Trailblazer, operated by Mountain Mobility, and the City's administrative costs.

The City of Asheville is the designated recipient of the Job Access and Reverse Commute (JARC) funds, a program of the Federal Transit Administration (FTA). JARC is a formula grant program oriented to provide job access in the urbanized and suburbanized area. The formula is based on the number of eligible low-income and welfare recipients in these areas.

The job access refers to projects relating to the development and maintenance of transportation services designed to transport welfare recipients and eligible low-income individuals to and from jobs and activities related to their employment.

The reverse commute refers to a public transportation project designed to transport residents of urbanized areas and other than urbanized areas to suburban employment opportunities.

To be eligible, the program requires an intensive planning process and the development of a Coordinated Public Transportation and Human Services Transportation Plan or CTP-HSTP based on community participation. The CTP-HSTP was developed in conjunction with the French Broad Metropolitan Planning Organization, Buncombe, Henderson and Haywood Counties, human services agencies, public and private transportation providers, NCDOT and general public to assess current transportation needs, identifies gaps and sets goals. The plan was adopted on April 17, 2008 by the French Broad River MPO's governing body, the Transportation Advisory Committee (TAC), which is made up of elected representatives from each of the eighteen local governments which make up the MPO. They include Buncombe, Haywood, and Henderson County, and each of the incorporated municipalities in the three counties. The CTP-HSTP set the rules to apply for projects and the projects are selected in a competitive process that is approved by the TAC.

In January 2011 Buncombe County's Mountain Mobility was selected as subrecipient of the JARC funding and received $73,449 in JARC funds to operate the Black Mountain Trailblazer. The funding will pay for two years of operation, beginning in January 2011 and ending in December 2012. The city needs to set up a project budget in order to pass through the funds and will seek reimbursement directly from the FTA. This funding covers 50% of operations, the other 50% is provided by Buncombe County as local match.

The City will be responsible for the Program Management and, as designated recipient, to oversee the utilization of these funds according to FTA regulations. The program management will require the use of city resources, mainly staff. As a designated recipient the city will use additional $23,432 of JARC funds for administration purposes, which will cover the program management expenses for a period of two years.

This action complies with the City Council Strategic Operating Plan by supporting the fiscal responsibility focus area, specifically operating the City of Asheville to the highest levels of fiscal responsibility.

Pros:

- Project funding is provided by the FTA (50%) and Buncombe County provides the local match (50%).
- The city can use $23,432 for administration purposes.

Con:

- The project cost is $73,449 and the city will seek reimbursement from FTA.

The total financial impact for the subject project is $96,881 and it will be funded with Federal Funds. $23,432 will be reimbursed to the city for administrative costs.

Staff recommends that City Council adopt a budget ordinance amendment in the amount of $96,881 from Federal Funds to set up the project budget for Job Access and Reverse Commute project, the Black Mountain Trailblazer operated by Mountain Mobility and the administrative costs.

**ORDINANCE BOOK NO. 27 – PAGE 122**

**Q. ORDINANCE NO. 4003 - BUDGET AMENDMENT FROM THE NORTH CAROLINA ARTS COUNCIL**

Summary: The consideration of a budget amendment, in the amount of $49,850, for the North Carolina Arts Council Grassroots Arts Program Grant.

The North Carolina Arts Council operates the Grassroots Arts Program Grant that provides per capita-based funding for arts programming to all 100 counties across North Carolina ensuring opportunities for citizens to experience the arts in their own communities. In counties without Designated County Partners, the North Carolina Arts Council invites an organization to serve as a Provisional County Partner in order to manage the distribution of Grassroots funds.

The City of Asheville Parks, Recreation and Cultural Arts Department will annually serve as the Provisional County Partner to manage the distribution of Grassroots Arts Program funds as approved by the North Carolina Arts Council. The funds will be awarded to eligible organizations in Asheville and Buncombe County who will then provide community art programs. Per grant guidelines, the City may retain 10% of the grant funds to support administrative cost associated with the grant program.

The action complies with the City Council Strategic Plan in that is creates more collaborative and effective working partnerships between the City of Asheville, the business community, and other key organizations to effectively manage the city's regulatory environment while accomplishing economic development goals and fiscal responsibility of exploring alternative for enhancing the city's long-term financial commitment to master plan implementation, infrastructure maintenance, capital improvements, and public facilities. The action also complies with the Parks, Recreation, Cultural Arts and Greenways Master Plan in that it enhances public confidence for and appreciation of the arts, and enhance facilitation and resources among arts interests.

Pro:
- Provides additional funds to support the arts in Asheville and Buncombe County

Con:
- None

The $49,850 grant from the North Carolina Arts Council Grassroots Arts Program will be received by the City and passed on to the designated sub grantees. The grant will be budgeted in the General Fund.

Staff recommends City Council to approve the budget amendment authorizing the City Manager to establish a budget of $49,850 for a grant from the North Carolina Arts Council Grassroots Arts Program Grant.

Superintendent of Cultural Arts Diane Ruggiero responded to Councilman Smith regarding how the City will utilize their partnership with the Asheville Area Arts Council in administering this grant.

**ORDINANCE BOOK NO. 27 - PAGE 124**

**R. ORDINANCE NO. 4004 - BUDGET AMENDMENT FOR THE 4TH & FINAL YEAR OF FUNDING FROM THE N.C. DEPT. OF PUBLIC INSTRUCTION FOR THE 21ST CENTURY COMMUNITY LEARNING CENTER S WHICH WILL OCCUR AT REID COMMUNITY CENTER**

Summary: The consideration of a budget amendment in the Grant Fund, in the amount of $78,000, for the fourth and final year of funding from the N.C. Dept. of Public Instruction for the City of Asheville 21st Century Community Learning Center which supports the West Riverside Operation Weed and Seed Initiative.

In October 2004, elected officials, city staff and Asheville citizens mobilized to develop comprehensive strategies to address crime, neighborhood restoration, and

prevention/intervention/treatment programs and activities in the West Riverside area of Asheville as part of a Weed and Seed initiative. The program was introduced to the community via a series of public meetings to determine the concerns of residents living in the targeted area and was received favorably with the understanding that residents would be integrally involved in the planning and implementation of the initiative. In July 2006, the U.S. Department of Justice announced the designation of Asheville as an "Officially Recognized" site for the federal Weed and Seed initiative which focuses on reducing crime and improving quality of life in neighborhoods experiencing high crime.

Weed & Seed sites are required to leverage additional funds to carry out goals and objectives of the initiative. The 21st Century Community Learning Center grant directly relates to the Weed & Seed prevention/intervention/treatment strategy and provides funds for afterschool programs serving Asheville High and Asheville Middle students who are academically at risk. Community-identified goals such as increased parent involvement in education and afterschool activities and increased community input on programming are addressed through the program.

Programs will take place at the Reid Community Center and will be part of the IRL (In Real Life) network of programs functioning out of Asheville Middle School. During the 2010/2011 school year, the City of Asheville 21st CCLC program served 211 middle and high school youth with a majority of students (178) attending Asheville Middle School. Youth living in the Weed & Seed designated area made up 16 percent of participants.

During the 2009/2010 school year, the City of Asheville 21st CCLC program served 161 middle and high school youth with a majority of students (121) attending Asheville Middle School. During this year, 13 percent of participants lived in the Weed & Seed designated area.

Opportunities for increased positive interactions between law enforcement officers and program participants continue to grow with 12 contact hours per week budgeted for the proposed grant cycle.

This action complies with the City Council Strategic Operating Plan in that it implements a strategy to significantly improve public safety in neighborhoods in Asheville with the highest levels of crime and supports recreation and employment alternatives for youth at risk of gang exposure. This action also complies with the community-based Weed & Seed goals of 1) reducing crime and improving public safety, 2) enhancing the relationship between the community and law enforcement, 3) providing accessible programs for youth, 4) increasing parent involvement in education and afterschool activities and 5) increasing job readiness among youth and adults.

Pros:

- Continued funding will bring much needed academic assistance to middle school students who are struggling in school and/or reside in high risk neighborhoods.
- Program works with community resources to affect change.
- Program will enhance the Weed & Seed strategy of providing a comprehensive crime prevention plan to address law enforcement, neighborhood restoration and prevention/intervention/treatment programs for residents of the targeted area.
- Partnering agencies are committed to sustaining the vision of the City of Asheville 21st CCLC program through current programming and the continuation of trust building opportunities between youth and law enforcement officers.

Con:

- The City of Asheville will have little control over the financial resources for the program in the 2012-2013 school year since the 4-year funding cycle will have come to an end.

Grant revenue in the amount of $78,000 will cover all personnel and operating expenses related to the afterschool program at no additional cost to the City. Expenses include, but are not limited to: salary for a full time program director, part-time site assistant, APD overtime, contracted site management agency, contracted teachers, and supply costs.

City staff recommends City Council adopt a budget amendment in the Grant Fund, in the amount of $78,000, to establish a budget for the 21st Century Community Learning Centers which will occur at Reid Community Center.

**ORDINANCE BOOK NO. 27 – PAGE 126**

**S. RESOLUTION NO. 11-182 – RESOLUTION TO RESCIND RESOLUTION NO. 11-151 DUE TO AN ACCOUNTING ERROR IN THE BID DOCUMENTS AND TO AUTHORIZE THE CITY MANAGER TO ENTER INTO A CONTRACT WITH SPL INTEGRATED SOLUTIONS FOR THE REVISED AND CORRECTED AMOUNT OF THE NEW SOUND REINFORCEMENT SYSTEM PROJECT IN THE CIVIC CENTER ARENA**

Summary: The consideration to rescind Resolution No. 11-151, approved on August 9, 2011, and issue a new resolution authorizing the City Manager to enter into a revised contract with SPL Integrated Solutions (AVI-SPL, Inc), in the amount of $ 418,461.03 for the installation of a new Sound Reinforcement System in the Asheville Civic Center arena.

On August 9, 2011, City Council adopted a resolution authorizing the City Manager to enter into a contract with SPL Integrated Solutions, in the amount of $368,233.71. After a review of the originally submitted bid the Contractor discovered an accounting error ($50,227.32) that neglected to properly add all of the Equipment Costs correctly. After a careful review by the contractor and staff it was determined that the contractor is still the lowest responsible bidder and meets the criteria of the contract.

The following bids were received:

| | |
|---|---|
| SPL Integrated Solutions, Columbia, MD | $418,461.03 |
| Musicraft Inc., Roebuck, SC | $425,675.00 |
| Daktronics Inc., Ossian, IN | $497,680.00 |

This change still falls within the projected budget and does not create any issues with the funding of the project.

This action complies with the City Council Strategic Operating Plan's Fiscal Responsibility goal of developing strategic partnerships to leverage resources for infrastructure and CIP projects. This action also complies with the Civic Center Commission Master Plan that encourages continuing renovations for the facility, and supports the goal of developing new partnerships. It has been reviewed and recommended by the Civic Center Commission.

Pros:

- Project allows replacement of an obsolete sound system.
- New sound system will create a much clearer sound experience during events.
- Project bid is below budget.

Con:

- None noted.

Funding for this contract is included in the Civic Center Capital Fund as part of the budget for the Southern Conference renovations.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with SPL Integrated Solutions (AVI-SPL, Inc), for $418,461.03 for the installation of new sound reinforcement system in the Asheville Civic Center arena and concourse.

**RESOLUTION BOOK NO. 34 – PAGE 147**

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Russell moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

**ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES**

**G. RESOLUTION NO. 11-173 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH TAYLOR & MURPHY CONSTRUCTION CO. INC. FOR THE EAST OAKVIEW ROAD BRIDGE REPLACEMENT PROJECT**

**ORDINANCE NO. 3999 - BUDGET AMENDMENT FOR THE EAST OAKVIEW ROAD BRIDGE REPLACEMENT PROJECT**

Councilman Russell moved to recuse Councilwoman Manheimer from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Davis and carried unanimously.

Summary: The consideration of a resolution authorizing the City Manager to execute on behalf of the City of Asheville a contract and any change order within the budgeted amount with Taylor & Murphy Construction Co., Inc. for the project known as East Oakview Road Bridge Replacement, TIP# B-4343; and a budget amendment in the amount of $325,000 with 80% of the needed funds ($260,000) coming from the N.C. Dept. of Transportation and 20% ($65,000) coming from the City's General Fund.

A formal request for bids was issued on June 27, 2011, and bids were opened on July 27, 2011. Taylor & Murphy Construction Co., Inc., a local company, was the low bidder at $1,142,616.20. This bid was squarely in line with our Engineer's Estimate of $1,249,486.96. The disadvantaged business enterprise goal of 8% was met with 8.07%. The City will be able to invoice the N.C. Dept. of Transportation (NCDOT) monthly for reimbursement of payments made to the contractor. This is a unit price contract and not a lump sum contract.

The East Oakview Road bridge collapsed in 2001, leaving residents of that neighborhood stranded. A gravel temporary access road was constructed from a nearby highway on/off ramp until NCDOT was able to loan the City a Bailey bridge to use as a temporary means of crossing Hominy creek. That borrowed bridge has been in service ever since. The City has obtained a grant from NCDOT and the Federal Highway Administration through the Municipal Bridge Program. The City will be required to pay 20% of the project cost and the grant will pay the remaining 80%. One of the City's inspectors will be on-site for the duration of the project and will receive valuable training from NCDOT employees. The City will be able to be reimbursed for the salary of City inspector working on the project. This new bridge, and the included sidewalk across it, will be a permanent solution for the citizens living on East Oakview Road.

The budget for the East Oakview Bridge project, which was initially adopted in FY 2004-05 is currently $1,363,000. Approximately $340,000 has been spent to date on design and right of way acquisition; leaving $1,022,000 in available budget to complete the project. In order to be able to award the contract and include funding for a 15% contingency, the project budget needs to be increased by $325,000. As mentioned above, the City is required to pay 20% of the project

cost and NCDOT pays the remaining 80%. Therefore, $260,000 of the additional funding needed for this project will come from NCDOT, with the City responsible for the remaining $65,000. The City's $65,000 share will come from funding that was approved in the FY 2011-12 budget for street resurfacing and repair.

This action complies with the City Council Strategic Operating Plan in fully leveraging funding from the State and other sources for regional transportation improvements.

Pros:

- Provides long term investment in the City's infrastructure.
- Permanent solution to a decade old problem
- 80% funded by NCDOT.
- City inspector will receive valuable training and salary funded by project grant.
- New sidewalk across structure.

Cons:

- The City will be responsible for future maintenance of the project.
- Project management and contract administration will consume staff time.
- 20% match ($65,000) needed for the budget amendment will come from City street maintenance funding.

The $325,000 budget amendment will increase the total budget for the East Oakview Bridge project to $1,688,000. 20% of the project budget ($337,600) is funded with City money, and 80% of the project budget ($1,350,400) is funded with an NCDOT grant. As noted above, the additional $65,000 in City funding needed for the current budget amendment will be taken from funding that was included in the adopted FY 2011-12 Public Works budget for street resurfacing.

City staff recommends City Council adopt the resolution awarding the contract to Taylor & Murphy Construction Co., Inc. and authorizing the City Manager to execute on behalf of the City of Asheville the contract and any change order within the budgeted amount; and the accompanying budget amendment

Councilman Russell moved for the adoption of Resolution No. 11-173. This motion was seconded by Councilman Bothwell and carried unanimously (with Councilwoman Manheimer being recused).

**RESOLUTION BOOK NO. 34 – PAGE 137**

Councilman Russell moved for the adoption of Ordinance No. 3999. This motion was seconded by Councilman Bothwell and carried unanimously (with Councilwoman Manheimer being recused).

**ORDINANCE NO. 27 - PAGE 108**

**III. PRESENTATIONS & REPORTS:**

**A. ADVANTAGEWEST ECONOMIC DEVELOPMENT UPDATE**

Mr. Scott Hamilton, President and CEO of AdvantageWest, updated City Council on AdvantageWest's 2010 programmatic activity on five core program areas (1) advanced manufacturing; (2) entrepreneurial development; (3) AdvantageGreen; and the (4) WNC Film Commission. He said all these accomplishments mean that our region is growing economically and our efforts are making a difference. They are committed to using all our resources, ingenuity and time to build business and create and retain jobs throughout our entire 23-county region.

Mayor Bellamy thanked Mr. Hamilton for their partnership with the City.

In response to Councilman Smith, Mr. Hamilton explained that regarding locally grown food, there are a lot of opportunities and they will continue to look at innovative ways the Blue Ridge Food Ventures can support and diversify the agricultural economy.

Mayor Bellamy noted that AdvantageWest is also addressing food security.

In response to Mayor Bellamy, Mr. Hamilton said that you can subscribe to the Winter Sun Farms CSA up to the first of December at AdvantageWest.com.

**B. QUARTERLY REPORTS**

**Finance Committee**

Councilman Russell, Chairman of the Finance Committee, updated Council on some major accomplishments during the first quarter of FY 2012. Below is a bulleted list that highlights some of the committee's accomplishments during that time: (1) During the FY 2012 budget adoption, City Council recommended that the Finance Committee review the adopted water rate structure and its impact on large manufacturers as well as the possibility of creating a manufacturing customer class. The committee began its discussion on this item on July 12. As a first step in an overall feasibility analysis, the committee directed staff to produce a financial analysis illustrating the financial impact an alternative rate for a manufacturing customer class would have on overall revenue projections. The finance committee further discussed the importance defining a "manufacturing class." The committee asked staff to report back to the committee in early October. The committee expects to bring forward its analysis and any recommendations to City Council by the end of the calendar year; (2) Staff provided the first FY 2011 audit update to the Finance Committee at the July meeting. During that presentation, staff provided the committee with a general overview of the financial audit process as well as an update on progress with the FY 2011 audit and preparation of financial statements. Feedback from the accounting firm, Dixon Hughes, has been positive so far. The lead accountant from Dixon Hughes will be at the Finance Committee meetings in August, September and October. The audit is scheduled to be presented to City Council on November 22, 2011; (3) The committee has reviewed Asheville's FY 2012 debt issuance schedule, which will combine the permanent financing for 51 Biltmore Avenue garage, the refinancing of the some existing debt, and the issuance of new debt for capital projects approved with the fiscal year 2012 budget. The Reimbursement Resolution, which provided for expenditure reimbursements to the City prior to the actual debt issuance, was approved by City Council at the July 26, 2011, meeting. It is anticipated that the debt will issued in the March 2012 timeframe; and (4) The deadline for community media development proposals was August 1, 2011, and the City received seven submissions. The joint city-county evaluation panel is currently reviewing proposals, and the Finance Committee will review results at its meeting in September. A final recommendation will be brought forward to City Council in at the second meeting in September or the first meeting in October.

Mayor Bellamy asked that when the Finance Committee reviews water rates that they consider a one-year out implementation date and that any increase not be on the City's fiscal year, but on a calendar year so people can plan for the increase. Councilman Russell said that he would be glad to add that to their discussion.

**Strategic Operating Plan**

Assistant City Manager Jeff Richardson said that the Asheville City Council identified short and long term goals at the January, 2010 strategic planning retreat and staff has continued to provide its quarterly updates on progress of the five key focus areas.

City Council asked City staff to provide quarterly updates on key strategic initiatives associated with the five primary focus areas of the City's Strategic Plan. Staff has tracked projects using performance indicators and measurements through the Fiscal Year 2010-11.

In addition, City Council has asked for an activity report on a quarterly basis of the Domestic Partner Registry. Since the Registry began on May 2, 2011, a total of 24 couples have registered.

Mr. Richardson then highlighted the major accomplishments for the end of the year focus areas of (1) Safe (A) review of the 2009 and 2010 Asheville Crime Index, compared to comparable cities; (B) track and monitor Nuisance Court progress; (C) significantly improve public safety in neighborhoods with the highest level of crime; and (D) maintain accreditation and the Asheville Fire and Rescue Department; (2) Affordable (A) enhance affordability of Asheville's Bus Pass Program; (B) implement reforms to Unified Development Ordinance to encourage affordable housing development; and (C) continued to provide funding for affordable housing through the Housing Trust Fund; (3) Green and Sustainability (A) implement new ways to reduce City-wide solid waste; (B) integrate and implement multi-modal transportation plan; (C) reduce the City's annual energy usage; and (D) expand community education programs; (4) Job Growth and Community Development (A) Development Services Center survey; (B) attract and retain quality employees; (C) enhance workforce diversity; (D) pursue models for re-formatting the Unified Development Ordinance; and (E) City of Asheville Youth Leadership Academy; (F) AT&T surface parking lot – 49 spaces; (G) Linamar Announcement; (H) Public Partnership with the UNC School of Pharmacy; and (I) Civic Center partnership with Tourism Development Authority, Buncombe County and ABC Board; and (5) Fiscal Responsibility (A) revenue stream diversification; (B) operate Asheville with the highest level of responsibility; (C) leverage/external partnerships for pursuing capital improvements and infrastructure projects; and (D) operate the City to the highest levels of fiscal responsibility.

Mr. Richardson responded to various questions/comments from Council, and for those which he could not readily answer, he said he would provide Council with that information. Some questions/comments were, but are not limited to: comparison of other cities Asheville's size in North Carolina on their turn-over rate; why did we pay for Budweiser wristbands for Bele Chere when there are so many local breweries; request for copy of PowerPoint given to the Airport Authority by Mr. Richardson and Fire Chief Scott Burnette; confirmation that if we had a joint fire station located at the Airport, all businesses in the City of Asheville would see a 2-5% decrease in their fire insurance premiums on a year to year basis, due to the potential ISO upgrade in 2013; and request to continue to improve the racial diversity so that our workforce mirrors our community.

Mayor Bellamy thanked the team members for the partnership with UNC-Asheville.

Councilman Davis also thanked key City staff for the partnerships in bringing the Southern Conference back to Asheville.

## IV. PUBLIC HEARINGS:

### A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE CONDITIONAL USE PERMIT FOR SUNSET PARK, LOCATED AT 2 SUNSET DRIVE

### ORDINANCE NO. 4005 - ORDINANCE AMENDING A CONDITIONAL USE PERMIT FOR SUNSET PARK, LOCATED AT 2 SUNSET DRIVE

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast said that this process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

When City Attorney Oast asked if any Council member had special knowledge of the site, other than visiting the site, no one spoke.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

City Attorney Oast said that the Authorized Practice Committee of the North Carolina State Bar has issued an advisory opinion that appearing in a representative capacity for a party before a local governmental body in a quasi-judicial proceeding is the practice of law, especially with respect to such aspects of the hearing as examining or cross-examining witnesses, or advocating for legal conclusions or results. This does not prevent persons, including land use professionals, from presenting information or expressing opinions within their knowledge or area of expertise.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 6:06 p.m.

Technical Review Manager Kim Hamel submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Hamel said that this is the consideration of an amendment to the conditional use permit for Sunset Park, located at 2 Sunset Drive, for the reduction in the number of units from 19 to 17 and changes to the building design, elevations and footprints.

On February 27, 2007, City Council approved a Conditional Use permit with an "Exceptional Development Density Bonus for the construction of a 19 unit condominium project located at 2 Sunset Park Drive (Attachment to City Exhibit 3 – Site Plan). Four (4) of the units were to be sold at prices meeting the City's definition of affordability.

To date, two duplex units (Units 1-4) at the corner of Baird and Sunset Park and two single family structures (unit 8 and 11) have been constructed to meet Healthy Built certification standards. Each of the four units housed within the duplex structures are occupied and were sold at a price that met the City's Affordable housing rate at the time construction was completed. With the exception of grading for the future construction of foundation pads for the remaining units, all storm drainage, sewer, grading and disturbance on the site is complete.

In 2008, after the construction of the last single family dwelling was completed on site (unit 11), the property went into foreclosure. In March 2011, Chris Carson of AVL Associates assumed ownership of the property from the bank and is now returning to City Council to seek several minor site modifications to the master plan and is also proposing changes to the building elevations that were approved.

The following is a list of minor site plan changes that the applicant is requesting with this amendment request:

- A reduction in density from 19 units to 17 units
- A reduction in the total number of parking spaces for the development: from 36 spaces to 32 spaces
- The addition of an accessory structure for unit 12

- Provide for a mix of footprint sizes between 600 square feet and 1,250 square feet – some of these footprints are smaller than what the previous approval proposed.

As stated above, this amendment request also includes proposed changes to the approved building elevations; and it is the primary reason the application is returning for Council's consideration (Attachment to City Exhibit 3 - 2 samples of front elevation) (Attachment to City Exhibit 5 – sample of rear elevation). While the new design proposed by the applicant is very similar in style, the former application proposed a mix of moiore, slender "tree-house like" structures that were to be constructed with high quality building materials and included significant interior upgrades to produce a fully sustainable housing design (each unit was required to be Energy Star and Healthy Built certified). The prior design also proposed varying footprint sizes ranging in scale from 700 - 1250 square feet, 2-3 stories in elevation and up to 44-feet in height. Because the "high quality building materials and designs" was a primary feature included in the original proposal's exceptional development features, staff felt that reconsideration by Council was necessary.

The new design proposed by the applicant incorporates many of the same Arts and Crafts style elements that were approved with the original design and also includes: front porches and rear decks, exposed rafters, decorative brackets, and roof pitches that mimic the character of homes found within the neighborhood. As stated above, homes will remain in the same location as the prior approval to utilize the existing footprints (and disturbance) from the original development. The homes will also be 2-3 stories in elevation and constructed to not exceed 40-feet in height.

In addition to the design features noted above the owner is retaining the requirement that the homes be Energy Star Certified; and in addition, will require homes to be either WNC Healthy Built or National Green (NAHB) certified.

The changes noted above are not expected to negatively affect the findings for the seven conditional use standards that were presented with the original application.

Staff recommends approval of the amendment pursuant to the site plans, elevation character sketches and supplemental design features proposed with this application.

Mr. Michael Lavoy, engineer of record and the property owner's representative, spoke in support of the amendment and stated that he would like to build homes that reflect the community that is in the area.

Rev. Christopher Chiaronmonte felt that developers should build according to the rules and not ask for any exceptions by City Council.

After rebuttal, Mayor Bellamy closed the public hearing at 6:16 p.m.

Councilman Russell moved for the adoption of Ordinance No. 4005, amending the conditional use permit for Sunset Park, located at 2 Sunset Drive, for the reduction in the number of units from 19 to 17 and changes to the building design, elevations and footprints. This motion was seconded by Councilman Davis and carried unanimously.

**ORDINANCE BOOK NO. 27 - PAGE 128**

**B. PUBLIC HEARING TO CONSIDER THE CONDITIONAL ZONING OF THE PROJECT IDENTIFIED AS DOLLAR GENERAL MARKET, LOCATED AT 1131 SMOKY PARK HIGHWAY FROM COMMUNITY BUSINESS II DISTRICT TO HIGHWAY BUSINESS DISTRICT/CONDITIONAL ZONING FOR THE DEVELOPMENT OF A TWO PHASE RETAIL PROJECT**

**ORDINANCE NO. 4006 - ORDINANCE TO CONDITIONALLY ZONE THE PROJECT IDENTIFIED AS DOLLAR GENERAL MARKET, LOCATED AT 1131 SMOKY PARK HIGHWAY FROM COMMUNITY BUSINESS II DISTRICT TO HIGHWAY BUSINESS DISTRICT/CONDITIONAL ZONING FOR THE DEVELOPMENT OF A TWO PHASE RETAIL PROJECT**

Urban Planner Nate Pennington said that this is the consideration of an ordinance to conditionally zone the project identified as Dollar General Market. located at 1131 Smoky Park Highway, to rezone from Community Business II District to Highway Business District/Conditional Zoning for the development of a two phase retail project. This public hearing was advertised on August 12 and 19, 2011.

Urban Planner Nate Pennington oriented the Commission to the site location and said that the applicant is requesting a Conditional Zoning for three (3) parcels zoned CB-II (Community Business II) to HB-CZ (Highway Business – Conditional Zoning) for the development of a new shopping center in accordance with Section 7-7-8 of the Unified Development Ordinance (UDO). The subject property is located outside the City limits but within Asheville's extra-territorial jurisdiction.

The project site consists of three parcels comprising 5.52 acres according to the submitted site plan. The site is currently vacant but once contained a Winn-Dixie grocery store that has now been demolished. A large asphalt parking lot and concrete slab are all that remain onsite. The former building flooded heavily during the 2004 floods and the subject property is almost entirely located within the 100 year regulated floodplain.

The applicant is requesting a conditional zoning to allow for parking to occur in front of the proposed buildings along Smoky Park Highway. CB-II zoning only allows for parking to occur to the side or rear of buildings while HB zoning allows for parking to occur in the front of buildings. Two separate buildings are proposed to be built: the first would accommodate a Dollar General Market and the second (to be built a later date) would house an undetermined retail store.

Vehicular access to the site is proposed along Smoky Park Highway by utilizing two existing curb cuts and one existing cut along Rutherford Road would be used to allow patrons to utilize the traffic light at the intersection of Rutherford Road and Smoky Park Highway. Two additional existing cuts along Rutherford Road are proposed to be closed.

The project is proposed to be built in two (2) phases. The Dollar General Market will be built first and the second building will be constructed when a tenant is secured.

According to the site plan, 146 spaces are provided inclusive of required ADA parking. This amount of spaces is within the minimum and maximum thresholds as prescribed by the UDO. Nine (9) bicycle parking slots are available and dispersed between two bike racks that are to be located in front of the proposed buildings.

An off-street loading zone is proposed to be located in front and to the side of the Dollar General Market. One additional loading zone will be required for the second building that is proposed to be built as part of phase II of the development. Further, the applicant must depict the proposed truck route (ingress and egress) in relation to Smoky Park Highway and Rutherford Road on the site plan.

Sidewalk construction is required and proposed to be built along Rutherford Road. The applicant has requested to pay a fee in lieu of construction along Smoky Park Highway because of a stream that runs parallel to the road and the inherent requirement to maintain a 30 foot wide stream buffer. The Transportation Department noted in the Technical Review Committee (TRC) staff report that Smoky Park Highway is a needed linkage and therefore this option is not available. The Transportation Department conducted a field visit and verified that there are no

viable options for the required along Smoky Park Highway. Therefore, the developer may wish to appeal to the City Council for a waiver (as indicated in the Standards and Specifications Manual. Staff recommends that if a waiver is granted for the sidewalk that a fee-in-lieu of this requirement still be paid by the developer.

Street trees are required and provided along Smoky Park Highway and Rutherford Road. A 20 foot wide Class "A" property line buffer is required along the northeast portion of the property along Rutherford Road where a single-family residence is located across the street. The proposed parking areas are appropriately landscaped and no modifications are being requested.

The open space requirement for this type of development is 15% of the total site size; a total of 36,037 square feet for this site. The site plan illustrates that 36,070 square feet has been reserved to meet this requirement.

This proposal was recommended for approval with conditions by the TRC on June 20, 2011. A neighboring property owner expressed concerns related to the retention of the curb cut along Rutherford Road and the associated traffic that would utilize this street.

At their regularly scheduled meeting on August 3, 2011, the Planning & Zoning Commission unanimously approved this project with the conditions outlined in the staff report. As previously noted, at the TRC, a neighboring property owner expressed concerns related to increased traffic on Rutherford Road which were addressed by Ken Putnam, Director of the Transportation Department.

Section 7-7-8(d)(2) of the UDO states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the *UDO*, the *Standards and Specifications Manual*, the *North Carolina Building Code* and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The proposed project makes use of a previously developed site along an active commercial corridor. The previous building was built in 1978 and flooded heavily in 2004 given its location in the 100 year floodplain. The proposed buildings are required to meet flood standards that require the structures to be elevated two feet above the base flood elevation. Appropriate stream buffers have been provided for the associated streams along the eastern and southern boundaries of the subject property.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The single-family residence across Rutherford Road to the rear of the property will be further separated by a Class "A" property line buffer. The remaining portions of the property are surrounded by similar commercial developments of similar zoning along the Smoky Park Highway Corridor. Furthermore, the proposed zoning will allow for parking to occur in front of the proposed buildings

and away from the residential properties along Rutherford Road.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
The site is adjacent to a mobile home/modular sales business to the east, commercially zoned vacant property to the west and a number of commercial/industrial uses along the Smoky Park Highway corridor including offices, retail, warehouse, restaurant and the Vulcan materials site. The proposed use is consistent with both the existing zoning and character of the Smoky Park Highway commercial corridor in which it is located while maintaining sensitivity to the residences along Rutherford Road behind the proposed buildings through the use of mitigating factors including additional landscaping, open space and concentrating parking fields towards Smoky Park Highway.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
Elements of the proposal are aligned with the City's goals and objectives as noted in the Compliance with Comprehensive Plan and other Adopted Plans section (listed above). Specifically, the redevelopment of the site is consistent with the goals of infill development along an established commercial corridor.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
The site is located near the intersection of Rutherford Road and Smoky Park Highway with frontages along both roads and within two (2) miles of Interstate 40. The closest City of Asheville bus stop is located almost 3.5 miles away on Smoky Park Highway in front of the DMV office. Adequate water supply, fire and police protection, waste disposal and similar facilities are verified during the TRC review process.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
Although the anticipated project traffic exceeded 100 vph during the afternoon peak hour, we do not anticipate that the project will create any adverse traffic congestion along the existing street infrastructure. A draft traffic impact study was submitted to the City Traffic Engineer after the completion of this staff report and is currently being reviewed. Additional requirements may apply based on the review of this report.

Based on the above findings and the analysis provided in the report, staff finds this request, with conditions noted, to be reasonable.

Pros:

- Provides an opportunity to redevelop and upgrade a previously developed infill site.
- Will enhance a vacated site with new buildings and a landscaped parking lot that has lied dormant for many years.

Con:

- Although this site was in commercial use previously, that use has ceased for a number of years and some of the residential neighbors along Rutherford Road have expressed concerns about the potential for traffic generation originating from the proposed development onto Rutherford Road.

Based on the above findings, staff recommends approval of the project as requested by the applicant.

Mayor Bellamy opened the public hearing at 6:20 p.m.

An engineer with Patton Development Company, owner of the site, said Dollar General would like to bring one of their modern stores to this location.

Mayor Bellamy closed the public hearing at 6:22 p.m.

Councilman Davis felt this project fits the community well and is an appropriate development for the area.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Davis moved for the adoption of Ordinance No. 4006, to conditionally zone the project identified as Dollar General Market, located at 1131 Smoky Park Highway, to rezone from Community Business II District to Highway Business District/Conditional Zoning for the development of a two phase retail project. Phase I consists of a 20,700 square foot Dollar General Market; Phase II consists of approximately 10,000 square feet of future retail space, subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with cut-off fixtures or full cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (5) This project will undergo final review by the TRC prior to issuance of any required permits; and (6) A fee in lieu of be paid by the developer for the sidewalk along Smoky Park Highway. This motion was seconded by Councilman Smith and carried unanimously.

**ORDINANCE BOOK NO. 27 - PAGE 133**

At 6:26 p.m., Mayor Bellamy announced a short recess.

**C. PUBLIC HEARING TO CONSIDER AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO MODIFY AND EXPAND REQUIREMENTS FOR MOBILE FOOD VENDING**

**ORDINANCE NO. 4007 - ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO MODIFY AND EXPAND REQUIREMENTS FOR MOBILE FOOD VENDING**

Director of Planning & Development Judy Daniel said that this is the consideration of an ordinance to amend Chapter 7 of the Code of Ordinances to modify and expand requirements for mobile food vending citywide, including regulations specific to the downtown Central Business District (CBD). This public hearing was advertised on August 12 and 19, 2011.

She said that mobile food vending (in trucks, not carts) have been regulated in the rest of the city for some time and in most instances operate under temporary use permits. The use is allowed in commercial areas in most parts of the city but not the central business district where a

general prohibition has existed since the Unified Development Ordinance (UDO) was adopted in the late 1990's.

During the summer of 2010 the Planning staff was contacted multiple times by several mobile food vendors interested in an expansion of the regulations for mobile food vending to allow them to work downtown. They were advised that this would need to be evaluated by the Downtown Commission. By late October various stakeholders (primarily restaurant owners and mobile food vendors) were contacting members of City Council requesting the City to consider the issue. Because the primary issue of concern centered on the potential for mobile food trucks in downtown, the staff felt the Downtown Commission was the proper forum for that discussion.

By early November of 2010 with requests from a widening range of stakeholders and widening community interest, the staff requested that the issue be placed on the agenda of the Downtown Commission for an initial discussion. Following that discussion at the November 12 meeting the Commission created a subcommittee to study the issue. After four meetings of that subcommittee (January through June of 2011) and four Commission meetings discussing the issues; the Commission voted 7-2 on July 8 to support proposed modifications to the regulations. Although the work resulted in substantial agreement on elements related to regulating mobile food trucks in most of the city, there continues to be substantial disagreement (strong support for and opposition to) the concept of allowing mobile food vending in the CBD.

The proposed changes fall into two major categories: regulations for mobile food vending sites, and regulations for mobile food vending trucks. Within those changes are the more substantial policy changes that would allow mobile food vending in the downtown CBD area on a limited basis (a limit of ten truck permits), with a review to be conducted within a year after adoption or if substantial problems are found in enforcing the regulations. That review and the elements of enforcement were of particular importance to members of the Commission.

Community Comment: Interest in this issue has been high since it was first discussed at the Downtown Commission in November of 2010, although the primary issue of concern has been about the potential for this use in downtown Asheville. Because the proposed changes reflect helpful new standards for this use citywide, it is important to remember that there was general support for most of the elements of these changes; and the controversy has centered around two provisions allowing food trucks to operate in downtown.

Support came from truck operators and area residents who would like to have this choice available. A survey conducted by the Asheville Downtown Association (ADA) showed strong general support for the concept. The ADA did not take an official position for or against the regulations, stating in a June letter to the Commission that their members are split in their feelings on the issue. That letter expresses support for the majority of recommendations in the proposals (related to mobile food vending citywide), but their representative on the Commission voted against the modifications stating concern about enforcement issues.

The two main groups expressing general concern have been representatives of Downtown Asheville Residential Neighbors (DARN) and members of the Asheville Independent Restaurant Association (AIR). Several downtown residents have commented, and a DARN letter written by a steering committee formed to research this issue was received in August and expresses concerns related to enforcement, noise, and activity. A letter from the Director of the Grove Arcade was received in June expressing concerns essentially similar to those expressed by AIR and DARN.

AIR members have been very involved in the process of reviewing the regulations for Mobile Food Vending. While not taking an official position until the end of the process, since the beginning they have expressed a range of concerns related to the use of Mobile Food Trucks in downtown Asheville. Four downtown restaurant owners attended most of the meetings on this issue including the AIR President Steve Frabitore (of Tupelo Honey), Anthony Cerrato (of Fiores),

Michel Baudouin (of Bouchon), and Anoop Krishnan (of Mela). Downtown Commission Chairman Dwight Butner (owner of Vincenzos) has also been deeply involved in the issue. Many of the issues they thoughtfully raised were addressed in the ordinance proposal recommended by the Downtown Commission such as:

- Proposing the use of "plug-in" devices rather than relying on generators
- Requiring decibel limits for generators
- Limiting the size of food trucks that can be permitted
- Limiting locations and hours of operation for the vendors
- Limiting sales from trucks to food only
- Limiting truck vending locations to private property, no on-street parking spaces
- Limiting the number of trucks to be permitted downtown
- Denying the placement of tables and chairs in the proximity of truck vendors
- Emphasizing the importance of Health Department regulations
- Requesting details on how enforcement would be handled

Their concerns remain intense however, related to certain topics that include:

- Not allowing food truck vendors downtown
- Regulating the appearance of food trucks
- Limiting food trucks to local owners only
- A system for determining the quality and variety of food offered
- A requirement for restroom access for food truck patrons
- A distance requirement, keeping food trucks away from restaurants
- A requirement prohibiting chain restaurants from getting a permit
- A lower limit on the number of trucks permitted citywide and downtown
- A specific liability insurance requirement for food trucks

The Downtown Commission and the Subcommittee appointed to consider regulations discussed all these (and many other issues) at length. Ultimately the Commission did not choose to recommend these (and other) restrictions for various reasons such as:

- Commission members discussed the suggestion of not allowing food truck vendors in downtown Asheville several times, but ultimately did not vote to include that restriction in their recommendation to the Council. The Commission members agreed that allowing the mobile food trucks in downtown should be in the nature of a "pilot program" and recommended limiting permits for the trucks to 10, and a study/evaluation of how the program was working after a year of operation.

- Food trucks will have to be tied to a local restaurant or commissary, so they will be tied to local ownership. The Commission members also seemed to believe that practical matters (like the cost of fuel) would realistically limit the number of out of town truck owners who would want to apply for a permit. There is also a practical challenge to verifying residency.

- Restroom access is not required in the building code, and is not required for downtown food carts already operating.

- Distance requirements between retail businesses of similar types are not required for any other type of business; and chain businesses of any type are not prohibited in the City and it would be questionably legal to prohibit chains with food trucks.

- Commission members declined to require liability insurance. The reasoning appeared to be that legally permitted vending trucks would be responsible. The City only requires liability

insurance for City owned land/property/easements/rights-of-way or in other situations where the City is a party to the activity.

- An appearance standard and food quality/variety evaluation methods would be difficult and perhaps premature if only 10 trucks are to be permitted downtown. After the first year, the issue could be revisited to determine if mobile food vending is successful enough to warrant creating a new review body and guidelines for evaluation.

Ultimately, the most substantial and continuing grievance expressed by AIR members is that the decisions of the Downtown Commission did not address AIR philosophical / policy based concerns about food truck operations in downtown Asheville sufficiently. AIR members stated that they do not believe the Downtown Commission spent sufficient time considering whether food trucks should be allowed downtown at all, before they started developing regulations to govern them downtown and called for an economic impact study to be performed prior to adopting standards (no funding existed for a study). Because of this, they believe the process was flawed and as a result the ordinance, if enacted, could easily cause harm to both individual restaurants and the reputation of downtown as a place for high quality dining experiences. To them this is an issue of equity, fairness, and a responsibility of the Commission to fully research issues before changing restrictions that have existed for many years.

The Downtown Commission reviewed the wording amendment informally over multiple meetings and after lengthy discussion voted 7-2 to recommend approval of the proposed ordinance at their regular meeting on July 8, 2011. The Commission included a number of amendments to the ordinance language which are noted in the summary document and the proposed ordinance. In their approval the Commission has concerns about the following items: enforcement of the regulations including trucks operating without permits and enforcing the rules approved in the ordinance; having sufficient permit fees to provide some cost recovery for enforcement; that the ordinance be reviewed for its effectiveness after a one-year period allowing for a full season of operation.

Commission Chairman Dwight Butner was particularly disappointed with the vote and expressed a range of reasons for his concerns and vote against the measure, as noted on the summary timeline review, he provided to Council. The other 'no' vote was from Mr. Greiner who stated that he was primarily concerned about enforcement issues.

The Planning and Zoning Commission recommended disapproval of the ordinance with a vote of 3-3 at their meeting on August 3, 2011, after substantial public testimony from the public. Concerns centered on enforcement of the ordinance and competition from established restaurants.

The proposal for enforcement was reviewed the Public Safety Committee at their meeting on Tuesday August 16, 2011, and was supported by a vote of 3-0.

This action complies with the City Council Strategic Operating Plan in that the amendment supports the Council goal of broadening opportunities for entrepreneurial activities while managing community character.

Pros:

- Provides new and expanded opportunities for a new entrepreneurial activity during difficult economic times.
- Would contribute to the vitality of downtown
- Could activate under-utilized properties and/or under-developed areas of the city.
- Clarifies the existing rules to govern this use with consistency and efficiency.
- Expands eating options in Asheville.

Cons:

- May place pressure on established restaurants some of whom are already struggling with a slower economy.
- Without proper management trash and noise could be a concern.
- Enforcement has been identified as a concern especially 'after-hours' and weekends primarily from vendors without approved permits.

Depending on the level of interest from this business opportunity there may need to be additional enforcement resources, particularly during late night hours and weekends.

She said that staff urges support for the regulations that affect vending citywide as these advance and update the standards reflecting current trends and observed concerns. There appears to be broad general support for these standards. Substantial disagreement persists on the potential for allowing mobile food vending in downtown Asheville, even on a limited basis and as a one year "pilot program". Those recommendations reflect a substantial policy change that is at the heart of the continuing public debate.

Urban Planner Alan Glines reviewed the existing and proposed regulatory standards. There are several existing options in the *Unified Development Ordinance* (UDO) to permit mobile food vending at the present time in areas outside of the downtown, including operating under a temporary use permit or establishing a permanent vending use through the Level I site plan review process.

**Temporary Use Permits** are the most commonly pursued option for food vending with regulations outlined in the Temporary Use Section, found in 7-14-2 of the UDO. This section describes general specifications such as: a limit on the number of days of operation during a year, a limit on the hours of operation, a requirement that the activity be conducted on private property, that health department licenses be obtained, and standards for basic setback requirements and also identifies a specific prohibition on mobile food vending in the Central Business District.

The wording amendment proposes limited changes to the Temporary Use section permitting mobile vending that would expand options for vending outside of the downtown areas. Those standards are proposed for changes as they appear to have been limited because of concerns about the potential for activity in downtown that don't seem to be shared in other areas of the City. The most significant of these changes is a proposal to allow extended hours of operation (from 10:00 p.m. until midnight or 3:00 a.m.) for locations some distance from residential uses. The display of permits will be required to facilitate enforcement.

**Permanent Mobile Food Vending** is another existing option available in most commercial zoning districts for a mobile kitchen to establish a permanent mobile food vending operation on a regular basis. In this case, the kitchen is mobile, and therefore temporary, but the use is permitted on a permanent basis. The most well known example is the mobile food vendor that operates on the parking lot of the Home Depot on Fairview Road. It was approved in early 2008 as a Level I permit application. This application was reviewed for compliance with UDO standards and as the Home Depot site was fully compliant and had ample parking the application was easily approved. To establish this, two permits would be required – one for the site and one for the truck. The permit for the site will be treated like a Level I permit which means that it will be treated like other small scale development – setbacks will be considered, access to the site is looked at, site improvements, if any, would be reviewed, the parking demands of other uses on the parcel will be considered, if permanent electrical service will be brought to the site for the trucks to use, the locations will be reviewed, etc. A permit for the truck will also be required. The permit will be tied to a specific approved site, and operating without a permit will be a Class III misdemeanor and enforced by the Police Department. Permitting for this policy would apply City-wide inc commercial districts, except in the downtown Central Business District, as the Downtown Commission recommended limiting permits to 10 individual trucks for the pilot period. Other

areas of the City will not be limited by the number of permits for trucks. The truck permits will be reviewed annually.

Development of the proposed ordinance began with a review of current regulations, studying examples from other cities and working through a variety of details with the Downtown Commission study group, the Downtown Commission and other stakeholders.

Ultimately the staff provided information to the Subcommittee and Downtown Commission based on information derived from ordinances in six North Carolina cities (including but not limited to Charlotte, Durham, Raleigh, Greensboro, and Winston-Salem), and 12 cities throughout the rest of the country (including, but not limited to Savannah, Charleston, Austin, Portland, Madison, and Seattle); as well as multiple on-line and in-print magazines and newspaper stories submitted for staff review by other staff and members of the Downtown Commission and the Subcommittee members and stakeholders. Information and alternatives from all of these cities were used to provide alternative options for consideration by the Subcommittee and full Commission as questions and requests for additional information and research arose during the nine month process that led to the Commission's recommendation to the City Council.

Some of the ordinance amendments for permanent mobile food vending were based on the Home Depot example, borrowing from the concept that you can have a permanent use without a permanent structure. This concept was then explored further with additional research and input provided by the mobile vending discussion subcommittee of the Downtown Commission and area stakeholders including the Downtown Commission, the River Arts Business Group, citizens working on planning issues for Haywood Road, and the Asheville Downtown Association. The purpose of the new ordinance is to make a set of rules that apply city-wide that everyone can understand and follow. Some of the most substantial changes include:

- To establish mobile food vending on a permanent basis a total of two permits are required: one for the site and one for the truck. The permit for the site will ensure maneuvering onto the site, spacing, setbacks and required site improvements.

- The permit for the truck will ensure that Buncombe County requirements are met, that power sources and the noise level of the generator (if applicable) are acceptable, an approved site is identified, and that signage and other standards noted in the ordinance and pertaining to trucks are complied with.

- Even though the use may receive permanent approval to operate on a parcel, the mobile kitchen is temporary in nature and requirements from the building code such as accessibility features and restrooms, will not apply because there is no permanent structure.

- Hours of operation are proposed to be from 6:00 a.m. to 3:00 a.m. to capture a wide array of meal times and late night food vending, but are reduced to 12 a.m. (midnight) when located within 200 feet of a residential use.

- Access to the site is being considered with each application so partial access for patrons will be assured.

It is also important to note that under a separate permit, Buncombe County Department of Health approves the mobile kitchens and inspects them on a regular basis. Some of these State health regulations affect the operation such as the requirement that single-use utensils, plates and cups be used to serve patrons.

Proposals affecting Downtown: Representing a policy change for the City, mobile food vending would be expanded as a permanent allowable use in the Central Business District zoned

areas of the city for the first time. The regulations affecting downtown include the following major elements:

- They would be limited to a total of ten trucks for the entire downtown Central Business District as an introductory number that can be expanded, reduced, or eliminated depending on any issues or notable successes.

- Although there has been some cursory review of potential sites downtown for mobile food vending, negotiations for these operations will be between the interested mobile food vendors and the owner(s) of the property; however, it has been noted that there is marked demand for surface parking especially in the heart of downtown and this may inherently limit the availability of vendor locations.

- The proposed hours of operation of 6:00 a.m. to 3:00 a.m. are not reduced to a midnight closing when proximate to residential uses in the CBD. This CBD exemption has generated some comment from DARN; however, the Central Business District is primarily a business district and after discussion the Downtown Commission decided to not impose this limit as most other businesses are not limited in their hours of operation.

Mr. Glines then reviewed the following new definitions to the ordinance (as amended by the Downtown Commission), noting the Downtown Commission changes specifically:

- *Mobile food site* means an individual parcel where mobile food vending is permitted to occur on a permanent basis

- *Mobile food vending* means commercial food service sales by a mobile food vendor on a parcel of land outside of right-of-way areas. Sites approved for permanent mobile food vending are classified as a mobile food site.

- *Mobile food vendor* means an individual who owns and operates a vehicle (truck or trailer with a maximum of two axles) that includes a mobile kitchen that supports the sale and/or preparation of food and non-alcoholic beverages which is licensed and approved to walk-up customers.

Mr. Glines said that in order to establish the use of making mobile vending a permanent use on a site, the following regulations must be followed, specifically outlining the Downtown Commission changes:

a. Use Districts: Office, Office II, Office Business, Community Business I, Community Business II, Institutional, Highway Business, Regional Business, Central Business, River, Commercial Industrial, Light Industrial, Industrial, Urban Village, Neighborhood Corridor, Urban Place

b. Permitting: Permitting to establish mobile food vending as a permanent use will incorporate the following permits:

1. Permitting the mobile food site: Mobile food vending will only be allowed on parcels with an approved development permit and the actual number of vendors permitted will be dependent on site conditions and the ability to comply with spacing requirements in section 'c" below.

2. Permitting the mobile food vendor: A mobile food vendor is required to obtain a permit for each separately approved mobile food site where vending will occur, according to the following regulations:

   a. A mobile food vendor is permitted to vend at more than a single site but

each location must be approved by individual permit.

b. The Mobile Food Vendor permits will be renewed annually along with requirements for the Buncombe County Health Department.

c. The number of permits issued to individual mobile food vendors for the downtown Central Business District will be limited to 10. Vendors may vend from multiple locations subject to the ability to meet other requirements.

d. Mobile food vendor permits will run with the calendar year and existing vendors will have the option to renew.

e. Permits from Buncombe County and the City of Asheville shall be visually displayed on the mobile kitchen.

f. Copies of other required permits will be submitted with the mobile food vendor permit application.

c. Site Improvements: The permit to establish a mobile food site will require approval of a site plan illustrating the proposed placement of the mobile food vendor(s) and the following items:

1. Access into the site and parking for vendor patrons at the rate of one parking space per mobile food vendor (applicable only if off-street parking is required in the zoning district).
2. Landscaping - The site will be improved to meet the standard for street trees. In addition the affected area of the site will provide a minimum eight-foot wide property line buffer when directly adjacent to residentially zoned and used parcels. This buffer should be planted to include a mix of evergreen and deciduous trees and shrubs to result in a vegetative screen that is 75% opaque year-round. As an alternative, the buffer may be reduced by 50% with the installation of an opaque fence. Existing buildings that screen the impacts of the mobile food vendor(s) will be considered a substitute for the property line buffer or portions thereof.
3. Sidewalks - Sidewalks will be required along the frontage lines of the parcel if the road is designated on the City's needed linkages sidewalk list.
4. Site maneuvering - Each mobile food vendor will need sufficient space for maneuvering onto the lot, for safe access by pedestrians, and for emergency response.
5. Setbacks - Setbacks for individual mobile food vendors will be ten feet from side and rear property lines and other parked vehicles (if any). There is not a required setback from the frontage line except that no portion of the mobile food vendor will be permitted to encroach into the right-of-way.
6. Other site features - Permitting for the mobile food site will take into consideration the ability for the primary site user to maintain compliance with minimum parking standards (if there is one) referencing the specific zoning district standards as described in the UDO.
7. Permanent electric power infrastructure is the preferred method for supplying power at the mobile food site. If this is pursued, then the applicable permits must be obtained.

d. Other requirements for mobile food vendors:

1. No mobile food vendors will be permitted to vend in a public street, sidewalk or right-of-way.
2. All mobile food vendors are required to maintain permits issued by the Buncombe County Health Department and the City of Asheville will defer to Buncombe County for health and food safety regulations.
3. All mobile food vendors shall leave the mobile food site when they are not in operation.

4. Aside from festivals or special events that are permitted under separate event permits, the mobile food vendor will be required to maintain a list of the location(s) for operating the vending unit.
5. Mobile food vendors will be limited to the sale of food and non-alcoholic drinks. The sale of other merchandise or services will not be permitted.
6. Mobile food vendors are encouraged to use recyclable and/ or compostable containers, cups and utensils.
7. Hours of operation: (a) Mobile food vendors will be limited to the hours of 6:00 a.m. until midnight if they are within 200 feet of a residential use (locations in the downtown Central Business District excluded); (b) Mobile food vendors who are not located within 200 feet of a residential use or are located in the downtown Central Business District may not operate between the hours of 3:00 a.m. and 6:00 a.m.
8. The mobile food vendor(s) will be required to remove trash and litter from the mobile food site each day and to maintain the cleanliness of the site during hours of operation. The vendor must provide a receptacle for use by patrons.
9. The mobile food site will be subject to the outdoor lighting and noise ordinance standards established by the City of Asheville.
10. Outside power for the mobile food vendors may be provided by electric power pedestals as a preferred method or by a generator(s) operating at 65 decibels or less and which are properly attached per manufacturer's standards to the mobile food vehicle. Mobile food vendors utilizing a generator may not operate closer than 100 feet to a residential use, unless the generator operates at less than 50 decibels in which case distance will not be restricted except by other setbacks.
11. Vendors may not bring tables and chairs to the mobile food site except that a single chair may be brought by the vendor for use by staff. In addition stand-alone tents, shade clothes, steps, etc. may not be brought to the site by vendors.
12. Mobile food vendors shall maintain 20 feet between other mobile food vendors based on fire code separation.
13. Vendors will be subject to random inspections to ensure compliance with all applicable requirements.
14. Signage: Mobile food vendors may have signage on their vehicle, not to exceed 32 square feet total per vehicle including letters and/or logo advertising the business. Square footage may be divided between a maximum of two faces. No roof signs will be allowed. A single attached menu board totaling 6 square feet is also allowed for each truck.

Assistant Planning & Development Director Shannon Tuch said that enforcement in general can be challenging and there's no perfect formula to enforcement that works in all, or even most situations. Add to the normal challenges of enforcement, a mobile activity is inherently more difficult to track and regulate so it certainly warrants some special attention.

The majority of the concern related to enforcement has revolved around the fear that adopting standards would create a culture of acceptance for unpermitted or illegal food trucks – especially late night and after hours when there is less monitoring. Recognizing that our normal zoning enforcement has its limitations and that there may be a heightened public welfare concern related to unpermitted trucks, we knew that there was more work that we had to do with this issue and, it was clear that the Downtown Commission, while in support of adopting standards overall, remained concerned about enforcement and directed staff to investigate stronger options. In response to this, Planning staff arranged for a discussion with the Police Department to see if there was a way to better address these enforcement concerns through a collaboration.

These conversations were very informative and productive. Both Planning and the Police felt that monitoring this new activity could be absorbed into out normal patrolling and enforcement responsibilities and would not be overly burdensome, particularly if certain parts of the

enforcement could be shared. To accomplish this, the ordinance would have to be written in such a way as to assign both entities some specific authority. After some discussion and recognizing the nature of the community's concerns and the strengths of the two departments, it made sense to assign the enforcement of the illegal trucks to the Police Department and so that all unpermitted (or illegal) food trucks would be a Class III misdemeanor. All other violations related to the standards of the permit would be handled by zoning enforcement.

For an example, if someone sets up late night operating from an alley somewhere and the Police comes across them, and they don't have a permit, this would be a felony misdemeanor and the Police officer on the scene would be able to handle that situation per their normal protocol. And it should be easy for the Police to identify those who don't have a permit because it is a requirement of the ordinance that the trucks post their permit so it will be very recognizable for all who approach the truck. But, if someone has a valid permit and is just operating too late, or leaving trash behind, or are operating on a day that they hadn't been permitted for, then Zoning would handle these per our normal civil enforcement process. Additionally, for those who are permitted, our staff would be arranging for periodic but random inspections to ensure that the vendors are operating within the parameters of their permit.

This general enforcement concept was supposed to go before the Public Safety Committee for some additional review and feedback prior to Planning & Zoning Commission; however, due to a canceled meeting, staff was unable to receive this review prior to the Planning & Zoning Commission meeting. Additionally, the timing of the discussions with the Police Department did not provide enough time to include this information into the staff report and ordinance that the Planning & Zoning Commission reviewed, so staff had to share the concept (verbally) during the Commission meeting. Despite these positive steps regarding enforcement, the Planning & Zoning Commission remained concerned.

With some new questions raised by the Commission regarding the mechanics of enforcement, staff then developed an outline of exactly how we expected the enforcement process to work. This, along with the overall general concept was, ultimately reviewed before the Public Safety Committee, where the general idea and process was well received. With this positive review, staff was then able to incorporate the enforcement concept into the report and ordinance that Council received (so the Council has the benefit of some information that was not available to the Planning & Zoning Commission).

Again, our concern is not so much with the permitted vendors as those who are unpermitted; and the proposed standards are simple and clear enough that we don't anticipate a lot of zoning enforcement. But, in the event that we do experience an influx of unpermitted vendors, the Police will be in a better position to deal with these violators and can offer a stronger disincentive.

To summarize, it is largely through the assistance of the Police Department that we feel that we are better equipped to adequately regulate this new proposed land use.

She stressed that it is staff's intent to return in a little over a year to provide a report on mobile food vending. If staff experiences significant issues before the one year, they will come back to Council with an ordinance amendment.

Mayor Bellamy opened the public hearing at 6:59 p.m.

Mr. Michel Baudouin, owner of Bouchon restaurant on Lexington Avenue, expressed deep concerns about the process and outcome of the proposed ordinance. Due to the special character of Asheville's downtown, he asked Council to leave the ordinance as is or extend the decision-making process in considering the ordinance as it is proposed. If adopted, he suggested (1) reducing the hours from 6:00 a.m. to Midnight on weekdays and 6:00 a.m. to 10:00 p.m. on weekends; (2) reduce the initial number of trucks from 10 to 5 which will allow the City staff to

become more acclimated to their new enforcement responsibilities; (3) develop an enforcement plan for City sales tax collection; (4) investigate why restaurants are limited to a 20 pound heater tank while food trucks carry 100 pound heater tanks; (5) require compostable/recyclable disposables; (6) review why there is no stated limit on the number of times a mobile food vendor can change their operating hours; and (7) also prohibit site landlords from supplying the site with tables and chairs. He felt the ordinance ignores the 2000 downtown residents and the concerns of the business owners who are not only paying top dollar for their real estate, but who also contribute the largest tax revenue per square foot in the City.

Chef Andrew Maykuth supported permitting mobile food vendors in downtown Asheville. He felt competition is a good thing and Asheville needs to live up to its potential.

Dr. Milton Byrd supported mobile food vending felt Asheville is great for the opportunity of culinary expression.

Rev. Christopher Chiaronmonte spoke in support of downtown mobile food vending and was concerned about the amount of insurance required for the vendors and that the downtown restaurant owners will purchase the allotted 10 permits.

Mr. Larry Holt, downtown resident, supported mobile food vending downtown; however, was concerned with the proposed hours of operation. He felt 3:00 a.m. is unreasonable for downtown residents who already have enough noise. He suggested limiting their closing hours to 10:00 p.m. or Midnight at the latest. He was also concerned that there are no restroom facilities late in the evening. He also wondered who would be cleaning up the trash. He hoped Council would consider the concerns from the residents downtown and make special exceptions.

Mr. Dwight Butner, owner of Vincenzo's Ristorante & Bistro, member of the Downtown Commission, and found member of AIR, said that mobile food vending downtown was banned several years ago because people thought it was important to put tenants in our historic buildings to revitalize downtown. He said the ordinance applies to the City as a whole and creates a whole new category of street food vending. It does limit the number of permits downtown, but there is no limit to the number of locations downtown that you can do it. It also does not limit the number of locations outside of downtown. He noted that Fire Codes restrict restaurants throughout the City not to use propane heaters more than 25 pounds, but this will allow food trucks in downtown with 100 pound propane tanks. He felt the 65 decibel level for generators should be lower. Finally, he felt allowing mobile food vending downtown will deter residential development in the downtown.

Mr. Nate Kelly, mobile food vendor, felt that mobile food trucks are part of the future and are a good alternative to fast food chains. He felt they will draw people to downtown and they will be exposed to other downtown venues. Change is vital to avoid stagnancy.

Ms. Gail Childress, downtown resident, was concerned with the late hours that the mobile food vending trucks will be allowed to operate from a noise standpoint.

Ms. Mary Ann West, representing the Downtown Asheville Residential Neighbors, said they request the hours be limited to 6:00 a.m. to Midnight with a buffer zone. She said that to allow the vendors to operate until 3:00 a.m. will adversely affect their quality of life downtown and also hurt the value of their condominiums. She also felt there should be mandatory regulations regarding trash pick-up, restrooms and clean-up of the entire area wound the food truck. She hoped Council would take the time to work out all the details before adopting the ordinance.

Mr. Joe Minicozzi, Executive Director of the Asheville Downtown Association, explained the Downtown Commission's survey results regarding mobile food trucks. The Association has not taken a position on this issue, but the Issues Committee validated the following recommendations: (1) no mobile food vending be allowed on public streets; (2) any property that

should utilize mobile food vending shall be brought to the City's parking lot landscaping standard; (3) we suggest a required and measurable decibel limit (per unit and/or combined for the site) for generators, as measured from the adjacent sidewalk or habitable neighboring structure, whichever is closest; (4) require on-site trash and recycling; (5) we support the "no Styrofoam" recommendation; (6) a limit on the size of truck (we suggest "no mobile food vending vehicle shall be more than two axles and trailers no more than one axle"); (7) the state requirements for health inspection must be met and enforced; and (8) we encourage permitted, inspected, and approved electrification of site as part of the landscaping requirements, where possible, to help mitigate the generator issue.

Mr. Joe Cauble, downtown resident, spoke in support of mobile food vending downtown.

Ms. Allison Murphy, mobile food truck owner, was looking to expand food options to healthy, organic foods.

Mr. Barry Summers spoke in support of allowing mobile food vendors downtown. He wanted to make sure that one vendor can't monopolize all 10 locations downtown.

Ms. Susie Phillips, mobile food truck owner and founder of the Asheville Street Food Coalition, felt that mobile food vending is a "to-go" food which will target people more at night after the bars close at 2:00 a.m. Great food and small business owners deserve to be embraced and fostered by the community. She explained that progressive cities have mobile food trucks and felt this is a stepping stone for some who start small and then graduate into a restaurant building. Food trucks provide job opportunities, obtain licensing and permit certifications and pay taxes, just like restaurants. We need to foster positive communication between street vendors, residents and businesses downtown. In addition to the Police Department and Planning staff enforcement, the Coalition would like to create something similar to a neighborhood watch.

Mr. Tim Peck felt that with the City's enforcement and the vendor's own interest in following out the rules and pointing out violators, the enforcement concerns have been addressed. He supported the mobile food vending downtown.

Ms. Marnie Graves, mobile food truck owner, said she buys local and tries to provide healthy alternatives to fast food.

Ms. Kim MacQueen, downtown business owner, expressed concerns regarding trash, lack of restroom facilities, noise and competition with existing restaurants.

A gentleman felt this is a way to cater creativity and Asheville should foster this type of movement.

Ms. Audrey McMurray, mobile food truck owner in the River Arts District, explained an incident where she was permitted; however, her permit was revoked due to an oversight error in the issuance.

Mr. Sadler supported the vendors being allow to remain open until 3:00 a.m.

A food and beverage worker supported relaxing restrictions on mobile food vending downtown.

Rev. Lisa Landis felt the mobile food vendors want to support themselves and the City should help them like they do other economic developments that come to Asheville.

Mayor Bellamy closed the public hearing at 7:48 p.m.

Councilman Russell, Chairman of the Public Safety Committee, felt the process has been good. He said that no one person can buy all ten permits. The property owner will have to work with the vendors on keeping their property clean. He noted that there is no time that a person cannot call the Police if they feel someone is violating the noise ordinance. He address the potential concerns and noted that if Council or staff identify problems, Council has the authority to make changes.

Councilman Russell moved to adopt the ordinance as proposed by the Downtown Commission allowing 10 independent mobile food vending trucks in the Central Business District and that an application cannot be submitted until the truck is approved by the Health Department which would prevent someone from buying all 10 permits and not owning a single truck. This motion was seconded by Councilman Smith.

Staff responded to various questions/comments by Council, some being, but are not limited to: why do the vendors have to specify their hours of operation on the permit and what if their hours change; explanation of the temporary use permit option vs. this new ordinance which would allow multiple vendors on a single site; confirmation that the City is not requiring any liability insurance for mobile food vendors since they will be on private property; confirmation that the City does not require any liability insurance for brick and mortar restaurants, unless they have an encroachment agreement for use of the sidewalk; are food truck vendors required to pay food sales tax; and confirmation that the land owner and the mobile food truck must both obtain a permit.

Councilman Smith felt we should provide an incentive to encourage vendors to get a permanent electrical power infrastructure and use recyclable and/or compostable containers, cups and utensils, since it is the City's preferred method. Planning & Development Director Judy Daniel said that every time they meet someone has an idea or another concept, and perhaps staff could work on those ideas during this one-year trial period.

Councilwoman Manheimer noted that food trucks are only allowed on ten private property locations. She did have concerns about the hours of operation and personally felt Midnight is when the vendors should close. She felt that as long as setback requirements are met, she could support a few tables and chairs. Regarding the generator noise, she felt that should be revisited after the trial period. She noted concern with the portion of the motion what requires someone to own a food truck before they apply for a permit. She felt that most people would apply for permits before they begin constructing or making substantial investments. That would be a financial leap without knowing the outcome.

In response to Councilwoman Manheimer's concern with the motion, Councilman Russell and Councilman Smith both accepted an amendment to the motion that the permit will require the vendor to begin their operations within 30 days after receipt of the permit or the permit will be revoked. City Attorney Oast said that the Planning Director can extend that time as she can for other types of permits for an additional 30 days. The amended motion now reads "Councilman Russell moved to adopt the ordinance as proposed by the Downtown Commission allowing 10 independent mobile food vending trucks in the Central Business District and that the permit will require the vendor to begin their operations within 30 days after receipt of the permit or the permit will be revoked. This motion was seconded by Councilman Smith."

Councilman Davis, member of the Downtown Commission, felt staff has crafted an ordinance from a lot of public participation. He said that we did benchmark food trucks in various cities, but did not feel that we had a clear benchmarking of cities in similar situations to Asheville. It's not easy for anyone to go into business, but he is concerned for those who do pay property taxes and worked hard to make downtown Asheville successful. Food trucks will bring another food venture to the table, but there is worry in our struggling economy of the health of existing downtown businesses. We have tried to urge people to live downtown yet we are going to treat it as a non-residential area. He was very familiar with the sound of generators and felt that 3:00

a.m. with a 65 decibel generator is not a pleasant sound. He felt there should be some incentive for not using generators. He said that trash is a problem, noting that people do not stand at the food truck and eat. The City's expense will be more trash cans in the downtown area. He was also concerned with 10 permits in the downtown CBD because that's 10 points of sale in a 50 block area. He would like to be supportive, but he has heard from a large part of the community who is less vocal.

When Councilman Davis questioned cost recovery of permit costs, Ms. Tuch said that the permit for the site is $104 and the permit for the truck is $104. He hoped that the Finance Committee will review that amount.

Vice-Mayor Newman was also concerned about noise during the late hours of operation when a vendor is using a generator. It has been his observation that the noise ordinance is hard to enforce. Therefore, he asked for an amendment to the motion to restrict the hours of operation to 11:00 p.m. for a vendor using a generator, but 2:00 a.m. if the vendor is using an electric power pedestal. This motion was seconded by Councilwoman Manheimer.

In response to Councilman Russell, City Attorney Oast said that the City's noise ordinance has no decibel limit. It is complaint driven and based on a reasonable person's sensitivity.

Councilman Smith liked the idea of the amendment to the motion in that it creates an incentive for using an electrical power pedestal; however, he asked if Vice-Mayor Newman and Councilwoman Manheimer would be willing to change the hours from Midnight for those using a generator and 3:00 a.m. for those that use an electric power pedestal.

Vice-Mayor Newman could not think of any other business activity that Council would allow to run a generator until 3:00 a.m. in our downtown area. He would not be willing to extend the hours from his amendment.

The amendment to the motion made by Vice-Mayor Newman and seconded by Councilwoman Manheimer carried on a 5-2 vote, with Councilman Russell and Councilman Smith voting "no."

The amended main motion is as follows: "Councilman Russell moved to adopt the ordinance as proposed by the Downtown Commission allowing 10 independent mobile food vending trucks in the Central Business District except that the hours of operation for mobile food vendors are from 6:00 a.m. to 11:00 p.m. for a vendor using a generator, and 6:00 a.m. to 2:00 a.m. for a vendor using an electric power pedestal; and that the permit will require the vendor to begin their operations within 30 days after receipt of the permit or the permit will be revoked. This motion was seconded by Councilman Smith."

In response to Councilman Bothwell, Ms. Tuch said that staff is relying on the already established application process fees, explaining that a permit will be required for each site, as well as the truck. Councilman Bothwell felt the only other site specific permit is for our adult entertainers because we assign them to the place they can entertain. Those permit fees are $500. He liked the idea of mobile food vending and understood the concerns of downtown residents, but could not support the motion unless it requires the vendors to use electric power pedestals. He felt that would help with air and noise pollution. He asked for an amendment to the amended main motion that only electric power pedestals be allowed in the Central Business District. This motion was seconded by Councilwoman Manheimer and carried on a 4-3 vote, with Vice-Mayor Newman, Councilman Russell and Councilman Smith voting "no".

The amended main motion is as follows: "adopt the ordinance as proposed by the Downtown Commission allowing 10 independent mobile food vending trucks in the Central Business District except that the hours of operation for mobile food vendors are from 6:00 a.m. to

2:00 a.m.; that only electric power pedestals be allowed in the Central Business District; and that the permit will require the vendor to begin their operations within 30 days after receipt of the permit or the permit will be revoked."

In response to Mayor Bellamy, Ms. Daniel said that staff will modify the ordinance to include the prohibition of mobile food vendors in City parking decks, because it was staff's intent to prohibit them on any City property.

Mayor Bellamy wondered if the penalty was high enough and what the likelihood would be for an illegal food vendor, possibly from out of town, paying a Class III misdemeanor violation. In response, City Council Oast said that the penalties can be less than a Class III misdemeanor, but they can't be any higher. Mayor Bellamy also questioned the lack of the Planning & Zoning Commission, Downtown Commission and Public Safety Committee minutes for Council to review.

In response to Mayor Bellamy, Ms. Tuch said that the application fee of $104 is for a Level I site plan – similar to a small site review. It seemed appropriate to charge that same level of fee because the review is not anymore significant. We are also charging an additional $104 fee for the truck itself so staff can review the truck standards and then follow-up with an inspection of the truck. This is consistent with our existing permitting process. We do recognize that there is an opportunity to review fees and charges in the summer and staff's intent is to follow this and see if we are doing cost recovery and if not, they would go to the Finance Committee with a recommendation, or bring forward a recommendation after the one-year trial period.

Mayor Bellamy did understand staff's reasoning with the $104 permit fee, but bricks and mortar restaurants downtown pay $200,000 in property taxes. And, for individuals who want to do business in downtown are asking to pay only $104. The vendors pay no property tax and no food & beverage tax but they are benefitting from the Asheville brand. She felt that was unfair.

In response to Mayor Bellamy, Mr. Glines said that every truck that receives a permit from the Buncombe County Health Department has to tie their permit to a bricks and mortar restaurant. The truck has to report to the restaurant at least once each day for preparation, disposal of wastewater, grease disposal, rubbish removal, etc. They also have to have an arrangement with a restaurant to even operate as a food truck. That issue is handled by the Buncombe County Health Department.

Mayor Bellamy recommended the Boards & Commissions Committee consider discussion of an oversight committee to look at this new initiative going forward. Even though this is a pilot program in downtown, it is still allowed in other areas in our community.

When Mayor Bellamy questioned the disparity regarding propone tanks on mobile food trucks vs. brick and mortar restaurants, Ms. Tuch said that when the propane heater is attached to the vehicle, that is a NC Dept. of Motor Vehicle issue. The recommendation is that it just has to comply with the manufactured instructions and be covered under the NC Dept. of Motor Vehicles. Mayor Bellamy asked for a representative from the Fire Department or the Building Safety Department to respond to that question.

Mayor Bellamy agreed with Councilman Davis that additional trash cans were needed in the downtown area and it was the consensus of Council to have staff bring forward a budget amendment, if necessary.

Mayor Bellamy wondered if the age of the mobile food trucks has been an issue raised since Asheville is trying to reduce their carbon footprint. The Airport is looking at making age requirements on the vehicles that bring people into Asheville and she felt we should at least consider that for people that are being fed.

In response to Mayor Bellamy, Ms. Tuch explained the instance with Ms. McMurray in the River District.

When Mayor Bellamy asked if permit would be issued tomorrow if the ordinance is adopted at this meeting, Ms. Tuch said that people can come in and apply for the permits. Staff would then review the application and if it meets all the standards then the permit would be issued. She noted that trucks can't be permitted until the sites are established.

Mayor Bellamy was concerned with the permit fee of $104. She felt it was too low for the benefits immediately reaped.

In response to Mayor Bellamy, Ms. Tuch said that we have approximately 17 sites downtown for pushcarts, but not all the sites are occupied.

In response to Mayor Bellamy's concern of no separation requirements for the food trucks, Ms. Daniel said that was extensively discussed by the Downtown Commission; however, they decided to not have separation requirements.

Mayor Bellamy was also concerned of the transit nature of the ordinance. She felt we needed to get some of the remaining issues resolved before opening the door for business.

In response to Vice-Mayor Newman, Ms. Tuch explained that we already have the fee for what staff is calling a Level I. Our permit fees for a Level I escalate based on the square footage. The lowest fee for a Level I is $104 for projects less than 1500 sq. ft.

Vice-Mayor Newman agreed with Mayor Bellamy in that the permit fee is too low. He felt we need to have this endeavor come close to covering the operational expenses that the City will carry over the year as we look at this issue. City Attorney Oast cautioned Council to be cautious in setting these fees because under N.C. law the fees have to approximate cost recovery. He said it may be possible to establish a separate and higher business license fee, but he would have to investigate that issue.

At 8:57 p.m., Councilman Smith called the question.

The following amended main motion made by Councilman Russell and seconded by Councilman Smith carried on a 4-3 vote, with Mayor Bellamy, Councilman Bothwell and Councilman Davis voting "no" – "adopt the ordinance as proposed by the Downtown Commission allowing 10 independent mobile food vending trucks in the Central Business District except that the hours of operation for mobile food vendors are from 6:00 a.m. to 2:00 a.m.; that only electric power pedestals be allowed in the Central Business District; and that the permit will require the vendor to begin their operations within 30 days after receipt of the permit or the permit will be revoked."

City Attorney Oast said that because the ordinance was not adopted by a 2/3 vote of Council, it is necessary to bring the ordinance back at the next meeting for a second and final reading. This will allow some time to investigate some of the concerns of Council. He noted that the second reading does not require a public hearing unless substantive changes to the ordinance.

In response to Councilwoman Manheimer, City Attorney Oast said the ordinance can be further amended when considered on its second and final reading.

It was the understanding of Council that the following concerns would be addressed on the second reading: appropriateness of the review fees; the possibility of adopting a business privilege license fee; a plan to supplement trash collection downtown; provide the Council with the

Planning & Zoning Commission and Downtown Commission minutes; and the difference of propane tank requirements.

**ORDINANCE BOOK NO. 27 – PAGE 137**

**Closed Session**

At 9:03 p.m., Councilman Smith moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including a lawsuit involving the following parties: City of Asheville; J. Jerome Jensen, et al (Biltmore Lake Annexation). The statutory authorization is N.C. Gen. Stat. sec. 143-318.11(a) (3); and (2) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Russell and carried unanimously. This motion was seconded by Councilman Russell and carried unanimously.

At 9:41 p.m., Councilman Russell moved to come out of closed session. This motion was seconded by Councilman Bothwell and carried unanimously.

**V. UNFINISHED BUSINESS:**

**VI. NEW BUSINESS:**

**A. RESOLUTION NO. 11-180 - RESOLUTION AUTHORIZING THE MAYOR TO APPROVE A GRANT OFFER FROM THE FEDERAL AVIATION ADMINISTRATION**

City Manager Jackson said that we routinely consider the Federal Aviation Administration (FAA) grant offers; however, since the grant offer materials were not made available prior to placing this on Council's agenda, a list of questions were submitted to the Airport, which answers have been received and provided to Council. As a courtesy to the Airport, the item was placed on the agenda.

Mr. Lew Bleiweis, Airport Director, asked for Council to consider a resolution authorizing the Mayor to approve a Grant Offer from the Federal Aviation Administration (FAA) in an amount not to exceed $1,669,030. He explained this grant is for the following projects: (1) Purchase of new Aircraft Rescue Firefighting Vehicle to replace existing fire apparatus which has exceeded its useful life - total cost of this vehicle is $382,965 (2) Design services associated with a new Aircraft Rescue Firefighting Facility – total cost of these services is $541,409; and (3) Conduct of an Airport Master Plan Update for the Asheville Regional Airport – total cost of services is $832,500. The total FAA grant is expected to be in the amount of $1,669,030, which represents 95% of the total share of eligible costs of these projects. The remaining 5% of the total costs will be funded by the Airport Authority.

When Vice-Mayor Newman asked if Council's approval in this in any way would prejudice or close down any options relative to consideration of a joint use fire facility at the Airport, Mr. Bleiweis replied it does not. He said any continuation on discussions with a joint fire house with the City has no impact on that at all.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 11-180. This motion was seconded by Councilman Davis and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 145**

**B. RESOLUTION NO. 11-181 - RESOLUTION APPOINTING MEMBERS TO THE PLANNING & ZONING COMMISSION**

Vice-Mayor Newman said that the terms of Cindy Weeks, Darryl Hart and Jerome Jones, as members on the Planning & Zoning Commission, expire on August 14, 2011.

The following individuals applied for vacancies on the Commission: Britt Lippard, Joseph Minicozzi, Kenneth Fulford, Mark Mathews, Bruce Greene, David Mosrie, Jeremy Goldstein, Dustin Pulliam, Tony Hauser, Jane Gianvito Mathews, Kristy Carter, Jeff McGahee, Michael Bragg, Pete Hildebrand, Terry Meek, Abigail Emison, Ellen Nutter, Steve Rasmussen, and Barber Melton. Ms. Lippard, Mr. Hauser and Mr. Bragg did not submit written responses to questions sent to all candidates, and were not considered for the next step of interviews.

At the August 9 meeting, it was the consensus of Council to interview Joseph Minicozzi, Mark Mathews, Bruce Greene, David Mosrie, Jeremy Goldstein, Jane Gianvito Mathews, Kristy Carter, Abigail Emison and Steve Rasmussen.

Vice-Mayor Newman said that earlier in the day each of the nine candidates received a 20-minute interview.

At the request of Vice-Mayor Newman, it was the consensus of Council that each Council member identify 3 candidates and any candidate that receives 4 votes will be appointed to the Commission. He then explained the voting process.

After other Council members spoke highly of the strong candidates, Joseph Minicozzi received 3 votes; Mark Mathews received no votes; Bruce Green received no votes; David Mosrie received 2 votes; Jeremy Goldstein received 4 votes; Jane Gianvito Mathews received 4 votes, Kristy Carter received 4 votes, Abigail Emison received 3 votes; and Steve Rasmussen received 1 vote. Therefore, Jeremy Goldstein, Jane Mathews and Kristy Carter were appointed as members of the Planning & Zoning Commission, to each serve a three-year term respectively, terms to begin immediately and expire on August 14, 2014, or until their successors have been appointed.

Mayor Bellamy thanked Cindy Weeks, Darryl Hart and Jerome Jones for their hard work on the Planning & Zoning Commission.

**RESOLUTION BOOK NO. 34 – PAGE 146**

**VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:**

Rev. Christopher Chiaronmonte spoke about harassment by the Asheville Police Department.

Mr. Timothy Sadler expressed concerns as he felt there was a certain level of profiling against the homeless. In addition, he hoped that the City was prepared for any potential damage from Hurricane Irene. Mayor Bellamy said that City Manager Jackson would investigate Mr. Sadler's profiling concern. She also felt it would be appropriate for Council to have an emergency response update and invite a representative from the Land-of-Sky for an update on their fuel effort.

The following claims were received by the City of Asheville during the period of July 22 – August 11, 2011: Kelly Nash (Parking Services); Jennifer Westmoreland (Parks & Recreation); Sheila Thibodeaux (Fire); Alexey Zalakov (Transit); James Graves (Fire); Cotina L. Smith (Fire, Prestige Motors of Asheville (Streets); Cynthia Messer (Sanitation); Andrea L. Griffin (Police) and Christopher Hess (Police). These claims have been referred to Asheville Claims Corporation for investigation.

The City was served with the following Complaint on August 12, 2011, which is generally described as follows: Buncombe County v. Ridgeline Reclamation Corp., City of Asheville, leinholder. The nature of the proceeding is a complaint for a tax foreclosure. This matter will be handled in-house.

**VIII. ADJOURNMENT:**

Mayor Bellamy adjourned the meeting at 10:07 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – August 30, 2011 – 6:30 p.m.
UNC-Asheville, Wilma M. Sherrill Center

Community Meeting – North Asheville

Present: Vice-Mayor Brownie W. Newman, Presiding; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Mayor Terry M. Bellamy

Vice-Mayor Newman opened the meeting, thanked Chancellor Anne Ponder for allowing the City Council to see their new Center, welcomed the audience and introduced City Council members.

With the consensus of City Council, Vice-Mayor Newman said that a resolution was necessary to allow alcohol at the Asheville Grizzlies Football Game Event 2 this weekend as follows:

**RESOLUTION NO. 11-183 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE GRIZZLIES FOOTBALL GAME EVENT ON SEPTEMBER 3, 2011**

Director of Building Safety Robert Griffin Roderick Simmons said that this is the consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Asheville Grizzlies Football Game Event 2 on September 3, 2011. He said their original request also included September 11; however, Memorial Stadium was not available on that date.

Asheville Grizzlies has requested through the City of Asheville Development Services Center that City Council permit them to serve beer and/or unfortified wine at the Asheville Grizzlies Football Game Event 2 and allow for consumption at this event.

The Asheville Grizzlies Football Game Event 2 will be held on Saturday, September 3, 2011, from 5:00 p.m. – 11:00 p.m., within the boundaries of Memorial Stadium as per the event area limits referenced on a site map.

This action has no direct connection with the City of Asheville Strategic Operating Plan.

Pro:

- Allows fundraising opportunities for Asheville Grizzlies

Con:

- Potential for public safety issues

City staff recommends City Council adopt the resolution authorizing the City Manager to approve a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Asheville Grizzlies Football Game Event 2.

When Vice-Mayor Newman asked for public comment, no one spoke.

Vice-Mayor Newman said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Russell moved for the adoption of Resolution No. 183. This motion was seconded by Councilman Davis and carried unanimously.

**RESOLUTION BOOK NO. 34- PAGE 148**

Chancellor Ponder thanked City Council for coming to the new Wilma M. Sherrill Center, home of the North Carolina Center for Health & Wellness. She briefed Council on things going on at their campus, along with student initiatives and community partnerships.

Director of Transportation Ken Putnam provided Council with an overview of the community-based partnership to improve the walkability of Charlotte Street corridor.

Ms. Deborah Pirie spoke to Council about how the Charlotte Street Corridor Committee came into fruition. They have worked to achieve pedestrian and bike safety along Charlotte Street, particularly between Edwin Place and I-240. They surveyed residents, analyzed the survey, met with City staff to discuss the results with possible changes in the traffic plan with budgeting and traffic flow in mind, invited and met with businesses, formed a Streetscape Committee, and met again with City staff to discuss support and concerns. Concerns focused on traffic volume and safety of the middle lane. They also discussed various options of road diet, bike lanes, additional pedestrian crosswalks, bump-outs, etc – looking for the least expensive yet effective way to increase pedestrian safety and walkability on Charlotte Street while attending to business traffic needs. A particular issue was safety due to the number of power poles in the middle of sidewalks.

Ms. Billie Buie, representing a north Asheville group of residents and business owners, spoke to Council about making north Asheville streets safer and more attractive for pedestrians. Merrimon Avenue area residents also want to make Merrimon Avenue walkable. There are several sections on Merrimon Avenue that sidewalks are non-existent or are not safe. They have noticed foot trails next to sidewalks because people don't want to be so close to the rushing traffic on Merrimon Avenue. She asked for Council's assistance in providing sidewalks on Merrimon Avenue from downtown Asheville to Beaver Lake. She also spoke about the issue of utility poles in the middle of sidewalks, which are unsafe causing baby strollers and wheelchairs to go around the poles into the street. She requested that the City initiate a partnership with Progress Energy that when they move or relocate existing poles that they not be relocated in the existing sidewalks and when new poles are put up that they not be in the sidewalks. In addition, she expressed concern and assistance for sidewalks on Lakeshore Drive which has a lot of traffic.

Regarding power poles in sidewalks, Public Works Director Cathy Ball said that the Public Works Department is working with utility companies to address this issue. We are working (1) to amend the City's Right-Of-Way Ordinance to require all utility companies obtain a permit to replace a pole. This will allow our staff to work with them to provide handicap accessibility around the poles; (2) to amend our Standards & Specifications Detail Manual to require all intrusion into the sidewalk provide for ADA accessibility; and (3) on negotiating a contract with Progress Energy to repair sidewalk in over 200 locations where they are replacing poles. The agreement will specify that the City will provide ADA accessibility and Progress Energy will pay the cost of the repairs.

Mr. Putnam noted that the accessibility guidelines for pedestrian facilities in public right-of-way have been in draft format for over 20 years. The final draft, which was released on July 26, 2011, is now available for public review and comment until November 23, 2011. If all goes well, it is anticipated that the subject guidelines will become law during 2012. The City of Asheville has been using the draft guidelines for several years as best management practices. When they become law, then everyone including the various utilities will be subject to the requirements. Regarding sidewalks, the subject guidelines mandate that a minimum continuous width of 48 inches be maintained along the pedestrian access route section of a sidewalk. This requirement could generate the need for easements from affected property owners and staff would hope that those property owners would cooperate and grant the City an easement at no cost so that the monies can be used for actual construction.

Regarding sidewalks on Lakeshore Drive, Mr. Putnam said that included in the current fiscal year is a project to construct a short section of sidewalk along Lakeshore Drive from Merrimon Avenue to Mt. Vernon Circle at an estimated cost of $50,000. The design has been completed and staff is in the process of obtaining the necessary easements. Construction should be completed by June 30, 2011.

This project, when completed, will provide good connectivity from existing sidewalks in a well established residential neighborhood to existing sidewalks along Merrimon Avenue. In addition, staff is currently developing a project and/or projects along Lakeshore Drive from Lakeview Road to Mt. Vernon Circle for consideration in the FY 2012-13 and FY 2013-14 fiscal years. This section of sidewalk is identified as a needed linkage in the approved 1999 (updated 2005) Pedestrian Master Plan.

Vice-Mayor Newman then opened up the meeting for questions. Questions/comments responded to by City staff or Council members consisted of: how can citizens become involved in the Charlotte Street planning process; note that there are gas lines, waterlines, fiber optic lines, etc. underneath the sidewalks; what can residents do to facilitate sidewalks on Lakeshore Drive; has the City considered different mediums (like crushed gravel) other than concrete sidewalks; does maintenance of existing sidewalks take precedence over providing neighborhoods that have no sidewalks; request to work quickly on working with Progress Energy on power pole replacements; confirmation that once the ADA law takes effect that all utility companies must abide by it; need for a trash can at the Lakeshore Drive/Cherry Lane bus stop; request for a turn signal at Merrimon & Edgewood; request to raise the 4-inch recessed manhole on Kimberly Avenue; need maintenance of the Urban Trail; request to find Urban Trail pieces that were stored and now cannot be found; in our efforts to make Merrimon Avenue pedestrian and bicycle friendly, make sure cars can flow through the streets too; need for increased bike lanes as some end arbitrarily; request to review the noise ordinance to clearly define hours of night and day with noise limits, assign acceptable decibel limits, and clearly state nuisance noises; asked the City to consider rail service to Asheville; request to mandate developers to set aside money for sidewalks; residents can help the City in getting sidewalks by contacting property owners to give easements; request for City to meet with Fairway Advertising as they are willing to talk about relocating the digital billboard on Merrimon Avenue; why has the bus service on Merrimon Avenue not been changed from every hour to every 30 minutes as was proposed in the Transit Master Plan; vast overuse of fire trucks travelling to medical emergencies and suggestion to use a smaller vehicle; request fire trucks not use alarms through neighborhoods in early morning hours; congratulations for purchasing hybrid buses; request to have the AT&T box on the pole by St. Mary's Church removed as it takes up space on ½ of the sidewalk; request to remove graffiti on the AT&T box at the corner of Edgemont and Charlotte Street; suggestion that the City and/or the Chamber of Commerce consider bus service to the middle part of the state; and concern about bear problem in north Asheville.

Vice-Mayor Newman and Council members expressed their appreciation for the community involvement.

At 8:25 p.m., Vice-Mayor Newman adjourned the meeting.

Magdalen Bowlesson
CITY CLERK

MAYOR

Tuesday – September 13, 2011 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

**PLEDGE OF ALLEGIANCE**

Mayor Bellamy led City Council in the Pledge of Allegiance.

**INVOCATION**

Councilwoman Manheimer gave the invocation.

**I. PROCLAMATIONS:**

**A. RECOGNITION OF IRA B. JONES ELEMENTARY SCHOOL**

Mayor Bellamy recognized Mr. Denny Trantham, Executive Chef at The Grove Park Inn Resort & Spa; Ms. Susan Bowers, Child Nutrition Manager at Ira B. Jones Elementary School; Ms. Sarah Cain, Principal at Ira B. Jones Elementary School; Ms. Tara Jardine, AmeriCorps at Ira B. Jones Elementary School; and Ms. Nichelle Burroughs, Student Participant at Ira B. Jones Elementary School. She was pleased to recognize this team for their participation in the National Cook-Off Event at the American Culinary Federation National Convention under First Lady Michelle Obama's Let's Move Recipes for Healthy Kids Initiative.

**B. RECOGNITION OF A-B TECHNICAL COMMUNITY COLLEGE'S CULINARY TEAM**

Mayor Bellamy recognized Team members Stephen Hertz, Sidney Ann Caton, Tracy Williams, Jonathan Zetterholm; Team Captain Danny Schwaije; Team Coaches Frederick Snyder and Charles deVries; Associate Dean, Hospitality Education Sheila Tillman; and Chef Bronwen McCormick, Culinary Arts & Hospitality Department Chair. She was pleased to recognize the "Hot Food Team" for their silver medal in the American Culinary Federation Student Team Championship.

**C. PROCLAMATION PROCLAIMING SEPTEMBER 15 – OCTOBER 15, 2011, AS "HISPANIC HERITAGE MONTH"**

Mayor Bellamy proclaimed September 15 – October 15, 2011, as "Hispanic Heritage Month". She presented the proclamation to Ms. Yolanda Bopp and Ms. Christiana Glen Tugman from the Asheville Latin Americans Advancement Society. Ms. Bopp briefed City Council on some activities taking place during the month.

**D. PROCLAMATION PROCLAIMING SEPTEMBER 19-23, 2011, AS "MINORITY ENTERPRISE DEVELOPMENT WEEK"**

Mayor Bellamy read the proclamation proclaiming September 19-23, 2011, as "Minority Enterprise Development Week" in the City of Asheville. She presented the proclamation to Mr. James Lee, the City's Minority Business Plan Coordinator, who introduced the 2011 MED Week

Committee of WNC, consisting of Chair Hope Huskey, Vice-Chair Adrianne Gordon; Secretary Natalie Murdock; Treasurer Sherrene Swayney; and members Joseph Fox, Sharon Oxendine, Jill Sparks and Pam Lewis. Mr. Lee briefed City Council on some events taking place during the week.

**II. CONSENT AGENDA:**

**A. APPROVAL OF THE MINUTES OF THE FORMAL MEETING HELD ON AUGUST 23, 2011; AND THE COMMUNITY MEETING HELD ON AUGUST 30, 2011**

**B. RESOLUTION NO. 11-184 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH ROGERS GROUP INC. FOR THE WATER RESOURCES ROAD RESURFACING PROJECT AT THE NORTH FORK AND WILLIAM DEBRUHL WATER TREATMENT PLANTS**

**ORDINANCE NO. 4008 - BUDGET AMENDMENT FOR THE WATER RESOURCES ROAD RESURFACING PROJECT AT THE NORTH FORK AND WILLIAM DEBRUHL WATER TREATMENT PLANTS**

Summary: The consideration of a resolution by City Council authorizing the City Manager to enter into an agreement with Rogers Group, Inc. in an amount not to exceed $399,812, for the Water Resources Road Resurfacing Project at the North Fork and William DeBruhl Water Treatment Plants; and a budget amendment, in the amount of $224,812, from savings in a N.C. Dept. of Transportation capital project that was completed under budget.

On August 12, 2011, the Water Resources Department issued a Request for Proposals (RFP) for the Road Resurfacing Project at the North Fork and William DeBruhl Water Treatment Plants. The scope of the project includes all labor, materials, and equipment required for: (1) removing existing damaged pavement, (2) adding a stone base, (3) asphalt paving, (4) milling, (4) adding speed bumps, (5) repairing damaged curbing, (6) thermoplastic striping, and (7) additional scope as needed. The project locations include the North Fork Water Treatment Plant in Black Mountain and the William DeBruhl Water Treatment Plant in Swannanoa.

On August 31, 2011, Water Resources received two (2) proposals for the project in response to the RFP. The RFP was posted on the Interactive Purchasing System and Water Resources websites, and Water Resources also directly solicited seven (7) companies including the Public Works Department. Companies responding were:

1. APAC-Atlantic, Inc. – Asheville, NC; $416,512.46 total bid
2. Rogers Group, Inc. – Hendersonville, NC; $415,879.82 total bid

The lowest responsible bidder, Rogers Group, Inc. has been selected for the project. The project budget will be for a not to exceed amount of $399,812. Since the total bid cost is higher than the anticipated project budget, Water Resources will work with Rogers Group to reduce the project scope in order to stay within the $399,812 project budget.

This project is part of City Council's strategic plan to maintain and improve city infrastructure and provide local companies with labor opportunities.

Pros:

- Approval of the project will allow Water Resources to complete necessary road repair at the North Fork and William DeBruhl Water Treatment Plants.
- The project will provide a local company with work through June 2012.

Cons:

- Additional funds will be needed from another capital project to cover the total bid cost.

Water Resources has a Road Resurfacing capital project in which $175,000 is currently budgeted for this project. The contract with Rogers Group, Inc. will be for a not to exceed amount of $399,812, even though their total bid is $415,879.82. Water Resources will reduce the project scope to stay within the not to exceed amount. A budget amendment in the amount of $224,812 is needed to increase the project budget in order to cover the additional funds needed. The additional funds needed for the project will be reallocated from an older N.C. Dept. of Transportation (NCDOT) project (Brevard Road from Sardis Road to the Parkway) that is completed and has the funds necessary for this project.

| | |
|---|---|
| Current Road Resurfacing Budget | $175,000.00 |
| Rogers Group, Inc. Bid | $415,879.82 |
| Reduction in Project Scope | $ 16,067.82 |
| Revised Project Budget (Not to Exceed) | $399,812.00 |

After this budget amendment, all funds will be expended in the aforementioned NCDOT Project.

City staff recommends City Council authorize the City Manager to enter into an agreement with Rogers Group, Inc. in an amount not to exceed $399,812.00 for the Water Resources Road Resurfacing at the North Fork and William DeBruhl Water Treatment Plants Project; and a budget amendment in the amount of $224,812 from savings in an NCDOT capital project that was completed under budget.

**RESOLUTION BOOK NO. 23 – PAGE 151**
**ORDINANCE BOOK NO. 27 - PAGE 143**

**C. RESOLUTION NO. 11-185 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A SUBLEASE AGREEMENT WITH THE STATE OF NORTH CAROLINA FOR REAL PROPERTY LOCATED AT ONE PAGE AVENUE, SUITE 116, ASHEVILLE N.C., WITHIN THE HISTORIC GROVE ARCADE BUILDING FOR THE RENAISSANCE COMPUTING INSTITUTE AT UNC-ASHEVILLE (RENCI)**

Summary: The consideration of a resolution authorizing the City Manager to execute a Sublease Agreement between the City of Asheville and the State of North Carolina for real property located at One Page Avenue, Suite 116, Asheville, N.C., within the historic Grove Arcade building for the Renaissance Computing Institute at UNC-Asheville (RENCI).

On June 1, 2009, the City of Asheville entered into a lease with the Grove Arcade Public Market Foundation, Inc. for office space in Suite 116 at the Grove Arcade. As part of the partnership outlined in the Memorandum of Understanding between the City of Asheville and the UNC Asheville, this space is utilized by the Renaissance Computing Institute at UNC-Asheville (RENCI) for a Downtown Engagement Site. Per the arrangement, RENCI covered all costs associated with the occupancy of the leased space.

On behalf of UNC- Asheville - RENCI, the State of North Carolina has requested a formal sublease between the City and the State, applicable through the remainder of the lease term, expiring May 31, 2012. The State of NC will continue to be responsible for costs related to the occupancy, including rental at a rate of $2,908.51 per month, utilities, and janitorial services. As standard in State leases, the City (as Sublessor) is responsible for maintaining the premises in good repair and condition, including the maintenance and repair of the heating and cooling system.

This action complies with the City Council Strategic Operating Plan by supporting an ongoing collaborative partnership between the City of Asheville and the RENCI at UNC-Asheville.

Pros:

- Optimum location for Downtown Engagement Site
- Supports RENCI at UNC Asheville partnership
- All rent payment, utilities and janitorial costs are fully paid by the State of NC - RENCI

Con:

- The City is responsible for some maintenance and repair.

There is no immediate financial impact to the City. The State of NC (RENCI) will continue to reimburse the City on a quarterly basis for the full cost of the rental. The estimated replacement cost of the HVAC unit is $5,000 and in the event it should fail during the remainder of the term, the City would be responsible for the replacement.

City staff recommends City Council adopt a resolution authorizing the City Manager to execute the sublease agreement with the State of North Carolina for Suite 116 at the Grove Arcade.

**RESOLUTION BOOK NO. 34 – PAGE 153**

**D. ORDINANCE NO. 4009 - ORDINANCE ADOPTING THE 2012 NORTH CAROLINA FIRE CODE AND AMENDING THE 2002 CITY OF ASHEVILLE FIRE PREVENTION CODE**

Summary: The consideration of adoption of an ordinance adopting the 2012 North Carolina Fire Code and amending the 2002 City of Asheville Fire Prevention Ordinance.

The State of North Carolina 2012 Fire Code became effective on September 1, 2011. This will require the City of Asheville to update its existing 2002 Fire Prevention Ordinance. The following is an analysis of changes from the City of Asheville 2002 Fire Prevention Ordinance to the proposed 2012 State of North Carolina Fire Code.

**Section 6-1. Fire Prevention Code Adopted**.

(a) An ordinance of the City of Asheville adopting a Fire Prevention Code, regulating and governing the safeguarding of life and property from fire and explosion hazards arising from the storage, handling and use of hazardous substances, materials and devices, and from conditions hazardous to life or property in the occupancy of buildings and premises in the City of Asheville; providing for the issuance of permits and collection of fees therefrom; repealing Ordinance No. 2888 of the City of Asheville and all other ordinances and parts of the ordinances in conflict therewith.

(b) In the event of conflicts with North Carolina Fire Prevention Code and this chapter, the more restrictive provisions shall prevail as allowed by GS 143-138(e).

*The preamble was edited using the model ordinance language found in the International Fire Code.*

**Section 6-2:** *The 2012 NC Fire Code is established as the base document for our city ordinance.*

City of Asheville amendments to the State Fire Code:

**104.13.1 Public Street and Sidewalk Closures.** The temporary or permanent closure or obstruction of any public street or sidewalk must be approved by the *fire code official* prior to such

closure or obstruction placement, when such closure or obstruction would affect life safety or fire apparatus response.

*Section edited to clarify when AFD approval of street closure permits is and is not required, such as only in public safety matters.*

**105.1.1 Permits required.** *This section was re-codified in the base NC Fire Code document, so this rewrite reflects those changes made in section numbering. Additionally the permit expirations have been changed to match the NC prescribed fire inspection schedule.*

**105.6.47 Road and Public Way Obstructions.** An operational permit is required for the temporary or permanent obstruction of any fire apparatus access road or public way when such obstruction, in the opinion of the *fire code official*, would affect life safety, exit discharge, or fire apparatus use.

*This is a new section that permits closures of private streets and sidewalks. It mirrors the closure process used for city maintained public streets and sidewalks.*

**109.3.4 Appeals of civil penalties.** *This is a new section intended to clarify City Policy 51 on appeals of civil penalties. It also clarifies that appeals on other matters are the purview of the NC Office of State Fire Marshal.*

**503.4.1.1 Responsibility for Vehicles.** The registered owner shall be responsible for their vehicle which obstructs an apparatus access road. Vehicles may park no more than 30 minutes for loading and unloading purposes and the vehicle is constantly attended by licensed driver. The use of a fire lane for loading and unloading shall comply with NC General Statute 20-162(b).

*This last sentence was added for clarity.*

**503.4.1. Traffic calming devices.** Traffic calming devices shall be prohibited, unless approved by the fire code official.

*This is a new section to apply city standards to private streets and parking lots.*

**506.1 Where required.** The *fire code official* is authorized to require a key box to be installed in an *approved* location. The key box shall be of an approved type, listed in accordance with UL 1037, and shall contain keys to gain necessary access as required by *the fire code official.*

*Amended Knox Box section related to a NC DOI appeal; specific local adoption is required.*

**511.1 Nuisance fire alarms.** *Section deleted, and an edited section added at 401.9. The section is relocated for clarity and placed adjacent to the same section as false alarms.*

**D105.1 Where required.** Approved aerial fire apparatus access roads shall be provided for any building with an occupied floor located more than 55 feet (16 764mm) above the lowest level of fire department vehicle access.

*Section was amended to make it applicable only to mid-rise and high-rise buildings.*

**Section 6-2(k)** Adoption of Appendix F

**Appendix F Hazard Ranking.** *The information in this appendix is intended to be a companion to the specific requirements which regulate the storage, handling and use of all hazardous materials classified as either physical or health hazards. This appendix lists the various hazardous mate-*

*rials categories that are defined in the code, along with the NFPA 704 hazard ranking for each. This assists customers in completing their hazardous materials placard.*

**Section 6-2(l)** Adoption of Appendix J

**Appendix J Building Information Sign.** *This provides design, installation and maintenance requirements for a Building Information Sign (BIS), a fire service tool to be utilized in the crucial, initial response of fire fighters to a structure fire. The BIS placard is designed to be utilized within the initial response time frame of an incident to assist fire fighters in their tactical size-up of a situation as soon as possible after arrival on the scene of a fire emergency. The BIS design is in the shape of a fire service Maltese Cross symbol and includes five spaces (the four wings plus the centerpiece of the cross symbol) in which information is placed about the tactical considerations of construction type and hourly rating, fire protection systems, occupancy type, content hazards and special features which could affect tactical decisions and operations. Section J101.8 (2) was modified from annual inspection to the frequency required by the NC OSFM administrative requirements found in section 106.*

This action complies with the Strategic Operating Plan by making Asheville one of the safest cities, based on appropriate metrics as compared with similarly sized cities.

Pros:

- Consistency with 2010 NC Fire Code.
- Clarifies City of Asheville Fire Prevention Ordinance
- Increased firefighter and community safety.

Con:

- None identified

The updating of the City Fire Prevention ordinance and adoption of the 2012 NC Fire Code will have no fiscal impact.

As our local ordinance needs to reflect state law, City staff recommends that City Council adopt the 2012 NC Fire Code and the associated amendments to the City of Asheville Fire Prevention Ordinance.

**ORDINANCE BOOK NO. 27 – PAGE 145**

**E. RESOLUTION NO. 11-186 - RESOLUTION ADOPTING THE BUNCOMBE COUNTY HAZARD MITIGATION PLAN UPDATE**

Summary: The consideration of a resolution authorizing the City Manager to sign the acceptance of the Buncombe County Hazard Mitigation Plan update.

The City of Asheville is an agency in the Buncombe County Hazard Mitigation Plan. Buncombe County Emergency Management is the lead organization for the declaration process in requesting and receiving State and Federal funds for disaster assistance. This plan involves all jurisdictions in Buncombe County including the City of Asheville, Town of Montreat, Town of Black Mountain, Town of Woodfin, Town of Weaverville and the Town of Biltmore Forest. On August 1, 2011 at the Buncombe County EOC located at 164 Erwin Hills Rd. a public hearing was held for public review and comment to the plan.

The plan addresses City of Asheville needs through risk assessment and multiple map modeling scenarios. City Departments address hazards, mitigation, sheltering and public safety through education, enforcement and community outreach events. The City is subject to flooding events, severe weather, and other adverse conditions. The Department of Public Works, through flood plain mitigation and plan review, ensures that the City of Asheville remains in compliance

the FEMA National Flood Insurance Programs rules. This allows the businesses and residences in the flood prone areas to purchase flood insurance at reduced rates.

The plan is part of Section 322 of the Federal Disaster Mitigation Act of 2000 which states that local governments must develop an All-Hazards Mitigation Plan in order to be eligible to receive future Hazard Mitigation Grant Program Funds and other disaster-related assistance funding and that said Plan must be updated and adopted within a five year cycle.

This action complies with the Strategic Operating Plan by making Asheville one of the safest cities, based on appropriate metrics as compared with similarly sized cities.

Pros:

- This plan allows the City to receive disaster assistance funds
- This plan continues following the National Flood Insurance Program guidelines
- Firefighter and citizen safety will be enhanced.

Con:

- None identified

The Buncombe County Hazard Mitigation Plan will have no additional fiscal impact. The City of Asheville will continue to support the Nation Flood Insurance Program through plan review, enforcement and education.

City staff recommends City Council adopt a resolution authorizing the City Manager to sign the Buncombe County Hazard Mitigation Plan update.

**RESOLUTION BOOK NO. 34 – PAGE 154**

**F. RESOLUTION NO. 11-187 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH BUNCOMBE COUNTY TO OVERSEE THE ADMINISTRATIVE COORDINATION OF THE COLLABORATIVE COMMUNITY CRIME PREVENTION PROJECT, CHANGING TOGETHER**

**ORDINANCE NO. 4010 - BUDGET AMENDMENT FOR THE ADMINISTRATIVE COORDINATION OF THE COLLABORATIVE COMMUNITY CRIME PREVENTION PROJECT, CHANGING TOGETHER**

Summary: The consideration of a resolution authorizing the City Manager to execute on behalf of the City of Asheville an agreement with Buncombe County in which the City will act as the coordinating agency for the Changing Together community project aimed at reducing gang violence through strategic prevention, intervention and suppression; and a budget amendment in the Grant Fund in the amount of $63,000 for Governor's Crime Commission grant revenue to be received from the County.

Changing Together is a comprehensive and collaborative community project with participation from law enforcement, the District Attorney's Office and numerous non-profit and social service agencies throughout Asheville and Buncombe County. It was formed to address the issue of escalating gang activity and violence in the area and chosen by the Governor's Crime Commission (GCC) as a Tier 1 site for implementation of the Focused Deterrence Model (High Point Model) in fiscal year 2009.

Currently, the County receives grant funding from the Governor's Crime Commission to provide direct services to people involved with gangs and/or violent crime. Prevention and intervention programs are also coordinated for youth at-risk of becoming gang involved. The funding pays for the coordination of Changing Together, which includes a salary for a program

coordinator, one case manager and one ten hour per week administrative support person. For fiscal year 2011-12, the grant is $100,000. These positions are currently housed at the Mediation Center, a partnering agency of Changing Together.

If the agreement is approved, the program coordinator and part-time administrative support positions will be overseen by the community relations division of the city manager's office with associated funding from the County in an amount not to exceed $63,000. This figure also reflects ancillary administrative program costs. The remainder of the grant will fund formal and informal service support systems and a case manager. These components will be managed by Buncombe County Human Services through service contracts or the direct provision of services.

The County is requesting the City assume responsibility for administrative coordination of Changing Together. One factor prompting the request is that the Governor's Crime Commission emphasized a preference for the coordination to be located in a municipality because of the stability it provides due to organizational capacity and infrastructure. The Buncombe County District Attorney's Office and the Buncombe County Sheriff's Office are supportive of this restructuring of program coordination responsibilities.

This action complies with the City Council Strategic Operating Plan in the Core Focus Area of Safety. This partnership will continue to assist the Asheville Police Department in its work to successfully work with youths at risk of gang exposure and as a strategy to improve safety in neighborhoods with high crime.

Pros:

- Through initiatives such as West Riverside Operation Weed and Seed, the City of Asheville has impactful experience administering federal and state grants focused on community-based crime prevention.
- Administrative coordination by the City creates an opportunity for seamless crime prevention coordination with the community and greater flexibility in adapting the Focused Deterrence function of Changing Together to meet future crime trends.

Cons:

- Public perception of program effectiveness may by associated with only the City when it is actually a collaboration between the community, City of Asheville, Buncombe County and other state and federal agencies.
- Additional administrative resources related to contract management and accounts payable will be required.

Buncombe County has agreed to provide the required grant match of $33,000 for this fiscal year in addition to managing funds budgeted for the case manager position in the amount of $37,000. With revenue in the amount of $63,000 received from the County, the City will manage funds budgeted for ancillary costs, the program coordinator and administrative support position. All positions will be contract employees in order to re-evaluate available state funding at the conclusion of the current fiscal year. Other than the time commitment related to administrative oversight, there is no hard cost impact on the current year budget.

Staff recommends City Council adopt the resolution authorizing the City Manager to execute, on behalf of the City of Asheville, the agreement with Buncombe County to assume administrative coordination of Changing Together; and the accompanying budget amendment in the Grant Fund in the amount of $63,000. The recommendation received unanimous approval by the Public Safety Committee at the August 16, 2011 meeting.

Assistant City Manager Jeff Richardson highlighted this partnership opportunity with Buncombe County.

Mayor Bellamy acknowledged the wonderful partnership in that the City has been at the table since the beginning. For the City being in this position says a lot about the collaboration that has been developed.

**RESOLUTION BOOK NO. 34 – PAGE 155**
**ORDINANCE BOOK NO. 27 - PAGE 154**

**G. RESOLUTION NO. 11-188 - RESOLUTION SETTING A PUBLIC HEARING ON SEPTEMBER 27, 2011, FOR THE VOLUNTARY ANNEXATION OF PROPERTY LOCATED AT 55 PINEY MOUNTAIN ROAD – BELLE VISTA RETIREMENT**

Summary: The consideration of a resolution fixing the date of a public hearing on September 27, 2011, for the voluntary annexation of property located at 55 Piney Mountain Drive – Bella Vista Retirement.

Asheville Retirement Residence, LLC has petitioned the City of Asheville for the annexation of one (1) lot located at 55 Piney Mountain Drive containing a total of 13.52 acres on which was recently constructed a 120 suite retirement residence. The property is contiguous to the primary corporate limits of the City of Asheville. The area is subject to the standards for annexation of contiguous areas contained in NCGS 160A-31.

Pursuant to NCGS 160A-31, such petitions must be investigated by the City Clerk for sufficiency in accordance with state law. This investigation has been completed and the Certificate of Sufficiency accompanies this petition request.

The next step in this process is for the Asheville City Council to fix the date for the public hearing on this matter. Should the City Council decide to proceed with this request, the effective date for the annexation would be November 30, 2011.

Pros:

- Provides for the orderly growth of the City and the tax base through the acceptance of appropriate areas into the corporate limits where owners desire annexation.
- Complies with the 2025 Plan in that it supports the strategy of promoting voluntary annexation of developing areas.
- Allows for service provisions for a new retirement community that would benefit from an urban level of service.

Con:

- Marginal costs for patrol.

The property located at 55 Piney Mountain Drive is valued at $12,813,700. This property is currently serviced by the City of Asheville Fire Department under the Haw Creek Fire District agreement. As such, the City receives a share of the Haw Creek Fire District property tax revenue based on the property's value. If the property were to remain outside the City, the City would receive $11,532 in revenue annually from the Haw Creek Fire District property tax. Once the property is annexed, it will no longer be subject to the 9-cent Haw Creek Fire District tax; instead the property will be subject to the City of Asheville's 42 cent property tax rate. Therefore, the City will receive $53,817 annually in property tax revenue once the property is annexed. Thus, the net tax revenue gain from the annexation is $42,285. As noted above, cost impacts from this voluntary annexation are minimal.

City staff recommends that City Council adopt the resolution setting the date of September 27, 2011, for a public hearing on the annexation petition.

**H. ORDINANCE NO. 4011 - BUDGET AMENDMENT FOR PURCHASE OF AN EXTRACTOR AND REMITTANCE PROCESSOR FOR CUSTOMER SERVICES**

Summary: The consideration of a budget amendment in the Water Resources Operating Fund, in the amount of $130,000, for the purchase of an extractor and remittance processor for Customer Services.

The Customer Services Division currently uses two separate machines, a remittance processor and an extractor, to process approximately 1,250 utility bills daily. Utility Billing Specialists receive utility bill payments at City Hall, open them using the extractor, and scan the payments into the remittance processor for posting to the customer's account. The entire process is handled in-house by Water Resources staff. The current machines are approximately seven years old and break down on a regular basis. Since the useful life for this equipment is a maximum of five years, then it is well past time to replace them.

Water Resources consulted with the Finance Department on the decision to lease or purchase new equipment, and it makes more financial sense to purchase it. Once the budget amendment is approved and processed, the Purchasing Division will assist in the procurement of the new extractor and remittance processor.

This project is part of City Council's strategic plan to improve city infrastructure and to operate at the highest levels of fiscal responsibility.

Pro:

- Customer Services will have new equipment that is more efficient and reliable than the existing extractor and remittance processor.

Con:

- Customer Services will continue to use the older equipment, which is inefficient and breaks down on a regular basis.

The Water Resources Department does not have a budget in place for the purchase of the Mail Processing Equipment. Since this is a single year project, the budget amendment will create the budget in the Water Resources Operating Fund. The funds needed for this purchase in the amount of $130,000 will be transferred from an older N.C. Dept. of Transportation (NCDOT) project (Brevard Road from Sardis Road to the Parkway) that is completed and has the funds necessary for this project.

| | |
|---|---|
| Amount in Completed NCDOT Project | $354,812.48 |
| Amount Needed for Mail Processing Equipment | $130,000.00 |
| Amount Remaining in NCDOT Project | $224,812.48 |

The amount remaining in the older, completed NCDOT Project will be reallocated to other capital projects as the need arises. Staff will seek Council approval on any future reallocation of these funds.

City staff recommends City Council authorize a budget amendment in the Water Resources Operating Fund, in the amount of $130,000, for the purchase of an extractor and remittance processor for Customer Services.

**ORDINANCE BOOK NO. 27 – PAGE 156**

**I. RESOLUTION NO. 11-189 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH MOTOROLA INC. FOR**

**RADIO SYSTEM MAINTENANCE FROM AUGUST 1, 2011 THROUGH JULY 31, 2012**

Summary: The consideration of a resolution authorizing the City Manager to sign an agreement with Motorola, Inc. to provide maintenance coverage for the City's radio system.

Motorola, Inc. has provided maintenance services for the City's radio communications system since installation of the system in 1992. The service agreements are renewed annually. The maintenance cost per unit of equipment for the renewal period of August 1, 2011, through July 31, 2012, has remained the same as last year's cost.

The renewal agreement reflects an annual charge of $142,877.40 and covers additional equipment purchased by the City to equip new vehicles and replace broken equipment. The agreement also covers infrastructure that has come out of the installer's warranty during the past year.

This action complies with City Council's Strategic Operating Plan of partnerships to improve critical services / infrastructure. These partnerships also help the City recoup some of their investment in the system infrastructure through fees collected for use of the system.

Pros:

- The primary benefit of this contract is to keep the City's radio system reliable and operational for public safety officers.
- By keeping the radio system in optimal condition the City is also able to provide communication services to several outside agencies, thereby improving interagency communications.

Cons:

- None noted.

Funding for this contract was appropriated in the FY 11/12 budget process.

City staff recommends the adoption of the resolution for radio maintenance coverage for the term of August 1, 2011 through July 31, 2012.

**RESOLUTION BOOK NO. 34 – PAGE 159**

**J. RESOLUTION NO. 11-190 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AMENDMENT TO THE EXISTING AGREEMENT WITH THE N.C. DEPT. OF ENVIRONMENT & NATURAL RESOURCES FOR THE FLOOD MITIGATION EFFORTS ASSOCIATED WITH THE LAKE CRAIG PROJECT**

**ORDINANCE NO. 4012 - BUDGET AMENDMENT FOR THE FLOOD MITIGATION EFFORTS ASSOCIATED WITH THE LAKE CRAIG PROJECT**

Summary: The consideration of a resolution authorizing the City Manager to modify an existing agreement with the N.C. Dept. of Environment & Natural Resources (NCDENR) to supplement the current contract by an additional $1,090,139 in order to complete Phase I of the Lake Craig Project; and a budget amendment in the amount of $374,251 to appropriate additional Senate Bill 7 funding received from NCDENR.

The Hurricane Recovery Act of 2005 (Senate Bill 7) allocated funds for planning and implementation of projects to aid in flood damage reduction for North Carolina communities

hardest hit by the 2004 hurricane season. Through a study completed by Brown and Caldwell, the Lake Craig Project has shown potential to provide significant flood reduction benefits. The flood control features of the project include stream relocation and restoration, removal of floodplain fill and flood bench restoration, and the evaluation of the existing dam.

On May 15, 2007, City Council approved a resolution allowing the City Manager to enter into the following three contracts with NCDENR:

1) $2,500,000 for a three phase flood damage reduction measure which institutes a watershed-wide program for flood damage reduction in the Swannanoa
2) $2,000,000 for acquiring property that is prone to flooding
3) $75,000 to work with the Army Corps of Engineers to develop an emergency flood preparedness plan for Biltmore Village

The City did not utilize all the funds for acquisition of property, $715,888 is remaining. This $715,888 will be re-allocated and additional NCDENR (Senate Bill 7) funds in the amount of $374,251 has been approved for the flood damage reduction measures contract. The $1,090,139 supplements the existing NCDENR contract ($2,500,000) for a new total amount of $3,590,139.

On May 26, 2009, by Resolution No. 09-108, the City Manager was authorized to enter into a Feasibility Cost Share Agreement for the Swannanoa Flood Risk Management Project with the Army Corps of Engineers to provide professional services for a feasibility study for reducing flood damage in the Swannanoa River Watershed. The CORPS continues to be involved with this project.

On June 28, 2011, City Council approved the City Manager to enter a contract with McGill Associates to perform the engineering services necessary to provide flood mitigations to the properties down stream of the Lake Craig Dam which will include the evaluations of the existing dam. The Lake Craig Project was the highest priority in the Swannanoa Flood Risk Management Project which was accepted by City Council on May 10, 2011. McGill Associates are also providing engineering services associated with the improved roadway connections to the John B. Lewis Soccer Complex and provide a much needed connection to the City of Asheville water system.

These funds will be in addition to the $2.5 Million that have been made available for the City to perform flood mitigation work. The funds available for the completion of the engineering services for the Swannanoa Flood Risk Management project and to complete Phase I of the Lake Craig Project total $3,590,139.

This action complies with the City's plans and commitments to continue to administer $2.5M of Senate Bill 7 funding consistent with a contract executed with the N.C. Division of Water Resources on April 1, 2007. In addition, this project has complied with the Council's Strategic to provide a safe community for our citizens.

Pros:

- Implements the priority objective of the Swannanoa Flood Risk Management Project
- To continue to work with state, local and federal partners on a flood mitigation plan
- Priorities are set for expending the remainder of state flood mitigation funding
- This funding will allow the completion of the construction phase of the Lake Craig project

Cons:

- Construction/rehabilitation of the dam will require the involvement and funding of the US Army Corps of Engineers or the North Carolina Division of Water Resources.

The City has currently budgeted $1,263,206 for the engineering services necessary to complete Phase I of the Lake Craig Project and the Azalea Road capital improvement project. Funding for the engineering services contract has come from a combination of NCDENR Senate Bill 7 money and capital funds, made available from the water fund for work associated with the installation of water line infrastructure as permitted by state statue, which are already budgeted in the Azalea Road capital improvement project. The reallocation of the $715,888 and the additional $374,251 (total $1,090,139) from NCDENR Senate Bill 7 will allow the city to finalize the design and complete the construction of Phase I of the Lake Craig Project for flood mitigation

Staff recommends City Council approve a resolution authorizing the City Manager to modify an existing agreement with NCDENR to supplement the current contract by an additional $1,090,139 in order to complete Phase I of the Lake Craig Project; and a budget amendment in the amount of $374,251 to appropriate additional Senate Bill 7 funding received from NCDENR.

Mayor Bellamy was pleased that the City received these funds, especially during times of budget cuts. The State has recognized this is a good investment for a comprehensive project.

**RESOLUTION BOOK NO. 34 – PAGE 160**
**ORDINANCE BOOK NO. 27 – PAGE 158**

**K. ORDINANCE NO. 4013 - BUDGET AMENDMENT FOR THE PURCHASE OF LIFECYCLE REPLACEMENTS FOR COMPUTERS AND RELATED EQUIPMENT**

**RESOLUTION NO. 11-191 - RESOLUTION AUTHORIZING THE REIMBURSEMENT OF THE CITY FROM PROCEEDS OF THE FINANCING FOR PROJECT EXPRESSES INCURRED PRIOR TO THE EXECUTION OF THE INSTALLMENT PURCHASE CONTRACT**

**RESOLUTION NO. 11-192 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN INSTALLMENT PURCHASE CONTRACT FOR THE EQUIPMENT**

Summary: The consideration of a budget amendment, in the amount of $350,000 from debt proceeds, for the purchase of lifecycle replacements for computers and related equipment; a resolution authorizing the reimbursement of the City from proceeds of the financing for project expenses incurred prior to the execution of the installment purchase contract; and a resolution authorizing the City Manager to enter into an installment purchase contract for the equipment.

In previous years, the City of Asheville has used an operating lease for computer equipment. This offered the operational benefit of a lifecycle replacement for computers every four years, which allowed for more reliable computing for employees. However, based on financial analysis of the operating lease rebid process, staff recommends moving away from the operational lease model and purchasing the equipment with debt proceed for several reasons. First, it will cost the City 14-30% less to purchase the equipment with debt proceeds than to lease it over the useful life of the equipment. In addition, when computers are purchased rather than leased, an extension of the lifecycle is at zero cost because the City owns the equipment as opposed to leasing it.

The proposed purchase of the computer equipment would be from State and other authorized contracts. To execute the purchase, staff is asking for City Council consideration of:

1) A budget amendment from debt proceeds in the amount of $350,000 to allocate funding for the project.

2) A reimbursement resolution allowing the City to move forward with the project and reimburse its accounts upon the issuance of the debt. When the FY 2011-12 budget was adopted, staff had not finalized its plan to purchase rather than lease computers, therefore only the operational lease costs were included in the adopted budget, not the purchase price. The money that was budgeted for the remaining operational lease payments will be redirected to pay debt service on the financing.

3) A resolution authorizing the City Manager to enter into an installment purchase contract in an amount not to exceed $350,000 to finance the purchase of the replacement equipment.

This action supports the City Council's strategic goal to operate the City to the highest levels of fiscal responsibility by making smart investments that result is lasting returns.

Pros:

- Continue to offer the lifecycle replacement, allowing for more reliable computing for employees
- Save between 14-30% over the life of the equipment

Cons:

- Because the deferral of lifecycle computer replacements would be at zero cost in the future, several difficult budget years in a row could create a situation where employees have old, unreliable computers, creating a service impact.

The FY 2011-12 adopted budget included $104,196 in the Information Technology Services departmental budget to pay the operational lease on the computers and related equipment that are set to be replaced in the current fiscal year. The City will pay approximately $52,098 between July 1 and the time that the operational lease payment ends. The remaining funds will be used to pay the annual debt service on the amount up to $350,000 borrowed for this purchase. Over the useful life of the equipment, staff estimates that purchasing the equipment will save14-30% over leasing the equipment.

City staff recommends that City Council authorize a budget amendment, in the amount of $350,000 from debt proceeds, for the purchase of lifecycle replacements for computers and related equipment and approve the reimbursement resolution and the resolution authorizing an installment purchase contract.

**ORDINANCE BOOK NO. 27 – PAGE 160**
**RESOLUTION NO. 11-191 - RESOLUTION BOOK NO. 34 – PAGE 161**
**RESOLUTION NO. 11-192 - RESOLUTION BOOK NO. 34 – PAGE 162**

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Davis moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Bothwell and carried unanimously.

## III. PRESENTATIONS & REPORTS:

### A. EMERGENCY MANAGEMENT PLAN UPDATE

Assistant Fire Chief David McFee said that our Emergency Plan is professionally developed, was updated in 2010, is comprehensive, and is a living document and developed to be easily updated.

For major emergencies and disasters, our plan is (1) designed to address any emergency or disaster; and (2) gives guidance to Council, staff and community fore preparedness, response, mitigation and recovery. Numerous annexes within our plan address more specific events such as radiological, terrorism and hazard materials release.

For flooding, our plan in action is (1) before or early onset, we warn, evacuate, and disseminate public information; (2) during a flood, we give direction and control and issue an emergency proclamation; and (3) after a flood, recovery.

Another tool available is the City of Asheville Elected Officials Guide to Emergencies and Disasters. The condensed guide contains disaster declarations, preparedness, response, recovery, mitigation and media guide.

Also included in our plan is a fuel conservation plan. We are participating in the Local Energy Assurance Project (LEAP). The Land-of-Sky Regional Council is our partner in this Project. It's made up of 22 local entities across our region. Its focus is (1) building regional energy assurance capabilities to allow counties/cities to better prepare for a fuel shortage or disaster; and (2) coordinating and communicating state-wide with one another on energy security, reliability, and emergency response issues. Its objectives are (1) strengthen and expand local government energy assurance planning and resiliency; and (2) reduce the impacts from energy supply disruptions such as premature budget depletion resulting in the inability to provide services.

In response to Councilman Davis, Mr. McFee felt that the Land-of-Sky has been trying to keep all 22 entities in the project and felt they are doing a good job in going in the right direction.

Mr. McFee responded to Councilman Smith regarding how fuel will be set aside for emergency services and in the event of a fuel shortage if there is any contingency for fuel for food distribution.

**IV. PUBLIC HEARINGS:**

**A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE CONDITIONAL ZONING FOR SKYLOFTS/ALEXANDER DRIVE PROJECT**

**ORDINANCE NO. 4014 - ORDINANCE TO AMEND THE CONDITIONAL ZONING FOR SKYLOFTS/ALEXANDER DRIVE PROJECT**

Urban Planner Julia Fields said that this is the consideration of an ordinance to amend the conditionally zoning of Skylofts/Alexander Drive Project. This public hearing was advertised on September 2 and 9, 2011.

Ms. Fields said that on June 27, 2006, the Asheville City Council reviewed and unanimously approved the conditional zoning (RM16 CZ) of 4.59 acres of property located off of Carroll Drive and Alexander Drive in order to allow for the construction of a 69-dwelling unit development, the Skylofts of Asheville. Subsequent to this approval and receipt of permits, two of the proposed eight buildings were constructed and units sold. The property then suffered during the recession and a foundation for a third building was in place at the time of foreclosure on the development.

A new developer, Progressive Consultants, LLC, has obtained the property containing the foundation for the third building ("Unit C") and the property across (to the south) Alexander

Drive. Given changes to the market, the developer wishes to complete the project with some amendments to the plan. For purposes of analysis, the entire Skylofts development has been reviewed although the amendment would only apply to the portion controlled by the new development team.

The new proposal would contain fewer buildings (seven vs. eight) but seven additional units (76 vs. 69) with more small units added. Up to 77 units would be allowed on the site under the zoning. The other significant change is that parking for buildings D, E, F, and G would become surface parking as opposed to the primarily structured parking that was to be provided. Because of the parking change, the building height is reduced in those buildings that are south of Alexander Drive. The existing and proposed heights are as follows: Building A - 28' 9/5"; Building B – 39' 5.5"; Building C – 39' 5.5"; Buildings D-G – 29' 10". The impervious surface area for the development will also be reduced from an originally proposed total of 1.89 acres to 1.78 acres. The proposed unit mix is as follows:

- Building A – 3 – 1 Bedroom; 3 – 2 Bedroom
- Building B – 3 – 1 Bedroom; 6 – 2 Bedroom
- Building C – 3 – 1 Bedroom; 6 – 2 Bedroom
- Buildings D- F – 4 – 1 Bedroom; 7 – 2 Bedroom; 1- 3 Bedroom
- Building G – 8 – 1 Bedroom; 7 – 2 Bedroom; 1 – 3 Bedroom

Although for purposes of City review there is no distinction, the developer is proposing to lease the new units as opposed to selling them, again reflecting current market conditions. Landscaping is proposed to be provided in accordance with the original conditional zoning approval.

The developer is proposing to complete the street and storm drainage repair work left incomplete by the previous developer. It is also proposed that the partially constructed parking deck to the east of Building A would be completed to provide six additional spaces at the time Building C is constructed.

The developer is working with the owners of units in Buildings A and B concerning the development of Building C which is restricted as part of the Skylofts Homeowner's Association (HOA) documents as to the number of rental units allowed.

Although this issue does not relate to City regulations, representatives of the Skylofts Homeowner's Association (HOA) and the developer agreed to (by letter dated September 13, 2011) to the following conditions: (1) stucco all exterior block walls and paint with color approved by the Skyloft HOA; (2) insure that the remaining foundation meets minimum building safety requirements; (3) paint and secure the existing elevator building; (4) cut all exposed plumbing down to ground level; (5) provide monthly landscape service; (6) remove all existing fencing and debris; and (7) plant perimeter landscaping as required under previous plan. The developer has committed to doing these items within 60 days after final permit approval by the City.

The staff strongly recommends that the City condition approval of any amendments on some improvements to the area surrounding Building C being provided if Building C is not constructed at the same time as the other buildings. The developer is willing to:

- Stucco all exterior block walls and paint with color approved by the HOA.
- Insure that the remaining foundation meets minimum building safety requirements.
- Paint and secure the existing elevator building.
- Cut all exposed plumbing down to ground level.
- Provide monthly landscape service.
- Remove all existing fencing and debris.

- Plant perimeter landscaping as required under previous plan.

If Building C is not constructed along with Buildings D-G, the staff recommends that any approval be conditioned on those items noted above being met within 60 days after final permit approval from the City

The developer proposes to maintain the originally approved 10% affordable condition on the project. There are four units in place in Buildings A and B. The developer will provide four additional units in the remainder of the development. The developer also plans to provide the previously required bus shelter at the corner of Martin Luther King, Jr. Drive and Alexander Drive.

The developer held a meeting with residents of the area on September 1, 2011, to discuss the project and to listen to neighborhood concerns. Most of the comments raised were related to the concerns of the homeowners in Buildings A and B.

At their meeting on August 15, 2011, the City of Asheville Technical Review Committee (TRC) reviewed the conditional zoning amendment and made a positive recommendation (with conditions) that the project be forwarded to the Asheville City Council. This amendment did not have to be reconsidered by the Planning and Zoning Commission because the changes were relatively minor in nature.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The project, if approved, must meet the technical standards set forth in the City's Unified Development Ordinance. The existing site plan shows compliance with most all of the City's development standards and the applicant is working on a resubmittal to address the comments of the Technical Review Committee.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The applicant has met all applicable provisions of the hillside regulations. The applicant has worked to create a design minimizing grading activity and impervious surface on the site.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The use of property that surrounds this site is varied. There is another multi-family housing development to the west of the site. The applicant is proposing buffering or other landscaping in compliance with City of Asheville standards along all property lines in the development.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   The East End Valley Street area contains an array of building types and uses with varying with varying gross floor areas, densities, and elevations to existing structures. The developer is proposing to maintain an architectural design consistent with the existing Skylofts buildings.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
   The proposed development proposed development supports the following goals/strategies of the *Asheville City Development Plan 2025:*
   - Locating development in areas where infrastructure exists and can easily be provided.
   - Finding appropriate opportunities to establish transit supportive densities (8-16 units per acre) and facilities.
   - Promoting infill developments proximate to the Central Business District and in developed areas that can support increased density in development.
   - Providing affordable housing.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   The proposed development is within a block of an existing transit stop and proposes to provide a shelter at this location. The original developer improved the existing water line along Alexander Drive.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
   The City of Asheville Traffic Engineer has indicated that the roads that will be accessed by this development are sufficient to handle any traffic generated. The provision of additional on-street parking along Alexander should assist in calming traffic along Alexander.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:
- Completes a development that had been stopped due to economic conditions.
- Provides for infill development in an area in close proximity to downtown and infrastructure suitable for increased density of development.
- Provides additional affordable housing in an area with transportation options.

Con:
- Existing residents of Skylofts have concerns about the development of Building C.

At their meeting on August 15, 2011, the City of Asheville Technical Review Committee reviewed this conditional zoning amendment and made a positive recommendation to Council.

Mayor Bellamy opened the public hearing at 5:45 p.m.

Mr. Pace Burt, representing Progressive Properties, LLC, was excited about the project. He hoped to addressed all the concerns of Skyloft homeowners, as they would like the development to be successful.

Ms. Rebecca Cobbledick, representing the Skyloft Condominium Owners Association, said that they have been living next to an eyesore for several years and excited Progressive Properties have bought the land. With the agreed upon conditions, she supported staff's recommendation to amend the conditional zoning.

Mayor Bellamy closed the public hearing at 5:49 p.m.

In response to Mayor Bellamy regarding stormwater issues, the engineer for the project said that as soon as the project is started, that will be an area of focus. Ms. Fields also noted that the developer will have to meet all of the City's stormwater requirements and will have adequate drainage on the back side of the property. Anything off-site is not proposed to be addressed.

Ms. Fields responded to Mayor Bellamy regarding the condition in the previous approval regarding stormwater runoff onto the church's parking lot. The previous developer committed $10,000 to work on the crushed storm drain; however, it required doing work on the Church's property and the two parties were not able to work out an agreement.

In response to Mayor Bellamy regarding air quality concerns on the previous project, Assistant Planning & Development Director Shannon Tuch said that issues of air quality will be regulated through our Building Safety Department. Our Building Safety Department would coordinate and assist with contacting the Division of Air Quality.

Mayor Bellamy asked the developer to keep in mind that the surrounding streets are also their neighbors.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 4014, to amend the conditional zoning for a portion of the Skylofts development located on Alexander Drive, subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with cut-off fixtures or full cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (5) This project will undergo final review by the TRC prior to issuance of any required permits; (6) A maximum of 76 units may be constructed in the development; (7) Four additional affordable units shall be constructed in the remainder of the development; (8) A bus shelter will be required at the corner of Alexander and Martin Luther King, Jr. Drives; and (9) Within 60 days of final zoning approval, if Building C is not to be constructed at the same time as Buildings D-G, the developer shall comply with the conditions for improving the area around Building C as follows: (a) Stucco all exterior block walls and paint with color approved by the HOA; (b) Insure that the remaining foundation meets minimum building safety requirements; (c) Paint and secure the existing elevator building; (d) Cut all exposed plumbing down to ground level; (e) Provide monthly landscape service; (f) Remove all existing fencing and debris; and (g) Plant perimeter landscaping as required under previous plan. This motion was seconded by Councilman Bothwell and carried unanimously.

**ORDINANCE BOOK NO. 27 - PAGE 162**

**B. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF PROPERTY LOCATED ON CLUB STREET TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT**

**ORDINANCE NO. 4015 - ORDINANCE TO ZONE PROPERTY LOCATED ON CLUB STREET TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT**

376.

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance to initially zone property on Club Street to RM-8 Residential Multi-Family Medium Density District. This public hearing was advertised on September 2 and 9, 2011.

He said that the subject property was erroneously left absent from the Buncombe County tax maps for a number of years. As a result, when zoning districts were studied and assigned as part of the creation of the Unified Development Ordinance, this area was believed to be within the interstate right-of-way and was not assigned a zoning district. Staff is bringing forward the initial zoning action to address this omission and make the zoning consistent with the surrounding area.

The adjacent properties on Club Street and other neighboring streets have similar characteristics and are all zoned RM8, Residential Multi-Family Medium Density. Staff feels that this zoning district is the only option for the subject parcel, as assigning any other district to an area this small could legitimately be challenged as spot zoning.

Further, the narrowness of Club Street and its one-way traffic pattern would not befit a higher-intensity zoning district.

At their August 3, 2011, meeting, the Planning and Zoning Commission voted unanimously to recommend approval of the rezoning.

The owner has stated that he is "looking to develop this property with residential development that is similar to, and fits within, the surrounding residential context."

Based on the above findings and the analysis provided in the report, staff finds this action to be reasonable.

Pros:

- Zones property in consideration of the surrounding zoning and land use and the City's comprehensive plan.
- Rectifies ambiguity in zoning map.

Con:

- None noted.

Staff recommends approval of the initial zoning.

Mayor Bellamy opened the public hearing at 5:55 p.m. and when no one spoke, she closed the public hearing.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Smith moved for the adoption of Ordinance No. 4015. This motion was seconded by Councilman Russell and carried unanimously.

**ORDINANCE BOOK NO. 27 – PAGE 167**

**C. PUBLIC HEARING TO CONSIDER AMENDING THE UNIFIED DEVELOPMENT ORDINANCE FOR THE PURPOSE OF PROVIDING GREATER FLEXIBILITY IN THE REGULATION OF ACCESS ONTO RESIDENTIAL STREETS BY NONRESIDENTIAL USES**

**ORDINANCE NO. 4016- ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE FOR THE PURPOSE OF PROVIDING**

**GREATER FLEXIBILITY IN THE REGULATION OF ACCESS ONTO RESIDENTIAL STREETS BY NONRESIDENTIAL USES**

Urban Planner Julia Fields said that this is the consideration of an ordinance to amend the Unified Development Ordinance for the purpose of providing greater flexibility in the regulation of access onto residential streets by nonresidential uses. This public hearing was advertised on September 2 and 9, 2011.

The Unified Development Ordinance of the City of Asheville currently limits access onto residential streets by nonresidential uses. A residential street is defined in the ordinance as "those streets abutted primarily by residential uses and that provide direct access to these residences." The ordinance states that nonresidential uses having frontage on more than one street (corner lots, through lots, etc.), "shall have their access from the street that is abutted by uses most consistent with the use located on or proposed for the lot for which access is being sought." The ordinance, however, provides some flexibility for corner lots to have access from another street. This option is afforded if that portion of the street is zoned a nonresidential or mixed use district and where it is determined by the City's traffic engineer that the access results in an improved traffic flow on the major street, or provided, that the access does not negatively impact the residential uses on the street (also determined by the City's traffic engineer).

Staff has found that there are instances where more efficient access to a nonresidential use with frontage on more than one street can be provided from a residential street. This can be true even in situations where the access is not on a portion of the street with a nonresidential or mixed use zoning district designation. This ordinance amendment proposes to extend the flexibility for access from a nonresidential street to any situation where it is determined by the City's traffic engineer that the access results in an improved traffic flow on the major street and provided that the access would not negatively impact the residential uses on the street.

At a meeting on August 3, 2011, the Planning and Zoning Commission discussed the proposed wording amendment and voted 4-2 to recommend the amendment to the Asheville City Council. One person was there to speak with concern for the amendment. They asked about procedures for appeal and whether these situations should be reviewed by someone other than staff.

Pros:

- Provides greater flexibility regarding access point on streets in the City's jurisdiction.
- Provides for improved traffic management.

Con:

- Concerns of residential communities that access would negatively impact them.

City staff recommends approval of this wording amendment.

Mayor Bellamy opened the public hearing at 5:59 p.m. and when no one spoke, she closed the public hearing.

In response to Councilman Bothwell, Transportation Director Ken Putman explained that this is on a case-by-case basis and how such applications will be reviewed by his Department.

When Councilman Bothwell asked if there is a process for neighborhood appeal, Ms. Fields said that there is a provision in the ordinance that any decision by City staff can be appealed to the Board of Adjustment.

In response to Mayor Bellamy, Mr. Putnam said that he envisioned part of their review process would be to reach out to the neighborhood to get any concerns addressed up front.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 4016. This motion was seconded by Councilman Davis and carried unanimously.

**ORDINANCE BOOK NO. 27 – PAGE 169**

**D. PUBLIC HEARING TO CONSIDER AMENDING THE UNIFIED DEVELOPMENT ORDINANCE BY AMENDING THE STANDARDS FOR COTTAGE DEVELOPMENTS BY ADDING A PURPOSE STATEMENT TO THE USE-BY-RIGHT STANDARD**

**ORDINANCE NO. 4017 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE BY AMENDING THE STANDARDS FOR COTTAGE DEVELOPMENTS BY ADDING A PURPOSE STATEMENT TO THE USE-BY-RIGHT STANDARD**

Planning & Development Director Judy Daniel said that this is the consideration of an ordinance to amend the Unified Development Ordinance by amending the standards for Cottage Developments by adding a purpose statement to the Use-By-Right Standard. This public hearing was advertised on September 2 and 9, 2011.

The "cottage development" use was adopted by the City Council in June of 2007. Its stated intent was to allow small infill development of small single family homes as a means to increase the stock of housing affordable at the "workforce" housing levels. According to the staff report at the time, the impact of the allowed greater density is offset by the smaller size of the homes, and the layout and design are of particular importance to ensure that they complement the surrounding existing neighborhood. The Council had expressed an interest in this development type, and after substantial staff research, public input, and modifications suggested by the Planning and Zoning Commission; it was adopted unanimously. The use is defined as:

A cluster of small detached single family residences constructed to specific design standards and arranged around common open space, generally at higher density than the underlying zoning would allow for traditional detached single family residential development.

The use is a "by right" use, providing all technical standards are met, in the RS-8, RM-6, RM-8, and RM-16 zoning districts. To date, four have been approved and two have been fully built.

**The Kenilworth Cottages** development is located on at 127 Aurora Drive (off Kenilworth Road). The development was approved in 2010 for 11 homes, and 3 have been built and one is inhabited. The site was in bankruptcy proceedings but still advertises homes for sale and the site is kept mowed. Foundations are in place for 2 units, and basic grading and stub-out infrastructure is in place for the remaining 6 units.

**The Cottages on Liberty Green** development is located at 2 Cottage Cove Lane, off Liberty Street in the Oakley community off Fairview Road. It was approved in 2008 for 7 "green" homes for sale, and 2 have been at least partially built. None were purchased and none are inhabited; the site had appeared abandoned but recent activity has been noted.

**The Town View Common Cottages** were approved in 2008 for 11 homes and completed in 2009. They are located on at 45 Nancy Road, off Hansel Road near Patton. All 11 homes were built and are inhabited, and the project functions as an affordable housing rental property. This project received Housing Trust Fund support.

**The Beaucatcher Cottages** are located at 444 Beaucatcher Road off Kenilworth for 12 homes. They were approved in 2010 and are almost completed; some are already inhabited. It is being built by the same developer that built the Nancy Road development. It also received Housing Trust Fund support and is also to be operated as an affordable rental property.

Immediate neighbors across Beaucatcher Road are upset about this community due to its design, which located the required common green on the interior of the property (with the homes facing it), and the rear of 7 of the homes facing Beaucatcher Road. Staff is working with the developer on an augmented landscaping plan for that area to provide increased screening for the neighbors across the street.

In summary, the standards for this development type include criteria that set:

- Minimum development area (smaller than standards for the zoning district);
- Minimum street frontage on a public street;
- Minimum and maximum number of units;
- Distance requirement between cottage development and between the homes in a development;
- Height limits for the home and any accessory structure (garage);
- Size limit for the homes and "accessory structures" (generally garages);
- Percentage limit on accessory structures and accessory dwellings above garages;
- Parking requirements, including screening requirements and parking dispersal requirements;
- Common and private open space requirements including a requirement for a front porch;
- Design standards for roofs and siding materials;
- Design standards for the relationship of the homes to the street; and
- The use is not allowed on steep slopes or ridgetops; or portions of sites with a 15% grade

Despite the standards, there have been concerns with recent designs for this development type. The staff believes that some of the problems inherent in the design standards are because they seem to have been designed to accommodate properties that are "interior" - surrounded by other lots facing a public street, and taking access from a single access drive. All of the approved developments in Asheville, however, take direct access from public streets. While the developments approved include intended design features, there has been some awkwardness to certain aspects of the designs, especially related to orientation to the surrounding neighborhood and parking areas. This has led to developments that do not blend well with their surrounding neighborhoods as intended.

Further, another problem with the standards is that they do not include a purpose clause, stating the intent for this development type and allowing Planning staff some discretion in evaluation of designs that may meet the "letter" of the standards, but not the "intent" for this type of development.

Proposal: Given the concerns noted above the staff believes that a review of the standards is warranted, and modifications should be considered. Such a study is, however, likely take at least 6-8 months to complete. Further, we believe the new Affordable Housing Commission should be involved in that review and members have not yet been appointed or meeting dates set.

Therefore, as an interim measure, the staff recommends that the suggested purpose clause and statement of expectations be added to the use to allow some added flexibility in review of the use type while the more extended study is underway. Alternately, the use could be

removed from the UDO while revisions to address the other concerns are studied, but this would preclude this use which has become an option of interest for affordable housing development.

In either scenario, the staff will be proposing modifications to bring before the newly created Affordable Housing Commission for review and comment (once they are seated) before being brought to the Planning and Zoning Commission and Council. The areas of change are likely to include:

- Evaluation of the added density allowed - specifically for the very small units allowed in the accessory structures
- Evaluation of the standards given the growing interest in the use of the development for affordable rental housing
- Modifying the design standards for properties that have more than 25 feet of frontage on a public road (to ensure visual protection and preferably enhancement for existing dwellings)
- Considering additional standards for how a cottage development relates to nearby lot sizes, setbacks, and other neighborhood characteristics
- Expanding the type of architecture and siding allowed, establishing more flexibility in design (reflecting the increased use of contemporary or blended architectural styles in many Asheville neighborhoods)
- Reconsideration of the common open space requirements and associated building orientation.
- Reconsideration of the approval process to determine if it should remain as a USSR approved only by the staff or changed to an approval by the Planning and Zoning Commission under a different type of process allowing public input on the design. In order to meet the intent for the use, it would be important for any level of public review to be about the proposed design and, not the density. Currently the staff is left in the role of determining whether the submitted plan meets the required standards; and despite the intent that the standards be very explicit, we have found more opportunity for interpretation than was intended

It is important to recall that design is the crucial element for successful cottage development standards. As noted in the "Cottage Housing Development Standards Guide (Seattle, WA - 2000) used for the original staff research:

> *"In all cases careful attention to design detail and landscaping softens the impact of higher densities... "Going one step further, a design goal should be that the cottage cluster actually improves the surrounding neighborhood, rather than having just a neutral impact"..."The surest way to destroy public support for cottage development would be to build cheap little boxes that add density while degrading the aesthetics of the neighborhoods. While very inexpensive cottages may provide affordability in the short run, such development will inevitably erode support for the higher densities necessary for long-term affordability...".The policy challenge is to find ways to ensure that cottage development in single family areas follows good design principles. Cottage housing is a wonderful idea that could be killed off with just a few bad experiences."*

Thus, with a bit over four yeas of experience, the staff now believes that we should consider changes to "tailor" these very important design criteria to our experiences in Asheville

and elsewhere. Foremost is the need to ensure that the overall development fits smoothly into its setting, and is a complement to the existing homes in the area.

The Planning & Zoning Commission considered the proposal at their July meeting and voted 6-0 (with one Commissioner absent) to recommend support for this change.

As a first step in the re-evaluation of this use the staff recommends approval the wording amendment to the use Use-by-right standards located in Article XVI, to provide a new purpose statement. The purpose clause clarifies that the use is intended to allow small infill development of small single family homes that increase the stock of housing affordable at the "workforce" or "affordable" housing levels. And it clarifies that the greater density allowed for such housing is offset by the smaller size requirement for the homes, and development design standards that work to provide infill housing that is a complement to the surrounding existing neighborhood.

Mayor Bellamy opened the public hearing at 6:09 p.m. and when no one spoke, she closed the public hearing.

Vice-Mayor Newman asked that as we go through the process of getting feedback from the community, he asked that staff also solicit feedback on if there are any unneeded barriers for cottage development.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Newman moved for the adoption of Ordinance No. 4017. This motion was seconded by Councilman Smith and carried unanimously.

**ORDINANCE BOOK NO. 27 – PAGE 171**

**V. UNFINISHED BUSINESS:**

**A. SECOND & FINAL READING OF ORDINANCE NO. 4007 – ORDINANCE AMENDING CHAPTER 7 OF THE CODE OF ORDINANCES TO CLARIFY THE REGULATIONS FOR MOBILE FOOD VENDING**

Assistant Planning & Development Director Shannon Tuch said that at the August 23, 2011, City Council meeting the subject of Mobile Food Vending (MFV) was discussed. During this meeting a number of questions were raised regarding various aspects or impacts associated with the proposed use. She provided Council with the following information with answers to the various concerns noted.

(1) Regarding trash removal, at the August 23, 2011 City Council meeting the subject of Mobile Food Vending (MFV) was discussed. During this meeting a number of questions were raised regarding various aspects or impacts associated with the proposed use. Among the issues raised was a concern that MFV would contribute to the on-going issues and concerns over trash and litter downtown.

Presently, there are approximately 136 city trash receptacles downtown that are emptied nightly by the Department of Public Works' (DPW) downtown cleanliness crew. In addition to emptying cans every day, this crew of four full-time staff also manually picks up litter throughout the downtown core.

Recognizing a need to not only increase trash collection downtown, but also to add a recycling component, the DPW has been researching and procuring grants to begin replacing the current receptacles with new, larger trash and recycling

receptacles that will include solar compaction (similar to the receptacle in front of the Wolcott building now). Beginning in 2012, this replacement program will afford the downtown cleanliness crew additional time to expand its manual trash pick up and/or expand its service area.

The limited mobile food vending that will be permitted downtown is not expected to generate large amounts of trash and is expected to be primarily a "grab and go" style of dining. Once food is picked-up, it is expected that most patrons will carry the food back to their offices or other public destinations (parks) to eat and where the resulting trash can be disposed of properly. For those few folks who choose to eat on-site or nearby, the mobile food vendor will be required to provide a trash receptacle for the patrons to use. This receptacle will be removed from the site each day with the contents being disposed of at the commissary.

With these considerations in mind, staff is not proposing to make any amendments to the current ordinance regarding trash collection. Regarding the discussion about a possible budget amendment; however, any additional revenue to expand this service would have to be considered through a grant process or a budget amendment to be considered separately. It is unclear, given the plan for the current expanded service, if that is still warranted.

While raising privilege license fees for MFV is an option available, it is recognized that MFV is not the only business generating trash downtown (most restaurants offer take-out as well) and to place the burden of cost recovery for expanded service on this one business operation would likely be cost prohibitive for these small start up enterprises. Should Council desire to see privilege license fees raised in order to provide additional trash collection services downtown, staff would recommend examining the fees for all businesses that sell or produce disposable packaging. There has already been substantive talk regarding the establishment of a Business Improvement District (BID) and tax that would allow, among other things, the ability to generate revenue to be reapplied in that district. This is one alternative to raising privilege license fees.

(2) At the August 23, 2011 City Council meeting the subject of Mobile Food Vending (MFV) was discussed. During this meeting a number of questions were raised regarding various aspects or impacts associated with the proposed use. Among the issues discussed was a concern regarding a disparate use of liquid petroleum gas (LPG) containers.

The subject of LPG use and regulation has proven to be somewhat interesting. Regarding codes and jurisdiction:

- The NC State Fire Code does not apply to motor vehicles, only structures.
- The NC State Fire Code does not regulate LPG use outside of buildings.
- The NC State Fire Code applies to structures and the use and storage of LPG (portable cylinders) in the structures and is primarily determined by the occupancy of the structure but is generally prohibited inside of structures. Most restaurants' gas is piped, and not from portable sources.
- The Fire Code also regulates and prohibits the use of portable, open flame heaters in outdoor dining areas where the assembly of people is expected in association with a structure (usually a restaurant).

- The Department of Transportation and the Division of Motor Vehicles are responsible for registration and licensure of the motor vehicle, but does not examine the operation of the mobile food vendor or its kitchen.
- Buncombe County Health Department does issue permits for mobile food units but limits their inspections to food safety, and does not examine the vehicle or its attachments.
- The Department of Agriculture does inspect LPG use but has only five inspectors for the entire state of NC, and only two individuals dedicated to field inspections including mobile food vending. Their inspection process is primarily complaint driven or investigations after an accident.

This research has revealed that there is little to no inspection occurring for the safe use of the portable LPG containers, and there is some risk associated with the use of these containers. Propane is extremely flammable. While propane is used as a gas, it is transported and stored as a liquid under high pressure in tanks or cylinders. When liquid propane changes into a gas vapor, it expands in volume by about 270 times. Propane vapors are heavier than air and, therefore, will not dissipate rapidly and will accumulate in low areas. These two characteristics mean that even a small leak of liquid propane can result in a much larger quantity of propane vapor, which poses a risk of explosion and fire in a confined space or in low lying areas.

Determining the extent of the risk is challenging, however. Clearly, the use of portable LPG containers is a widespread practice and is most commonly used for heating and cooking, including the very common backyard grill used residentially throughout the country. In all of these instances, it is expected that the use of the LPG is in accordance with the manufacturer's instructions and if followed properly, is used with minimal risk. The proposed ordinance requires that all systems be used in accordance with these standards and if a system is found to be suspicious in any way, it would be within the city's power to withhold or revoke a permit. An inspection from the Fire Marshal's office may also be considered when trucks are initially permitted, and random inspections from zoning may be used to check to make sure connections are secure and that the cylinder and all connections are free from corrosion.

Staff has proposed a small amendment to the proposed ordinance be considered that the Fire Marshal's office, upon inspection, may hold or revoke a permit for any public safety related concern. The Asheville Fire & Rescue Department has been willing to ensure that the public safety concern is adequately addressed. In collaboration, Planning staff will check on the systems during our random inspections. Planning staff is currently in the process of drafting a check-list that would allow our inspectors to check all safety-related concerns.

The Planning and Fire staff had the opportunity to meet with one of the inspectors from the U.S. Dept. of Agriculture, which is one entity that does inspect propane systems. He was in the area to inspect the food vendors at the Mountain State Fair. They walked around the fairground site and checked all the different propane systems. They discussed any potential concerns that could arise from the different systems and staff now feels more comfortable with our ability to check the systems.

(3) Regarding privilege license fees, one of the items on which information was requested was whether a separate privilege license tax may be charged for a MFV, and if so, how much.

Pursuant to N.C.G.S. 160A-211, a MFV is considered to be a restaurant. Restaurants may be charged a separate privilege license tax for each location. If the restaurant has four or fewer seats, the fee that can be charged, by statute, is $25.00. The City already charges privilege license taxes on restaurants as State law allows. Accordingly, privilege licenses are already required for MFVs as a separate location for a restaurant; all that may be needed to implement this for MFVs is to notify the operators of this requirement. Because the tax is established by State law, the City may not impose a higher tax.

Council also inquired about the fees collected by Planning for its review of the permits for MFVs for cost recovery in association with the MFV use. Permit fees can only cover the anticipated cost associated with the actual review of the permit (not necessarily including enforcement). The applications are treated as Level 1 reviews, which is essentially a staff-level site plan review. The charge for this review is $104. It would be problematic for the City to charge anything more than the basic Level I review fee.

Fees charged for processing of regulatory permits, like Level 1 reviews, may be set at a level that is intended to defray the costs of the regulatory program, and must be reasonable. This would include the "direct" costs of the program, such as staff time for processing permits, and may be approximate. This methodology has been upheld against legal challenges. Fees may be adjusted from time to time depending on changes in the direct costs of administration, or based on experience as to the costs of the program.

She also provided Council with copies of the draft minutes of Downtown Commission meetings where the issue was discussed including the final recommendation made and draft minutes from the August Planning and Zoning Commission where their recommendation was made. These Commissions are scheduled to adopt these minutes before the Council meeting - Planning and Zoning Commission on September 7 and Downtown Commission on September 9.

Staff proposes a small clarifying language amendment regarding the enforcement as follows: "Section 4. This ordinance shall be enforced as provided in Article 18 of Chapter 7 and Sec. 1-5 of the City Code, except that a failure to obtain or display a permit, as required by Sec. 7-14-2 d. (3) e. 4 and Section 7-16-1 (c) x g (display of permit) shall be punishable as a misdemeanor pursuant to N. C. Gen. Stat. sec. 160A-175 (b) and 14-4."

Finally, the proposed ordinance is included as well, containing the following modifications per direction of the Council at their August 23 meeting including:

7-16-1(c.)x.b.2.c. – Clarifying that in the downtown area, a MFV must begin operating within thirty (30) days of receiving their permit and clarifying that individuals (not corporations) may obtain a single truck permit.

7-16-1(c)x.d.7 – Modifying hours of operation in the downtown area

7-16-1(c.)x.d.10.(a.) – Prohibiting the use of generators in the downtown area

City Attorney Oast said that because this is a second reading, for which the public hearing has already been held, further public comment is not in order unless there are substantive changes proposed that would change the effect of the ordinance. It was his opinion that the changes outlined by Ms. Tuch would not require further public debate.

Mayor Bellamy noted that there are two issues on the table: (1) city-wide regulations for mobile food vending; and (2) including those regulations in the downtown area. City Attorney Oast said that Council can separate their vote on the two issues.

Councilwoman Manheimer is interested in three different issues regarding this ordinance (1) possibility of requiring some kind of aesthetic regulation for the appearance of the food truck; (2) further limiting the hours of operation in the downtown area - cease operations at 11:00 p.m.; and (3) limiting the number of permits issued from 10 to 5. We are launching a pilot program and we should be cautious because if it does not go well, it may be difficult to scale it back or repealing it. If it goes well, we can expand it.

Councilman Manheimer moved to amend the ordinance that limits the number of permits issued from 10 to 5. This motion was seconded by Councilman Davis and failed on a 3-4 vote, with Vice-Mayor Newman, Councilman Bothwell, Councilman Russell and Councilman Smith voting "no."

Councilwoman Manheimer moved that the downtown hours of operation be reduced from 2:00 a.m. to 11:00 p.m. This motion died for a lack of a second.

Vice-Mayor Newman understood that the fees charged for processing of regulatory permits must be set at a level that is intended to defray the costs of the regulatory program and must be reasonable. He wondered how we define the regulatory program. One way is to look at the cost to cover the specific set of tasks of staff time to review the permit and make a decision. But, it's his sense that with a pilot program, you should define the regulatory program in a broader sense. When we think about the staff time to develop this pilot program, he personally would like to have a fee level set at a level that really does cover the cost of this regulatory program that we are putting into motion in addition to the specific staff time for receiving the permit and making sure it meets technical requirements. Ms. Tuch responded that it was her understanding of what we can capture in our permit review fee is just those costs associated with reviewing the application and issuing the permit, including the initial inspection. We cannot include the time spent developing an ordinance, working with stakeholders, etc., all which is part of their long-range planning function.

City Attorney Oast said that it is legal for us to charge our direct costs. Beyond that, he was reluctant to advise Council that they can charge for other less direct costs. In fact, there has been legislative proposals to restrict cities abilities to charge anything other than direct costs. We can charge same fees we charge for a Level I permit. He said staff can look at this fee question to see if they can identify any other direct costs and adjust the fees later. Council does not need to take any action to authorize the charging of fees for this purpose, as the Level I permit fee is already covered in the fee schedule.

Ms. Tuch said that staff will be coming back to Council in a year with a report summarizing the list of different items they will monitor, and fees may be one thing they should look at.

Councilman Davis said that at the Boards & Commissions Committee they discussed an oversight committee recommended by Mayor Bellamy. He wanted to see how the program progresses first, but if a committee is established, that would be another staff expense.

In response to Councilman Smith, Ms. Tuch said that, from memory, the checklist included some of the following items: trash collection; enforcement issues; permitting issues; whether there was a need for an oversight committee; whether or not we want to check on food quality; whether or not aesthetic concerns become a problem; whether 10 permits was an appropriate number for downtown; whether tables and chairs should be allowed; noise resulting from generators outside of downtown; ensure that sales tax is being collected; etc.

In response to Mayor Bellamy, Ms. Tuch said the food carts pay an initial fee of $125 (and possibly an encroachment fee onto a public sidewalk) and the renewal fee is, she believed, $75.00/year.

Upon inquiry by Mayor Bellamy, Ms. Tuch said that she would clarify the ordinance that property owners (in addition to the vendors) cannot bring tables and chairs to the site.

Vice-Mayor Newman said that he supports the policy, but it is a policy that from a direct business standpoint is benefitting a pretty small number of specific businesses. If there is a way to have those businesses help recover the costs of putting a program together, that would be fair. City Manager Jackson said that staff will capture those costs and include it in the report on the pilot program.

Mayor Bellamy expressed concern that there is not a limit on the number of food vendors that can be permitted outside of downtown and the number of staff hours necessary to monitor those vendors.

Councilwoman Manheimer was concerned that said that some of the owners of dilapidated properties will use the band-aid approach and let a mobile food truck on their property for rental income, noting that this ordinance does not require the owner to fix up their real property. She did not want the mobile food vending on a dilapidated parking lot to become a substitute for non-recovery of some of our real estate. That would move us in the wrong direction in terms of economic recovery. Planning & Development Director Judy Daniel responded that staff will monitor that and if there are 25-30 applications, they would bring it through the Planning & Zoning Commission with a recommendation to Council. It was the consensus of Council for that to occur.

Councilman Bothwell asked staff to monitor mobile food trucks which locate near schools, defeating the attempt of the schools to encourage students to have healthier eating habits,

Vice-Mayor Newman said that he supports the policy, but it is a policy that from a direct business standpoint is benefitting a pretty small number of specific businesses and if there is a way to have those businesses help recover the costs of putting a program together, that would be fair. He moved to ask staff to track their direct costs associated with administering the new regulations for this ordinance and after the pilot project that we include that full staff administrative costs into future fees. This motion was seconded by Councilman Davis and carried unanimously.

At Mayor Bellamy's request, Vice-Mayor Newman moved to divide the question with one vote being city-wide (except the downtown area), and the other vote being for the downtown area. This motion was seconded by Councilwoman Manheimer and carried on a 4-3 vote, with Councilman Bothwell, Councilman Russell and Councilman Smith voting "no."

Councilman Russell moved to adopt the mobile food regulations city-wide (except for the downtown area). This motion was seconded by Councilman Bothwell and carried unanimously.

Councilman Russell moved to adopt the mobile food regulations for the downtown area. This motion was seconded by Councilman Bothwell and carried on a 5-2 vote, with Mayor Bellamy and Councilman Davis voting "no."

**ORDINANCE BOOK NO. 27 - PAGE 137**

**VI. NEW BUSINESS:**

**A. RESOLUTION NO. 11-193 - RESOLUTION APPOINTING MEMBERS TO THE AFFORDABLE HOUSING ADVISORY COMMITTEE**

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Affordable Housing Advisory Committee.

On June 14, 2011, City Council established the Affordable Housing Advisory Committee.

The following individuals have applied for vacancies: Allison Bond, Anthony Goodson Jr., William Irby, David Dills, M. Mae Creadick, Brian K. Alexander, Richard Warren, Barber Melton, Scott Dedman, Lindsey Simerly and Paul Reeves.

On August 9, 2011, City Council (1) appointed Scott Dedman, William Irby, Allison Bond, Brian Alexander, Barber Melton, Lindsey Simerly and Anthony Goodson Jr. to each serve a three-year term, or an initial two-year term respectively, until their successors have been appointed; and (2) asked the City Clerk to arrange interviews for Paul Reeves, M. Mae Creadick, David Dills and Richard Warren. Mr. Reeves was unable to attend the interview.

After other Council members spoke highly of the strong candidates, M. Mae Creadick received 7 votes; David Dills received 5 votes; and Richard Warren received 2 votes. Therefore, David Dills was appointed as member to the Affordable Housing Advisory Committee, to serve an initial two-year term, term to expire September 1, 2013; and M. Mae Creadick was appointed as member to the Affordable Housing Advisory Committee, to serve a three-year term, term to expire September 1, 2014. Both terms are until their successors have been appointed.

**RESOLUTION BOOK NO. 34 – PAGE 163**

**B. RESOLUTION NO. 11-194 - RESOLUTION APPOINTING A MEMBER TO THE CRIME-STOPPERS BOARD OF DIRECTORS**

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing a member to the Crime-Stoppers Board of Directors. .

The term of Michele McClure expired on June 30, 2011.

The following individuals have applied for this vacancy: Princess Adams, Lynda Bell Haynes, Karl Katterjohn, Allen Brailsford and Daniel L. Ater.

On August 9, 2011, the Boards & Commissions Commission recommended interviewing Princess Adams and Karl Katterjohn.

After other Council members spoke highly of the strong candidates, Karl Katterjohn received the majority of votes. Therefore, Karl Katterjohn was appointed as member to the Crime Stoppers Board of Directors, to serve a three-year term, term to begin immediately and expire on June 30, 2014, or until his successors has been appointed.

**RESOLUTION BOOK NO. 34 – PAGE 164**

**C. RESOLUTION NO. 11-195 - RESOLUTION APPOINTING A MEMBER TO THE RECREATION BOARD**

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing a member to the Recreation Board. .

There currently exists a vacancy left by Ms. Sara Manual whose term would have expired on June 30, 2012.

The following individuals have applied for a vacancy: Barry Mundt, Richard Warren, John Parrish, Robert Pierce and John Broadbooks.

On August 9, 2011, The Boards & Commission Committee recommended interviewing: John Parrish, Barry Mundt and Robert Pierce. Mr. Pierce was unable to attend the interview.

After other Council members spoke highly of the strong candidates, Barry Mundt received 2 votes; and John Parrish received 5 votes. Therefore, John Parrish was appointed as a member of the Recreation Board to serve a three-year term, term to begin immediately and expire on June 30, 2012, or until his successor has been appointed.

**RESOLUTION BOOK NO. 34 – PAGE 165**

**D. RESOLUTION NO. 11-196- RESOLUTION APPOINTING A MEMBER TO THE BUNCOMBE COUNTY TOURISM DEVELOPMENT AUTHORITY**

Due to a conflict of interest, Vice-Mayor Newman moved to recuse Councilwoman Manheimer from participating in this issue. This motion was seconded by Councilman Russell and carried unanimously.

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing a member to the Buncombe County Tourism Development Authority. .

The term of Eric Scheffer (individual who is involved in the tourist business and who has demonstrated an interest in tourism development but who does not own or operate a hotel, motel or other taxable tourist accommodation) expires on August 30, 2011.

The following individuals have applied for this vacancy: John Ellis, Cesar Romero, Ruth Summers and Chris Bubenik.

On August 9, 2011, the Boards & Commission Committee recommended interviewing: John Ellis, Ruth Summers and Chris Bubenik.

After other Council members spoke highly of the strong candidates, John Ellis received 5 votes; Ruth Summer received 1 vote; and Chris Bubenik received no votes. Therefore, John Ellis was appointed as a member of the Buncombe County Tourism Development Authority ((individual who is involved in the tourist business and who has demonstrated an interest in tourism development but who does not own or operate a hotel, motel or other taxable tourist accommodation) to serve a three-year term, term to begin August 31, 2011, and expire on August 30, 2014, or until his successor has been appointed.

**RESOLUTION BOOK NO. 34 – PAGE 166**

**E. RESOLUTION NO. 11-197 - RESOLUTION APPOINTING A MEMBER TO THE RIVER DISTRICT DESIGN REVIEW COMMITTEE**

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing a member to the River District Design Review Committee.

Mr. Randy Shull (one of two members who must be a property owner located within the River District) has resigned from the Committee, thus leaving an unexpired term until September 1, 2013.

The following individuals have applied for the vacancy: Darren Green, Chase Brugh, Philip Ellis, Jay Marino, Laurie K. Miller, Tadd Clarkson, Stuart Smith, Michael McDonough and Leslie McCormick.

The Boards & Commissions Commission recommended appointing Mr. Darren Green.

Councilman Smith moved to appoint Darren Green to serve the unexpired term of Mr. Shull, term to expire September 1, 2012, or until his successor has been appointed. This motion was seconded by Councilman Davis and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 167**

**VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:**

Rev. Christopher Chiaronmonte spoke about the homeless issue in Asheville and how Asheville needs a legal place for the homeless to camp.

Rev. Lisa Landis spoke about she felt the public is mistreated by our government.

Mr. Fred English did not want his tax dollars spent for gay unions.

Dr. Milton Byrd felt that the City should issue a historic proclamation to recognize the Asheville Drum Circle.

**Lawsuit**

The following civil action was commenced in Superior Court on August 26, 2011, which is generally described as follows: Susan Zakanycz vs. City of Asheville, City of Asheville Transit Authority, Transit Management of Asheville, First Transit Inc. First Transit Transportation and Ralph Dowdle. The nature of the proceeding is a complaint for negligence.

**Closed Session**

At 7:06 p.m., Councilman Smith moved to go into closed session for the following reasons: (1) To discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session. The statutory authority is contained in G.S. 143-318.11 (a) (4); and (2) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Bothwell and carried unanimously.

At 7:14 p.m., Vice-Mayor Newman moved to come out of closed session. This motion was seconded by Councilman Smith and carried unanimously.

**VIII. ADJOURNMENT:**

Mayor Bellamy adjourned the meeting at 7:14 p.m.

Magdalen Bowerson
CITY CLERK

MAYOR

Tuesday – September 27, 2011 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and Interim Deputy City Clerk Jeffrey B. Richardson

Absent: None

**PLEDGE OF ALLEGIANCE**

Mayor Bellamy led City Council in the Pledge of Allegiance.

**INVOCATION**

Councilman Russell gave the invocation.

**AGENDA CHANGES**

(1) **RESOLUTION NO. 11-208 – RESOLUTION APPOINTING JEFFREY B. RICHARDSON AS INTERIM DEPUTY CITY CLERK FOR SEPTEMBER 27, 2011**

Due to the absence of the City Clerk and the Deputy City Clerk, Mayor Bellamy said that it was necessary to adopt a resolution appointing Jeffrey B. Richardson as Interim Deputy City Clerk for September 27, 2011.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Smith moved for the adoption of Resolution No. 11-208. This motion was seconded by Councilman Russell and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 180**

(2) Mayor Bellamy said that there has been a request to pull off New Business Item "E".

**I. PROCLAMATIONS:**

**A. PROCLAMATION PROCLAIMING OCTOBER, 2011, AS "FIRE PREVENTION MONTH"**

Mayor Bellamy read the proclamation proclaiming October, 2011, as "Fire Prevention Month" in the City of Asheville. She presented the proclamation to Division Chief Barry Hendren, who briefed City Council on some activities taking place during the month.

**B. PROCLAMATION PROCLAIMING OCTOBER 7-9, 2011, AS "SALUTE TO FAMILIES CELEBRATION"**

Mayor Bellamy read the proclamation proclaiming October 7-9, 2011, as "Salute to Families Celebration" in the City of Asheville. She presented the proclamation to Dr. John Grant,

Pastor from Mt. Zion Missionary Baptist Church, who briefed Council on the events taking place for that event.

**C. PROCLAMATION PROCLAIMING OCTOBER 24, 2011, AS "FOOD DAY"**

Mayor Bellamy read the proclamation proclaiming October 24, 2011, as "Food Day" in the City of Asheville. She presented the proclamation to Councilman Gordon Smith, who briefed Council on the events taking place on that day.

**II. CONSENT AGENDA:**

**A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON SEPTEMBER 13, 2011**

**B. RESOLUTION NO. 11-198 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH BROWN & CALDWELL FOR THE WATER RESOURCES ASSET MANAGEMENT PLAN UPDATE**

**ORDINANCE NO. 4018 - BUDGET AMENDMENT FOR THE WATER RESOURCES ASSET MANAGEMENT PLAN UPDATE**

Summary: The consideration of a resolution by City Council authorizing the City Manager to enter into an agreement with Brown and Caldwell in an amount not to exceed $99,880 for the Water Resources Asset Management Plan Update; and a budget amendment in the amount of $99,880.00 from savings in a N.C. Dept. of Transportation (NCDOT) capital project that was completed under budget.

In 2005, Brown and Caldwell developed an Asset Management Plan for Water Resources to create an asset inventory, improve the refurbishment and replacement (R&R) planning process, create a Replacement Planning Model (RPM), and establish a capital planning process. The Excel-based RPM was originally developed in 2005 and updated in 2007 to determine long term funding needs to R&R activities of the City's water-related infrastructure. Since completion of the $40 million revenue bond projects, changes in the City's enterprise software, and numerous other capital improvement projects, an update to the RPM and Asset Management Plan is needed to update the asset inventory, R&R schedule, and capital project plan.

Since Brown and Caldwell created the department's Asset Management Plan and Replacement Planning Model, they are the most qualified firm to complete the update. Based on that justification, Water Resources desires for City Council to waive competitive bidding requirements and award the contract for the Asset Management Plan Update to Brown and Caldwell in an amount not to exceed $99,880.00.

This project is part of City Council's strategic plan to maintain city infrastructure and to operate the City of Asheville to the highest levels of fiscal responsibility.

Pro:

- Approval of the project will allow Water Resources to create an up-to-date asset inventory, update the refurbishment and replacement schedule, update the Replacement Planning Model, and establish a multi-year capital plan.

Con:

- Additional funds will be needed from another capital project to cover the project cost.

The Water Resources Department does not have a budget in place for the Asset Management Plan Update. The budget amendment will create the project budget and transfer

the funds needed for this project in the amount of $99,880.00 from an NCDOT project that was completed under budget.

| | |
|---|---|
| Amount in Completed NCDOT Project | $486,999 |
| Amount Needed for Asset Mgt Plan Update | $ 99,880 |
| Amount Remaining in NCDOT Project | $387,119 |

The amount remaining in the completed NCDOT Project will be reallocated to other capital projects as the need arises. Staff will seek Council approval on any future reallocation of these funds.

City staff recommends City Council authorize the City Manager to enter into an agreement with Brown and Caldwell in an amount not to exceed $99,880.00 for the Water Resources Asset Management Plan Update; and to adopt a budget amendment in the amount of $99,880.

**RESOLUTION BOOK NO. 34 – PAGE 168**
**ORDINANCE BOOK NO. 27 – PAGE 174**

**C. RESOLUTION NO. 11-199 - RESOLUTION ACCEPTING CHAPEL PARK PLACE AS A CITY-MAINTAINED STREET**

Summary: The consideration of a resolution to accept Chapel Park Place as a city-maintained street.

Code of Ordinances sec. 7-15-1(f)(4)a requires that streets dedicated for public use be accepted by resolution of the City Council. The developer submitted a written request on July 26, 2011, asking the City to accept the subject street as a city-maintained street.

Chapel Park Place from a point 0.07 mile north of West Chapel Road northward to Bostic Place is a developer-constructed street that has an average street width of 18 feet, grass shoulders, a length of 0.11 mile, and a right-of-way width of 25 feet.

Transportation Department staff and Public Works Department staff inspected the subject street and determined that it was constructed according to current standards as indicated in the City of Asheville's Standard Specifications and Details Manual. In addition, the Planning Department and the Asheville Fire Department have concurred with the acceptance of the subject street.

Following City Council's approval of this resolution, the subject street will be added to the official Powell Bill List.

This action complies with the City Council 2011-12 Strategic Operating Plan within the Fiscal Responsibility Area by accepting street infra-structure to help support the healthy growth of the City.

Pros:

- The City of Asheville will receive Powell Bill Funds from the N.C. Dept. of Transportation to help maintain the street.
- The street provides access and connectivity in a residential community.

Con:

- Powell Bill Funds will not cover 100% of the total cost to maintain the street.

There will be no initial financial impact to the City, although the responsibility of maintenance belongs to the Public Works Department. The City will receive Powell Bill Funds in

the future to help maintain the streets. Based on current allocation rates, the City will receive about $169 per year in Powell Bill Funds from the subject street.

Staff recommends that City Council accept Chapel Park Place as a city-maintained street.

**RESOLUTION BOOK NO. 34 – PAGE 169**

**D. RESULTS OF THE SEPTEMBER 12, 2011, CIVIL SERVICE BOARD EMPLOYEE ELECTION**

Summary: One copy of the results of the Civil Service Board employee election held on September 12, 2011, is to be filed with the City Manager and one with the City Clerk, who shall present such certification to the City Council at its next regular meeting. Secretary to the Civil Service Board Jessica Dunlap and City Clerk Burleson provided the following certified certificate on September 12, 2011: We do hereby certify, having opened, canvassed, and determined the original returns of the Civil Service Board employee election, the results of the Civil Service Board Employee Election held on September 12, 2011, noting the name of each person voted for and the number of votes cast for each person as follows: Virginia Robinson – 83 and Anthony Alan Coxie – 80.

**E. RESOLUTION NO. 11-200 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A SIDEWALK AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR A SAFE ROUTES TO SCHOOLS PROJECT FOR CHARLES C. BELL ELEMENTARY SCHOOL**

Summary: The consideration of a resolution authorizing the City Manager to execute a sidewalk agreement with the N.C. Dept. of Transportation (NCDOT) for the construction of a sidewalk along US 70 (Tunnel Road) from Maple Spring's Road to SR 2002 (Riceville Road) in East Asheville.

The NCDOT, the City of Asheville, and Charles C. Bell Elementary School have partnered together to construct a sidewalk along US 70 (Tunnel Road) from Maple Spring's Road to SR 2002 (Riceville Road) and to install pedestrian crosswalks at the intersection of US 70 (Tunnel Road) and Maple Spring's Road/Governor's View Road as a part of the Safe Routes to School Program.

The NCDOT will be responsible to prepare the planning documents, environmental permits, and the project plans and specifications. In addition, the NCDOT will construct or oversee the construction of the project. The City of Asheville will be responsible to provide any additional right-of-way and to relocate any utilities. After the project is completed, the City of Asheville will be responsible to maintain the sidewalk.

This action complies with the City Council 2011-12 Strategic Operating Plan within the Safe Area in supporting the Safe Routes to School Program by applying for funding for one school during the current fiscal year.

Pros:

- Demonstrates a continued partnership between the NCDOT and the City of Asheville in accomplishing various projects.
- Demonstrates City support for the Safe Routes to School Program.
- The NCDOT is funding and constructing the project.

Con:

- The City is responsible to maintain the sidewalk after it is constructed.

Staff does not anticipate the need for additional right-of-way or the relocation of any utilities for the subject project. Therefore, the only anticipated fiscal impact would be routine maintenance after the sidewalk is completed which is normally included in the Public Works annual operating budget.

Staff recommends that City Council approve a resolution authorizing the City Manager to execute a sidewalk agreement with the NCDOT for the construction of a sidewalk along US 70 (Tunnel Road) from Maple Spring's Road to SR 2002 (Riceville Road) in East Asheville.

In response to Mayor Bellamy, Director of Transportation Ken Putnam said that this will be our second successful Safe Routes to School Program with the NCDOT, with the Emma community sidewalk being the other one.

**RESOLUTION BOOK NO. 34 – PAGE 171**

**F. RESOLUTION NO. 11-201 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CONSTRUCTION AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE REMOVAL OF VEGETATION WITHIN THE I-240 RIGHT-OF-WAY NEAR THE HILLCREST PEDESTRIAN BRIDGE**

Summary: The consideration of a resolution authorizing the City Manager to execute a construction agreement with the N.C. Dept. of Transportation (NCDOT) for the removal of vegetation within the I-240 right-of-way near the Hillcrest Pedestrian Bridge.

The NCDOT and the City of Asheville have been working closely together during the past 18 months to make improvements at and around the Hillcrest Pedestrian Bridge to enhance the pedestrian experience. The NCDOT reopened the bridge during December 2010.

The NCDOT is willing to remove vegetation including the mature trees within the I-240 right-of-way at the City's expense. Specifically, the NCDOT will remove or cause to be removed all vegetation within the I-240 right-of-way that is not marked to be saved by City of Asheville staff. Staff is relying heavily on recommendations regarding the vegetation removal from the Asheville Police Department and using best management practices from Crime Prevention Through Environmental Design (CPTED) strategies. Vegetation will not be removed from any privately-owned property in the immediate area. The estimated cost for the work is $10,000.

This action complies with the City Council 2011-12 Strategic Operating Plan within the Safe Area in helping to make Asheville one of the safest and most secure communities compared to similar cities.

Pros:

- Demonstrates a continued partnership between the NCDOT and the City of Asheville in accomplishing various projects.
- Uses NCDOT resources instead of limited City resources.

Con:

- The City is responsible to pay for the proposed work.

As noted above, the estimated cost for the work is $10,000. Staff recommends that the funds for the subject work come from the Traffic Safety Project which is intended to finance small to medium size traffic-engineering related safety projects and pedestrian enhancements. The current balance in the Traffic Safety Project is about $131,000. Other current projects to be funded from the Traffic Safety Project include an upgrade to the traffic signal at the intersection of Haywood Street and Montford Avenue, a grant match to provide pedestrian enhancements at four existing signalized intersections, and pedestrian improvements at the intersection of Montford Avenue and Cullowhee Street/Soco Street.

Staff recommends that City Council approve a resolution authorizing the City Manager to execute a construction agreement with the N.C. Dept. of Transportation and the City of Asheville for the removal of vegetation within the I-240 right-of-way near the Hillcrest Pedestrian Bridge.

**RESOLUTION BOOK NO. 34 – PAGE 172**

**G. RESOLUTION NO. 11-202 - RESOLUTION TO SET ASIDE THE CONTRACT AWARD TO ROGERS GROUP INC. FOR THE WATER RESOURCES ROAD RESURFACING AT THE NORTH FORK AND WILLIAM DEBRUHL WATER TREATMENT PLANTS PROJECT AND AWARD THE CONTRACT TO APAC-ATLANTIC, INC.**

Summary: The consideration of a resolution by City Council to retract the contract award to Rogers Group, Inc. for the Water Resources Road Resurfacing Project at the North Fork and William DeBruhl Water Treatment Plants and authorize the City Manager to re-award the contract and enter into an agreement with APAC-Atlantic, Inc. in an amount not to exceed $399,812 for the project.

On September 13, 2011, Water Resources recommended and City Council awarded the contract to Rogers Group, Inc. for the Road Resurfacing Project at the North Fork and William DeBruhl Water Treatment Plants in an amount not to exceed $399,812. The scope of the project included all labor, materials, and equipment required for: (1) removing existing damaged pavement, (2) adding a stone base, (3) asphalt paving, (4) milling, (4) adding speed bumps, (5) repairing damaged curbing, (6) thermoplastic striping, and (7) additional scope as needed.

After City Council awarded the bid and Water Resources started project discussions with the contractor, Rogers Group admitted to leaving out a section of paving in the bid that, if included, would have made them the highest bidder. The section of paving that was left off the Rogers' bid was not noticed by City staff since it was included with other sections and is a small area. Upon learning of the bid error, Water Resources informed Rogers Group that they were no longer the lowest responsible bidder and the contract award needed to be retracted and re-awarded to APAC-Atlantic, Inc. upon City Council approval. The corrected bid amounts are:

1. APAC-Atlantic, Inc. – Asheville, NC; $416,512.46 total bid
2. Rogers Group, Inc. – Hendersonville, NC; $445,561.82 estimated total bid with the deleted section added to original bid of $415,879.82

The lowest responsible bidder is no longer Rogers Group, Inc. but is now APAC-Atlantic, Inc. The project budget will remain at a not to exceed amount of $399,812.00. Since the total bid cost is higher than the anticipated project budget, Water Resources will work with APAC to reduce the project scope in order to stay within the $399,812.00 project budget.

This project is part of City Council's strategic plan to maintain and improve city infrastructure and provide local companies with labor opportunities.

Pros:

- Approval of the project will allow Water Resources to complete necessary road repair at the North Fork and William DeBruhl Water Treatment Plants.
- The project will provide a local company with work through June 2012.

Con:

- Re-awarding the contract to APAC will delay the project by two weeks, which may push paving at the William DeBruhl WTP out to spring 2012.

Water Resources has a Road Resurfacing capital project in which $399,812 is currently budgeted for this project. The contract with APAC will be for a not to exceed amount of $399,812, even though their total bid is $416,512.46. Water Resources will reduce the project scope to stay within the not to exceed amount.

City staff recommends City Council retract the contract award to Rogers Group, Inc. for the Water Resources Road Resurfacing Project at the North Fork and William DeBruhl Water Treatment Plants and authorize the City Manager to re-award the contract and enter into an agreement with APAC-Atlantic, Inc. in an amount not to exceed $399,812 for the project.

**RESOLUTION BOOK NO. 34 – PAGE 173**

**H. RESOLUTION NO. 11-203 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH ACCELA FOR THE DEVELOPMENT SERVICES CENTER SOFTWARE REPLACEMENT PROJECT**

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract for the Development Services Center Software Replacement project with Accela and other suppliers in total amount not to exceed $560,000 for software, hardware, and services.

An extensive Request for Proposals (RFP) process for Development Services Center software was conducted earlier in 2011. A survey of the developer community was used to guide RFP requirements. The RFP was also guided by state law requirements regarding the development services process. In addition to system requirements, the RFP included minimum proposal criteria, described the criteria for initial proposal evaluation and established finalist vendor selection activities and criteria. Responses were received from 7 vendors, and evaluated by a team that included IT, Building Safety, and Purchasing, as well as other affected departments.

A second stage of evaluation and due diligence was done for the 4 vendors who substantially met the RFP requirements. The 3 vendors who were not advancing to the second stage received notification from staff.

After completing due diligence and reference checks, staff is seeking authority from City Council to enter into contract negotiations and sign a contract with Accela.

Pros:

- Prioritize a reasonable level of business technology as a means to make staff operations more efficient
- Meets multiple city council objectives (see below)
- Enhances ability to engage in process re-engineering
- Project is being funded with a dedicated revenue source not from General Fund revenue.

Con:

- Any software implementation causes some degree of organizational turbulence during implementation

This action ties into Council's "Green" goal by implementation of processes (i.e. driving to apply and receive permits, plans submittal) that will require significantly less paper and less fuel consumption. It also ties into Council's "Sustainable" goal in several meaningful ways: (1) This project will better enable staff to fulfill the specific action item of "Ensure financial accountability by matching resources with strategic initiatives," specifically enhancing systems so that "creating meaningful performance measures" can be better accomplished; (2) In the same manner, the specific action item of "Strengthen efforts to create measurable goals, accountabilities, and outcomes for all city policies and operations" will also be enhanced by this project; and (3)

Likewise, the item of "Reform and streamline the development review process to improve the ease and efficiency of the customer's experience without compromising the quality of standards or other strategic goals (affordability, environment, etc.)" through deployment of better, greener, more online technology.

In April 2008, City Council approved a 4% Technology Fee on permits with the proceeds dedicated to technology improvements related to Development Services. The Development Services Center Software Replacement project will be funded with proceeds collected from this fee. The Technology Fee project is already budgeted in the City's adopted Capital Improvement Program.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into contracts for the Development Services Center Software Replacement Project with Accela in total amounts not to exceed $560,000 for software, hardware, and services.

**ORDINANCE BOOK NO. 27 – PAGE**

**I. ORDINANCE NO. 4019 – BUDGET AMENDMENT TO ESTABLISH A FISCAL YEAR 2011-12 BUDGET FOR PURCHASING PHASE II LED STREETLIGHTS AND PHOTOCELLS**

Summary: The consideration of a budget amendment to establish a FY 2011-12 budget in the amount of $1,192,481 for purchasing Phase II LED streetlights and photocells.

In April 2011 City Council approved a resolution to increase the annual municipal carbon footprint reduction goal from 2% to 4%. A key element to achieving this goal is the 4 year plan to change most of the municipal streetlights to LED technology. During the FY 2011-12 annual budget process, staff discussed with Council the establishment of a Green Capital Improvement Program (Green CIP) to fund this initiative. The Green CIP will initially borrow money to fund carbon reduction efforts and then will use operational energy savings to pay the debt service. This budget amendment, in the amount of $1,192,481, will provide authorization for the first year of the Green CIP.

This project supports the following City Council strategic goals: (1) Identify strategies and costs for increasing the city's annual energy reduction goal to 4%; and (2) Identify resources for strategic initiatives and create meaningful performance measures for programs and services.

Pros:

- Installation of 2,913 LED streetlights will generate an estimated $110,000 in avoided spending in the municipal streetlight operations budget. These annual savings will be rededicated to fully cover annual debt service for the investment.
- This activity will result in 879 tons of avoided carbon dioxide resulting in a 2.6% total municipal carbon footprint reduction.

Con:

- None have been identified.

As noted above, this project was discussed with Council during the annual budget process. Staff will borrow money to fund the purchase of the LED streetlights and photocells and use savings generated by the purchase to fund the debt service on the loan.

City staff recommends City Council approve the budget amendment to establish a FY 2011-12 budget in the amount of $1,192,481 for purchasing Phase II LED streetlights and photocells.

In response to Councilman Smith, Director of Finance and Management Services said that this does not constitute all of the street lights in the City and would provide to Council the percentage of streets that will be done in Phase 2.

**ORDINANCE BOOK NO. – PAGE 176**

**J. RESOLUTION NO. 11-204 - RESOLUTION IN SUPPORT OF FEDERAL HOUSE RESOLUTION 1351 TO RETAIN MAIL SERVICES WITHIN ASHEVILLE AND WESTERN NORTH CAROLINA**

Summary: The United States Postal Service is currently experiencing financial problems, and is considering reducing or eliminating current services and facilities. The Postal Service announced that the Brevard Road Production and Distribution Facility would be undergoing a study for possible reduction, consolidation, or closure; and mail processing operations moved to Greenville, South Carolina. This move would add additional time to customer delivery, and be a reduction in service standards currently realized by the citizens of Asheville and western North Carolina. Reduction or closure of the Brevard Road facility would also affect as many as 180 workers, and the economy for Asheville and surrounding communities. The City Council supports Federal House Resolution 1351, to preserve and secure the current level of mail service to the citizens of Asheville and western North Carolina. In addition, a copy of this resolution be transmitted to Senators Richard Burr and Kay Hagan, and to Representative Heath Shuler,

**RESOLUTION BOOK NO. 34 – PAGE 176**

**K. RESOLUTION NO. 11-205 - RESOLUTION AUTHORIZING THE CITY MANAGER TO AWARD THE SALE OF SURPLUS DINNERWARE TO THE ASHEVILLE INDEPENDENT RESTAURANT ASSOCIATION**

Summary: The consideration of a resolution authorizing the City Manager to award the sale (no compensation) of surplus dinnerware no longer in use at the Civic Center to the non-profit Asheville Independent Restaurant Association (AIR) and to enter into a negotiated purchase agreement.

The AIR has a forthcoming educational project which could utilize a portion of the excess dinnerware left from the old Banquet Hall at the Civic Center. The dinnerware has not been used by the Civic Center for at least 15-20 years, and has a nominal value of $1,500 or less. N.C. Gen. Stat. sec. 160A-279 authorizes a City to dispose of property to a non-profit agency that is carrying out a public purpose. The educational project would serve a public purpose. The very small value of the dinnerware, justifies the donation of the property, with the conveyance of the property conditioned on the use of the property for a public purpose.

At the September 5, 2011, Civic Center Commission meeting, the Commission voted to recommend to City Council that the dinnerware be donated to AIR for the educational project, with any excess to be offered to the Asheville Buncombe County Christian Ministry by AIR.

The consideration of this action relates to the City's Strategic Plan to form strategic partnerships to further education and economic development.

Pros:

- Allows the dinnerware to remain in the Asheville community for public use.
- Supports the City's goal to partner with outside groups and agencies to provide educational programming.
- Provides a method to have the property removed from the Civic Center which is required as part of the renovations.

Con:

- The value of the dinnerware is very nominal but the City would receive no cash for the donation, as opposed to a competitive bid process.

Nominal $1,500 potential loss of revenue could be offset by the benefit of the educational program by AIR for the Asheville community.

City staff recommends City Council authorize the City Manager to award the sale (with no compensation) of the surplus dinnerware from the Civic Center to AIR and to enter into a negotiated purchase agreement conditioning the disposition of the dinnerware on its use for a public purpose.

**RESOLUTION BOOK NO. 34 – PAGE 177**

**L. ORDINANCE NO. 4020 - BUDGET AMENDMENT IN THE STORMWATER FUND FROM PROCEEDS RECEIVED FROM THE CLEAN WATER MANAGEMENT TRUST FUND FOR REPAYMENT OF THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES DINGLE CREEK LOAN**

Summary: The consideration of a budget amendment in the Stormwater Fund in the amount of $116,550 from proceeds received from the Clean Water Management Trust Fund (CWMTF) for repayment of the North Carolina Department of Environment and Natural Resources (NCDENR) Dingle Creek loan.

In September 2009, the City was awarded funding through the American Recovery and Reinvestment Act (ARRA) for the Dingle Creek stormwater improvement project. The grant award was structured as a 50% grant with a 50% loan requirement, with the Clean Water Management Trust Fund (CWMTF) agreeing to cover a portion of the 50% loan amount. The City recently received a check from CWMTF for its portion of the 50% loan amount. Upon receipt of the CWMTF funds, the City is required to then repay the $116,550 to the North Carolina Department of Environment and Natural Resources (NCDENR). Since the timing of the receipt of the CWMTF proceeds was uncertain, staff did not include them in the FY 2011-12 adopted Stormwater Fund budget, therefore a budget amendment is needed to appropriate these funds and repay the NCDENR loan.

This action complies with the City Council Strategic Operating Plan goal of "Operate the City of Asheville to the highest levels of fiscal responsibility."

Pros:

- Provides the required budget authorization for the receipt of the $116,550 in proceeds from CWMTF and the repayment to NCDENR of that loan amount.

Con:

- None.

This technical budget amendment in the Stormwater Fund has no overall fiscal impact.

City staff recommends City Council adopt the budget amendment in the Stormwater Fund in the amount of $116,550 from proceeds received from the Clean Water Management Trust Fund (CWMTF) for repayment of the North Carolina Department of Environment and Natural Resources (NCDENR) Dingle Creek loan.

**ORDINANCE BOOK NO. 27 - PAGE 178**

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Newman moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

**III. PRESENTATIONS & REPORTS:** None

**IV. PUBLIC HEARINGS:**

**A. PUBLIC HEARING TO CONSIDER THE VOLUNTARY ANNEXATION OF PROPERTY LOCATED AT 55 PINEY MOUNTAIN DRIVE – BELLE VISTA RETIREMENT RESIDENCE**

**ORDINANCE NO. 4021 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE PROPERTY LOCATED AT 55 PINEY MOUNTAIN DRIVE – BELLE VISTA RETIREMENT RESIDENCE**

Urban Planner Julia Fields said that this is the consideration of an ordinance for the voluntary annexation of property located at Biltmore Town Center (55 Piney Mountain Drive). This public hearing was advertised on September 16, 2011.

Asheville Retirement Residence, LLC has petitioned the City of Asheville for the annexation of one lot located at 55 Piney Mountain Drive containing a total of 13.52 acres. A 120 suite retirement residence, Bella Vista, has recently been constructed at the site. The property is contiguous to the primary corporate limits of the City of Asheville and qualifies for annexation by petition as set forth in NCGS 160A-31.

Pursuant to NCGS 160A-31, a public hearing must be held prior to adopting any ordinance for voluntary annexation. If City Council decides to proceed with this request, it is proposed that the annexation become effective on November 30, 2011.

Pros:

- Provides for the orderly growth of the City and the tax base through the acceptance of appropriate areas into the corporate limits where owners desire annexation.
- Complies with the 2025 Plan in that it supports the strategy of promoting voluntary annexation of developing areas.
- Allows for service provisions for a new retirement community that would benefit from an urban level of service.

Cons:

- Marginal costs for patrol.

The property located at 55 Piney Mountain Drive is valued at $12,813,700. This property is currently serviced by the City of Asheville Fire Department under the Haw Creek Fire District agreement. As such, the City receives a share of the Haw Creek Fire District property tax revenue based on the property's value. If the property were to remain outside the City, the City would receive $11,532 in revenue annually from the Haw Creek Fire District property tax. Once the property is annexed, it will no longer be subject to the 9-cent Haw Creek Fire District tax; instead, the property will be subject to the City of Asheville's 42 cent property tax rate. Therefore, the City will receive $53,817 annually in property tax revenue once the property is annexed. The net tax revenue gain from the annexation is $42,285. As noted above, cost impacts from this voluntary annexation are minimal.

City staff recommends City Council adopt the ordinance annexing the property at 55 Piney Mountain Drive – Bella Vista Retirement Residence.

Mayor Bellamy opened the public hearing at 5:18 p.m.

Mr. Wes Smith, representing the owner, thanked Council for consideration of this voluntary annexation.

Mayor Bellamy closed the public hearing at 5:19 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 4021. This motion was seconded by Vice-Mayor Newman and carried unanimously.

**ORDINANCE BOOK NO. 27 – PAGE 180**

**B. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 144 CARIBOU ROAD, KNOWN AS SWEETEN CREEK HOLDINGS LLC**

**ORDINANCE NO. 4022 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 144 CARIBOU ROAD, KNOWN AS SWEETEN CREEK HOLDINGS LLC**

Mayor Bellamy administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

City Attorney Oast asked if any Council member has any special knowledge associated with this project that they disclose it at this time. Councilman Davis said that he has visited the building in connection with a different matter and Councilwoman Manheimer said that she reviewed a sign variance while serving on the Board of Adjustment not related to this matter. Both noted they would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

City Attorney Oast said that the Authorized Practice Committee of the North Carolina State Bar has issued an advisory opinion that appearing in a representative capacity for a party before a local governmental body in a quasi-judicial proceeding is the practice of law, especially with respect to such aspects of the hearing as examining or cross-examining witnesses, or advocating for legal conclusions or results. This does not prevent persons, including land use professionals, from presenting information or expressing opinions within their knowledge or area of expertise.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 5:20 p.m.

Urban Planner Nathan Pennington submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Pennington said that this is the consideration of the issuance of a conditional use permit for property located at 144 Caribou Road, known as Sweeten Creek Holdings, LLC, for future tenant upfit for occupancy of the existing 158,000 square foot building.

He said that the applicant is requesting site plan approval for one parcel zoned CI (Commercial Industrial) for the redevelopment of an existing industrial building in accordance with Section 7-5-9(a) of the UDO which designates review for commercial buildings with a gross floor area of more than 100,000 square feet. Level III projects are reviewed as a conditional use in the Commercial Industrial district.

The subject property consists of one parcel comprising 11.57 acres according to the submitted survey. The approval of a conditional use permit will allow for further upgrades to the existing building in order to accommodate additional future tenants. The existing building was once home to the Lustar dyeing and finishing factory but was abandoned for almost a decade until last year when a local scrap metal recycler moved in and was subsequently followed by a PODS storage facility tenant. The arrival of the recycling tenant triggered a Level II site plan review for the site and the property was required to be brought into compliance with all applicable UDO requirements. The owner has elected to proceed with a Level III site plan review to accommodate additional tenants because of the fact that the gross square footage of the building exceeds 100,000 square feet.

In order to meet the needs of future tenants, the building may need to be reconfigured with additions to or deletions from the building in a way that is not specifically shown on the submitted site plan. One possible configuration is illustrated on the site plan. There is no maximum structure size requirement in the CI zoning district. The final design of the building footprint will be required to be reviewed and approved by the Technical Review Committee.

The combined square footage of the development meets the Level III review threshold (projects exceeding 100,000 square feet) and is subject to the Conditional Use Permit findings outlined in Section 7-16-2(c) of the UDO.

The existing building is partially occupied by the metal recycler and the PODS storage tenants. New phases of interior building upgrades will occur as tenants become available over time.

Future tenants shall be limited to uses such as recycling, warehousing, etc. as noted on page C2 of the site plan – see note #2, and the building area summary in order to remain in compliance with parking standards.

While the site is bounded by both Caribou Road and Sweeten Creek Road, the only access to the site is afforded via Caribou Road.

According to the site plan, 154 spaces are indicated inclusive of required ADA parking and this number is well within the required minimum and maximum thresholds as prescribed by the UDO for industrial types of uses. Additionally, eight bicycle parking slots are also to be provided.

The project was approved for a small area of outdoor storage along Sweeten Creek Road during the Level II site plan review process. Since that time, the parameters of the outdoor storage has shifted around the site and grown in size. The dedicated outdoor storage area must be clearly delineated on the site plan and appropriately screened pursuant to Section 7-11-3 of the UDO. Persistent issues with unpermitted signage on the outdoor storage must also be addressed prior to the issuance of any final permits.

The site was brought into compliance with UDO landscaping requirements in 2010 under the Level II site plan review. On March 15, 2010 the Tree Commission approved an alternative compliance request for a number of landscaping requirements including street tree placement along Sweeten Creek Road and the allowance of existing perimeter landscaping to suffice for some of the required parking lot landscaping.

The open space requirement for this type of development is 15% of the total site size; a total of 1.7 acres for this site. The site plan illustrates that adequate open space has been reserved to meet this requirement.

A fee in lieu of sidewalk construction along Sweeten Creek Road and Caribou Road was previously paid when the project was reviewed under the Level II site plan process. A fee-in-lieu-of construction in the amount of $3,715 (capped at 15% of the project cost) has been received by the City of Asheville. As the subject project moves forward with additional phases, the fee-in-lieu-of decision will not change: however, the developer will be expected to submit additional fee-in-lieu-of payments which will be capped at 15% of the new total project costs.

This proposal was recommended for approval with conditions by the Technical Review Committee on August 15, 2011.

At their regularly scheduled meeting on September 7, 2011, the Planning and Zoning Commission unanimously approved the project subject to the conditions noted in the staff report. No members from the public were present to speak about the project.

City Council must take formal action as set forth in Section 7-5-5(e)(3) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case pursuant to Section 7-16-2(c). Staff's review indicates that all seven standards are met as proposed in the site plan.

**1. That the proposed use or development of the land will not materially endanger the public health or safety.**
The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the *UDO*, the *Standards and Specifications Manual*, the *North Carolina Building Code* and other applicable laws and standards that protect the public health and safety.

**2. That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
The subject property is appropriately zoned for the existing industrial uses that are occurring in the existing building. The site is surrounded by existing established vegetation and similar industrial and commercial uses and is bounded along the southern perimeter by Interstate 40 and eastern perimeter by Sweeten Creek Road.

**3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
As noted in Finding #2, the proposed development is compatible with surrounding commercial uses and adjacent transportation corridors.

**4. That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
The site is adjacent to a trucking terminal to the north of similar commercial intensity to the north and a small warehousing building is located to the west. The subject property is separated from

Sweeten Creek Road by steep topography to the east and Interstate 40 to the south. No residential properties surround the subject site.

**5. That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
Elements of the proposal are aligned with the City's goals and objectives as noted in the Compliance with Comprehensive Plan and other Adopted Plans section (listed above). Specifically, the redevelopment and expansion of the building is consistent with the goals of infill development along an established commercial corridor.

**6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
The site is located off of Caribou Road and is approximately ¼ of a mile from the intersection of Sweeten Creek Road. The nearest bus stop is at the intersection of Caribou Road and Shiloh Road and is approximately ¾ of a mile from the subject site. Adequate water supply, fire and police protection, waste disposal and similar facilities are verified during the TRC review process.

**7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
Based on the existing and anticipated uses of the site, there will not be any undue traffic congestion on the existing street infra-structure. As additional phases are constructed and/or modified, the City Traffic Engineer will review the possible traffic impacts and recommend any appropriate mitigation improvements including a traffic impact study.

Based on the above findings and the analysis provided in the report, staff finds this request, with conditions noted, to be reasonable.

Pros:

- Provides an opportunity to adaptively reuse and upgrade an existing developed site.
- The project is consistent with a number of stated goals and objectives in the comprehensive and strategic operating plans.

Con:

- New tenants have not yet been identified and may be pulled from a list of approved land uses (this flexibility may also be viewed as a "pro").

Staff recommends approval of the project as submitted by the applicant with the standard conditions and the following additional conditions: (1) The outdoor storage area must be clearly delineated on the site plan and appropriately screened with vegetation or fencing as outlined in Section 7-11-3(d)(6) of the UDO; (2) All required landscaping that was installed and has since perished pursuant to the Level II site plan review process must be replanted; (3) All outstanding violations must be resolved and fines paid related to the unpermitted freestanding sign along Caribou Road before any permits are issued; and (4) Land uses are limited to those identified in the staff report and on the site plan.

After rebuttal, Mayor Bellamy closed the public hearing at 5:24 p.m.

Based on the above findings and the analysis provided in the report, Councilman Russell moved to recommend approval of the project identified as Sweeten Creek Holdings, LLC located at 144 Caribou Road for future tenant upfit for occupancy of the existing 158,000 square foot building, subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance

and be equipped with full cut-off fixtures (including wall packs) and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee if applicable; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (5) This project will undergo final review by the TRC prior to issuance of any required permits; (6) The outdoor storage area must be clearly delineated on the site plan and appropriately screened with vegetation or fencing as outlined in Section 7-11-3(d)(6) of the UDO; (7) All required landscaping that was installed and has since perished pursuant to the Level II site plan review process must be replanted; (8) All outstanding violations must be resolved and fines paid related to the unpermitted freestanding sign along Caribou Road before any permits are issued; and (9) Land uses are limited to those identified in the staff report and on the site plan. This motion was seconded by Councilman Bothwell and carried unanimously.

**ORDINANCE BOOK NO. 27 - PAGE 182**

**V. UNFINISHED BUSINESS:**

**VI. NEW BUSINESS:**

**A. ORDINANCE NO. 4023 - ORDINANCE CHANGING THE NAME OF THE PUBLIC ART BOARD TO THE PUBLIC ART AND CULTURAL COMMISSION AND EXPANDING THE ROLES AND RESPONSIBILITIES OF THE COMMISSION**

**RESOLUTION NO. 11-206 - RESOLUTION AMENDING THE PUBLIC ART POLICY TO INCLUDE SPECIAL CONSIDERATION FOR REGIONAL ARTISTS**

Superintendent of Cultural Arts Diane Ruggiero said that this is the consideration of (1) an ordinance expanding the Public Art Board's role and responsibilities and changing its name to the Public Art and Cultural Commission; and (2) a resolution supporting the Public Art Policy and Implementation Guidelines.

Ordinance No. 2609 was passed on September 14, 1999, establishing a public art board and a public art policy for the City of Asheville. The ordinance was codified in Article III of Chapter 2, Division 11 of the Asheville Code. The proposed revisions to the Code and policy reflect the need in the community and within the Parks, Recreation and Cultural Arts Department to have an advisory board with a broader focus on arts and culture in Asheville.

Ordinance

The goal for expanding the Public Art Board's roles and responsibilities as outlined in the ordinance is so that the City of Asheville, the Parks, Recreation and Cultural Arts Department, and the community can have an advisory board for both public art and cultural arts.

Staff and members of the Public Art Board worked together to update the ordinance. The Public Art Board and staff also met with members of the Downtown Master Plan Cultural Arts Implementation Committee to ensure that the updates would be in keeping with the needs outlined in the Downtown Master Plan.

The Code pertaining to the establishment of a public art board will be revised as follows. Sec 2-185.8. Purposes, Responsibilities, and Powers will be revised to read:

(a) Subject to such limitation as may be imposed by laws or regulations, the Board shall serve as an advisory board to the City Council for the following purposes in order to further the public welfare:

1. Facilitate public art in public buildings and public spaces.
    a. Inform the residents of and visitors to Asheville and about public art.
    b. Advance the City of Asheville as an "arts destination" and engage public art as a major attraction for artists, cultural tourism, and economic development.
    c. Advise staff and Council on the site and content of public art.
    d. Be responsible for developing a procedure for the selection of art and/or artists, which will include public input as well as appropriate staff review. The Board shall follow its Public Art Policy and Implementation Guidelines as modified and/or amended every five years.
    e. Recommend to staff and City Council the acceptance of works of art.
2. Engage the creative sector as a major attraction for artists, cultural tourism, and economic development.
3. Encourage public confidence for and appreciation of the arts in Asheville.
4. Work to build partnerships and collaborations throughout Asheville's creative community.
    a. Support relationships and shared resources and make use of existing strengths in public and cultural arts organizations
5. Aid in strengthening the organizational structure of public and cultural arts delivery.

(b) To carry out the purposes state in subsection (a) of this section, the Board shall have the powers as follows:

1. Appoint task forces to make recommendations to the entire Board relative to specialized studies or projects that further the implementation of the purposes of this division.
2. Perform those tasks necessary to implement agreed upon decisions of the Board.
3. Members appointed to task forces and ad hoc committees shall perform their duties in a manner that satisfies all conduct required of an appointed member of the Board including restrictions on conflicts of interest.

The Public Art Board had two public forums during their monthly board meetings to discuss the policy changes and the Public Art Board Chair and some Board members had one on one meetings with key community stakeholders. The expanded roles and responsibilities were approved by the Public Art Board at their monthly meeting in June, 2011. In addition, the Boards & Commissions Committee recommended approval at their August 9, 2011, meeting.

Name Change

To better reflect their expanded roles and responsibilities, the Public Art Board has made the recommendation that the name of the Board be changed.

The recommended name is: The Public Art and Cultural Commission

The Public Art Board had two public forums during their monthly board meetings to discuss the policy changes and the Public Art Board Chair and some Board members had one on one meetings with key community stakeholders. The name change was approved by the Public Art Board at their monthly meeting in June, 2011. In addition, the Boards & Commissions Committee recommended approval at their August 9, 2011, meeting.

Policy

At the suggestion of City Council, the Public Art Board and staff updated the Public Art Policy to ensure special consideration for regional artists when commissioning and selecting works of art for the City of Asheville.

Section 2.7 (Artist Selection) of the Public Art Policy will be amended to add the following language:

> Specific artist eligibility will be developed for each project and special consideration will be given for regional artists. All projects will use regional artists and fabricators wherever practicable. Determining factors for geographic eligibility may include project budget, project location, context, and project prominence.
>
> For the acquisition of new public art, the public art board and staff will work with arts councils and other public art groups to ensure that regional artists are encouraged to participate in public art projects with the City of Asheville.
>
> The public art program will consider regional artists to be artists who live or work in the 15 counties of Western North Carolina which includes Buncombe, Yancey, McDowell, Rutherford, Polk, Henderson, Madison, Haywood, Transylvania, Jackson, Swain, Macon, Graham, Clay, and Cherokee.

The Public Art Board had two public forums during their monthly board meetings to discuss the policy changes and the Public Art Board Chair and some Board members had one on one meetings with key community stakeholders. The amendment to the policy was approved by the Public Art Board at their monthly meeting in June, 2011. In addition, the Boards & Commissions Committee recommended approval at their August 9, 2011, meeting.

The updated public art ordinance and policy complies with the Parks, Recreation, Cultural Arts, and Greenways Master Plan Goal #12 % (Enhance public confidence for, and appreciation of, the arts), (Enable sustainable funding for permanent and temporary public art), Goal #14 (Enhance facilitation and resources among art interests), Goal #15 (Build public and organizational capacity for the arts), and Goal #16 (Strengthen the organizational structure of public and cultural arts delivery).

Pros:

- Supports the City of Asheville and the community in matters related to both cultural and public art;
- Achieves Parks, Recreation, Cultural Arts, and Greenways Master Plan Goals.

Con:

- None.

Approval of the updated ordinance and policy has no direct fiscal impact to the City.

City staff recommends City Council adopt (1) an ordinance expanding the Public Art Board's role and responsibilities and changing its name to the Public Art and Cultural Commission; and (2) a resolution supporting the Public Art Policy and Implementation Guidelines.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and ordinance and they would not be read.

Councilman Smith moved for the adoption of Ordinance No. 4023. This motion was seconded by Councilman Davis and carried unanimously.

Councilman Smith moved for the adoption of Resolution No. 11-206. This motion was seconded by Councilman Davis and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 178**

**B. PROCESS RECOMMENDATIONS TO POSSIBLE AMENDMENTS TO THE NOISE ORDINANCE**

City Manager Jackson said that this is the consideration of a citizen request for City Council to amend the noise ordinance.

During the town hall meeting held at UNC Asheville on August 30, 2011, Dan Marsh proposed revisions to the City noise ordinance. Mr. Marsh suggested modifying the ordinance to strengthen the ability to measure volume of sound generated in residential neighborhoods. Additionally, he suggested consideration of the City of Chapel Hill's ordinance as a model ordinance.

In response to the citizen concerns, City Council expressed a willingness to review existing noise regulation and to possibly consider ordinance modifications. The existing noise ordinance was adopted in 2000, after several months of practical and legal analysis, public input and Council deliberation. A policy review of noise issues occurred in the spring of 2009, but was limited in scope to consideration of motorcycle noise. The motorcycle noise issue involved preparation of a staff report, and then Public Safety Committee consideration on September 15, 2009.

Before initiating a noise ordinance review, it would be helpful to receive affirmation from City Council on the goals. The following questions may guide City Council consideration:

1. *Scope:* Is the goal to specifically examine the application of the noise ordinance in residential neighborhoods or conduct a comprehensive policy review of the full application of the noise ordinance? The review limited to residential noise issues would involve data collection to determine the extent and nature of the specific problems, followed by staff analysis of alternative actions. A comprehensive review would be far more competitive, involving a best practice study of municipal ordinances, comparing ways and means of dealing with the wide variety of potential noise issues that arise and drafting of a revised ordinance.
2. *Process:* Should the process be limited to internal policy review by staff and report at the Council committee level, or should it be expanded to provide for stakeholder and community input? If the scope is limited to research of the residential noise issue alone, the process could simply provide for a staff report to be developed and presented to the Public Safety Committee. Alternatively, a comprehensive review would begin with a staff report to the Public Safety Committee on major trends emerging from location application of the noise ordinance and trends evident when benchmarking with ordinances of other cities. In this case, staff might also schedule public input sessions and obtain input from the Noise Ordinance Appeals Board. Finally, another option is to have the City's Neighborhood Coordinator and the APD Community Policing Officer to work with the neighborhood association and Mr. Marsh on a localized solution.

Comprehensive review process may require several months, and depending on the scope of the process, significant work plan adjustments may be necessary.

Provide direction for next steps and process of noise ordinance review.

Mayor Bellamy felt it would be helpful to have more information on the dollar costs associated with each of the options and the staff's availability for a comprehensive overview.

After Vice-Mayor Newman received responses from City Manager Jackson regarding the current process for noise complaints and the use of the Noise Ordinance Appeals Board, he was open to more options; however, was not aware of any better solution than what we currently have in place. He did support staff following up with Mr. Marsh to see how we can mitigate his concern.

Councilman Davis also felt that as imperfect as the noise ordinance may be, it is working pretty well. He was not certain it would be worth the time and expense to add a decibel level in the ordinance.

Councilwoman Manheimer was interested in at least reviewing ordinances from other cities as they do have restricted noise periods. She also thought it would be worthwhile to hear about any police concerns, along with their suggestions to give them better tools in dealing with the situations as they arise. She also noted it may be a bigger problem in some neighborhoods than others.

Councilman Smith agreed with Vice-Mayor Newman. He felt it's important that neighbors talk to neighbors first to resolve any conflicts and to get to know each other.

Vice-Mayor Newman concurred with Councilwoman Manheimer in that we keep a degree of subjectivity in the ordinance, but give more definition to what is the reasonableness standard in residential neighborhoods.

City Manager Jackson said that he would provide Council with more information, including a matrix of the calls received, how many go to the Noise Ordinance Appeals Board, observations from the Police Department to improve the ordinance, etc. At Mayor Bellamy's suggestion, City Manager Jackson said that he would take that information to the November Public Safety Committee for review prior to coming back to the full Council.

At Mayor Bellamy's request and Council concurrence, City Manager Jackson said that he would have the City's Neighborhood Coordinator and the APD Community Policing Officer work with the neighborhood association and Mr. Marsh on a localized solution.

**C. RESOLUTION NO. 11-207 - RESOLUTION AUTHORIZING THE APPROVAL OF THE 2011-12 OUTSIDE AGENCY AGREEMENT WITH THE ASHEVILLE-BUNCOMBE COMMUNITY RELATIONS COUNCIL FOR OUTSIDE FUNDING**

Community Development Director Jeff Staudinger said that the Housing and Community Development Committee has completed its Outside Agency review of the request by the Asheville Buncombe Community Relations Council (ABCRC).

ABCRC has requested Outside Agency funding from the City of Asheville. ABCRC representatives have met several times with the Housing and Community Development Committee this summer to discuss the proposed scope of work and organizational structure. ABCRC will not perform federal fair housing investigations this year. It has been working to structure its scope of work in light of this change. The organization has sought and received technical assistance from fair housing and community relations commissions across the state that also do not perform federal fair housing investigations.

ABCRC is proposing a scope of work that focuses on the following areas:

- Serving as a local fair housing service and referral agency. It would refer fair housing cases to the State for investigation, and help resolve complaints that were not related to fair housing discrimination.
- Serving as an information sharing and education resource for fair housing;

- Receiving and resolving complaints relate to other alleged discrimination, including those involving employment discrimination;
- Serving as a resource for persons and groups who experience discrimination in other matters;
- Serving as a resource to the general community in matters of community relations, especially regarding the promotion of diversity in Asheville;
- Exploring how its internal structure, including the Board of Directors and staff, can support its mission.

The organization has a commitment of support of $25,000 from the Asheville Housing Authority. Support has also sought from Buncombe County, and ABCRC is in discussion with the County to confirm funding. ABCRC has also indicated it will expand its fundraising.

The status of ABCRC's tax liability is unchanged. The organization is still awaiting disposition of its case by the IRS; has no current unpaid liabilities; and has reserved funds to pay a portion of prior liabilities.

Pros:

- ABCRC is the only local organization dedicated to addressing discrimination and assisting persons who feel they have been discriminated against;
- The majority of fair housing complaints in the community are not directly related to discrimination, and ABCRC can continue to play an important role in helping resolve those complaints;
- The Asheville Housing Authority has committed to providing financial support;
- The organization is currently not staffed and cannot address these issues without staff.

Cons:

- The organization has not yet put forward a plan for Board reorganization;
- Support from Buncombe County has not been received;
- The tax liability has not yet been resolved;

Outside Agency funding sufficient to meet this request is available in the City's 2011-12 budget.

Staff recommends approval of the resolution authorizing the approval of $45,000 in Outside Agency funding for the Asheville Buncombe Community Relations Council. Staff further recommends that $5,000 of this funding be conditional on ABCRC raising $5,000 in private funds through its fundraising efforts.

After Mr. Alan Ditmore noted that outside agency funding is very competitive, Mr. Staudinger explained the process and criteria used for funding requests.

In response to Rev. Lisa Landis confusion regarding the purpose of the ABCRC, Mr. Staudinger explained that they have been open to working on a wide variety of community relations and will decide during their strategic planning process where they can be useful.

In response to Councilwoman Manheimer, Mr. Staudinger said that federal fair housing investigations can only be conducted by an organization certified as a fair housing assistance program by the U.S. Dept. of Housing & Urban Development. This organization was, but is no longer, certified. Fair housing investigations regarding discrimination are now investigated by the N.C. Human Relations Commission in Asheville and Buncombe County.

In response to Councilwoman Manheimer, Mr. Staudinger said that in the past few years, the ABCRC has handled approximately 200 complaints, of which 40 were discrimination. He said

that they cover all residential rental housing in Buncombe County, noting federal funds do not have to be involved.

Councilwoman Manheimer expressed concern about funding an agency that has major outstanding issues, noting their tax liability status and they lack of board reorganization.

Vice-Mayor Newman said that the Housing & Community Development Committee spent a lot of time on a variety of questions. They talked about the value of the ABCRC and whether they could overcome those concerns. After looking at what has worked well around the state, they feel that the organization has played a positive role in advancing the mission of preventing housing and job discrimination in the community, as well as doing positive work in community relations, e.g., mediating disputes, etc. They feel there is a lot of benefit with a local community organization. Regarding the tax liability issue, the organization has gone a long way in addressing the issue. They are also still waiting on some information from the state about the final numbers on that. In terms of the board reorganization, they are eager to begin their planning process after a new director is hired.

When Councilwoman Manheimer asked if there was any remote possibility that our funding could be used to pay off the tax liability, Councilman Smith replied that our funding will be for the operations of the ABCRC and not towards the tax liability. Mr. Staudinger explained that our funding will be provided on a reimbursable basis on the current operations. They have to incur the expenses and then ask for reimbursement. We will require documentation of all those expenses.

Councilman Davis said that people will be reluctant to call the state agency when they have comfort with a local group to talk about their concerns. The local group has become an agency that the state has relied on in other cities.

Dr. Larry McCallum, ABCRC Board Chairman, said that the Board has been working on these issues since October of 2010. We will look at securing a grant where we can have a consultant look at our organization to see how the restructured organization can be the best asset to the community. The ABCRC has been a local entity to address discrimination and other community-related issues that may or may not be discrimination issues.

Vice-Mayor Newman said that in the long run, the ABCRC needs the funding from the three traditional partners (City, County & Housing Authority) to be successful. We are optimist that all three partners will remain supportive. He would be happy to make the approval conditioned upon Buncombe County's participation, which he thinks they are close to deciding their role.

Mayor Bellamy was opposed to the condition in that this is a relationship between the City and the ABCRC, based upon reimbursable expenses. She felt we shouldn't make our decision based upon the Buncombe County Commissioners funding.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 11-207. This motion was seconded by Councilman Davis and carried on a 5-2 vote, with Councilwoman Manheimer and Councilman Russell voting "no".

**RESOLUTION BOOK NO. 34 – PAGE 179**

**D. MOTION APPROVING AN UPDATE TO THE CITY OF ASHEVILLE'S FINANCIAL POLICY**

Director of Finance & Management Services Lauren Bradley said that this is consideration of a motion to approve an update to the City of Asheville's Financial Policy.

The National Advisory Council on State and Local Budgeting (NACSLB) and the Government Finance Officers Association (GFOA) recommend that local governments adopt and annually review a financial policy to help frame resource allocation decisions as a part of a comprehensive set of recommended budget practices. Staff should annually review the policy to ensure its continued relevance and to identify any gaps that need to be addressed.

As part of this annual review process, staff is recommending that City Council consider approving an updated policy. The two most significant updates to the policy include an expansion of the section on "Reserves" and the addition of a section on "Interfund Transfers." Each of these areas is described further below.

**(1) Reserves**

Reserves, or fund balances, provide working capital to ensure adequate cash flow to pay vendors and others in a timely manner, to meet emergency or unforeseen needs, and to be able to take advantage of unexpected opportunities that require the expenditure of money. In the proposed Financial Policy, the section on Reserves (Paragraph B, Section 2) has been expanded to include fund balance targets for all operating funds. Previously, the policy on reserves only referenced the General Fund.

The proposed targets for reserves in most funds are based on the Local Government Commission's recommendation that cities and counties maintain a general fund balance of at least 8 percent of expenditures for the year. Staff is recommending that the City seek to maintain this standard in the Golf Fund, Parking Fund, and Stormwater Fund. In addition, staff is recommending this standard for the Transit Fund, although a portion of those reserves may be reflected in the General Fund's existing reserve target since transit operations rely heavily on financial support from General Fund. At the end of FY 2011, it is anticipated that the Parking Fund and the Stomrwater Fund will meet or exceed the proposed fund balance standard. The City is pursuing alternatives that will assist the Golf Fund in meeting the standard in future years.

The proposed target for Civic Center reserves is recommended at a higher rate, 16%, due to greater fluctuations in cash flow requirements as a result of events – settlements often occur on the day of the event with final ticket sale receipts credited after the event. At the end of FY 2011, it is anticipated that the Civic Center Fund will exceed this target.

By the nature of water operations, water utilities are highly capital intensive, meaning they require large expenditures of capital in order to provide the service. In addition, credit rating standards regarding the maintenance of working capital are extremely high for water utilities with superior credit such as the City's water utility. As a result, staff recommends that the Water Fund maintain a minimum of 365 days of working capital, which is a comparable standard for utilities in cities with populations of 50,000 or more. At the end of FY 2011, it is anticipated that the Water Fund will exceed this target.

**(2) Interfund Transfers**

A section on interfund transfers has been added to the policy to clarify how those transfers will be handled during the annual audit process. The section states that if financial performance in an enterprise operating fund that receives a General Fund transfer is better than budgeted, and the enterprise fund meets the reserve standards set in the policy, then any remaining portion of the interfund transfer shall be returned to the General Fund as part of the audit. Staff will provide City Council with a status report on interfund transfers during the audit process.

The City Council Finance Committee reviewed this item at its meeting on September 13, 2011, and recommended that it move forward for consideration by the full Council.

This action supports the City of Asheville's strategic goal to operate the City to the highest levels of fiscal responsibility.

Pros:

- Updates the City's financial policy to ensure it is accurate and current.
- Provides greater guidance on targets for reserves and interfund transfers.

Con:

- None noted.

Staff recommends that City Council approve the proposed changes to the City of Asheville's Financial Policy.

Mayor Bellamy did not support the portion in the Reserves section that reads "the City will maintain an undesignated fund balance equal to 15% of the General Fund operating budget, with any amount in excess of 15% being credited to a capital reserve account." She gave examples of why she would not want to automatically designate any excess into the capital reserve account. If it the money stays in Fund Balance we can do operations or capital without any problems. Ms. Bradley said the purpose of that statement is that for any amount that the general fund would have over 15%, the overage would automatically go into the capital reserve account and then in the budget process Council would make the allocation decision for that money. The justification being the capital expenses are one-time expenses that Council would generally use excess Fund Balance for.

Councilman Russell agreed with Ms. Bradley in that any amount over 15% should credited to a capital reserve account. It doesn't mean that the overage has to be spent on bricks and mortar – it can be used for other non-recurring expenses.

Mayor Bellamy asked that consideration be given to lower stormwater rates when we have exceeded the target Fund Balance and are meeting the capital needs.

At the suggestion of Mayor Bellamy, Ms. Bradley said that we can add a standard in for our water utility bond rating of AA+.

At the suggestion of Mayor Bellamy, Ms. Bradley said that we can find a section in our policy that the City will meet the Local Government Commission's published deadlines for the CAFR and the annual audits.

When Mayor Bellamy asked if we can include in the policy that we will automatically ask for reimbursement of expenses as it relates to bond packages, Ms. Bradley said that we cannot in that state law requires the City to pass a reimbursement resolution for specific issuances, which are project specific and time limited.

When Mayor Bellamy asked what the determination was for the general obligation debt of the City not exceeding 8% of the assessed valuation of the taxable property of the City, Ms. Bradley said that is published by the Local Government Commission and is a widely accepted standard.

In response to Mayor Bellamy, Ms. Bradley said that we are changing the way the water fund liability is reflected on our statements – it will become a balance sheet issue.

Mayor Bellamy could not support the portion in the Reserves section that reads "the City will maintain an undesignated fund balance equal to 15% of the General Fund operating budget, with any amount in excess of 15% being credited to a capital reserve account."

Councilman Russell moved to adopt the update to the City of Asheville's Financial Policy with two amendments regarding (1) a standard in for our water utility bond rating of AA+; and (2) a section in our policy that the City will meet the Local Government Commission's published deadlines for the CAFR and the annual audits. This motion was seconded by Councilman Bothwell.

Mr. Alan Ditmore commented on interfund transfers.

Mayor Bellamy felt the overall policy was great; however, could not support the excess of 15% being credited to a capital reserve account. She asked Council if they would be willing to divide the motion so she can support the entire financial policy (except for B (1)) and then vote separately on B (1).

In response to Councilman Russell, Ms. Bradley said that by putting the excess into a capital reserve account, the intent is to use the one-time money toward one-time expenses, which tends to be capital expenses. Having said that, through the budget process, when Council allocates that money, they can choose to do something different with it. The philosophy of taking it out of operating and putting it in capital is to reinforce Council's goal not to use it for non-recurring expenses.

When Mayor Bellamy asked for a motion to divide the motion, one was not made.

The motion made by Councilman Russell and seconded by Councilman Bothwell carried on a 6-1 vote, with Mayor Bellamy voting "no".

**E. CONSIDERATION OF "BLUE RIDGE PRIDE DAY" PROCLAMATION**

This item has been removed from the agenda.

**VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:**

Ms. Ashley Arrington, representing Blue Ridge Pride, thanked Mayor Bellamy for signing their proclamation designating October 1, 2011, as "Blue Ridge Pride Day."

Rev. Lisa Landis commented on the forced closure of URTV by the corruption in local government. Mayor Bellamy provided Rev. Landis with a copy of the information that URTV provided the City, noting that the City did not walk away from their obligations.

Rev. Christopher Chiaronmonte spoke about the homeless issues in Asheville.

Mr. Alan Ditmore spoke about the need for family tourism dollars.

Ms. Charlotte Anderson was pleased to see the Blue Ridge Pride proclamation was signed by the Mayor.

Mr. Robert Todd, Chair of the Public Art & Cultural Commission, thanked the Council for their support on their expanded roles.

Councilman Bothwell regretted that Councilman Davis interpreted what was said about the ABC Board as being a suggestion of corruption on his part. He did not mean to imply or say that. He regretted the appearance that was conveyed to some people. He did not accuse him and did not think he is corrupt. Councilman Davis said that regrettably when one casts

dispersions on his livelihood, he has no choice to respond to it. He didn't think Councilman Bothwell provided him with an apology, but if that is what it was, he will accept it and they will continue to work together.

Councilman Smith appreciated how the Blue Ridge Pride proclamation came through and how everyone worked to overcome any misunderstandings.

**Closed Session**

At 7:08 p.m., Councilman Smith moved that the Asheville City Council go into closed session for the following reasons (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including potential litigation. The statutory authorization is contained in G.S. 143-318.11(a)(3); (2) To discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session. The statutory authority is contained in G.S. 143-318.11(a)(4); (3) To consider the qualifications, competence, performance, character, fitness, conditions of appointment of an individual public officer or employee. The statutory authorization is contained in G.S. 143-318.11(a)(3); and to prevent the disclosure of information that is confidential pursuant to G.S. 160A-168, the Personnel Privacy Act. The statutory authorization is contained in G.S. 143-318.11(a)(2); and (4)To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Davis and carried unanimously.

At 7:45 p.m. Councilman Russell moved to come out of closed session. This motion was seconded by Councilman Smith and carried unanimously.

**VIII. ADJOURNMENT:**

Mayor Bellamy adjourned the meeting at 7:45 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – October 11, 2011 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer (arrived in meeting at 5:14 p.m.); Councilman William A. Russell Jr.; Councilman Gordon D. Smith (arrived in meeting at 5:06 p.m.); City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

**PLEDGE OF ALLEGIANCE**

Mayor Bellamy led City Council in the Pledge of Allegiance.

**INVOCATION**

Mayor Bellamy gave the invocation.

**I. PROCLAMATIONS:**

**II. CONSENT AGENDA:**

**A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON SEPTEMBER 27, 2011**

**B. ORDINANCE NO. 4024 - BUDGET AMENDMENT FROM THE FRIENDS OF THE NATURE CENTER FOR CAPITAL PROJECTS AND EDUCATION PROGRAMS AT THE WNC NATURE CENTER AND FROM THE N.C. DEPT. OF COMMERCE TO SUPPORT CAPITAL PROJECTS AT THE WNC NATURE CENTER**

Summary: The consideration of budget amendment. in the amount of $75,000, from the Friends of the WNC Nature Center for capital improvements and educational programs at the WNC Nature Center and a budget amendment, in the amount of $92,630, for an allocation from the North Carolina Department of Commerce to support capital projects at the WNC Nature Center.

Friends Donation: The City of Asheville in the Parks, Recreation & Cultural Arts Department has received a contribution from the Friends of the WNC Nature Center, Inc. to support capital improvements and educational programs at the WNC Nature Center.

NC Department of Commerce: Each year the State of North Carolina allocates and distributes funds to 25 to 30 member museums, science centers and nature centers in North Carolina. The WNC Nature Center is a member of the collaborative. These funds will be used to make improvements to the facility and animal exhibits at the WNC Nature Center.

These actions comply with the City Council 2011-2012 Strategic Plan Goal of fiscal responsibility of exploring alternatives for enhancing the city's long-term financial commitment to master plan implementation, infrastructure maintenance, capital improvements, and public facilities. These actions also comply with the Parks, Recreation, Cultural Arts & Greenways Master Plan in that it increases department funding with alternative funding via grants and ensuring a high level of service in parks and facilities by addressing capital maintenance of existing parks and facilities to meet community standards.

Pros:

- Provides additional funds to support capital improvements at the Nature Center without impacting the City's General Fund budget
- Provides funds to enhance special projects and services to Nature Center visitors
- Provides funds to assist in fulfilling standards and maintaining Nature Center accreditation with the Association of Zoos and Aquariums

Cons:

- None

This amendment will increase the City's total budget by $167,630 in the special revenue and general capital projects funds. There is no impact on the City's General Fund budget.

Staff recommends City Council approve the budget amendment in the amount of $75,000 from the Friends of the WNC Nature Center for capital improvements and educational programs at the WNC Nature Center and the budget amendment in the amount of $92,630 for an allocation from the North Carolina Department of Commerce to support capital projects at the WNC Nature Center.

**ORDINANCE BOOK NO. 27 – PAGE 190**

**C. RESOLUTION NO. 11-209 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXTEND THE EXISTING AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE CONSTRUCTION OF REED CREEK GREENWAY, PHASE II BY FIVE MONTHS**

Summary: The consideration of a resolution authorizing the City Manager to extend the existing agreement between the City of Asheville and the N.C. Dept. of Transportation for the construction of Reed Creek Greenway, Phase II by five months.

On February 12, 2008, City Council approved a resolution authorizing the City Manager to enter into an agreement with the North Carolina Department of Transportation (NCDOT) for up to $400,000 to construct Reed Creek Greenway, Phase II. The three year agreement was initially executed on April 4, 2008, and extended by six months on February 22, 2011. Due to construction delays the project will not be complete by October 31, 2011. The NCDOT has agreed to a five month extension until March 31, 2012, to the existing agreement contingent upon City Council approval.

This action complies with the FY 11-12 City Council Strategic Plan in that it supports seeking partnerships for investments in greenway infrastructure, including cost sharing options. In addition, this action complies with the Parks, Recreation, Cultural Arts, and Greenway Master Plan in that it allows for the implementation of the Reed Creek Greenway, a high priority greenway corridor within the master plan.

Pro:

- Extends the NCDOT agreement to allow the City an additional five months to complete Reed Creek Greenway, Phase II

Con:

- It is taking more time to complete the greenway construction than originally planned.

There is no fiscal impact to this action. The total budget for this project, which includes $383,000 in City funding, is $783,000. Staff will report on the progress of this capital project as part of the Quarterly Financial Update.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into an agreement with NCDOT to extend the current agreement between the City and the NCDOT for construction of the Reed Creek Greenway, Phase II by five months.

**RESOLUTION BOOK NO. 34 – PAGE 181**

**D. RESOLUTION NO. 11-201 - RESOLUTION AMENDING THE 2011 CITY COUNCIL MEETING SCHEDULE TO (1) CANCEL THE REGULAR MEETING ON TUESDAY, NOVEMBER 8, 2011; AND (2) ADD THE CITY COUNCIL ORGANIZATIONAL MEETING ON TUESDAY, DECEMBER 6, 2011, BEGINNING AT 5:00 P.M. IN THE COUNCIL CHAMBER OF CITY HALL**

**RESOLUTION BOOK NO. 24 – PAGE 182**

**E. RESOLUTION NO. 11-211 - RESOLUTION DESIGNATING THE MAYOR AS THE AUTHORIZED SIGNATORY OF THE 2011-12 OUTSIDE AGENCY CONTRACTS**

Summary: The consideration of a resolution to change the approved signatory on Outside Agency program contracts.

When Outside Agency program funding was approved (June 14 and September 27, 2011) the City Community Development Director was designated as signatory for the contracts. Typically, this position does not receive authority to sign contracts for this program. The purpose of the resolution is to designate the Mayor as the authorized signatory for the City on these contracts.

Staff recommends approval of the resolution to designate the Mayor as signatory of 2011-2012 Outside Agency contracts.

**RESOLUTION BOOK NO. 34 – PAGE 183**

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Davis moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Russell and carried unanimously (with Councilwoman Manheimer absent).

**III. PRESENTATIONS & REPORTS: None.**

**IV. PUBLIC HEARINGS:**

**A. CONTINUATION OF PUBLIC HEARING TO CONSIDER CLOSING SEVERAL PORTIONS OF UNOPENED RIGHTS-OF-WAY AND CITY STREETS WITHIN THE MONTFORD COMMONS DEVELOPMENT AREA**

Mayor Bellamy said that she has received a request from Mr. Kyle Evans, representing Montford Commons, LLC, requesting a continuance until November 22, 2011, as they are still waiting to receive the final funding commitment from HUD required to move the project forward. He spoke with a HUD liaison on October 4 that they have been working closely with and they will do everything they can to bring this to a close before the November 22 date. Therefore,

Councilman Russell moved to continue this public hearing until November 22, 2011. This motion was seconded by Councilman Bothwell and carried unanimously (with Councilwoman Manheimer and Councilman Smith absent).

**B. PUBLIC HEARING TO CONSIDER THE CONDITIONAL ZONING OF PROPERTY LOCATED AT 3 EAST WANETA STREET FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/ CONDITIONAL ZONING TO ALLOW FOR CONVERSION OF THE DUPLEX TO A SINGLE FAMILY HOME; THE CREATION OF A SECOND PARCEL FOR FUTURE DEVELOPMENT OF A SINGLE-FAMILY DWELLING; AND A REQUEST FOR MODIFICATIONS TO STANDARDS FOR SETBACKS AND LOT SIZE**

**ORDINANCE NO. 4025 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED AT 3 EAST WANETA STREET FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/ CONDITIONAL ZONING TO ALLOW FOR CONVERSION OF THE DUPLEX TO A SINGLE FAMILY HOME; THE CREATION OF A SECOND PARCEL FOR FUTURE DEVELOPMENT OF A SINGLE-FAMILY DWELLING; AND A REQUEST FOR MODIFICATIONS TO STANDARDS FOR SETBACKS AND LOT SIZE**

Urban Planner Julia Fields said that this is the consideration of an ordinance to conditionally zone 3 East Waneta Street from RM-8 Residential Multi-Family Medium Density District to RM-16 Residential Multi-Family High Density District/Conditional Zoning for the conversion of the duplex to a single family home; the creation of a second parcel for future development of a single-family dwelling, and approval of modifications to the standards for setbacks and lot size. This public hearing was advertised on September 29 and October 7, 2011.

Ms. Fields said that the property that is the subject of this conditional zoning application is currently part of a 7,353 square foot (.18 acre) parcel located at 3 E. Waneta Street in the Montford Historic District containing one structure with two dwelling units (a former garage with upstairs apartment modified to create a dwelling unit in the former garage area). The lower level dwelling unit was, according to research by city staff, created without a permit at some time in the past. The owners, Alexis and Jenny Giese, initially filed an application for the conditional rezoning of a portion (2,353 square feet or 0.054 acre) of the parcel identified as PIN 9649.03-6746 from RM-8 (Residential Multi-Family Medium Density District) to URD-CZ (Urban Residential Conditional Zoning) to allow that structure to remain as a duplex on the property. They plan to divide off the rest of the property creating a lot for a single family dwelling.

The 1976 inventory of properties in the Montford Historic District indicates that at that time 3 E. Waneta contained a building with an apartment above and a garage below. Although the addresses were different, this building was located on the same parcel as a single-family home with the address of 38 Soco Street. Despite the different addresses the building appears to have been an accessory structure to the primary residence with the Soco Street address. The home at 38 Soco was demolished sometime after 1976. The zoning of the property from 1976 until 1997 was R-3 Medium Density Residential. While this district allowed multi-family dwellings on a property, the required minimum lot area was 8,000 square feet for the first unit and 2,500 square feet for any additional unit. That zoning would not have allowed the creation of additional units on the property. In fact, two units (the single family home and accessory apartment) created a nonconforming situation. Additionally, staff can find no record of any permits being issued to allow for the garage portion of the building to be converted to a residence from 1976 forward.

With the adoption of the Unified Development Ordinance (UDO) in 1997, this property became zoned RM-8. Again, this district allows for multiple dwelling units on a property but would require 10,000 square feet for two units (5,000 per unit) unless the additional dwelling was

considered an accessory apartment. There can only be one accessory apartment on a parcel with a single-family home and the accessory apartment is limited in size. This information from our research has led staff to the conclusion that the additional apartment in the former garage was created in violation of City ordinances.

When the Gieses bought the property at 3 E. Waneta, at the corner of Waneta and Soco Street, the property only contained the former accessory structure (the single-family home having been destroyed). Mr. Giese indicates that the two units were in existence at that time. In 2006, the Gieses received permits to renovate the accessory structure to replace the garage door openings with period appropriate carriage house doors and replace the covered porch with a screened in porch in addition to a number of exterior materials enhancements. At the time of this permitting the accessory apartment (only one) would continue to meet the accessory apartment standards in the UDO should a primary residence be constructed on the property at a later date.

In 2007, the Gieses received a notice of violation from the City when it was learned that the screened in porch had been fully enclosed. Mr. Giese subsequently received zoning and building permits to allow for this work – but the approvals were granted with the understanding that the accessory apartment was now too large (approximately 800 square feet) to qualify as an "accessory apartment" unless any new single-family home built on the parcel was at least 3200 square feet in size (accessory apartments are limited to 500 square feet or 25% of the principal residence). At about the same time, the Gieses received a notice of violation (NOV) for violating the minimum housing code for the second (downstairs) garage unit (no housing certificate obtained) and for an expired certificate for the upstairs unit. The NOV required that the downstairs dwelling unit be returned to unoccupied space per zoning code and building safety standards.

Mr. Giese met with members of City staff (Historic Resources, Planning and Zoning, Building Safety) on many occasions. The staff's position at those meetings was that:

- The Gieses may keep the upper apartment but the second unit must be returned to the previous use as a garage or comparable unoccupied space.
- Because of the size of the unit, for the upstairs unit to be considered an accessory apartment, should a new single-family home be built on the property, the single family home would have to be at least 3200 square feet in size.
- If no primary residence is built, the apartment can become the primary residence and the rest of the property (with the Soco Street address) will have to remain vacant.
- Under current zoning, the property is too small to support a duplex (10,000 square feet required).
- Under current zoning, the property is too small to subdivide legally (RM-8 requires 5,000 square foot minimum lot size).
- Staff indicated to the Gieses that we could support a subdivision of the property creating a separate 5,000 square foot lot; if they agreed to leave one dwelling unit with garage on the remaining portion (2,353 sf). This would require a conditional zoning to RM-16 for only one unit on that portion.

Instead the Gieses initially sought conditional zoning to URD-CZ (Urban Residential Conditional Zoning) for the portion (2,353 square feet) of the property containing the former accessory structure. They had hoped to keep and "legalize" the two units in this structure and leave the remaining portion (5,000 square feet) of the parcel for future single-family development. Urban Residential zoning is the only residential zoning that would allow the two units to remain in the current accessory structure on that sized (2,353 square feet) lot.

The staff expressed significant concerns with this proposal as the Urban Residential District was established to provide for urban scaled residential structures that relate to the street and are located on significant transit corridors and/or in high growth areas. The district standards require orientation to the street and establish design criteria for entrances and openings on the

facades. While the URD would allow for a density of two units on the parcel for which this conditional zoning is applied, staff expressed our belief that this district was not created for situations like the one on E. Waneta and using this zoning in this manner would establish an inappropriate precedent.

The Technical Review Committee reviewed this proposal on July 18, 2011, and made the technical comments.

The Asheville Planning and Zoning Commission first considered this matter on August 3, 2011. The commission members expressed concern that if this conditional zoning was approved, that ultimately there could be four units total on the site (the two existing units plus a single family home and accessory apartment on the 5,000 square foot portion). It was suggested that the applicant meet with staff to try to come up with a solution that would limit the property to no more than three units. The matter was continued until September 7th.

Prior to the meeting on the 7th of September, the applicant met with staff and amended the application to request that the subdivision still take place. However the current duplex portion (2,353 square feet) of the property would be conditionally zoned RM-16 only allowing one unit. The 5,000 square foot portion would remain RM-8 unconditioned. The applicant is willing to convert the duplex back to a single unit.

To rezone the smaller portion to RM16 conditionally allowing only one unit in the existing structure, will require modifications to be granted. These are as follows:

1. That the lot size be modified from the required 3,500 square feet by 1,147 square feet.
2. That the front setback be modified by 5 feet. (15 feet required; the existing structure is only 10 feet back).
3. That the side setback to the west be modified 3.6 feet (6 feet required and only 2.4 feet from property).
4. That the rear setback be modified by 10.8 feet (15 feet required and only 4.2 feet from property line).

Staff feels this is an acceptable solution to the situation presented. At its meeting on September 7, 2011, the Asheville Planning and Zoning Commission unanimously (4-0) voted to recommend this conditional zoning to you. Three people spoke at this meeting commenting that they felt the density to be too great for the area.

Section 7-7-8(d)(2) of the UDO states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The applicant is proposing to subdivide the property and use the rezoned portion for a single dwelling unit in a residential neighborhood. The proposal, if approved, must meet the technical standards set forth in the City's Unified Development Ordinance and other applicable standards except for those modifications proposed.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The applicant proposes to retain all existing vegetation on the site.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   It is the opinion of Planning Department Staff that the density that is proposed with the amended request is in keeping with the surrounding area which is comprised of single-family homes on small lots.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   It is the opinion of the staff that the density is in keeping with that found in the area surrounding this property.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
   This application supports goals related to the provision of affordable housing.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   The proposed use is located one block from Montford Avenue which is serviced by Transit Route 11 of the City's Transit System. The project has been reviewed by the Technical Review Committee and noted the technical comments are found in their report.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
   The City's Transportation Department has reviewed the plans and feels that no undue traffic congestion or traffic hazards will be created.

Pros:

- Provides additional affordable housing in an area with transportation facilities and infrastructure to support it.
- Applicant has worked with staff and the Asheville Planning and Zoning Commission to come up with a solution to remedy an existing situation.

Con:

- Creates a lot that is smaller than is allowed in the RM-16 district for a single-family structure.

Based on the above findings and the analysis provided in the report; staff finds this request to be reasonable and recommends approval for the conditional zoning request and modifications.

At its meeting on September 7, 2011, the Asheville Planning and Zoning Commission unanimously (4-0) voted to recommend this conditional zoning to you. Three people spoke at this meeting commenting that they felt the density to be too great for the area.

Mayor Bellamy opened the public hearing at 5:11 p.m.

Ms. Patsy Brison, attorney representing the applicants, said that they tried to take into all concerns expressed by the Planning & Zoning Commission and staff and modified their application for three units for the entire track of land. They are trying to encourage affordable housing and infill development. She noted that the lot fronting on Soco Street is within the Montford Historic District and will require a lot of review which will hopefully address the

neighborhoods concerns regarding density and parking. She urged Council to support the conditional zoning request.

Mr. David Patterson, resident on Short Street and President of the Montford Neighborhood Association, opposed to seeing the parcel divided and the density increased. He said that the issue is density and approving this conditional zoning will be setting a precedent in the neighborhood.

Ms. Ellen Nutter, resident on Flint Street representing the Montford Neighborhood Association, expressed concern about density. She said that the immediate neighborhood, and almost all of Montford, is zoned RM-8 which allows two units per lot. She said they supported the subdivision of the lot, but asked Council to allow only two units, not three (no accessory unit on the lot on Soco Street). Allowing three units would create a precedent for increasing density in many areas in Montford. East Waneta Street is very narrow with no opportunity for on-street parking. The unit on East Waneta Street has a concrete pad in its front yard for parking of one car and it cannot be expanded for more than one car due to the smallness of the lot and it's within the required setback. She asked that the Council rezone the new lot on Soco Street to RM-8 Residential Multi-Family Density District/Conditional Zoning with the condition that only one unit be permitted on that lot.

At 5:20 p.m., Mayor Bellamy closed the public hearing.

For clarity purposes, Ms. Fields explained that the property owner could not build a duplex on the lot fronting Soco Street because 5,000 sq. ft. is required for each unit in RM-8 and the lot size is too small. He could only build a single family home with an accessory apartment (either a garage apartment or within the structure). The owner would still have to meet the standards for an accessory apartment. The neighborhood wants only the single family home and not the accessory apartment.

In response to Councilwoman Manheimer, Ms. Fields said the owner wants to make the small lot a conforming lot (with the duplex being converted into one unit) and the larger lot be a conforming lot allowing whoever buys it the ability to build a single-family home and potentially an accessory structure.

In response to Councilman Davis, Ms. Fields reminded Council that whatever is built on the larger lot would have to go through the Historic Resources Commission as well. There are historic retaining walls on the property and she understood that it would be very difficult to tear them down. Therefore, it will be difficult for accessory unit, unless it's located within the structure itself (like a basement unit). The accessory structure limitations in the ordinance state that the structure has to either be a maximum of 500 sq. ft. or a maximum of ¼ of the single-family home on the property.

Councilman Davis expressed concern of the accessory structure being allowed on the small size of the property.

In response to Mayor Bellamy, Ms. Fields said that she had no proof that the former home on the larger lot that burnt down was multi-family.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Smith moved for the adoption of Ordinance No. 4025 to conditionally zone 3 East Waneta Street from RM-8 Residential Multi-Family Medium Density District to RM-16 Residential Multi-Family High Density District/Conditional Zoning for the conversion of the duplex to a single family home, the creation of a second parcel for future development of a single-family dwelling, and approval of modifications to the standards for setbacks and lot size, subject to the

following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) This project will undergo final review by the TRC prior to issuance of any required permits; (3) Any new site lighting must comply with the City's Lighting Ordinance, Section 7-11-10 of the Unified Development Ordinance; (4) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (5) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards. This motion was seconded by Councilman Russell and carried on a 4-3 vote, with Mayor Bellamy, Councilman Davis and Councilwoman Manheimer voting "no."

City Attorney Oast said that because the ordinance was not adopted by a 2/3 vote of Council, it is necessary to bring the ordinance back at the next meeting for a second and final reading.

In response to Councilwoman Manheimer, Assistant Planning & Development Director Shannon Tuch said that there is an extent to what the Board of Adjustment can grant and the lot size is too small. The only alternative for the applicant was to go through the conditional zoning process.

Mayor Bellamy felt Council may want to review the accessory apartments standards to see if we are being successful without being contentious at the same time.

Councilman Davis felt that since this is a fairly small piece of property he wondered if Council could condition the accessory structure to be attached to the single-family home. Ms. Fields said that the applicant would have to agree to that condition. The applicant would have to make an application and it would have to go through the review process of the Technical Review Committee, the Planning & Zoning Commission and then back to City Council. City Attorney Oast noted that without going through a new process initiated by the owner, Council cannot condition the use of the lot that is not subject to the rezoning.

In response to Vice-Mayor Newman, Ms. Brison said that the constraints of the site will likely result in one single-family home with the possibility of an accessory unit within it - provided it meets all the other requirements. She said that it has been a long process to get to this point and after compromising, they believe this is the best solution.

**ORDINANCE BOOK NO. 27 - PAGE 192**

**C. PUBLIC HEARING FOR THE MISSION HOSPITAL SIGN PACKAGE FOR PHASES 2-4**

**ORDINANCE NO. 4026 - ORDINANCE APPROVING THE MISSION HOSPITAL SIGN PACKAGE FOR PHASES 2-4**

Technical Review Manager Kim Hamel said that this is the consideration of an ordinance to approve the Mission Hospital Sign Package for Phases 2-4. This public hearing was advertised on September 29 and October 7, 2011.

Ms. Hamel said that this is the consideration of a multi-phase signage plan for Mission Hospital and surrounding campus locations.

On January 25, 2011, the Asheville City Council approved the first Phase of a forthcoming master signage plan for Mission Health Systems (MHS). The initial phase was submitted in advance of the multi-phased approach to signage for the campus in order to address the immediate needs for directional signage associated with the Hospital Drive road opening and the impending opening of the Cancer Center slated for completion in December of this year.

The signage plan submitted with this application addresses Phases 2- 4 of an 8 phase Wayfinding program that is to be implemented over the next four years. The plan builds upon the changes implemented in the first Phase and includes the installation of additional directional and identification signs. It also continues with planned retrofits of older signs to be consistent with the current design standards and wayfinding methodology established in the first Phase.

For the purposes of this review, the staff focused on signs that would normally require review and permitting; primarily signs visible to adjoining properties and roadways. In their submission, however, MHS felt that it was important to provide Council with a broader view of the project to illustrate the complexities of developing a wayfinding program (for a hospital with multiple campus locations) and to help explain the reasoning behind the sign package request.

As in the staff review of the first Phase, a "Development Area" for Mission Health Systems was defined and evaluated. It includes the Memorial Mission and St. Joseph's Campus drives and entrances along Biltmore Avenue, the new Hospital Drive and Victoria Road connections and MHS mini campus locations on the NW and SE sides of the street (445-495 Biltmore Avenue and Cancer Center), and the Mission Hospital entrances along McDowell Street and Doctors Drive.

In addition to the maps and illustrations provided by applicant, the following tables provide a summary of the signs that are required a sign permit by the City. The information includes the types of signs proposed, their respective sizes and the phase in which the sign is to be installed. The sign package review is (again) broken into two areas: Identification Signage and Directional Signage.

Phase 2:

Phase 2 of the signage plan proposes new identification signs, retrofits of existing signs, and vehicular directional signs within the development area. It also includes placeholders for future construction and building expansions, retrofit of several MAHEC signs (upon completion of MHS's purchase of the property), and new identification signs for the Cancer Center.

Two (2) new and one existing corporate façade identification signs are proposed within the development area. (Sign 2.142c has been omitted from the sign package.) Signs are proposed to be located on the upper stories of existing buildings or buildings targeted for future expansion. The signs include:

- Location 2.215 (new/ future expansion): Mission Hospital campus signage proposed on the twelfth story of a future expansion at Mission Hospital above the Surgery Center entrance located off of Lily Carmichael Drive.
- Location 2.142a (new/ existing): Cancer Center signage proposed on the 4th story facing Hospital Drive
- Location 2.083 (retrofit): Mission Hospital campus signage replaces existing sign and is proposed on the seventh story and visible from Biltmore Avenue.

In addition to the corporate identification signs noted above, one new additional wall mounted sign (Location 2.142b) is proposed for the new Cancer Center and is located above the primary entrance into the Cancer Center, facing Hospital Drive.

The specific sign dimensions for each of the identification signs proposed for the development are provided in the table below.

CAMPUS IDENTIFICATION AND WALL MOUNTED SIGNS: PHASE 2

| SIGN TYPE/ LOCATION | PROPOSED |
|---|---|
| Corporate Façade Identification<br>Memorial Campus<br>I-1 (New / Future Vertical Expansion)<br>Location: 2.215<br><br>* Illustration I | Wall Mounted- 12th story (future expansion)<br>Size: < 80 square feet |
| Corporate Façade Identification – Cancer Center<br>I-2 (New)<br>Location 2.142a<br><br>* Illustration II | Wall Mounted- 4th story (5 story bldg.)<br>Size: < 105 square feet |
| | |
| Building Identification<br>Cancer Center<br>IB-5a (New)<br>Location: 2.142b<br><br>* Illustration III | Wall Mounted – above building entrance<br>Size: 12.5 square feet |
| Building Identification<br>IB-5b (Remove and Replace)<br>Location: 2.212b<br><br>* Illustration IV | Decorative Wall Mounted – Remove MAHEC sign, replace with new Mission Health Sign<br>Size: Not to exceed 60 square feet |
| Building Entrance Identification<br>IB-5c (Retrofit)<br>Location: 2.214<br><br>* Illustration V/VI | Remove and replace wall MAHEC signs (wall mounted and freestanding sign) with new Mission Health signage<br>Wall: not to exceed 60 square feet<br>Freestanding: Not to exceed 8'in height, 60 square feet in area |

Phase 3

The proposed directional signs in Phase 3 are intended to serve future development projects and expansions (not yet reviewed by the City). Several include: the construction of a new parking deck along Hospital Drive with an overhead connection to Lily Carmichael Drive and an expansion of the service zone with new internal road connections to Doctor's Drive. They will thus not be installed until these expansions are completed.

Phase 4

As in Phase 3; the Phase 4 signage is proposed to support several new projects that will require alteration of existing signage and necessitate additional signage needs. In the submitted documents MHS plans a significant building expansion over a portion of the Memorial Visitor Parking Deck that will result in a new Main Entrance and circular drop-off area for the Memorial

Campus. The circular drive in front of the new main entrance will connect the new Parking deck proposed in Phase 3 to lower levels in the existing Memorial Visitor parking deck.

Vehicular Directional Signs – Phase 2, 3 and 4

All three phases of this review include new directional signs or retrofits of existing directional signs to bring them up to the current design standards approved in the first Phase. The type and size of the directional signs included in this review are identical to those approved in Phase 1, and are designed to direct and route emergency vehicles, patients and visitors to the correct hospital and entrance.

As noted in the January staff report, the various types of directional signs are differentiated by height, square footage and branding (name/logo) provided. The larger signs are designed to comply with the DOT cap heights standards (letter size) that address higher vehicle speeds on roadways with multiple traffic lanes; while smaller directional signs are primarily located at street intersections and in several internal sites within the campus boundary where there are higher levels of vehicle and pedestrian activity.

The table below provides the location and type of directional signage proposed for each location point identified on the map.

VEHICULAR DIRECTIONAL SIGNS: PHASES 2-4

| INSTALLATION PHASE | SIGN TYPE/ LOCATION | WHAT IS PROPOSED |
|---|---|---|
| Phase 2<br>New<br><br>* Illustration V-I | DV-2<br>Locations: 2.250 (Biltmore Avenue)<br>Directional Sign w/ Name, Logo, Address | MAHEC Replacement<br>Height: 9'-11"<br>Size: < 50 sqft |
| Phase 2<br>Retrofit<br><br>* Illustration V-I | DV-2r<br>Locations: 2.002, 2.028, 2.080 (Biltmore Avenue)<br>Directional Sign w/ Name & Logo, | Height: 9'-11"<br>Size: < 50 sqft |
| Phase 2<br>Retrofit<br><br>* Illustration V-2 | DV-3r<br>Location: 2.017, 2.079<br>(Internal locations but visible)<br>Direction Sign w/ Name & Logo | Height: 11'-1/2"<br>Size: < 53 sqft |

Findings:

The stated purpose of allowing the consideration of a separate signage plan is as follows:

*The purpose behind this section is to permit creativity in sign design and placement to address site issues and constraints associated with topography, pedestrian-orientation, way-finding and other conditions unique to the subject development.*

The staff believes that MHS has proposed a comprehensive sign program that meets the intent and purpose of a signage plan. The signs have been creatively designed and customized to exclusively identify multiple MHS campus locations and parking areas by providing visible cues that are consistent in color, layout, branding (pictography), and structural form (stone bases).

The Directional (wayfinding) signage is also customized to complement the common design elements featured in the identification signs (noted above) visually informing motorists that they are still within the hospital campus area. The signs are strategically located throughout the development area and should provide clear direction to visitors and patients traveling to specific campus destinations.

Pros:
- Comprehensive, graphically consistent signage
- Presents an intuitive and effective wayfinding (directional) approach

Con:
- None noted

Staff supports MHS efforts to create a unique and consistent identity. We believe this approach is satisfactory and we recommend approval with the list of the following conditions: (1) A 10% deviation to the sign standards presented in Phases 1-4 can be considered with review and approval by the Planning Director. All other deviations to this approved plan will result in an amendment to be reviewed and approved by City Council; (2) All signs shall meet site distance triangle and building code requirements, including clearance requirements for pedestrian and vehicular traffic; (3) All signage must comply with illumination standards as outlined in Articles 11 and 13 of the UDO; and (4) All signs in the project area shall comply with the proposed standards and no exceptions or variances are permitted.

Mayor Bellamy opened the public hearing at 5:44 p.m. and when no one spoke, she closed the public hearing at 5:44 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 4026 to approve the signage plan for Mission Hospital Systems as proposed with the following conditions: (1) A 10% deviation to the sign standards presented in Phases 1-4 can be considered with review and approval by the Planning Director. All other deviations to this approved plan will result in an amendment to be reviewed and approved by City Council; (2) All signs shall meet site distance triangle and building code requirements, including clearance requirements for pedestrian and vehicular traffic; (3) All signage must comply with illumination standards as outlined in Articles 11 and 13 of the UDO; and (4) All signs in the project area shall comply with the proposed standards and no exceptions or variances are permitted. This motion was seconded by Councilman Davis and carried unanimously.

**ORDINANCE BOOK NO. 27 – PAGE 197**

**V. UNFINISHED BUSINESS:**

**A. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A THREE-YEAR CONTRACT WITH PONDERWELL, INC., FOR COMMUNITY MEDIA DEVELOPMENT SERVICES**

Public Information Officer Dawa Hitch said that this is the consideration of a resolution authorizing the City Manager to enter into a three-year contract with Ponderwell, Inc. for community media development services.

In May 2011, public access studio space provided by a third-party organization closed as a result of funding challenges. Due to the status of the organization, the City decided not to renew or extend its recently expired contract for public access management services. As an alternative, the City of Asheville and Buncombe County issued a joint Request for Proposals (RFP) for community media development services, projects or initiatives with an emphasis on: community development, economic and workforce development, industry development, and training and education.

The RFP was posted on July 1, and submissions were due by August 1. Nine submissions were received by the August 1 deadline. An evaluation panel of nine employees from the City of Asheville, Buncombe County and the Asheville Area Chamber of Commerce reviewed and scored the submissions during the month of August. Evaluators reviewed and scored proposals independently, and then scores were aggregated together to provide an average score for each submission.

Submissions were scored on a 100-point scale using weighted criteria, which included such factors as the potential of the project to achieve results consistent with goals outlined in the RFP, the extent to which the project would engage the public, and the appropriateness of the budget, funding support and sustainability strategy.

The City Council Finance Committee reviewed preliminary scoring results at its September 13, 2011, meeting and agreed with staff's recommendation to invite the top two scoring organizations to make presentations to the evaluation panel. Presentations were made on September 13, 2011, and scored on a 55-point scale. Points from the presentation were combined with the total scoring tabulation for the RFP process.

The overall scores for the top six submissions included:

| | |
|---|---|
| Ponderwell | 126.6 |
| Mountain Xpress | 111.5 |
| JB Media | 58.6 |
| American Green Media | 57.5 |
| Asheville Area Arts Council | 56.8 |
| Lakehouse Music | 55.9 |

After the presentation process, the evaluation panel noted that the top two scoring submissions were meritorious projects that would add considerable value to the region's growing multi-media industry and were worthy of funding consideration. Based on the point system, Ponderwell was the top scoring submission.

Ponderwell proposes to launch a web-based, community driven local news and information outlet that is driven by local writers, photographers and videographers.

Pros:

- Funds a project that could result in job creation and workforce training as well as community engagement.
- Proposes a funding model that encourages self-sufficiency within three years.

Con:

- Typical risks associated with any start-up project including delays in implementation, ability to deliver final product and/or maintain financial projections. The contract will include specific performance metrics to ensure funding aligns with expected deliverables.

The structure of the contract award is intended to provide seed funding to allow a new community media development initiative to achieve financial independence and sustainability within three years. During the three year award period, funding will be provided to Ponderwell according to the following schedule:

- Year 1 (Sept. 2011-Sept. 2012): $60,000
- Year 2 (Sept. 2012-Sept. 2013): $40,000
- Year 3 (Sept. 2013-Sept. 2014): $20,000
- After three years, funding will be discontinued.

Buncombe County and the City of Asheville will split the funding allocation each year, and each government will provide $30,000 in year 1, $20,000 in year 2, and $10,000 in year 3. In the FY 11-12 budget, the City has allocated $30,000 for community media services.

Based on the results of the RFP process, staff recommends that City Council approve the resolution authorizing the City Manager to enter into a three-year contract with Ponderwell, Inc. for community media development services.

Councilman Bothwell voiced concern that the proposals didn't meet their intent they desired when the Request for Proposals was created. He felt the proposals are more of an aggregator function for community media, which is already happening on blogs. He felt we are funding something that is already happening. Councilman Russell agreed.

When Councilwoman Manheimer asked what would happen to the funds if Council doesn't accept any proposal, Ms. Hitch said that the funds are part of the General Fund and can be used for anything.

Councilwoman Manheimer moved to not authorize the City Manager to enter into an agreement with Ponderwell and that the funds remain in the General Fund. This motion was seconded by Councilman Davis.

Rev. Lisa Landis stressed the importance of public access in Asheville and requested the equipment from URTV be used for the public. Ponderwell has stated that they will work with the community, not just in mentoring, and if they had our equipment, the community can continue to speak.

Ms. Amie Tracey, representing Ponderwell, said they don't want to just build a website, but to create a system that facilitates people getting involved in community journalism by creating an editorial process and mentorship program. They didn't put the equipment into the proposal because they felt like within the grant monies they really needed the money to build the system and build the community in order to get people involved. If there is anyway to incorporate the equipment they would certainly work with people to get it out into the community.

Rev. Christopher Chiaronmonte felt that the community needs a public forum and public access.

Dr. Milton Byrd explained why he was not in favor of the contract moving forward.

Mr. Michael Tracey, Chief Technical Officer of Ponderwell, said they are proposing a community-run on-line news editing system to allow all the people in the community to write niche news for the very small issues they are concerned with. They will let everyone have a voice by building a platform. They are also building educational and mentoring systems so the people who want to shoot video or audio or photography can work and build news articles on-line together.

Mr. Coleman Smith felt there is a huge digital divide of people that do not have access to internet.

Mr. Heywood spoke in support of the contract because it will be an opportunity to give people the opportunity to learn about the things they care about themselves.

Ms. Davyne Dial felt the proposal falls short of the four major objectives in the Request for Proposals and felt the contract was aimed at serving a small group of people who are already producing content in the community. This narrow and exclusive proposal offers little benefit to the community in a time when job creation is imperative.

Councilman Smith understood there was a lot of work in this process; however, there is so much accessibility to the internet now. He wanted to see more of the economic and workforce development objectives and more of the training and education pieces being accented. He questioned whether government should be funding an arm of journalism. Should Ponderwell be able to secure other funding for this, he wondered if Council might be willing to explore some kind of co-applicant on future grants using the City's equipment.

The motion made by Councilwoman Manheimer and seconded by Councilman Davis carried unanimously.

**VI. NEW BUSINESS:**

**A. COUNCIL DIRECTION ON PERMANENT ALLEY CLOSING BETWEEN NEBRASKA STREET AND NEVADA AVENUE**

**RESOLUTION NO. 11-212 - RESOLUTION SETTING A PUBLIC HEARING ON NOVEMBER 22, 2011, TO CONSIDER THE PERMANENTLY CLOSING OF AN ALLEY BETWEEN NEBRASKA STREET AND NEVADA AVENUE**

City Attorney Oast said that the street closure process is a two-step process with the first step being adoption of a resolution of intent to close and establishing a date for the public hearing. The public hearing would occur approximately four weeks later. He said there is more disagreement amongst the property owners that abut the alley than Council usually sees with respect to other street closures and he suggested those issues be addressed at the public hearing.

Public Works Director Cathy Ball said that staff is requesting direction from Council on the closure of an unopened alley between Nebraska Street and Nevada Avenue.

N. C. Gen. Stat. sec 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, adjacent property owners, Julia Watts Schafer, Edward V. Hardin, Jane P. Ward, Hannah Danise, Dewitt Hurst, Kandi Kilpatrick, Alexander Brown, Bonnie R. Locklear, Jack Askew and Katherine Folkman, and Joanne C Gunter have requested the City of Asheville to permanently close an alley between Nebraska Street and Nevada Avenue. In accordance with the City of Asheville Fees and Charges Manual, the applicants paid the City $4,000 to process this closure.

The Greenway Commission met on August 11, 2011. The Commission discussed various subject areas and voted 4-1 against supporting the closure.

The right to use or occupy the alley is a matter in litigation between some of the property owners abutting the alley, including the petitioners. The attorneys for the parties met with City staff, including City Attorney and the Assistant Planning Director, to review the closure process

and the implications of closure on the legal issue in the lawsuit. With their consent, further processing of the petition was delayed to allow additional time for the parties to try to resolve their differences, which might eliminate the need for the closure, or affect the form that it might take. The petitioners asked if they could be refunded the application fee of $4,000. The petitioners were informed that they would be able to get a refund on the application fee so long as the petition was withdrawn before any public notification or advertising occurred.

On September 23, 2011, Vice-Mayor Newman and Council Members Davis and Smith requested an item be placed on the agenda to provide policy direction.

The fee for a petition, which includes public notification and advertising, is $4,000.

Provide direction on the role of the City with regard to the alley closure. A resolution is provided should the Council wish to proceed with the public hearing.

Mayor Bellamy said that the normal process for a street closure would be to put the resolution of intent to close the alley and set the public hearing on the consent agenda and consider the details at the public hearing.

In response to Vice-Mayor Newman, City Attorney Oast said that Council's adoption of the resolution of intent to close the alley does not commit Council to close the alley.

Ms. Ball said that staff is asking for another clarification regarding the $4,000 application fee. The petitioners have submitted the application fee which covers the cost of advertising, public notice and staff time. That money has been deposited. Some petitioners are now requesting that money back since City Council is now the body requesting the closure. She asked for Council direction.

Vice-Mayor Newman said the primary issue is to set in motion the process to determine whether this paper alley should be closed or not. The second issue is the process question about whether this is a City Council initiated consideration or whether it is a citizen initiated process, noting there are arguments on both sides.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Newman moved to adopt Resolution No. 11-212, setting a public hearing on November 22, 2011. This motion was seconded by Councilman Smith.

Dr. Milton Byrd felt that just closing the alley does not solve the problem and suggested a plan of action to deal with the alley once closed.

In response to Mayor Bellamy, City Attorney Oast said that issue of the street closing is not in litigation, but there are disagreements amongst the neighbors about the appropriate use of the alley which is in litigation.

Mayor Bellamy felt this sounded like a private property rights issue. City Attorney Oast responded that Council is not being asked to adjudicate the rights of the neighbors and Council would not be taking sides. The request before Council is whether the City has an interest in keeping the alley open for any permissible purpose. He said the paper street has never been accepted by City and never used for public purposes.

In response to Mayor Bellamy, City Attorney Oast said that the $4,000 application fee covers the requirements for advertising for 4 consecutive weeks, which is expensive, and a lot of staff time in assessing whether the City has any interest in keeping the alley open.

In response to Mayor Bellamy, Ms. Ball said that typically an applicant comes in and makes a request for a closure and staff asks Council to adopt a resolution of intent to close and set the public hearing. The normal process is that it would have come to Council. Staff would have brought this to Council earlier but staff was asked to hold off so that the property owners could have a discussion and possibly come up with a resolution.

City Attorney Oast said the process and the costs are the same, regardless of who initiates the request. Staff met with the attorneys from both sides to make sure that they clearly understood the implications of the closing and the legal effect of it was.

Mayor Bellamy could not support the motion because she felt by Council's intervening sets a precedence, including a precedence of refunding the money that is to be used to cover our expenses. Council's parameters set at their retreat are for cost recovery. She felt Council should not intervene on this issue.

Vice-Mayor Newman felt it's the City's job to make a decision on whether that street should be built.

The motion made by Vice-Mayor Newman and seconded by Councilman Smith to set the public hearing on November 22, 2011, carried on a 6-1 vote, with Mayor Bellamy voting "no."

Vice-Mayor Newman moved to consider this action as a Council initiated request. This motion was seconded by Councilman Smith.

Mr. Jay Fiano, property owner who started clearing the alley, said that he started clearing the alley with the permission of the Building Safety Department, which issued him a grading permit. He did reach out to the neighbors but received no response until his grading began.

Ms. Julia Schafer, adjoining property owner, said that the neighbors have asked for evidence of the permits; however, the City said that permission and permits were never granted.

The motion made by Vice-Mayor Newman and seconded by Councilman Smith to consider this a Council initiated process carried on a 6-1 vote, with Mayor Bellamy voting "no."

**RESOLUTION BOOK NO. 34 – PAGE 184**

**B. BOARDS & COMMISSIONS**

**ABC Board**

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, noted that the Commission recommended interviewing Mr. Jim Ellis on November 22 as his term expires November 13, 2011, and he is eligible for reappointment to the ABC Board. City Clerk Burleson advised that the term of Mr. Charles Worley, Chair of the ABC Board, will also expire on November 13, 2011, and that advertising for the vacancies will begin October 15.

**Board of Adjustment**

At Mayor Bellamy's request to re-advertise in order to try to reach racial diversity, it was the consensus of Council to re-advertise for unexpired regular seat term left by Ms. Kristy Carter, term to expire January 21, 2014. Alternates Richard Fort, Phillip Hardin, Doug Hattaway, Nelda Holder and James Sheeler have expressed interest in the regular seat; and David Nutter is the only individual who applied for the vacancy.

**RESOLUTION NO. 11-213 - RESOLUTION APPOINTING MEMBERS TO THE HOMELESS INITIATIVE ADVISORY COMMITTEE**

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Homeless Initiative Advisory Committee (HIAC).

The terms of Tom Rightmyer, Stephen Bolden and Wanda Lanier will expire on November 1, 2011.

The following individuals have applied for the vacancies: Debbie Metcalf, Micheal Woods, Michael Akers, Marcie Walker and Chris Sullivan.

The HIAC recommended appointing Chris Sullivan and re-advertising for the other two remaining vacancies in order to give the HIAC an opportunity to interview any new applicants. The Boards & Commissions Commission concurs with their recommendation.

Vice-Mayor Newman moved to appoint Chris Sullivan to serve a three-year term, term to expire November 1, 2014, or until her successor has been appointed. This motion was seconded by Councilwoman Manheimer and carried unanimously (with Mayor Bellamy absent).

**RESOLUTION BOOK NO. 34 – PAGE 185**

**VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:**

Rev. Lisa Landis requested some of the URTV equipment so she can continue to record history and allow people's voices to be heard. She wanted government to be held accountable for things they are doing wrong.

Ms. Patricia Dockery, west Asheville resident, urged Council to revise the noise ordinance to restrict noise from 11:30 p.m. to 7:30 a.m. Vice-Mayor Newman noted that Council is in the process of looking at the noise ordinance and will consider her suggestion. In addition, Mayor Bellamy asked City Manager Jackson to contact Ms. Dockery to see if we can address her immediate concerns.

Rev. Christopher Chiaronmonte spoke about democracy and said that he would fast until City Council gives him five acres of land.

When Mr. James Smith requested a transcript of a specific 911 call, City Attorney Oast said that a copy of that requested transcript has been mailed to Mr. Smith; however, he would provide him with what was sent.

Ms. Melissa Porter, representing Moogfest, said that on October 28-30, 20-30,000 people will be coming into Asheville to attend Moogfest. Therefore, she asked City Council (1) for a temporary amendment to the banner pole-hanging policy that says only co-sponsored events and/or City-produced events can take advantage of that policy; and (2) to waiver the temporary sign policy for additional direction signage and larger directional signs. Mayor Bellamy instructed City Manager Jackson to work with Ms. Porter on her requests and report back to City Council at their next meeting on October 25.

**Occupy Asheville**

The following individuals urged City Council to waive the 10:00 p.m. park curfew that would permit Occupy Asheville a permanent place to camp to assemble 24 hours indefinitely within Pack Square Park/Roger McGuire, respecting their constitutional right to assemble and give the protests a peaceful outlet (noting that the WNC CLC AFLCOI will provide port-a-johns):

Dr. Milton Byrd
Chaplain Robert Zachary, former civil rights activist

Mr. Matthew Burd
Ms. Clare Hanrahan
Ms. Jennifer Foszer, attorney who has guided process (provided Council with petition alleged to contain over 350 signature from business owners, business managers and concerned citizens)
Mr. Timothy Sadler
Mr. Charles Rawls
Ms. Jessica Archer
Mr. Mark Case, President of the WNC CLC AFLCIO
Mr. Steve Arpin
Mr. Anthony Benton

Councilman Bothwell moved to all Occupy Asheville 24-hour occupancy of Pack Square Park/Roger McGuire subject to an agreement about health, safety and sanitation.

Councilwoman Manheimer was concerned about the other groups who have reserved the area a long time ago and have spent thousands of dollars for their events. She thought the request was for night-time occupancy only – not 24-hour occupancy. For night-time occupancy, she suggested the Public Works Facility parking lot.

At the request of Councilman Smith, Councilman Bothwell withdrew his motion so any concerns could be addressed in a possible motion.

In response to Mayor Bellamy, Director of Building Safety Robert Griffin relayed to Council several events booked at Pack Square Park between now and October 25, at which time the park is scheduled for one month of re-seeding to re-generate, as it experiences a lot of activity which damages the grass.

Councilman Davis was sympathetic to the cause and wanted to help, but asked that people realize the Pack Square Park has come at a great price with a lot of small donations to build the park with still quite a bit of debt to keep it going. The Park was not designated as an overnight camping spot. He felt the suggestion of the Public Works Facility parking lot for overnight camping was a good suggestion.

Vice-Mayor Newman explained that first amendment rights are not always simple, citing the bullhorns used by pastors at Bele Chere. The City has had extensive public input to develop the rules for all our public parks. Currently our policy is that our public parks are not open all night. The policy was not developed for the special reason of denying people political expression rights, but sincerely developed with public safety issues in mind. Based on the processes we have in place, he would not be comfortable in simply discarding all the public involvement we've had to develop the policies today at this meeting. He would like to see City staff work with representatives from Occupy Asheville to see if there is a mutually acceptable place. He also noted that we must treat everyone the same and if we create a first amendment area that is different than all our other parks, it will have to be for anyone, not just for one organization. Councilman Russell agreed.

Councilman Smith appreciated the peaceful nature of the group and reaching out to Council. The theme that resonates with him is patience, understanding and dialogue. Those values can help guide the process. As an elected official, his responsibility is to ensure public health, safety and other things.

Councilman Bothwell suggested Aston Park for overnight camping; however, understanding that it doesn't fit the purpose of Occupy Asheville which want to be located downtown. He felt that as the City looks to find a suitable location that we not drag our feet to address this issue.

Mayor Bellamy felt Council needed to direct staff to gather recommendations and report back to Council. She recommended Council not make a decision at this meeting without allowing staff to have an opportunity to find a suitable location, working not only with Occupy Asheville, but with neighborhood representatives who are not members of Occupy Asheville. We have listened to Occupy Asheville supporters for almost one hour and if Council decides at this meeting an overnight camping area, Council will hear from others who don't agree with that location. As we deliberate this process, Council needs to make a choice that is a win/win for the community. She said that when someone occupies a space for 24-hours that is not designed for that, neighbors or business owners need to have their voices heard.

Councilman Smith agreed that an indeterminate length of time is something that needs to be considered, but wants Council to address this in a timely manner.

Councilwoman Manheimer voice concern that this item is not on Council's agenda and the community has not had the opportunity to speak with Council, other than supporters of Occupy Asheville. She would be willing to consider giving the City Manager to authority to work with Occupy Asheville to find a temporary location for overnight camping, until Council can hear the recommendations from City staff at their October 25 meeting. She did not support using Pack Square Park/Roger McGuire as there are already scheduled events.

In response to Councilman Russell, City Manager Jackson said that staff will work within Council policies. What is possible, within the current framework, is along the lines of what Seattle's Mayor decided to do, and that is not to create an exception to their park policy, but rather find public property wherein the public can convene. That way Council s not violating their stated park policy. To the extent that the organizers would want to come forward with a permit, and act like any other group that wants to rent and reserve and reasonably comply with the standards, we can make parks available under a permit process. My understanding there is an application pending to use Pritchard Park for three hours on Sunday and we are expediting the review of that. Staff will work within Council's park policies and offer creative opportunities to make public space, that is not park space, available. We will also work to avoid conflict with business hours and make those safety provisions. Again, staff's goal would be not to make policy, but find a creative solution within the policies.

City Manager Jackson noted that if we are going to make public property available, we must make it available to the entire public. We will not reserve public property for the exclusive use of any one group.

Mayor Bellamy thanked Occupy Asheville supporters for attending the meeting. She noted that with regard to the request for Council to dialogue, City Council goes to different parts of the community to hear concerns. Asheville is a very inclusive community. When it comes to dialogue, there are more outlets in Asheville for dialogue than in any other parts of the State. Regarding issues involving the Police Department, we have a Citizens/Police Advisory Committee that is made up from community residents, along with a Police Academy for citizens. A City Council meeting is not the only forum for input. She stressed that Asheville has more non-profits per capita than anywhere else in North Carolina and we have a lot of people who dedicate their time to help kids graduate from high school, Manna Food Bank sends food all over North Carolina, Mountain Housing Opportunities works on affordable housing, etc. So, as Occupy Asheville articulates who you are, don't do that in isolation of other people who are working in our community as well. What you are trying to accomplish is important, but don't negate the efforts of others in our community who are also working on the issues near and dear to other people's hearts. She hoped they understand that Council is willing to work with them and when this matter is before Council again in two weeks that Occupy Asheville be open to hear other citizens voices about their concerns. She also noted that statements about other city mayors have a different form of government where the mayor has the final say; however, this is not a proclamation, which is a ceremonial document that she has authority to declare herself. She cannot authorize a group to use a park 24-hours indefinitely. She said this is not the end of the conversation.

It was the consensus of Council to direct the City Manager to work with Occupy Asheville representatives to find a temporary location for overnight camping, until Council can hear the recommendations from City staff at their October 25 meeting.

**Lawsuit**

The City received a Complaint on October 5, 2011, from Brittany Rose Sams vs. City of Asheville, Officer James A. Boyce, in his individual and official capacity. The Complaint is negligence and the Plaintiff requests a trial by jury. This matter will be handled by an attorney outside the city Attorney's Office.

**VIII. ADJOURNMENT:**

Mayor Bellamy adjourned the meeting at 8:11 p.m.

Magdalen Burleson
CITY CLERK

Jan Mayor Bellamy
MAYOR

Tuesday – October 25, 2011 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr. (arrived in meeting at 5:59 p.m.); Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

**PLEDGE OF ALLEGIANCE**

Boy Scout Troop 91 sponsored by St. Paul's United Methodist Church led City Council in the Pledge of Allegiance.

**INVOCATION**

Vice-Mayor Newman gave the invocation.

**I. PROCLAMATIONS:**

**A. PROCLAMATION PROCLAIMING NOVEMBER 2011 AS "ADOPTION AWARENESS MONTH"**

Mayor Bellamy read the proclamation proclaiming November, 2011, as "Adoption Awareness Month" in the City of Asheville. She presented the proclamation to Ms. Becky Kessel who briefed City Council on some activities taking place during the month

**B. PROCLAMATION PROCLAIMING NOVEMBER 5, 2011 AS "AIDS AWARENESS WALK 2011 DAY"**

Mayor Bellamy read the proclamation proclaiming November 5, 2011, as "AIDS Awareness Walk 2011 Day" in the City of Asheville. She presented the proclamation to Ms. Sarah Tennyson, Youth Outreach Specialist at the WNC AIDS Project, and Mr. Jeff Bachar, Executive Director of the WNC AIDS Project. Mr. Bachar briefed City Council on some activities taking place during the day. Mayor Bellamy also congratulated Mr. Bachar to Asheville.

**C. PROCLAMATION PROCLAIMING NOVEMBER 13, 2011, AS "CITY SCHOOLS CHAMPIONS DAY"**

Mayor Bellamy read the proclamation proclaiming November 13, 2011, as "City Schools Champions Day" in the City of Asheville. She presented the proclamation to the Lake Eden Arts Festival in Schools and Streets; Loraine Martin; the Community Foundation of Western North Carolina, The I Have A Dream Foundation Asheville; the Asheville Police/Fire Department's Back to the Basics Program; the late Captain Jeffrey Bowen; Asbury Memorial United Methodist Church; Pastor Lisa Hartzog Hannah; Ruth Paar; Mark Ackerman; and Ruth Belcher. She recognized Asheville City Schools Foundation Board President Betsy Russell who thanked City Council for their support.

**D. PROCLAMATION PROCLAIMING NOVEMBER 13, 2011 AS "UNC-ASHEVILLE BULLDOG DAY"**

Councilman Davis read the proclamation proclaiming November 13, 2011, as "UNC-Asheville Bulldog Day" in the City of Asheville. He presented the proclamation to Mr. Mike Gore,

Associate Athletics Director for External Affairs, who briefed City Council on some activities taking place during the day.

**II. CONSENT AGENDA:**

At the request of Councilwoman Manheimer Consent Agenda Item "C" was removed from the Consent Agenda for an individual vote due to a conflict of interest.

**A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON OCTOBER 11, 2011**

**B. RESOLUTION NO. 11-214 - RESOLUTION AUTHORIZING THE PURCHASE OF AN EXTRACTOR AND REMITTANCE PROCESSOR FOR CUSTOMER SERVICES FROM SINGLE SOURCE VENDOR CREDITRON**

Summary: The consideration of a resolution authorizing the purchase of an Extractor and Remittance Processor for the City's Water Resources Department Customer Services Division, from Creditron Inc., for approximately $160,000.00, without requesting formal bids pursuant to NCGS §143-129.

NCGS §143-129(e)(6) (ii)(iii), allow purchases without formal bidding when a needed product is available from only one source of supply and when standardization or compatibility is the overriding consideration.

The Customer Services Division currently uses two separate machines, a remittance processor and an extractor, to process approximately 1,250 utility bills daily. The current machines break down on a regular basis and have exceeded their useful life. Purchasing new equipment, in lieu of leasing it, makes more financial sense. Creditron is the single source of supply for the City's needed Extractor and Remittance Processor. Additionally, standardization and compatibility of the City's existing software with Creditron's equipment is an overriding consideration for purchasing from Creditron.

Water Resources staff consulted with the Information Technology and Purchasing Departments to recommend the purchase from Creditron due to single source supply and compatibility issues with the existing software and conversion to the new equipment. All parties agreed that Creditron should be the recommended source. The funds for this purchase exist in the Water Operating Budget, following City Council approval on 9/13/11.

This project is part of City Council's strategic plan to improve city infrastructure and to operate at the highest levels of fiscal responsibility.

Pro:

- Awarding the purchase contract to Creditron for the mail processing equipment and authorizing the purchase without requesting formal bids for standardization and/or compatibility eliminates software compatibility issues.

Con:

- None.

The funding needed for this purchase is currently allocated in the Water Resources' Operating budget.

City staff recommends City Council adopt a resolution authorizing the City's Water Resources Department Customer Services Division to purchase the Creditron extractor and remittance processor for approximately $160,000.00 based on their standardization needs.

C. **RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A PROFESSIONAL SERVICE AGREEMENT WITH W.K. DICKSON & CO., INC., FOR THE CHALLEDON SUBDIVISION WATER LINE EXTENSION PROJECT**

**RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A PROFESSIONAL SERVICE AGREEMENT WITH MCGILL ASSOCIATES FOR THE OLD HAW CREEK AND RIDDLE ROAD WATER LINE EXTENSION PROJECTS**

**RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A PROFESSIONAL AGREEMENT WITH MICHAEL BAKER ENGINEERING, INC., FOR THE GROVEMONT SUBDIVISION WATER LINE EXTENSION PROJECT**

**BUDGET AMENDMENT TO COMBINE TWO SEPARATE CAPITAL PROJECTS WITH THE SAME NAME OF OLD HAW CREEK INTO ONE CAPITAL PROJECT FOR OLD HAW CREEK**

These items were removed from the Consent Agenda for an individual vote due to a conflict of interest by Councilwoman Manheimer.

D. **RESOLUTION NO. 11-218 - RESOLUTION EXEMPTING THE NORTH FORK WATER TREATMENT PLAN DAM / TUNNEL EVALUATION PROJECT FROM THE ANNOUNCEMENT REQUIREMENT OF N.C. GEN. STAT. SEC. 143-64.31 AND AWARDING THE PROJECT TO SCHNABEL ENGINEERING**

Summary: The consideration of a resolution exempting the North Fork Water Treatment Plant Dam/Tunnel Evaluation Project from the architectural, engineering and surveying announcement requirement of NCGS §143-64.31.

NCGS §143-64.32 allows a local government to exempt particular projects from the requirements of NCGS §143-64.31, that has requirements for architectural, engineering, and surveying services be announced. For several years, Water Production has used Schnabel Engineering to inspect the dams at the North Fork and William DeBruhl water plants and make recommendations for repairs or improvements. Schnabel Engineering has also developed an Emergency Action Plan (EAP) for Asheville to address several scenarios involving dam failures. Schnabel is recognized as an expert engineering firm specializing in dam design, construction, and maintenance.

Schnabel provided an Engineering proposal for spillway, conduit, and gate evaluations and EAP training for the North Fork Dam. The proposal consists of: (1) evaluating alternatives to address the spillway capacity at a cost of $51,800.00, (2) a structural evaluation of the outlet works conduit at a cost of $88,300.00, (3) evaluating the North Fork Dam spillway gates by performing gate inspections and a structural analysis of the gates at a cost of $34,300.00, and (4) conducting EAP training for plant staff at a cost of $14,900.00. This proposal from Schnabel Engineering is the most qualified proposal from a firm that has a proven successful track record to complete the dam/tunnel evaluation project.

This project is part of City Council's strategic plan to improve city infrastructure and to operate at the highest levels of fiscal responsibility.

Pro:

- Recognize Schnabel Engineering as the most qualified engineering firm to perform the North Fork WTP Dam / Tunnel Evaluation by exempting the project from the announcement requirement of NCGS §143-64.31.

Con:

- None.

The funding needed for the evaluation is currently allocated in the Water Resources Capital Improvement Projects fund.

City staff recommends City Council adopt a resolution to exempt from the statutory announcement requirement of NCGS §143-64.31, the North Fork Water Treatment Plant Dam / Tunnel Evaluation Project and authorize the awarding of a contract to Schnabel Engineering in an amount not-to-exceed $189,300.00.

**RESOLUTION BOOK NO. 34 – PAGE 190**

**E. ORDINANCE NO. 4028 - ORDINANCE AMENDING THE EFFECTIVE DATE OF THE VOLUNTARY ANNEXATION OF 55 PINEY MOUNTAIN DRIVE TO OCTOBER 25, 2011**

Summary: The adoption of an ordinance amending the effective date of the annexation of property located at 55 Piney Mountain Drive.

On September 27, 2011, the City Council of the City of Asheville adopted an ordinance annexing property located at 55 Piney Mountain Drive. Asheville Retirement Residence, LLC had petitioned the City for the annexation of this property which contains a total of 13.52 acres on which a 120 suite retirement residence, Bella Vista, has been constructed. November 30, 2011, was set as the effective date for this annexation.

It was subsequently called to the attention of staff that the North Carolina General Assembly amended the statutes dealing with voluntary annexation this past summer. In this amendment they provided that the effective date for a voluntary annexation must be either on the date of the passage of the ordinance or on June 30th of the following year after the date of passage of the ordinance.

The ordinance revises the effective date to be on the date of adoption of this ordinance, October 25, 2011. The petitioner is aware of this change.

Pros:

- Provides for the orderly growth of the City and the tax base through the acceptance of appropriate areas into the corporate limits where owners desire annexation.
- Complies with the 2025 Plan in that it supports the strategy of promoting voluntary annexation of developing areas.
- Allows for service provisions for a new retirement community that would benefit from an urban level of service.

Con:

- Marginal costs for patrol.

The property located at 55 Piney Mountain Drive is valued at $12,813,700. This property is currently serviced by the City of Asheville Fire Department under the Haw Creek Fire District agreement. As such, the City receives a share of the Haw Creek Fire District property tax revenue based on the property's value. If the property were to remain outside the City, the City would receive $11,532 in revenue annually from the Haw Creek Fire District property tax. Once the property is annexed, it will no longer be subject to the 9-cent Haw Creek Fire District tax; instead, the property will be subject to the City of Asheville's 42 cent property tax rate. Therefore, the City will receive $53,817 annually in property tax revenue once the property is annexed. The

net tax revenue gain from the annexation is $42,285. As noted above, cost impacts from this voluntary annexation are minimal.

City staff recommends City Council adopt the ordinance amending the effective date of the annexation of 55 Piney Mountain Drive to October 25, 2011.

**ORDINANCE BOOK NO. 27 – PAGE 205**

**F. RESOLUTION NO. 11-219 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH MOORE AND SON SITE CONTRACTORS INC. FOR THE PROJECT KNOWN AS TUNNEL ROAD US 70, 74A & KENILWORTH ROAD SIDEWALK IMPROVEMENTS**

Summary: The consideration of a resolution authorizing the City Manager to execute a contract (and all change orders in the amount of 15% of the contract or $15,300) with Moore and Son Site Contractors, Inc. in the amount of $101,972.50 for the project known as Tunnel Road US 70, 74A & Kenilworth Road Sidewalk Improvements, Project # ENG -10-11-003.

A formal request for bids was issued on August 12, 2011, and bids were opened on September 6, 2011. Due to the receipt of only 2 bids, the project was rebid informally. These bids were opened on September 15, 2011. A local contractor, Moore & Son Site Contractors, located in Mills River, N.C., was the low bidder with an amount of $101,972.50. With the addition of a 15% contingency, the total budgeted amount for this project is $117,268.38. This will be a unit price contract and not a lump sum contract and is part of the City of Asheville's CIP program.

This action complies with the City Council Strategic Operating Plan of Multimodal Transportation in that it will meet the need of increasing the output of sidewalk construction and provide sidewalk in an area that is in need of sidewalk linkage.

Pros:

- Provides a pedestrian linkage by connecting existing sidewalks.
- Will be a step forward in meeting the City's Strategic Plan and current fiscal year CIP goals.
- Is listed as an identified need on the City of Asheville pedestrian plan.

Cons:

- Project management and contract administration will consume staff time and city funds.
- Temporary lane and driveway closures.

This project is part of the $1.3 million sidewalk construction program that City Council approved as part of the FY 2011-12 Capital Improvement Budget. Funding will come from debt proceeds.

Staff recommends City Council authorize the City Manager to execute on behalf of the City of Asheville a contract with Moore and Son Site Contractors, Inc. in the amount of $101,972.50 for the project known as Tunnel Road US 70, 74A & Kenilworth Road Sidewalk Improvements, and all change orders in the amount of 15% of the contract or $15,300.

Assistant Director of Public Works David Foster responded to Councilman Smith's inquiry about the description and linear feet of the project.

**RESOLUTION BOOK NO. 34 – PAGE 191**

**G. RESOLUTION NO. 11-220 - RESOLUTION TO PROCEED WITH PLANNING AND IMPLEMENTATION OF BOND FINANCING AND APPROVING THE FINANCING TEAM**

Summary: The consideration of a resolution directing the City Manager and Finance Director to pursue debt financing for capital projects and refinancing existing debt in Fiscal Year 2012, and to appoint bond counsel and the managing underwriter for the transaction.

On July 26, 2011, City Council adopted a reimbursement resolution for several debt issuances planned as one transaction in Fiscal Year 2012: (1) the issuance of "new money" for Council approved capital projects authorized as part of the Fiscal Year 2012 and Fiscal Year 2011 Budgets, (2) the takeout of the interim note on the 51 Biltmore Parking Deck project and (3) the refinancing of some existing debt to achieve financial savings.

As a next step in the process, staff is seeking City Council's approval of a resolution appointing Parker, Poe, Adams & Bernstein as bond counsel and Merrill Lynch, Pierce, Fenner & Smith as the managing underwriter for the transaction. These recommended appointments are being made on the basis of qualifications, familiarity with the City's finances and capital planning and in the case of the managing underwriter, having provided the lowest cost financing for the 51 Biltmore Parking deck project interim financing. The resolution also authorizes the City Manager and Finance Director to retain other members of the financing team as necessary.

Pro:

- Allows the City to move forward with the FY 12 debt financing.

Con:

- None noted.

This action supports the City of Asheville's goal to operate the City to the highest level of fiscal responsibility by enhancing its commitment to infrastructure maintenance and capital improvements.

Staff recommends that City Council approve the resolution as it is proposed.

**RESOLUTION BOOK NO. 34 – PAGE 192**

**H. RESOLUTION NO. 11-221 - RESOLUTION AUTHORIZING THE CITY MANAGER TO DESIGNATE OBSERVERS FOR THE DETERMINATION OF RESULTS OF THE PETITIONS REGARDING THE BILTMORE LAKE ANNEXATION**

Summary: The consideration of a resolution authorizing the City/ Manager to designate three observers for the determination of results of the petitions regarding the Biltmore Lake annexation.

As Council knows N.C. Sess. L. 2011-173, adopted this past summer, makes the Biltmore Lake annexation subject to the "petitioned denial" process that is a new feature of the annexation law. In essence, the law provides that if the owners of 60% of the parcels in the annexation area submit a petition opposing the annexation, the annexation is terminated. This process was made applicable to several annexations already in process, including Asheville.

The law provides that the determination of the results of the petition, to be performed by the local Board of Elections, should be observed by three property owners from the annexation area, and three persons designated by the municipality. The resolution will authorize the City Manager to make that designation. The persons selected will likely be City employees who have some expertise in such matters.

Pro:

- Complies with statute.

Con:

- None noted.

Adoption of the resolution is recommended.

**RESOLUTION BOOK NO. 34 – PAGE 193**

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Manheimer moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Smith and carried unanimously (with Councilman Russell absent).

**ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES**

C. **RESOLUTION NO. 11-215 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A PROFESSIONAL SERVICE AGREEMENT WITH W.K. DICKSON & CO., INC., FOR THE CHALLEDON SUBDIVISION WATER LINE EXTENSION PROJECT**

**RESOLUTION NO. 11-216 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A PROFESSIONAL SERVICE AGREEMENT WITH MCGILL ASSOCIATES FOR THE OLD HAW CREEK AND RIDDLE ROAD WATER LINE EXTENSION PROJECTS**

**RESOLUTION NO. 11-217 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A PROFESSIONAL AGREEMENT WITH MICHAEL BAKER ENGINEERING, INC., FOR THE GROVEMONT SUBDIVISION WATER LINE EXTENSION PROJECT**

**ORDINANCE NO. 4027 - BUDGET AMENDMENT TO COMBINE TWO SEPARATE CAPITAL PROJECTS WITH THE SAME NAME OF OLD HAW CREEK INTO ONE CAPITAL PROJECT FOR OLD HAW CREEK**

At Councilwoman Manheimer's request, Councilman Smith moved to recuse Councilwoman Manheimer from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Davis and carried unanimously (with Councilman Russell absent).

Summary: The consideration of a resolution authorizing the City Manager to enter into three professional service agreements for the Water Line Extension Project: (1) W.K. Dickson & Co., Inc. in the not-to-exceed amount of $111,000.00 for Challedon Subdivision; (2) McGill Associates, PA in the not-to-exceed amount of $125,800.00 for Old Haw Creek and Riddle Road; and (3) Michael Baker Engineering, Inc. in the not-to-exceed amount of $222,055.00 for Grovemont Subdivision; and a technical budget amendment in the amount of $500,000 to combine two separate capital projects with the same name of Old Haw Creek into one capital project for Old Haw Creek.

The City of Asheville Water Resources Department identified four Neighborhood Waterline Replacement Projects for the current fiscal year and is seeking engineering design and project management assistance with these projects. The four projects are known as: Challedon Subdivision, located west off Dogwood Road; Riddle Road, located east off Bee Tree Road; Old Haw Creek area; and Grovemont Subdivision, located east off Old US Hwy 70. These projects will replace existing substandard and failing waterlines in favor of new waterlines, designed and constructed in accordance with the City of Asheville standards.

On August 3, 2011, Water Resources issued a Request for Qualifications (RFQ) for engineering services related to the design and contract administration for these projects. In response to the RFQ, Water Resources received 13 proposals. Companies responding were:

1. Alliance Consulting Engineers, Inc. – Columbia, SC
2. Brooks Engineering Associates – Asheville, NC
3. Cavanaugh & Associates, P.A. – Asheville, NC
4. David D. Smith & Company, PLLC – Asheville, NC
5. Mattern & Craig, Inc. – Asheville, NC
6. McGill Associates – Asheville, NC
7. Mercer Design Group – Weaverville, NC
8. Michael Baker Engineering, Inc. – Asheville, NC
9. Robinson & Sawyer, Inc. – Gastonia, NC
10. The Wooten Company – Raleigh, NC
11. Vaughn & Melton Consulting Engineers – Asheville, NC
12. Willis Engineers – Charlotte, NC
13. W. K. Dickson & Co., Inc. – Charlotte, NC

Water Resources initially planned for one engineering firm to design and manage all four waterline projects. However, due to their size and scope staff decided to divide the engineering portion into three separate contracts.

A review team, comprised of Water Resources staff, reviewed each proposal, selected three firms for the engineering services contracts, and negotiated contract amounts for the following firms: (1) W.K. Dickson & Co., Inc. in the not-to-exceed amount of $111,000.00 for Challedon Subdivision; (2) McGill Associates, PA in the not-to-exceed amount of $125,800.00 for Old Haw Creek and Riddle Road; and (3) Michael Baker Engineering, Inc. in the not-to-exceed amount of $222,055.00 for Grovemont Subdivision.

This project is part of City Council's strategic plans to improve city infrastructure.

Pros:

- The selected engineering firms have provided Engineering Services on numerous water system improvement projects for the City of Asheville. Their experience and knowledge of our water system will minimize staff support and input during the design process.
- These projects will provide water customers with a more reliable drinking water source and much improved fire protection.

Con:

- Failure to award an engineering services contract would prevent Water Resources from completing the adopted Capital Improvement Projects Plan in a timely manner and delay the replacement of aging infrastructure.

The funding needed for each of these projects is currently allocated in the Water Resources' Capital Improvement Projects budget. The technical budget amendment included with this staff report will combine two separate capital projects with the same name of Old Haw Creek into one capital project for Old Haw Creek.

City staff recommends City Council approval of the City Manager to enter into three professional service agreements for the Water Line Extension Project: (1) W.K. Dickson & Co., Inc. in the not-to-exceed amount of $111,000.00 for Challedon Subdivision; (2) McGill Associates, PA in the not-to-exceed amount of $125,800.00 for Old Haw Creek and Riddle Road; and (3) Michael Baker Engineering, Inc. in the not-to-exceed amount of $222,055.00 for Grovemont Subdivision; and a technical budget amendment in the amount of $500,000 to combine two separate capital projects with the same name of Old Haw Creek into one capital project for Old Haw Creek.

Councilman Bothwell moved to adopt Resolution Nos. 11-215, 11-216 and 11-217. This motion was seconded by Councilman Davis and carried unanimously (with Councilman Russell absent and Councilwoman Manheimer recused).

Councilman Bothwell moved to adopt Ordinance No. 4027. This motion was seconded by Councilman Davis and carried unanimously (with Councilman Russell absent and Councilwoman Manheimer recused).

## III. PRESENTATIONS & REPORTS:

### A. BLUE RIDGE PARKWAY OVERLOOK FOR ASHEVILLE

Mr. Phil Francis, Superintendent of the Blue Ridge Parkway, said they were asked by the Buncombe County Commissioners to consider adding an overlook on the Blue Ridge Parkway. Once they received the request, Mr. J. David Anderson, Resident Landscape Architect/GIS & GPS Coordinator for the National Park Service Blue Ridge Parkway, looked to see if there was a place where an overlook might be constructed.

Mr. Anderson explained that they looked at the height of the buildings in downtown Asheville and projected where you could see the Parkway if you were on the top of those buildings. Because of vegetation, there are only a few places that were appropriate. Using a location map, he explained why the location selected was at Mile Post 394.5 – south 8.2 miles from the center of downtown. He also used a map to show Council the existing site.

Mr. Francis stressed that this is not a project in their system yet. They will have to describe the project and put it into their National Park Service System and it will have to compete with other projects for funding for planning/design work, need to compliance work, and construction work. They are willing to move forward, especially since in the near future they will begin doing a planning effort in the Asheville area looking at parking, overlooks, trail connections, greenways, etc. He felt it was a good time to consider this project.

Mayor Bellamy thanked Mr. Francis for their consideration of this overlook and also for their new and expanded Center on the Parkway in Asheville. She asked Mr. Francis to keep City Council updated on their efforts.

### B. REPORT ON LEAF COLLECTION

Public Works Director Cathy Ball updated City Council on the status of the city's leaf collection program following changes implemented this fiscal year that included the elimination of loose leaf collection.

She said changes to the leaf and brush collection program were submitted as part of the budget that was adopted by City Council in May 2011.

She said that as part of the budget, which was adopted in May 2011, the frequency of brush collection was increased from once per month to twice per month. Loose leaf collection by vacuum trucks was replaced with bagged leaf collection twice per month.

Challenges in vacuuming include (1) maintenance of equipment (a) annual cost - $55,000; (b) average age of vehicles – 18 years old; and (c) impacts on schedule; (2) weather impacts ability to provide service; (3) roadway/pedestrian hazards; (4) impacts of leaves in storm drain system (a) flooding; and (b) water quality; and (5) servicing 30 to 50% of priorities.

It was changed for (1) increase in collection frequency; (2) more reliable collection schedule; (3) safer roads; (4) safer sidewalks and bicycle lanes; (5) improve water quality and flood control; and (6) financial benefits.

Our planned/budgeted service delivery methods are (1) brush and leaves are collected every two weeks; (2) large, durable bags are available at fire stations free of charge; (3) crews empty leaves from bags and the bags are left on-site to be reused; and (4) leaves are taken to a facility for mulching.

If people are physically unable to bag leaves; (1) when leaves are mowed, leaves can be mowed; (2) neighbors can help neighbors – City staff is working with church groups and other organizations to encourage a network for assistance; and (3) community resources may be available, 2-1-1 is a resource people can use to see if they meet the criteria for available resources.

Regarding public outreach, the goals of the communication plan are (1) communicate the change in service; (2) share information about the benefits; (3) encourage community participation in a network to assist people with physical limitations.

Communication tools include website, press release, videos, Facebook, twitter, mailers, reminder postcards, letter to contractors/residents, messages to community and neighborhood groups, and reminder letters to residents (education not punitive).

Option are (1) continue with planned/budgeted level of service; (2) restore basic level of service; (3) establish a preferred level of service; or (4) establish an "on-call" loose leaf service.

The basic level of service would include (1) leaf collection twice a season through March; (2) 8 trucks – 4 from other departments – 4 new trucks; (3) $110,000 – annual seasonal employees; (4) $320,000 – capital (7 year replacement); and (5) budget amendments for operating and Capital Improvement Plan (CIP) budgets.

The preferred level of service would include (1) leaf collection once a month through January or February; (2) 12 trucks – 4 from other departments – 8 new trucks; (3) $150,000 – annual seasonal employees; (4) $640,000 – capital (7 year replacement); and (5) budget amendments for operating and CIP budgets.

"On-call" service would require (1) RFP for competitive bids; (2) three to five year contract with one or multiple vendors; (3) user-fee based on full-cost recovery; and (4) budget amendment for operating budget and fee schedule change.

Cities that do not collect loose leaves are Denver, Seattle, Boston and Austin. They have more stringent environmental regulations. Best practices for sustainability are to mulch or compost leaves.

Council direction requested is (1) continue with planned/budgeted level of service; (2) pursue one of the described levels of service, including appropriate budget amendments; (3) establish an "on-call" fee-for-service program; or (4) timeline for bringing preferred options back to Council.

In response to Councilman Bothwell, Ms. Ball said that it is possible to do an "on call" service with existing trucks with a service fee, but she would have to look at what that cost would be.

In response to Vice-Mayor Newman, Solid Waste Manager Wendy Simmons said that the costs outlined by Ms. Ball are additional costs beyond what we are using for brush/leaf collection now.

When Mayor Bellamy asked if we had any locations for residents to bring their leaves for composting, Ms. Simmons said that there are no City-operated sites; however, there are private facilities in town that do accept leaves.

Mayor Bellamy felt there was no opportunity for transition from picking up loose leaves to having to bag leaves. She suggested the Finance Committee review this issue to see if they can locate some funds for a hybrid system (with no additional fee for service) because some residents physically cannot bag their leaves. She does not support the bagged leaves option only. She felt that collection of leaves is a city function covered by property taxes and residents should not have to pay an additional fee for that service now.

Councilman Bothwell noted that we currently have an "on call" service for large objects for a minimal fee of $5.

Councilwoman Manheimer supported sending this to the Finance Committee to explore a blend of bagged leaves and some capital investment for new trucks. Another idea is whether we want to contract out the entire brush and leaf collection program, and then the City wouldn't have to make the capital investment for the equipment.

Councilman Smith said there is at least one business ramping up composting of yard waste in the City and there may well be others. He felt it would be a good idea to research to see if there is a company that wants the leaves.

Vice-Mayor Newman supported the issue being sent to the Finance Committee. He felt that there are other types of basic cleanliness and sanitation services in the City that Council would like to see more investments in, e.g., sidewalk restoration. We need to clearly have more things like that happening in the City as a whole and that will take some money too, in addition to volunteer efforts. Those things benefit everyone. Regarding the leaf collection service is that it is a City service and if we fully pay for that service ourselves (opposed to having some part of it on-call) is that it does very disproportionately benefit different property owners. He felt this would be a case for some role of basic service, but then if some people are requiring more service than others, then maybe there is some way to partially pay for that so that we can make sure that we are spending enough of funding on the types of City cleanliness initiatives that really benefit the community broadly.

Councilman Davis felt that by the time this issue goes to the Finance Committee and then back to Council, we will be a good way through leaf season. He felt we should try to move forward with the present bagged leaf collection system, and let the community know that the Finance Committee is reviewing the matter and there may be some fees that might be levied. Another concern about loose leaves is when people sweep their leaves to the curb, it takes sometimes 2-3 weeks for the vacuum truck to collect them, and if it rains they are very slick and stop up storm drains.

At this time (5:59 p.m.), Councilman Russell arrived at the meeting.

In response to Councilman Davis, Ms. Ball said that it would take 6-9 months from the time we order a new vehicle to receive it. She said we would miss this leaf season if any change is made if it included new vehicles.

It was the consensus of Council to refer this matter to the Finance Committee.

**IV. PUBLIC HEARINGS:**

**A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE CONDITIONAL USE PERMIT FOR FOUR SEASONS PLAZA, LOCATED AT 1011 TUNNEL ROAD**

**ORDINANCE NO. 4029 - ORDINANCE AMENDING THE CONDITIONAL USE PERMIT FOR FOUR SEASONS PLAZA, LOCATED AT 1011 TUNNEL ROAD**

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

City Attorney Oast asked if any Council member has any special knowledge associated with this project that they disclose it at this time. Mayor Bellamy said that she was on City Council when this project went through the conditional use permit process. She stated that she would consider this issue with an open mind on all the matters before her without pre-judgment and she they will make her decision based solely on what is before Council at the hearing.

Regarding a potential conflict of interest, Councilwoman Manheimer stated that HomeTrust Bank is a client in her law firm; however, the applicant is not the bank. It was the opinion of City Attorney Oast that Councilwoman Manheimer did not have a conflict of interest.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

City Attorney Oast said that the Authorized Practice Committee of the North Carolina State Bar has issued an advisory opinion that appearing in a representative capacity for a party before a local governmental body in a quasi-judicial proceeding is the practice of law, especially with respect to such aspects of the hearing as examining or cross-examining witnesses, or advocating for legal conclusions or results. This does not prevent persons, including land use professionals, from presenting information or expressing opinions within their knowledge or area of expertise.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 6:04 p.m.

Urban Planner Blake Esselstyn submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Esselstyn said that this is the consideration an amendment to a conditional use permit for Four Seasons Plaza, located at 1011 Tunnel Road, to include additional property to support a new configuration for the bank drive through.

The Four Seasons Plaza project was originally approved as a Conditional Use Permit in 2005. The applicant is now seeking to reconfigure the bank drive-through, extending the vehicular use area to the east, onto a parcel that was not originally part of the Conditional Use Permit (CUP) (Location and Aerial Maps – Attachments to City Exhibit 3). This change requires an amendment to the CUP, necessitating the technical review and Council hearing.

After the initial approval in early 2005, the project was required to have an amendment of the CUP in the summer of 2005 to alter the access on the west side, extending the vehicular use area onto the adjacent parcel, and creating an access easement. This 2011 amendment is somewhat similar, altering the access on the east side, and adding new property to the area subject to the conditional overlay.

Subsequent to the approval of the CUP in summer of 2005, the property owner sought to add the drive-through use, not shown in the earlier submittals. This modification simply underwent staff review, as it was not seen as significant enough to warrant re-review by City Council and did not extend the boundary of the project or involve other properties.

The property to the east has two existing curb cuts, and the proposed new entrance for the drive-through would use the one closer to the existing plaza. The adjacent property is also owned by the owner of the plaza, but consideration should be given to the possible scenario in which the parcel to the east changes ownership.

Though the curb cut is existing, the driveway it serves has not received significant use since the construction of the plaza. The applicant points out that directing the drive-through traffic into this entrance would alleviate the (occasionally dangerous) interference of drive-through stacking with traffic entering the plaza from Tunnel Road. Further, relocation of the ATM would allow for fewer conflicts with other parking lot traffic flow (Site Plan – Attachment to City Exhibit 3).

City staff's chief uncertainty about the proposed redesign was related to potential conflict with the driveway across the street and the number of entrances serving the same development in such proximity. However, given that US-70 is a highway, assessment of such conditions is the purview of N.C. Dept. of Transportation (DOT). On October 6, the applicant informed staff that DOT had approved the driveway permit.

The area proposed for modification which would need to be added to the conditional use overlay is only a portion of a parcel. In order to prevent the overlay from bisecting a parcel, the applicant has agreed to relocate the property boundary to include the affected area.

This project was approved with conditions by the Technical Review Committee on October 2, 2011. As an amendment to a previously approved Conditional Use Permit, review by the Planning & Zoning Commission is not required.

As of this writing, staff has not received any communication from citizens regarding this matter.

City Council must take formal action as set forth in Section 7-5-5(e)(3) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case pursuant to Section 7-16-2(c). Staff's review indicates that all seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   *The project will meet State building code requirements and will be reviewed in detail by the Technical Review Committee (as well as NCDOT staff) to ensure compliance with safety requirements.*

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   *The proposed site modifications will involve minimal earth work and disturbance. For what grading is undertaken, measures will be required to prevent adverse impact to nearby water quality.*

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   *There is only one property adjoining the affected area which is not owned by the applicant. Staff feels this proposed change will have no discernible effect on that property, nor any other nearby property.*

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   *The amendment essentially involves the reconfiguration of a vehicular use area, whose characteristics staff feels will have negligible consequences for the character of the neighborhood.*

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
   *Other than possibly promoting safety by lessening conflicts related to traffic interaction, staff feels the proposal would neither hinder nor promote the goals of such plans, policies, and strategies.*

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   *The proposed changes are not anticipated to generate additional traffic, demand water, or increase any need for other services, and as such, the location is equally suitable as the current situation.*

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
   *Staff from both the City's Transportation department and the North Carolina Department of Transportation have reviewed the proposed alterations for safety and traffic flow implications and deemed them appropriate for approval.*

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pro:

- May improve safety of traffic movement.

Con:

- None noted.

Staff recommends approval of this amendment to the previously approved Conditional Use Permit.

Mr. Marty Kocot, Civil Engineer on the project, urged Council to approve the amendment to the conditional use permit for safety reasons.

After rebuttal, Mayor Bellamy closed the public hearing at 6:09 p.m.

Councilman Russell moved for the adoption of Ordinance No. 4029, granting an amendment to the conditional use permit for Four Seasons Plaza, located at 1011 Tunnel Road, by adding the area denoted on the site plan to the conditional overlay for the Four Seasons Plaza, subject to the conditions recommended by City staff and subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All new site lighting must comply with the City's Lighting Ordinance and be equipped with full cut-off fixtures and directed away from adjoining properties and streets. If lighting is to be added, a detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; and (5) This project will undergo final review by the TRC prior to issuance of any required permits. This motion was seconded by Councilman Bothwell and carried unanimously.

**ORDINANCE BOOK NO. 27 - PAGE 207**

**V. UNFINISHED BUSINESS:**

**A. SECOND & FINAL READING OF ORDINANCE NO. 4025 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED AT 3 EAST WANETA STREET FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/ CONDITIONAL ZONING TO ALLOW FOR CONVERSION OF THE DUPLEX TO A SINGLE FAMILY HOME; THE CREATION OF A SECOND PARCEL FOR FUTURE DEVELOPMENT OF A SINGLE-FAMILY DWELLING; AND A REQUEST FOR MODIFICATIONS TO STANDARDS FOR SETBACKS AND LOT SIZE**

Mayor Bellamy said that the public hearing and adoption on first reading of this ordinance was held on October 11, 2011, but because the ordinance was not adopted by a 2/3 vote of Council, it was necessary to bring the ordinance back for a second and final reading.

Ms. Patsy Brison, attorney representing the applicants, provided Council with a letter dated October 25, 2011, along with a copy of a Certificate of Appropriateness issued by the Historic Resources Commission of Asheville and Buncombe County on February 26, 2008, for new construction of a 2,324 sq. ft., two-story single-family dwelling with basement. The Permit Extension Act of 2009, as amended, has the effect of extending the time period for this approval beyond the expiration date, meaning that it is still in effect.

City Attorney Oast explained that the Certificate of Appropriateness describes how the property can be developed – two-story single-family dwelling with basement. In order for anything else to be built would require an amendment to the Certificate of Appropriateness.

Councilman Russell moved for the second and final reading of Ordinance No. 4025. This motion was seconded by Councilman Smith and carried on a 4-3 vote, with Mayor Bellamy, Councilman Davis and Councilwoman Manheimer voting "no."

ORDINANCE BOOK NO. 27 – PAGE 197

**B. REPORT ON REQUEST FOR TEMPORARY WAIVERS TO THE BANNER POLICY AND SIGNAGE POLICY FOR MOOGFEST**

Assistant Director of Planning & Development Shannon Tuch said that at the October 11, 2011 City Council meeting the Council directed city staff to work with ACS entertainment on identification needs for the upcoming Moogfest music festival. Specifically, temporary signage and light pole banners were discussed.

City staff has met with the event organizer and have cooperatively detailed and mapped all of the proposed temporary signage – all square footage limitations and off-premise restrictions have been waived. Only those standards related to public safety have been upheld with very limited effect on the event. Light pole banners were also discussed and offered; however, the event organizers ultimately decided not to pursue these at this time.

As part of a wording amendment currently in process, new signage allowances for large temporary events is being considered. It is anticipated that these allowances will be in place prior to the Southern Conference Basketball Tournament and other large events expected in the spring.

Councilman Smith moved to waive the proposed temporary signage. This motion was seconded by Councilman Davis and carried unanimously.

At 6:15 p.m., Mayor Bellamy announced a 5-minute recess.

**C. REPORT ON A PERMANENT OVERNIGHT CAMPING LOCATION FOR OCCUPY ASHEVILLE**

Assistant City Manager Jeff Richardson said that at the direction of City Council in the October 11 formal meeting, staff reviewed City-owned public spaces in an effort to provide potential public space options for Occupy Asheville to be permitted to occupy on a continuous 24 hour basis for an indefinite period of time. On Thursday, October 13, city staff met with representatives from Occupy Asheville and covered in detail three public space options that City staff had analyzed and were prepared to work with the group on the normal permitting process. Those parcels were:

- Bottom of Lexington Avenue under the I-240 Overpass (specifically the public metered parking area) in that area. This area can be offered on a **24-7 basis** and there are no permitted events there for the remainder of the calendar year.
- City employee lot adjacent to Marjorie Street and the corner of Valley Street. (Gated currently). This lot can be permitted for the group's use from **7pm - 7am daily.**
- City street level public parking lot on Rankin Street (two options), across and beside the Rankin Avenue Parking garage. **7pm to 7am daily**.

These locations would serve as a staging area for and would be ancillary to the group's primary activity of conducting a protest in the City's downtown parks during daytime hours. City staff answered questions regarding each of these options, and explained the required permitting process for any of these locations, at their request.

The group indicated that their primary interest is to occupy a public park in downtown on a continuous 24-hour basis, within eye sight and sound proximity to government buildings and banks. Staff explained that they do not have administrative authority to allow occupying of the parks past 10:00 p.m. daily, and such consideration would require City Council approval.

The group requested one additional day to consider each of the options as presented and a follow up meeting with City staff on Friday, October 14 for further discussion. On Friday, October 14, City staff met again with representatives from Occupy Asheville. That meeting resulted in the following:

1. Occupy Asheville completed a permit application for the fifteen (15) publically metered parking spaces at the bottom of Lexington Avenue under the I-240 overpass. Note: This property is under the control of the City of Asheville through an Encroachment Agreement with the N.C. Department of Transportation.
2. The event organizer stated their intent to attend the October 25 City Council meeting and request waivers for all fees associated with the permitting of the space.
3. On Tuesday, October 18, City staff was contacted by Occupy Asheville and a new permit application was submitted with an expanded list of requested uses for the public space and an extended timeframe of twelve months. Staff continues the review the new application permit at the time of submittal of this memorandum.

Fiscal Impact:

- City policy outlines a $15 per meter per day charge to the event organizer for the permitted use of the parking spaces in the requested area. These charges total $225 per day. Parking Services Division has provided periodic analysis of public usage of metered areas in the CBD and reports that average daily revenue generated from these spaces average $16.09 per day, representing an overall low public usage.
- Inspection Fees: $260
- Liability Insurance: TBD
- The city does not have the resources to fulfill the barricade order for the defined period of time as it would negatively impact the city's ability to meet day-to-day operational needs.

Concerns noted:

- Department of Transportation: The City of Asheville has permitted temporary use special events on occasion, however, none for the expressed use as outlined herein, and none for the potential duration of time as indicated by the event organizer. As result, the local office of the Department of Transportation has contacted the City and expressed concern that the permitted use of this public space does not keep in the spirit and intent of the agreement as outlined. Further, DOT staff indicated that if the City permits this space for long term use in this manner, DOT will review this issue with DOT in Raleigh and ask for guidance accordingly.

- Insurance Liability Requirement: As standard practice, the event organizer is responsible for providing certificate of insurance prior to release of the permit. The City's Risk Manager has reviewed the permit and requested use and does not recommend waiver due to the city's liability associated with this waiver.

- Constitutional Law: There are significant First Amendment considerations (i.e. consideration of future permit applications for all other groups to continuously occupy City property if they meet the permit requirements).

- District Attorney's Office: The District Attorney has concerns of successfully prosecuting defendants for violations of law on City property if exceptions are allowed for a particular group.

- Public Safety: The Asheville Police and Fire Department has indicated public safety/traffic concerns and continues to monitor accordingly. As event participation levels

grow, staffing redeployment considerations may need to be made. To date, Police has charged one person with assault at the event site.

- Environmental Health: City ordinance requires portable restrooms and the event organizer has complied with this requirement. There are no other health related requirements specific to this permit application.

Review of North Carolina cities:

- City of Charlotte: Occupy event organizers are allowed to have "pop up" tents in a green space in front of City Hall designated Public Forum space. The space is not a city park, but is owned by the City and can be utilized by any group. The city does not program the space and there are not any time constraints accordingly.
- City of Greensboro: Occupy demonstrators are leasing a YWCA lot for overnight camping, nine blocks from downtown plaza. The YWCA lease runs out in two weeks and the city has placed the burden on finding additional space on the event organizers.
- City of Durham: Occupy event organizers have been congregating at CCB Plaza during the day-time hours, but because it is considered a part of the Durham Parks System, overnight camping is prohibited. No permits have been issued.
- City of Raleigh: 19 Occupy event participants were arrested on October 15 after refusing to leave the NC Capital grounds, after their permit expired at 3:00 p.m. on that day. Event organizers are not allowed to pitch tents as Raleigh does not allow camping in public parks, except for Olmsted Park, where there is a $14 fee. In addition, event participants are allowed to set up lawn chairs as long as they do not impede the use of the sidewalk.

At this time, City staff is withholding the final permit action in an attempt to determine viable options regarding the event organizer's required insurance certificate. City staff will continue to review this event in concert with its current staging location, and will be prepared to report on any additional issues that may arise up until the October 25 meeting.

Mayor Bellamy said that normally Council would have a motion on the floor before public comment. There has been a request to hear from the community before a motion is made. Councilman Bothwell then moved to hear from the community before a motion is made. This motion is seconded by Councilman Smith and carried on a 4-3 vote, with Mayor Bellamy, Councilman Davis and Councilman Russell voting "no." Councilman Russell wondered what the public would be commenting on. Mayor Bellamy agreed with Councilman Russell; however, the motion passed. She said that public comment is limited to one hour and explained the time limits for speakers.

In terms of process, Vice-Mayor Newman moved to allow 30 minutes for public comment now with the understanding that if a specific motion is made by Council, then an additional 30 minutes for public comment be allowed on that specific motion. This motion was seconded by Councilman Bothwell and carried on a 6-1 vote, with Mayor Bellamy voting "no." Mayor Bellamy could not support the motion as the rules are continually changing and we are setting a bad precedence.

The following individuals expressed concern over Council setting precedence in allowing special privileges and fee waivers for one group:

Mr. Rod Hudgins, representing the Council of Independent Business Owners
Mr. Chris Peterson
Ms. Heather Dillashaw, with Homeward Bound, but representing herself (requested consistency because it's problematic for one particular group to be given special consideration for an approved and permitted camp site when any given night we have over 500 homeless that do not have places to sleep, noting that many are

arrested for camping in public places)

The following individuals urged Council to waive the 10:00 p.m. park curfew that would permit Occupy Asheville (an assembly of people) a permanent place to camp to assemble 24 hours indefinitely within Pack Square Park/Roger McGuire, claiming that this falls under the rights of free speech and public assembly:

Dr. Milton Byrd
Ms. Rosetta Star, owner of Rosetta's Kitchen on Lexington Avenue (also noted that their current location under the Lexington Avenue bridge is toxic due to issues with air quality, and already occupied by a huge amount of the mentally ill, sick and homeless population)
Mr. Scott Owen
Chaplain Robert Zachary
Rev. Christopher Chiaronmonte

Councilman Smith praised the social movement and how everyone has handled the situation to date. He said that Occupy Asheville is referred to as a leaderless organization, making it difficult to negotiate with local government, especially when different parts of Occupy Asheville want different things. He outlined the following issues facing Council when considering their role regarding Occupy Asheville: (1) what is the precedent we are setting; (2) public safety for Occupy Asheville and everyone else; (3) responding appropriately to non-violent actions; (4) recognition that there are a variety of political views in the City; and (5) respect for free speech and civil liberties. Based on his conversations with Occupy Asheville, he did not believe the presence or absence of an enduring permitted partnership with the City will either make or break this movement. He knows that people who want to camp, do it currently and legally as evidenced by the Federal Building campers. The temporary solution under the I-240 overpass on Lexington Avenue was designed to give the City a chance to consider all these issues, noting this is not the end. Our ongoing patience and understanding and dialogue will help all of us move the City forward.

Councilman Smith then moved that the temporary accommodations cease on Friday, October 28, 2011, at 6:00 p.m.; that the Asheville Police Department fully train all responding officers in non-violent responses to non-violent direct action and are very clear regarding protecting free speech and civil liberties; and that Council waive fees incurred in the course of this Council-initiated response to an extraordinary circumstance.

Because Councilman Smith's motion is complicated dealing with procedures, operations and finances, Mayor Bellamy requested each part of the one motion be divided and voted on separately.

Councilman Smith then moved that temporary accommodations cease on Friday, October 28, 2011, at 6:00 p.m. This motion was seconded by Vice-Mayor Newman.

Due to previous discussion about the amount of public comment allotted for each specific motion, Vice-Mayor Newman confirmed with City Attorney Oast that it is a Council member's option to include multiple parts into one motion if they choose.

Councilman Russell, Chair of the Public Safety Committee, felt that the second part of Councilman Smith's motion regarding the Asheville Police Department can be handled without Council direction. City Manager Jackson agreed in that that we have experienced the training identified in the motion and felt that the intent of the motion was to use it to it's fullest extent in the event of the closure of the temporary accommodations.

Councilman Smith also noted that the movement will likely continue and will have a series of non-violent direct actions quite possibly, and that the Asheville Police Department

should respond appropriately to each of those and ideally work closely with the organizers to ensure that everything remains non-violent. City Manager Jackson said that is our intent and approach and with the City Attorney's Office and the Police Department there has been extensive training. We will continue to be current to track movement and track the best techniques in responding and working with Occupy Asheville cooperatively.

From City Manager Jackson's response, Councilman Smith understood that it's not necessary to make a motion to that point in that the policy and procedures are already in place. City Manager Jackson said that Council is asking them to operate with the best training techniques and communication skills we have available.

Councilman Smith agreed to have his motion divided and voted on separately if 15 minutes of public comment is allowed on each of the two motions.

Mayor Bellamy reiterated Councilman Smith's motions as follows: (1) that the temporary accommodations cease on Friday, October 28, 2011, at 6:00 p.m.; and (2) that Council waive fees incurred in the course of this Council-initiated response to an extraordinary circumstance. Mayor Bellamy said that there will be a total of 30 minutes public comment on both motions and the motions will be considered concurrently so people can speak to both issues when they address Council.

The following individuals spoke to Council on both issues, with various comments being made, such as, but not limited to: ceasing the temporary accommodation is not applicable since they only have an application for a permit; request to waive the $224 for the public spaces parking; waive the 10:00 p.m. park curfew so Occupy Asheville can camp to assemble 24 hours indefinitely within Pack Square Park/Roger McGuire; Occupy Asheville has been a benefit to the City and not a burden as they have helped feed people and are keeping people safe at night; Occupy Asheville has done random acts of kindness; Occupy Asheville does not want hand-outs but to educate the public;

Mr. Matthew Burd
Ms. Leslie Boyd
Ms. Lindsey McGillis
Rev. Lisa Landis
Mr. Scott Owen
Mr. Chad Ekre
Mr. Michael Pinnager
Mr. Victor Ochoa
Mr. Anthony Benton
Mr. Luca Resani
Ms. Judith Hoy
Ms. Catherine Davis Zommer

Mr. Mike Fryar spoke against waiving the fees incurred by Occupy Asheville.

Mayor Bellamy reiterated Councilman Smith's motion which was seconded by Vice-Mayor Newman that the temporary accommodations cease on Friday, October 28, 2011, at 6:00 p.m.

Councilman Bothwell agreed that credit was due for all parties. He was hoping to hear some ideas about locations in the public comment period before Council discussion. Most public comment was about the spirit of Occupy Asheville more than specific plans. He understood that their goal is a park. He supported the Occupy movement. He was pleased that the AFL CIO followed through on his suggestion to provide port-a-johns. He is working with the ACLU to create a legal defense team. He is also talking with a Physician's Assistant and a doctor to provide a free health care clinic two days a week for Occupy Asheville. Regardless of what

Council does, Occupy Asheville will go on and he wants this to move forward. Maybe the motion to cease the temporary accommodation is necessary to force the next step. He didn't know if the City will be able to come up with a place, but he felt it is important that Asheville supports this movement.

The motion made by Councilman Smith and seconded by Vice-Mayor Newman carried on a 6-1 vote, with Councilman Bothwell voting "no."

Councilman Smith then moved that Council waive fees incurred in the course of this Council-initiated response to an extraordinary circumstance. This motion was seconded by Councilman Bothwell.

Councilwoman Manheimer asked for a clarification on the parking meter fees. Mr. Richardson said the approximate amount of waiver would be $150 for the entire time Occupy Asheville has occupied the lot.

Vice-Mayor Newman outlined the many has many shared goals that City Council has with Occupy Asheville, e.g., Council is a diverse group and have different views, they have adopted a living wage policy for City employees and those who do business with the City, we have adopted a policy and provided resources to end homelessness in Asheville, we are reducing our own carbon footprint, and we believe in equal rights for everyone in Asheville.. But, he said we have a long way to go on many issues. Although we may disagree on the specific issue brought before Council does not mean we disagree with the changes you want brought to the community and this country.

Councilman Bothwell felt that waiving the parking meter fees is the minimum we can do. He noted that we block off parking meters for different reasons all the time. He did not recall the 51 Biltmore Avenue project or the Pack Square Conservancy project paying for the meters that they closed during their construction phases.

Mayor Bellamy cannot support the motion and asked Occupy Asheville to really look at our community. Asheville is a very inclusive community and we make sure people are involved in our decision-making processes. We have over 30 boards & commissions that volunteer members make up all facets of life and the decisions that govern our community are not just made by City Council. Our Planning & Zoning Commission, Recreation Board, Historic Resources Commission, Greenway Commission, Public Art & Cultural Commission (to just name a few) are made up of residents who advise City Council. We made a commitment to dialogue with our residents. When we think about parking taken off line, it's normal that someone pays a permit fee or it's a group that is bring economic development into our community. While the amount requested to be waived for parking is low, that does not take into other costs incurred by the City by the movement's presence, e.g., Police Department's time (which could be devoted to other areas of the City). She didn't think it was fair for Occupy Asheville to make the working class and low-income residents, they purport to help through their movement, to pay for these services. There is a financial impact of this movement on people who are not part of this movement. She could not support waiving the fees because she believed this is a cost incurred by collectively a group and they should pay the fees.

The motion made by Councilman Smith and seconded by Councilman Bothwell carried on a 4-2 vote, with Mayor Bellamy, Councilman Davis and Councilman Russell voting "no."

Councilman Bothwell moved to find a park and remove the curfew to allow permanent camping. This motion died for a lack of a second.

**D. RESOLUTION NO. 11-222- RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CHANGE ORDER WITH MOORE & SONS SITE**

460.

**CONTRACTORS INC. TO COVER THE COST OF REVISIONS TO THE CLINGMAN AVENUE/HAYWOOD ROAD STREETSCAPE PROJECT**

Engineering Services Manager Greg Shuler said that this is the consideration of a resolution authorizing the City Manager to execute a change order with Moore & Sons Site Contractors Inc., in the amount of $175,000, to cover the cost of revisions to the Clingman Avenue/Haywood Road Streetscape Project.

City Council authorized the City Manager to enter into a contract with Moore and Sons Site Contractors Inc., a local company, for the Clingman Avenue/Haywood Road Streetscape Project for a total of $503,827, not to exceed the project budget. On December 14, 2010, a change order was executed for the amount of $100,000 to increase the contract to cover unforeseen construction costs. This exhausted the 20% maximum that City Council had authorized the City Manager to execute. Subsequent thereto, members of the community voiced a desire to add a bike lane on the climbing side of Clingman to connect to Hilliard Avenue. To accommodate the community's request, the project had to be re-designed, significantly increasing the project cost due to among other things, the relocation of numerous utility poles. City Council then approved the transfer of funds from the completed Patton Avenue Sidewalk project and the completed Kimberly Avenue Resurfacing project to cover the cost of the re-design and subsequent additional construction. Staff is now seeking Council approval of a change order to the contract with Moore and Sons Site Contractors Inc. in the amount of $175,000 to pay for these additional construction costs per City contracting procedures.

This action complies with the City Council Strategic Operating Plan in fully leveraging funding from the State and other sources for regional transportation improvements. This action also complies with the City of Asheville Comprehensive Bicycle Plan in that it provides a climbing lane on a street identified in the plan as a need.

Pros:

- Implements a project in the City's adopted bicycle plan.
- Improves bicyclist safety.
- Encourages biking, thereby reducing carbon emissions.

Con:

- The City's contribution to the project had to be increased to cover the additional design and construction costs.

Funding already exists within the Clingman Streetscape project to accommodate this $175,000 change order. The original budget for this project was $907,251. In May of this year, Council approved a $250,000 budget amendment in this project to fund the additional design and construction costs mentioned above, which brought the total project budget to $1,157,251. Of this amount, $750,000 is City General Fund money, with the remaining $407,251 being provided by grant funding from the N.C. Dept. of Transportation.

City staff recommends City Council adopt the change order to appropriate fund accounts.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Smith moved for the adoption of Resolution No. 11-222. This motion was seconded by Councilman Davis and carried on a 6-1 vote, with Mayor Bellamy voting "no."

**RESOLUTION BOOK NO. 34 - PAGE**

**VI. NEW BUSINESS:**

## A. METROPOLITAN SEWERAGE DISTRICT

Mr. Steven T. Aceto, Chairman of the Metropolitan Sewerage District of Buncombe County (MSD), is requesting the City of Asheville join with him in the following letter to Mr. Tim Moore, Chairman of the Legislative Research Commission regarding the Legislative Research Commission Water & Sewer Consolidation Study. "We are writing to you in your capacity as the Chair of the Legislative Research Commission. We understand that you have been authorized to appoint subcommittees to study certain matters, including *Metropolitan Sewerage / Water System (HB 925 Moffit),* and that Representatives Moffit, McGrady, Brawley, Murry and Brisson have been appointed to the subcommittee researching this issue with Representative Moffit serving as chair. As the ratepayers and users of the Metropolitan Sewerage District of Buncombe County and the ratepayers and users of the City of Asheville water system could be affected substantially by the work of this subcommittee and staff, we request the opportunity to provide input to the subcommittee and staff as they go about their work. Your cooperation and assistance in this matter are most appreciated." The MSD Board approved this letter.

Regarding the Task Force (which the MSD Board approved), Mr. Aceto said the role of the Task Force is to address the specific items mentioned by Mr. Moffitt and, the three models of providing service. The MSD Planning Committee recommended to the full MSD Board and the City Council that a Task Force be created to assemble the information delineated in HB 925 along with other pertinent information in order to provide input to the Legislative Research Committee (LRC) Study Subcommittee. The Task Force shall report all findings to the MSD Board and City Council. In addition, the Task Force shall consider the three models of providing service: (1) No change in service providers; (2) City of Asheville Water system merge with MSD, and (3) Separate independent Authority like MSD. This local Task Force shall be comprised of two members from the MSD Board and two members of City Council, with Gary McGill as consultant and facilitator. The MSD Committee voted to have Al Root and Bob Watts represent the MSD Board on the local Task Force.

Vice-Mayor Newman said that the Boards & Commissions Committee discussed this and recommended appointing Councilwoman Manheimer as one of our representatives to the Task Force. He also said that if no one else on Council would like to serve, he would be willing. He has served on the MSD Board in the past, but noted that his term on City Council ends on December 6; however, he would be willing to continue on the Task Force if that is the wish of Council.

Councilman Bothwell moved to appoint Councilwoman Manheimer and Vice-Mayor Newman as our two representatives to the Task Force.

Regarding Councilman Davis' question on the Task Force's role when they attend the meetings in Raleigh, Mr. Aceto understood the LGC will appoint five members of the Study Committee; Representative Moffit as Chair, Chuck McGrady from Henderson County, Bill Brawley from Mecklenburg County, Tom Murry from Wake County and William Brisson from Bladen County. Mr. Moffit reported that the LRC Committee is limited to four meetings between now and the end of April of next year. As Chairman of the Committee, Mr. Moffit is trying to get a lot of what needs to be done ahead of the first meeting and felt the best way to effectively have a very local transparent involvement of interested parties in the entire process would be an informal committee; probably advisory. Mr. Aceto said the function of the Task Force would not necessarily to participate in the meetings, but provide a coordinated way to provide factual input and study into this process, whatever form it takes.

Mayor Bellamy was not opposed to Vice-Mayor Newman serving, but only until his term on Council ends. She felt the intent of the MSD Planning Committee was to have two members of City Council on the Task Force.

Vice-Mayor Newman understood Mayor Bellamy's statement and withdrew his name because he would not be a member of Council through the process.

Councilman Smith suggested Councilman Davis as the other City representative because of his history and depth of the matter. He would be willing to serve; however; he may not be the City's best representative.

Mayor Bellamy was not interested in serving on the Task Force as she admitted she was very biased about what should happen to our water system. She did feel it was necessary to have a seated City Council member who can start and finish the process.

Councilman Davis appreciated the confidence of Councilman Smith, noting he did have a good institutional history of the matter, but he also acknowledged that he is biased in his opinion. He felt Asheville is being treated uniquely in this instance. The City has worked a long time on making a good water system and they have been good stewards. He would be advocating for the City to keep its assets. That said, he is running for re-election in November and if not re-elected, he would not be eligible to serve on the Task Force.

In response to Councilman Smith, Councilwoman Manheimer said that the legislature had decided that certain studies would basically be formed as subcommittees of the LRC and in the case of the House, the LRC creates these subcommittees and appoints the members. The point is it is very discretionary and all we know is that the Chair has been designated to be Representative Moffit and there are four other members of the House. Because it is a subcommittee of the LRC, no one else can be on the subcommittee other than a House member. We also know that they are charged with studying the items that were included in the original proposed study bill. We have been told by Mr. Moffit that the Speaker of the House has directed that the LRC subcommittees can meet only four times during the interim (the time period where the legislature is not in session). They go back into session in May for their Short Session. All we know is that at the pleasure of Mr. Moffit, they shall meet four times in Raleigh at a time designated by the Chair.

Councilwoman Manheimer said the Task Force will not make a recommendation but provide information back to Council and MSD. They are only more of a vehicle of compiling the information. Rather than sit by and have no participation on the part of local government in Asheville, the MSD Planning Board decided to come together and gather data to provide to the Study Committee. The purpose of the Task Force is not to make a recommendation one way or another.

Councilman Smith said that he would be willing to serve, with the understanding that he could not guarantee that he could attend the meetings in Raleigh.

In response to Councilman Bothwell, Councilwoman Manheimer said that the meeting schedule may not be known until one week ahead of the meeting.

Councilman Davis said that if it is acceptable to Council, if he is re-elected, he would be willing to serve.

Councilman Bothwell withdrew his motion.

Rev. Christopher Chiaronmonte predicted the City would lose the water system.

Dr. Milton Byrd recognized that the wheels of government move slowly and the bureaucracy around the water and sewer issue has been a quagmire for years. He said there is no balance and at some point Council needs to look forward to see what is the best way to let go and move forward.

Councilman Russell moved to (1) authorize the Mayor to sign the joint letter with MSD regarding the Water & Sewer Consolidation Study; and (2) appoint Councilwoman Manheimer and Councilman Davis, with Councilman Smith as a back-up should Councilman Davis not be re-elected, as our two representatives to the Task Force. This motion was seconded by Vice-Mayor Newman and carried unanimously.

**B. CONSIDERATION OF A CHARITABLE CONTRIBUTION COMBINED CAMPAIGN FOR CITY OF ASHEVILLE EMPLOYEES**

Director of Finance and Management Services Lauren Bradley provided Council with the following background information for a proposal to implement a charitable contribution combined campaign for City of Asheville employees.

The City of Asheville participates in an annual campaign where City employees can make charitable contributions through voluntary payroll deductions or one-time gifts. The United Way is currently the only organization authorized to participate in the City's campaign and to solicit charitable contributions in our workplace.

At the September 13, 2011, Finance Committee meeting, a representative from EarthShare North Carolina (ESNC) requested that the City consider expanding its campaign to be a "combined campaign," or one that includes additional federations, which are "umbrella" organizations that have multiple independent, charitable agencies who all work on a specific area of focus as members.

The Finance Committee directed staff to gather further background information about a combined campaign with a focus on its impact on staff workload and potential costs. The Committee asked for that information to be shared City Council. The following document provides additional information about the proposed combined campaign.

This report is being provided for informational purposes only and there is no associated staff recommendation. Information on the combined campaign is below:

**How does a combined campaign work?** Based on best practices in North Carolina, the local government first develops a standard procedure for the combined campaign that defines criteria for accepting charitable organizations. The criteria used by other local governments typically requires an eligible organization to be a federation, which is a group of a minimum number of non-profit charitable organizations that have voluntarily joined together for purposes of raising and distributing money for and among themselves. Once the criteria and application process is adopted, the city would accept applications from organizations for inclusion in the campaign.

In most cases, the local government selects a participating federation to administer the campaign. The campaign administrator serves as the liaison between the city and the participating federations, prepares a combined pledge card, and coordinates with representatives from all of the included federations to participate in employee campaign meetings and activities. The city considers management proposals and selects the administrator. The city can also establish the maximum fee for administering the campaign. The fee is typically a percentage of pledges in the campaign but could be a set cost as well.

Representatives from EarthShare NC have suggested that the United Way of Asheville and Buncombe County has experience administering the combined federal campaign covering Western North Carolina and would be familiar with what is involved to administrate a combined campaign for Asheville, and may be a natural choice since it has an established local presence. EarthShare NC also serves as the administrator for the Raleigh and Cary campaigns, and has suggested that it could provide that support if needed.

The city decides to what extent staff is used to communicate the campaign. In most cases, the city utilizes staff to serve as campaign coordinators, as Asheville does now for the United Way campaign, to distribute and collect pledge cards and serve as the ambassadors for the campaign. The campaign administrator compiles all of the pledge cards to provide the city with a payroll deduction file, receives the payroll deduction check from the city, and distributes the pledges and receipts from the campaign to the participating federations for distribution to their members.

**Would a combined campaign result in additional staff workload?** From a payroll administration perspective, the process is identical to Asheville's current procedures with the United Way campaign and would not necessarily result in additional staff workload. Asheville would deduct contributions from paychecks and send a single payment to the campaign administrator. The campaign administrator is then responsible for distributing the funds to the designated federations.

**What federations typically participate in combined campaigns in North Carolina?** Examples of federations in North Carolina include EarthShare North Carolina, which is a federation of 66 member non-profits that share a mission of preserving and enhancing the natural environment. Community Health Charities is an umbrella organization for health-related charities. North Carolina Community Shares is a federation of organizations that focus on social justice. There are a number of other federations in North Carolina.

**What other local governments have a combined campaign?** The Towns of Carrboro, Chapel Hill, Cary and Hillsborough; the Cities of Durham, Raleigh and Greensboro; and the counties of Guilford, Mecklenburg, Orange and Wake currently offer a combined campaign. The State of North Carolina also offers a State Employees Combined Campaign.

**What would be the timeline for launching a combined campaign?** If the combined campaign proposal is approved by City Council, staff would develop a standard operating procedure, including criteria for charitable organizations and an application process, for City Council consideration in winter 2012. Designating the campaign coordinator and implementing the application process would take place in spring/summer 2012. The combined campaign would be launched in late 2012 for payroll deductions in calendar year 2013.

Vice-Mayor Newman said that he and Councilman Bothwell and Councilwoman Manheimer met informally with representatives from the United Way and EarthShare to discuss some of the concerns for providing a public health environmental component to the workplace giving at the City. It was the consensus amongst the Council that it would be beneficial to provide some additional time for staff, United Way and EarthShare to continue this discussion and see if there is an approach which both groups could be supportive of going forward. He recommended that Council continue this matter until November 22.

Mayor Bellamy was under the impression that the groups wanted 60 days to allow them ample time for all issues to be addressed.

When Councilman Bothwell asked if there was a consensus of Council for this to move forward so as to avoid unnecessary City, United Way and EarthShare staff time if this idea is not something Council would be interested in, Councilman Russell said that the Finance Committee, made up of three members of Council, were supportive.

Councilman Russell moved to continue this matter until December 13, 2011. This motion was seconded by Councilman Bothwell and carried unanimously.

**B. PACK PLACE BOARD OF TRUSTEES**

Vice-Mayor Newman said that the Boards & Commissions Committee discussed appointing Councilwoman Manheimer to replace Councilman Russell on the Pack Place Board of Trustees. Councilwoman Manheimer is interested in serving; however, wanted additional time to do some research on whether there would be a conflict of interest since her law firm has done some work with the Art Museum. He asked that this matter be continued until November 22.

Mayor Bellamy said that all boards that have Council assignments will be discussed when the new Council takes office in December. She felt that would be the appropriate time to make the replacement.

**VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:**

Rev. Christopher Chiaronmonte felt the City has chased of f the homeless by harassment.

Mr. H.L. Carlyle spoke about the need for integrity and felt that Ms. Samatha Bowers, an employee of the Housing Authority, has integrity.

Dr. Milton Byrd said that Council has to stand their ground as representatives of due process and democracy. And, at the same time, they must have the willingness to stand up as leaders and say what needs to be said as leaders.

Mayor Bellamy reminded the public that City Council has cancelled their November 8, 2011, meeting and encouraged the public to vote. In addition, she said that the City of Asheville will not be holding an independent Veterans Day event, but encouraged the public to participate with the VA Hospital's event.

**VIII. ADJOURNMENT:**

Mayor Bellamy adjourned the meeting at 8:59 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

466

Tuesday – November 22, 2011 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and Deputy City Clerk Philip Kleisler

Absent: None

**PLEDGE OF ALLEGIANCE**

Mayor Bellamy led City Council in the Pledge of Allegiance.

**INVOCATION**

Councilman Davis gave the invocation.

**I. PROCLAMATIONS:**

**A. RECOGNITION**

Mayor Bellamy was pleased to recognize Robert W. Oast Jr., who has been Asheville's City Attorney for 15 years. On behalf of City Council, she thanked him for his service.

**II. CONSENT AGENDA:**

At the request of Councilman Smith, Consent Agenda Item "C" was removed from the Consent Agenda for discussion and/or an individual vote.

At the request of Mayor Bellamy, Consent Agenda Item "H" was removed from the Consent Agenda for discussion and/or an individual vote.

**A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON OCTOBER 25, 2011**

**B. RESOLUTION NO. 11-223 - RESOLUTION SETTING A PUBLIC HEARING ON JANUARY 10, 2012, TO CONSIDER THE PERMANENTLY CLOSING OF A PORTION OF COLLEGE STREET**

Summary: The consideration of a resolution of intent to permanently close a portion of College Street, and setting a public hearing on January 10, 2012.

N. C. Gen. Stat. sec 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, adjacent property owner Buncombe County has requested the City of Asheville to permanently close a portion of College Street, being a portion of College Street running with the Buncombe County property line on the Southern sidewalk of College Street beginning in the front of the existing Buncombe County Courthouse and toward the old Biltmore Press Building.

The proposed permanent closure of a portion of College Street has been placed on the Greenway Commission's agenda at their regular meeting on December 8, 2011.

This closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties
- Buncombe County will be installing the sidewalk within the remaining College Street right of way.

Con:

- None

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt the resolution of intent to close a portion of College Street, and setting a public hearing on January 10, 2012.

**RESOLUTION BOOK NO. 34 – PAGE 195**

**C. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH COPELAND HOLDINGS, LLC FOR SECURITY SERVICES IN THE CITY'S PARKING GARAGES**

This item was removed from the Consent Agenda for discussion and/or an individual vote.

**D. RESOLUTION NO. 11-224 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT A NON-MATCHING GRANT FROM THE N.C. DEPT. OF CRIME CONTROL AND PUBLIC SAFETY FOR THE PROCUREMENT OF EQUIPMENT FUNDS TO BE USED BY HAZARDOUS MATERIALS REGIONAL RESPONSE TEAM 6 – ASHEVILLE**

**ORDINANCE NO. 4030 - BUDGET AMENDMENT FROM THE N.C. DEPT. OF CRIME CONTROL AND PUBLIC SAFETY FOR THE PROCUREMENT OF EQUIPMENT FUNDS TO BE USED BY HAZARDOUS MATERIALS REGIONAL RESPONSE TEAM 6 – ASHEVILLE**

Summary: The consideration of (1) a resolution authorizing the City Manager to accept a non-matching grant from the N.C. Dept. of Crime Control and Public Safety, Division of Emergency Management, for the procurement of equipment and training funds to be used by Hazardous materials Regional Response Team 6 – Asheville; and (2) the associated budget amendment, in the amount of $25,000.

The U.S. Department of Homeland Security and the Office of Domestic Preparedness has made funds available through State Homeland Security Grant Number: FY2011-SS-00119-S01 to implement the State Homeland Security Strategy. The strategy identifies the NC Hazardous Materials Regional Response Teams (RRT) as an integral component of North Carolina's preparation and response to manmade and natural emergencies and disasters. The purpose of the grant is to purchase specialized equipment to be used on-scene and to prepare for threatened or actual weapons of mass destruction or domestic terrorists' attacks or major disasters and to train for such events.

There are seven Regional Response Teams (RRT) strategically located throughout the state. Asheville Fire and Rescue hosts one of the seven state funded teams - RRT 6. The team responds to hazardous materials incidents in the twenty westernmost counties of North Carolina.

Each of the seven RRTs will receive an equal amount of non-matching funding and each will procure comparable equipment. The equipment consists of updated existing equipment and for training. The grant is non-matching and all equipment provided through this grant will become the property of the Asheville City Government. This action also complies with the Strategic Operating Plan by better equipping the Hazardous Materials Team with upgraded equipment; this grant will assist in making Asheville a safer city, based on appropriate metrics for similarly sized cities.

The City Council Public Safety Committee reviewed this item on their November 15, 2011, agenda and recommended approval.

Pros:

- The Department of Crime Control and Public Safety, Division of Emergency Management, will provide $25,000 in non-matching funds for the purpose of upgrading Asheville and Western North Carolina's terrorism response capabilities.
- The equipment is state of the art and will better address the risk of terrorist's attacks and hazardous materials incidents.
- All statewide regional response teams will be comparably equipped and interoperability will be realized should an event require the resources of additional teams.
- This equipment is immediately available to Asheville residents and businesses. This level of equipment would most likely not be able to be obtained through the city's general budget process.
- Firefighter and citizen safety will be enhanced.

Con:

- The City of Asheville will be responsible for maintenance and upkeep of the equipment.

There is no fiscal impact associated with this grant, as it is non-matching.

City staff recommends that City Council (1) authorize the City Manager to accept the non-matching grant from the NC Department of Crime Control and Public Safety, Division of Emergency Management, to enhance AFD's capabilities to protect Asheville and Western North Carolina; and (2) adopt the associated budget amendment.

**RESOLUTION BOOK NO. 34 – PAGE 196**
**ORDINANCE BOOK NO. 27 – PAGE 214**

**E. RESOLUTION NO. 11-225 – RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A LETTER OF AGREEMENT WITH THE LAND-OF-SKY REGIONAL COUNCIL FOR A BROWNFIELDS ASSESSMENT FUNDING GRANT**

Summary: The consideration by Council to authorize the City Manager to sign a letter of agreement to verify that the City of Asheville, NC, agrees to be a member of the Regional Brownfields Initiative Coalition for the purpose of applying for and the subsequent award of a US Environmental Protection Agency (EPA) Brownfields Assessment Coalition Grant, and that the Land of Sky Regional Council of Government (LOSRC) will be the lead member of the Coalition for the purpose of the grant application and subsequent award.

The LOSRC submitted a Brownfields Assessment Grant application to EPA on behalf of the City of Asheville in 2007; the program was successfully funded in the amount of $400,000, as was a separate regional (four-county) grant application. Land of Sky, using the same strategy, submitted separate and unsuccessful grant applications on behalf of the City of Asheville and the region in 2010. LOSRC staff then researched and analyzed current best practices for EPA programs and recommended that applying for a Coalition grant instead of separate grants be

considered by the LOSRC Board. At their October 2011 meeting, The LOSRC board voted to approve LOSRC staff submittal of a Coalition application, and for LOSRC staff to pursue the signing of Letters of Agreement with each of the proposed Coalition partners.

This action aligns with Council's Strategic Goals related under Job Growth and Community Development, specifically Goal 1, objective 3: partner in regional economic development strategies and Goal 2, objective 1: Promote sustainable, high-density, infill growth that makes efficient use of existing resources.

Pros:

- City promotes sustainable infill development through re-use of commercial properties
- City promotes safety of citizens through potential clean up of hazardous materials
- City re-establishes brownfield redevelopment assistance as part of the toolbox of incentives for sustainable development

Cons:

- None noted

No fiscal impact. Any grant awards will be received and administered by Land of Sky Regional Council of Government. Program participation expected of City staff includes only existing resources.

Staff recommends Council authorize the City Manager to sign the letter of agreement.

**RESOLUTION BOOK NO. 34 – PAGE 197**

**F. ORDINANCE NO. 4031 - ORDINANCE AMENDING SECTION 12-42 TO CLARIFY WHERE CONCEALED HANDGUNS ARE PROHIBITED ON CITY PROPERTY**

Summary: The consideration of an ordinance, in response to new State law, clarifying where concealed handguns are prohibited in City recreational facilities.

Pursuant to State law, N. C. Gen. Stat. sec. 14-415.23, North Carolina local governments since 1994 have been able to prohibit the carrying of concealed handguns in all government "buildings, appurtenant premises, and parks." In the 2011 session, the General Assembly adopted Session Law 2011-268, which limits the authorization to prohibit concealed handguns in parks. The new law does allow municipalities to prohibit concealed handguns in "recreational facilities", if the municipality adopts an ordinance to prohibit, by posting, the carrying of a concealed handgun in or on municipal recreational facilities (defined in the new law as including only playgrounds, athletic fields, swimming pools and athletic facilities) that are specifically identified by the unit of local government.

Currently the City has an ordinance, City Code Sec. 12-42, that prohibits the possession of all firearms or weapons in City parks or facilities. This ordinance (Ordinance No. 2121) was adopted by City Council on June 21, 1994. Per the ordinance language, the City Council adopted the ordinance because it had, "determined that it should prohibit firearms or weapons in city parks or other facilities in order to promote public safety." The effect of the new law will be to pre-empt the current ordinance as it applies to the prohibition of concealed handguns in parks. All other provisions of this ordinance would remain in effect.

In order to bring the City's ordinance into compliance with the new law, and to prohibit the possession of concealed handguns in City recreational facilities, as allowed by the new law, several revisions are necessary. These proposed revisions will ensure, to the greatest extent possible under the new law, that the City's policy, as articulated in the 1994 ordinance, of promoting public safety as it relates to the possession of firearms or weapons on or in City owned property, will remain in place. Concealed handguns would continue to be prohibited from certain

recreational facilities, and their appurtenant premises, as identified and defined by the City's Parks Department.

While most of the park areas/facilities clearly fall within the statutory definition of playgrounds, athletic fields, swimming pools and recreational facilities, some areas may fall outside of these definitions, i.e. open park areas that do not clearly have any "facilities" associated with them. This may present some issues in terms of enforcement and we are continuing to review the law.

There are actually very few changes necessary in order to revise the current ordinance language in order to bring it into compliance with the new law and to add a provision prohibiting concealed handguns in recreational facilities.

(a) In order to make the ordinance compliant with the new law, Sec. 12-42 (a) which prohibits firearms and weapons would need to be modified to state that the prohibition does not apply to concealed handguns in parks.
(b) If a new ordinance prohibiting concealed handguns in recreational facilities is adopted, a new section would need to be added, Sec. 12-42 (b), to specifically identify the recreational facilities to which this ordinance would apply.
(c) Additionally, the definition of "recreational facility" would need to be added to Sec. 12-27, "Definitions," and
(d) The term "park" would need to be replaced with the term "recreational facility" in Sec. 12-43, "Posting of Signs," and Sec. 12-44, "Location of Signs."

This new law is effective on December 1, 2011. If Council desires to maintain a prohibition on concealed handguns in City recreational facilities, action is needed.

This matter was presented to the Public Safety Committee on November 15, which supported the proposed revisions, and directed that they be sent to Council for action.

This action complies with the City Council Strategic Operating Plan for Asheville to be safe and secure

Pro:

- Continues, to the fullest extent allowed by law, the prohibition of concealed handguns on City property.

Con:

- Potential difficulty in enforcement.

There will be some cost associated with the posting of new signs in areas that may not have them now. Estimated costs are $1,000.

Adoption of the ordinance is recommended.

In response to Mayor Bellamy, City Attorney Oast said that state law was amended to provide that concealed handguns could be carried in City parks, but if City Council designates certain facilities, those would be areas where handguns could be prohibited. He said that he will review the federal law recently passed to make sure that Asheville is in compliance or if further changes are necessary.

Councilman Bothwell suggested we consider a resolution, similar to Raleigh, disagreeing with the state legislature.

## G. MOTION SETTING A PUBLIC HEARING ON DECEMBER 13, 2011, TO CONSIDER AMENDMENTS TO THE 2010 AND 2011 CONSOLIDATED ANNUAL ACTION PLANS

Summary: The consideration of a motion to set a public hearing on December 13, 2011, for substantial amendments to the 2010-2011 and 2011-2012 Consolidated Annual Actions Plans for CDBG and HOME.

Three Action Plan Amendments are proposed.

1. Homeward Bound requests an amendment to increase their $55,203 2011-2012 CDBG Supportive Housing grant by $28,000. This request is made to allow for a full-time case manager position to be focused on the permanent housing program being run in collaboration with the Asheville Housing Authority.

   Homeward Bound employs case managers to provide direct assistance to chronically homeless persons to allow them to access and retain affordable housing. The partnership with the Housing Authority gives homeless persons priority for public housing and housing choice vouchers. This program has been recognized both by HUD and by the US Interagency Council on Homelessness as a national best practice. Evidence of its effectiveness has been the Point-In-Time Count reduction of the numbers of chronically homeless persons in Asheville, and the 93% retention rate in permanent housing for the persons who have been assisted by this program. This amendment would allow for service to be provided to an additional 5-10 persons currently experiencing chronic homelessness. Sufficient CDBG funds are currently held in contingency to amend this grant at the level requested.

2. Housing Assistance Corporation requests an amendment to increase their $350,000 2010-2011 HOME grant award for their Oak Haven development by $95,000.

   HAC is constructing 56 LIHTC units in Hendersonville for elderly and disabled persons. The project is now under construction. Prior to construction, updated project pricing created a $291,000 finance gap. In order to make up the gap, HAC reduced the project cost by $90,000, and deferred $200,000 of its development fee. HAC seeks $95,000 of additional funding to recover a portion of the deferred development fee. The project would still require a deferred fee of $106,000. Deferred fees affect the sustainability of the organization. The Consortium has $95,000 in available funds, due to the cancellation of the WCCA Rosman development.

3. Western Carolina Community Action is requesting approval to repurpose $15,400 of their 2010-2011 HOME Downpayment Assistance Program grant to Tenant Based Rental Assistance (TBRA).

   WCCA was awarded $23,100 of HOME funds in 2010-2011 to provide downpayment assistance loans to four households in Transylvania County. Transylvania County provided $7,700 in matching funds. Since then, four WCCA clients have been able to become homeowners through the USDA 502 direct lending program without the necessity of using DPA funds, and one additional client has been approved by USDA. WCCA has one loan of $7,000 pending. There are no additional clients seeking assistance at this time. There is no program in Transylvania County that provides security deposit, utility deposit and other upfront rental assistance to low income renters. Ashville's TBRA program has proven very effective in helping low income households secure affordable rental housing, and by so doing house persons who have experienced or are in danger of homelessness. WCCA has operated the HUD Housing Choice

Voucher program in Transylvania County for 35 years, and is a consistent "high performer" in this program.

The draft Action Plan Amendments directly relate to the Council's Strategic Goal of "Affordable."

The Housing and Community Development Committee and Asheville Regional Housing Consortium agree with this recommendation to set the public hearing and amend the plans.

Pro:

- The activities are all eligible activities under CDBG and HOME program rules. These proposed amendments allow for efficient use of funds in a timely fashion, and will assist in meeting overall program goals. The funds will also assist the sponsoring organizations viability and ability to meet community needs.

Con:

- There are none.

The proposed amendments use funds already available through the CDBG and HOME programs. There is no increase in administrative responsibility for the City. No City General Funds are allocated for these programs.

Staff recommends that Council move to set a public hearing on December 13, 2011, for consideration of amendments to the 2010 and 2011 Consolidated Annual Action Plans.

**H. RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT A GRANT FROM THE N.C. DEPT. OF ENVIRONMENT & NATURAL RESOURCES FOR RESIDENTIAL RECYCLING CARTS**

**BUDGET AMENDMENT FROM THE N.C. DEPT. OF ENVIRONMENT & NATURAL RESOURCES FOR RESIDENTIAL RECYCLING CARTS**

These items were removed from the Consent Agenda for discussion and/or individual votes.

**I. ORDINANCE NO. 4033 - BUDGET AMENDMENT TO REALLOCATE CAPITAL IMPROVEMENT FUNDS FROM THE TRANSIT BUS SHELTER PROJECT TO THE TRANSIT GARAGE ROOF REPAIR PROJECT**

Summary: The consideration of a budget ordinance amendment, in the amount of $35,000, to move previously approved Capital Improvement Funds from the Transit bus shelter project to the Transit garage roof repair project.

In FY 2009-10, City Council approved a capital project budget for the transit operations garage roof repair in the amount of $125,000. The purpose of the project is to repair the roof at the transit operations garage. The subject building, which was constructed in 1971, is a one-story steel and masonry structure containing about 12,600 square feet. The current roof is an EPDM ballasted roof that was installed in 1985. The membrane on the roof has deteriorated to the point that leaking is occurring in the parking shed, vehicle maintenance area, and offices during rain events. This leaking not only creates a safety hazard with the electrical wiring and equipment in the garage but it has also caused the wood to rot around the skylights and flashing at the mechanical units.

The existing insulation has also been damaged and is therefore not energy efficient. It needs to be replaced in the areas where the water damage has occurred. We do not know at this time if any major structural damage has occurred.

The project would replace the existing roof with a new EPDM mechanically adhered roofing system, which would meet current energy conservation requirements and it would provide savings in energy consumption.

The City issued a Request for Qualifications and hired REI Engineers, Inc. (REI) on April 14, 2011, as the engineering firm to design, develop the technical specifications, and manage the construction project. REI developed the specifications and the city released the construction bid on July 22, 2011. The bids received were higher than the budget available and the bid was not awarded.

Even when REI developed new specifications to bid the project again, the existing budget of $125,000 was not enough to make the repairs. Therefore, city staff is requesting the reallocation of $35,000 in the CIP budget from the previously approved bus shelter project to the roof project to be able to complete the necessary roof repairs. The total cost of the project will now be $160,000. Federal Funds will provide 80% of the cost, which equates to $128,000 and the remaining $32,000 will come from the local match.

The project is scheduled to take place during the next eight months.

This action complies with the City Council 2011-12 Strategic Operating Plan within the fiscal responsibility focus area by operating the City of Asheville to the highest levels of fiscal responsibility.

Pros:

- Provides needed maintenance to an aging facility.
- Helps to make the building safe and more energy efficient which should generate savings in energy consumption.
- Federal Funds will provide 80% of the total project cost, which equates to $128,000.

Cons:

- The total cost of the project is $160,000.
- The City's share of the total cost of the project is $32,000.

There is no net financial impact in the Transit Capital Fund. Staff is reallocating existing capital funds to cover the increased cost of the garage roof repairs.

Staff recommends that City Council adopt a budget ordinance amendment to reallocate $35,000 from Federal Funds and Capital Improvement Program Funds to build bus shelters to the project budget for the Transit Operations Garage roof repair project.

**ORDINANCE BOOK NO. 27 – PAGE 222**

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Russell moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

**ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES**

**C. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH COPELAND HOLDINGS, LLC FOR SECURITY SERVICES IN THE CITY'S PARKING GARAGES**

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Copeland Holdings, LLC for security services in the City's parking garages.

The City of Asheville, through the Parking Services Division, currently operates three parking garages; Civic Center, Rankin Avenue, and Wall Street. A fourth garage, Lexington Avenue Parking Garage will open on or about July 1, 2012. The Parking Services Division uses a combination of City employees and contract security officers to provide security and customer assistance in the garages. Generally, City employees work during the business day and early evenings while contract security is on duty during late nights, weekends, and holidays.

Contracts for security are in effect for three years and the current contract expires on November 30, 2011. In September 2011 the Parking Services Division requested quotes for service from interested vendors resulting in 20 vendors responding. Copeland Holdings, LLC provided the lowest price for the service. Copeland Holdings, LLC, is headquartered in Alpharetta, Georgia, and they have a district office in Burnsville, N.C. On a normal week, a total of 205 hours of security services will be needed. In addition, the Parking Services Division will request additional security support during periods of high demand; for example, Bele Chere, Southern Conference Tournament, Moogfest, employee vacations, or large concerts at the Civic Center. The total cost of the three-year security contract will be $375,000.00 but will not exceed $125,000.00 per fiscal year.

This action complies with the City Council Strategic Operating Plan in that it provides safe facilities for residents and visitors to park in the most cost effective manner.

Pros:

- Provides safe facilities for residents and visitors to park in.
- Using contract security is the most cost effective manner to augment the Parking Services Division's security requirements.
- Achieves the City of Asheville's assurances to its partners at 51 Biltmore that adequate security will be maintained in the Lexington Avenue Parking Garage.

Con:

- Total cost of $375,000.

The necessary funds are already budgeted in the Parking Services Fund's Operating Budget for FY 2011-12.

City staff recommends that City Council adopt a resolution authorizing the City Manager to sign a three-year contract with Copeland, Holdings LLC to provide security services in the City's parking garages at a total cost of $375,000.00; not to exceed $125,000.00 per fiscal year.

Councilman Smith said that Copeland pays their employees $8.00/hour, but the City could provide the service for $137,000 a year. He felt the $12,000 difference is worth further investigation for this service to be performed in-house as it would align with the City's mission of providing living wages.

At Mayor Bellamy's suggestion, Councilman Smith moved to have the Finance Committee review at their next meeting in January whether to enter into this contract or to bring the service in-house. This motion was seconded by Vice-Mayor Newman and carried unanimously.

Director of Transportation Ken Putnam said that the current contract expires at the end of November; however, he said we can do a short-term contract.

**H. RESOLUTION NO. 11-226 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT A GRANT FROM THE N.C. DEPT. OF ENVIRONMENT & NATURAL RESOURCES FOR RESIDENTIAL RECYCLING CARTS**

**ORDINANCE NO. 4032 - BUDGET AMENDMENT FROM THE N.C. DEPT. OF ENVIRONMENT & NATURAL RESOURCES FOR RESIDENTIAL RECYCLING CARTS**

Summary: The consideration of (1) a resolution authorizing the City Manager to accept a grant from the North Carolina Department of Environment and Natural Resources (DENR) to purchase 95 gallon roll-carts for the residential curbside recycling program; and (2) a budget amendment, in the amount of $75,000, for said grant.

As part of the FY 2011-12 Capital Improvement Program, City Council approved a $1.5 million budget for the purchase of 95 gallon recycling containers. The purchase of the new containers was to be fully funded with debt proceeds. After the budget was adopted, staff applied for and was awarded a grant to help offset the cost of purchasing the new 95 gallon recycling carts. The grant award is for the maximum allowable amount of $75,000. Use of these funds will go exclusively to the purchase of new carts. Receipt of this grant will allow the City to reduce the amount of funds borrowed for the purchase of the carts.

This action complies with City Council's Strategic Operating Plan in the following ways: (1) Implement ways to reduce city-wide solid waste; and (2) Identify resources for strategic initiatives and create meaningful performance measures for programs and services.

Pros:

- Support financial responsibility of the recycling program
- Reduces the amount of debt proceeds required to fund the 95-gallon cart purchase

Con:

- None

As noted above, the receipt of this $75,000 grant will lower the amount of debt that the City will incur for the purchase of the 95-gallon recycling carts.

City staff recommends City Council adopt (1) a resolution authorizing the City Manager to accept a grant from DENR to purchase 95 gallon roll-carts for the residential curbside recycling program; and (2) a budget amendment, in the amount of $75,000.

In response to Mayor Bellamy, Director of Finance and Management Lauren Bradley said that the $75,000 will reduce the amount of debt that we issue for the roll-carts.

Mayor Bellamy said that she did not support the new recycling program for $1.5 Million, but since we are reducing that amount by $75,000, she would support these motions to help off-set what the tax-payers will have to pay in debt service.

Vice-Mayor Newman moved to adopt Resolution No. 11-226. This motion was seconded by Councilman Russell and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 198**

Vice-Mayor Newman moved to adopt Ordinance No. 4032. This motion was seconded by Councilman Russell and carried unanimously.

## III. PRESENTATIONS & REPORTS:

### A. PRESENTATION OF THE EXTERNAL AUDIT OF THE FISCAL YEAR 2011 COMPREHENSIVE ANNUAL FINANCIAL REPORT

Mr. Brian Broom, Director of Dixon Hughes, PLLC, summarily reviewed with Council the annual audit. He said that the following is the audit and financial statement summary: "Our report for the 2011 audit expresses an unqualified opinion on the fair presentation of the basic financial statements in all material respects, in conformity with accounting principles generally accepted in the United States of America. Our report can be found on Page 1 of the Comprehensive Annual Financial Report (CAFR). Our reports on compliance and internal control, in accordance with Government Auditing Standards, OMB Circular A-133, and the State Single Audit Implementation Act, disclosed one material weakness in internal controls and no instances of non-compliance in the administration of federal and state awards programs. As noted in the City's Corrective Action plan, changes to accounting procedures were implemented during the year which resulted in the City's staff identifying and correcting the material weakness. Our compliance reports and a summary of the results can be found in the Compliance Section of the CAFR. Also, they noted some areas for improvement in the City's accounting function that they have communicated to management in a separate letter dated October 28, 2011." He was pleased to report that the City's fund balance policy is 15% of operating expenditures and that the City's available fund balance for 2011 is 15.2%. He then briefly reviewed the summary of property tax collections and analysis of debt service.

Director of Finance & Management Services Lauren Bradley briefly provided Council with some of the following key highlights regarding the audit from staff's perspective.

***The City's financial statements, internal control, stewardship, accountability and program compliance with federal and state awards continue to receive high marks.***

The independent audit firm is required to conduct an analysis of the City's compliance with various federal and state laws, regulations, contracts and grant agreements. Dixon Hughes reviewed the City's accounting and administrative controls over a wide range of financial transactions such as cash, investments, revenues, receivables, expenditures, payroll, property, debt and grant programs.

Dixon Hughes found no instances of material noncompliance in connection with applicable statutes and regulations regarding expenditures of major federal and state financial assistance programs. This favorable report is due to the significant efforts of City staff and finance department employees in developing and maintaining strong internal financial controls.

There was one material weakness noted in internal control over financial reporting. The City restated beginning net assets in Governmental Activities and Business-type Activities to correct errors in construction in progress and the net OPEB obligation. The necessity of these corrections was discovered as a result of staff's efforts to institute new procedures in connection with capital asset management and control. Those efforts included the development of procedures designed to capture capital expenditures prior to their incurrence and the development of multifunctional teams comprised of budget, finance and the affected departments to improve communication in connection with the recording of capital expenditures and project status. Capital asset identification reviews now occur periodically throughout the fiscal year. The net OPEB obligation restatement related to the methodology of calculating employer contributions to the retiree health plan. City staff, after consultation

with its independent actuaries, determined that the previous methodology understated the employers' contribution resulting in a correction that favorably impacted the City's net assets.

***The independent external auditor gives the City a "clean" opinion on financial statements.***

Dixon Hughes has provided the City with an unqualified, or "clean," opinion that the financial statements are fairly presented in conformity with generally accepted accounting principles. This opinion is the highest form of opinion that the external auditors can express on the presentation of the City's financial statements.

***Timeliness of audit completion significantly improved.***

As of October 28, 2011, the City had fully completed the audit process and was ready to submit its Comprehensive Annual Financial Report (CAFR) to the Local Government Commission (LGC) in compliance with its published October 31 deadline for submission, as well as City Council's direction to meet the deadline. As illustrated by the table below, completion and delivery of the CAFR by October 28 with presentation to be made at the November 22 City Council meeting is a significant improvement in timeline since 2006. Thanks go to the Finance Committee for its leadership throughout the audit process and to staff and Dixon Hughes for working diligently during the last several months to meet the schedule.

| Fiscal Year | Opinion Letter | Council Presentation |
|---|---|---|
| FY2011 | 10/28/2011 | 11/22/2011 |
| FY2010 | 12/28/2010 | 1/25/2011 |
| FY2009 | 11/12/2009 | 1/12/2010 |
| FY2008 (2) | 12/30/2008 | 2/10/2009 |
| FY2007 (1) | 10/31/2007 | 1/8/2008 |
| FY2006 | 10/27/2006 | 12/12/2006 |

(1) SAS No. 103
(2) SAS No. 104 - No. 111
SAS - Statement on Auditing Standards issued by the AICPA
Relates to risk assessment standards; effect of delaying the opinion letter date

***General Fund financial results are as predicted - breakeven.***

Due to a continued soft economy and uncertainty surrounding revenue projections, City staff implemented various savings strategies throughout FY 2011 to ensure the best possible General Fund operating results at year end. While revenues came in under budget, staff made efforts to control expenditures. As a result, revenues over expenditures were $1,870,000.

During the year, $4,747,000 was appropriated from different categories of General Fund fund balance, including appropriations for FY 2010 encumbrances, the transfer to the Festival Fund to address its cumulative deficit net asset position and thereby close the fund, and other appropriations for high priority expenditures. For the year, including transfers out of $4,164,000, expenditures exceeded revenues by $2,294,000. Of the $2,294,000, the transfer to the Festival Fund and the allocation for City Hall repairs represented $2,000,000.

She showed a table of the General Fund revenues, expenditures and changes in fund balance for FY 2011.

***General Fund unassigned fund balance has improved and meets the 15% policy threshold.***

Unassigned fund balance improved year over year, up from $12,319,000 in FY 2010 to $13,176,000 at the end of FY 2011. For FY 2011, this amount represents 15.2% of expenditures and transfers to other funds. The improvement in undesignated fund balance can be attributed to several factors. One of those factors includes improved financial performance in the Civic Center Fund, thereby permitting the General Fund to avoid making an operating transfer to the Civic Center Fund to address the fund's operating deficit. The amount budgeted for this subsidy in FY2011 was $392,594; the amount was not transferred. Another factor that contributed to the improved fund balance position was a transfer back to the General Fund in the amount of $275,000 from the Special Projects/Grants Fund as a result of project savings in those funds. The final factor contributing to a higher fund balance related to the staff's effort at conducting a thorough review of outstanding contracts and purchase orders which resulted in the liquidation of more than $246,000 in encumbrances that had been reserved at FY2010 year-end.

City Council has established a threshold of 15% as the minimum amount necessary to support the General Fund's working capital levels. The FY 2011 fund balance level meets this threshold. She showed a table which reflects the components of fund balance that appear in the CAFR.

***Financial performance as predicted or better than budget in nearly every proprietary fund.***

Despite the declining economy, financial results in most of the City's business-type activities experienced positive net income for FY 2011. Exceptions include the Golf Fund and the Festival Fund, areas in which the City has or will restructure operations to improve financial results. Within the Internal Service Fund, it is worth noting that the revenues exceeded expenditures in the Health Care program by $7,189, illustrating that the changes to benefits implemented in FY 2011 allowed the program to essentially break even. She showed a table which summarized the operating activity in these funds.

***Fund balance levels in some proprietary funds may allow for enhanced capital investment in FY 2012-2013.***

In September 2011, City Council adopted fund balance targets for all funds as part of its Financial Policy. At the end of FY 2011, four enterprise funds exceeded the established fund balance targets. It is staff's recommendation that City Council consider appropriating a portion of these funds for identified capital needs in the FY 2012-2013 budget cycle. She showed a table which illustrates year over year changes in fund balance for the enterprise funds as well as a comparison to the adopted fund balance targets.

We are pleased to present the audit and look forward to continuing to improve the City's financial reporting and planning efforts. We would also like to express our appreciation to the numerous city employees who contributed to successful financial management in FY 2011, and to those employees, especially in the Finance Department, who worked tirelessly on the audit process.

The City Council Finance Committee received monthly reports on the audit process since summer 2011.

This action supports the City of Asheville's strategic goal to operate the City to the highest levels of fiscal responsibility.

Pros:

- City received a "clean" opinion on financial statements and high marks on internal control, stewardship, accountability and program compliance with federal and state awards.
- Timeliness of audit completion significantly improved.
- General Fund undesignated fund balance meets City Council's 15% policy.
- Financial performance in nearly all funds as predicted or better than budget.
- Fund balance levels in some enterprise funds may allow for additional capital investment.

Con:

- None noted.

Staff recommends that City Council accept the FY 2011 Comprehensive Annual Financial Report.

In response to Mayor Bellamy, Ms. Bradley felt the single largest thing we can do to position ourselves to improve our credit rating is to work toward fully funding our Other Post Employment Benefit Fund obligation and consider discontinuing retiree health care insurance for future employees. She felt that would be looked at very favorably by the credit rating agencies.

It was the consensus of Council to accept the Comprehensive Annual Financial Report.

**B. THE WILMA DYKEMAN RIVERWAY IN ACTION UPDATE**

Ms. Karen Cragnolin, Executive Director of RiverLink, said the Wilma Dykeman Riverway Plan is a 17 mile plan that looked at where the tax and population base is for the entire watershed and then looked at the fact that we had two rivers running through our City. The 7 district plan was adopted by City Council in 2004. The Plan has three strategies for economic development. In 2004, they looked at (1) road costs per mile - $2 million a mile, 17 miles @ 2 million = $34 million (Can be paid for with state and federal highway funds); (2) Current tax base (Northern City Limits to Fairview Road, exclusive of Sayles Bleachery) (a) Current tax value of land - $17 million; (b) Current tax value of improvements (buildings) - $11 million for a total of $28 million; and (3) Tax Base Enhancement Estimated *(Northern City Limits to Fairview Road, exclusive of Sayles Bleachery)* (a) Estimated single story redevelopment = $106 million; and (2) Estimated Mixed Use vertical redevelopment in accordance with plan = $214 million.

The Plan looks at recreation, arts & crafts and wellness.

Economic impact for recreation is (1) Tourism $16.5 billion industry (a) 49 million visitors primarily for natural resources; (b) Fishing – commercial and recreations - $1 billion; and (c) Paddle Sports - $100 million; (2) 60 million Americans (18 years and older) bicycle each year; (3) Bicycling contributes $133 billion to the U.S. economy; (4) Supports nearly 1.1 million jobs across the U.S.; (5) Generates 17.7 billion in annual federal and state tax revenue; (6) Produces 53.1 billion annually in retail sales and services; (7) $6.2 billion in bicycling gear sales and services; (8) $46.9 billion in bicycling trip-related expenditures; (9) Provides sustainable growth in rural communities; and (10) $4.3 billion 3.4 million participants.

She showed graphics and photographs of things happening around Pearson Bridge and the historic Pearson Bridge. She also spoke about the Easy Street Discount Tires & Auto Service store being converted to an outdoor adventure building. They have received several applications for utilizing the building for bike rentals/charter fishing trips/camping equipment, etc. Rentals would include (1) bicycles (a) a wide selection of road bikes and mountain bikes; and (b) helmets; (2) fishing gear (a) rod and reel; (b) fly rods; (c) landing net; (d) bait; and (e) pads; (3) boats (a) high-quality flatwater and whitewater boats in a variety of sizes and styles (a) stand up paddleboards; (b) personal floatation devices; (c) helmets; (d) skirts; (e) paddles; (f) dry bags; (g)

bilge pump; and (h) paddle floats; and (4) camping equipment (a) tents; (b) sleeping bags and pads; (c) stoves; (d) water filter; (e) dining fly; (f) head lamps; and (g) compass and maps.

She said that several years ago the City purchased .47 acres at 706 Riverside Drive designated River District. She said that the operators for the outdoor recreation center really need that property to park vehicles, locate boats, stack bicycles, etc. She asked if the City would transfer that .47 acre ($5,000 tax value) property to RiverLink. The Brownfields group is willing to put this property into the system as an addendum to their application as is the State hazardous waste person.

Mayor Bellamy asked Ms. Cragnolin to put their property request in writing to the City Clerk and the City will follow the normal procedures for requests of this nature.

Ms. Cragnolin was pleased to announce that the last week in April, RiverLink will be hosting the International River Management Society Conference.

**C. ABC BOARD REPORT**

Chairman of the ABC Board Charles Worley said that the Board has had its challenges over the last three months as a result of the report of the Alcohol Law Enforcement Division report on our General Manager. He said they quickly responded to that report and to the State ABC Commission concerns that were properly raised as a result of that report and there are several things to note.

First, no member of the board was implicated in that report as having participated or known about any of the actions that were going on. Those activities took place outside of the scope of the day-to-day operations of the Asheville ABC System. They did not affect the operation of the system in any way that we can discern, and finally the Board responded quickly and appropriately concerning the matters raised in that report.

He obtained a copy of that report in the late afternoon of September 22, and immediately emailed a copy to all of the other Board members. On September 27 they had a Board meeting and a thorough discussion in closed session. Following that closed session, their General Manager resigned and the Board accepted his resignation.

In order to prevent similar activities from occurring in the future, they took immediate action prior to the completion and distribution of the ALE Report and before they knew or had any hint of the contents of that report.

First, they adopted an ethics policy in January of last year which closely mirrors the ethics policy of the City of Asheville. They then adopted several other policies in June of this year - a credit card policy, a travel policy, a gift policy and a purchasing policy, all of which were designed to tighten the physical controls and ethical controls for the ABC system.

Following the resignation of their General Manager, they began the process of a search for a new general manager or CEO and that search is ongoing, but we have just hired an interim general manager. He was pleased to announce that Mr. Mark Combs, former Public Works Director of the City of Asheville, has accepted the position of interim general manager and in fact began work yesterday. Mr. Combs remains a candidate for the permanent position but they will continue and broaden the search to be sure that they have the very best applicant for that position.

He provided Council with a few statistics to show how well they have done even during the economic downturn. Over the last five years they have distributed over $3.9 million to the City of Asheville and $1.3 million to Buncombe County. That's a total of $5.2 million that they have distributed to local government in the last five years. They've weathered the opening of new

ABC systems to our immediate north - openings that have cost our Merrimon Avenue store in particular, some $250,000 per month in lost sales, and they have survived a substantial increase in the State excise tax in 2010 that cost us approximately $400,000 in profits.

He then gave a quick overview of how this year is starting out. A comparison of the 1st quarter of this year (July through September) with the same time period last year shows that Sales are up over 10%, Gross profit is up over 11%, total income before distributions - up almost 33% and Distributions to City and County are up over 38% - $207,600 vs. $150,300 last year to the City.

During the last five years they had an extensive capital improvements program. They opened a new store on Sweeten Creek Road in November of last year, a new Tunnel Road store in July of 2009 and a new Leicester store in July 2009. They opened their new Long Shoals store in 2007 and they remodeled the Merrimon Avenue store in 2007 and the Louisiana Avenue store in 2008.

They are successfully pursuing a plan to build new stores, remodel old stores and provide a pleasant customer experience. And they are funding drug and alcohol abuse programs, as well as educational programs to help prevent underage drinking. They believe that they are carrying out their mission of controlling the sale of alcoholic beverages, educating the public and the establishments that sell alcoholic beverages to prevent improper use of alcoholic beverages and underage drinking and providing a safe and pleasant environment in which the sale of alcoholic beverages take place.

Mayor Bellamy thanked Mr. Worley for the timeline and how the Board handled the issues.

Vice-Mayor Newman said that after the report came out, the Boards & Commissions Committee invited Mr. Worley to their meeting for an update. After hearing the report, they felt it would be valuable to have Mr. Worley fully update the entire Council and the public and made arrangements for him to attend this meeting.

Councilman Bothwell said it was a fact that the report listed the ABC Board as having committed offenses, listing malfeasance, embezzlement, obtaining property by false pretenses, etc. including 59 counts of store personnel accepting things of value. Given that the Board is there to oversee the operations of the agency, he asked Mr. Worley to explain how the ALE considered it serious enough to present charges against the Board members.

Mr. Worley responded that the activities that took place, took place outside the scope of the day to day activities and operations of the ABC system. He struggled to find out what they could have done to have found out what was going on and he could not find that answer. He felt that is true of any board that has an oversight responsibility – there is no way to monitor the activities of all the employees all the time to find out what they are doing. You hope that things show up that bad things are happening so you can deal with them. That did happen here and they did deal with it. In response to the author of the ALE report listing 59 counts against the ABC Board, those were not charges, but simply his observations. If you read the report, there was not a single instance of a single member of the ABC Board participating in any of those activities. He noted that there were allegations that ABC Board members carried liquor out after board meeting and that is absolutely false during the entire time he has been associated with that board. A lot were allegations but nothing substantiated.

As Mr. Worley's term on the ABC Board recently expired, he thanked City Council for allowing him to serve his two full successive terms on the ABC Board. He was also pleased that the ABC Board continues to contribute to the City.

**D. QUARTERLY REPORTS**

**Finance Committee Chair Report**

Councilman Russell, Chairman of the Finance Committee, updated Council on some major accomplishments during the second quarter of FY 2011. Those highlights are as follows:

- **FY 2011 Annual Audit**
  The Finance Committee received monthly updates on the annual audit process since July 2011. Brian Broom, head auditor for Dixon, Hughes gave positive reports on the progress of the audit and the schedule. As of this report, the audit was completed prior to the October 31 deadline. The audit is scheduled to be presented to City Council at the November 22, 2011, meeting.

- **Water Rate Analysis**
  During the FY 2012 budget adoption, City Council recommended that the Finance Committee review the adopted water rate structure and its impact on large manufacturers as well as the possibility of creating a manufacturing customer class. At the direction of the committee, staff conducted a financial analysis on the impact that an alternative implementation of proposed rates would have on overall revenue projections. The committee reviewed the analysis at the September 27, 2011, meeting. Staff will bring forward the same analysis at the November 22, 2011, City Council meeting.

- **Other Post Employment Benefits (OPEB)**
  The Finance Committee received a briefing on OPEB and the long-term financial sustainability of offering retiree health care coverage. In 2008, the Governmental Accounting Standards Board (GASB) required local governments to recognize expenses for the cost of retiree health care benefits as those benefits are earned by employees during their active service life. The committee directed staff to bring forward a plan and associated recommendations for addressing the City's OPEB liability, which will come forward to the full City Council on November 22, 2011.

- **City of Asheville Financial Policy**
  As part of the annual review process for the audit, the committee reviewed the draft of the City of Asheville's finance policy. There were two key modifications staff made to the policy: the adoption of fund balance targets for all funds and a section that clarifies when interfund transfers are made. The policy was adopted by full City Council at the October meeting.

- **Community Media Development Request for Proposals (RFP)**
  A joint city-county evaluation panel reviewed the nine submitted proposals during this RFP process. After it was the consensus of the review panel that the quality of the submissions fell below expectations, the committee recommended that the panel invite the organizations that submitted the two highest scoring proposals to make presentations to the panel. Based on those presentations, the review panel selected the highest scoring group. At the October 11, 2011, City Council meeting, due to concerns that the proposals did not meet City Council's intent, funding was not authorized.

- **City of Asheville Combined Campaign/Earthshare Proposal**
  At the invitation of a committee member, a representative from Earthshare made a presentation requesting that the City consider implementing a combined campaign that includes other charitable federations. This item went to City Council for consideration at the October 25, 2011, meeting. Council directed staff to work with Earthshare and the United Way to determine if a mutually beneficial proposal could be crafted for Council consideration.

- **Golf Course Request for Information (RFI)**
  At City Council direction, staff is exploring alternative models of golf course operations to ensure the financial viability of the service. Staff updated the Finance Committee on their efforts to develop a Request for Information from golf course providers to determine what variables should be included in a formal RFP. Responses to the RFI are due December 12, 2011, and staff expects to update City Council on progress during the third quarter of the fiscal year.

**Public Safety Committee Chair Report**

Councilman Russell, Chairman of the Public Safety Committee, updated Council on some of the following major accomplishments during the first quarter of FY 2011-12 (1) Positive recommendation from the Public Safety Committee for Mobile Food Vending Amendment to be moved to full council; the amendment was passed; (2) The Focus Deterrence/Changing Together program received a positive recommendation from the Public Safety Committee for the City of Asheville to acquire program coordination responsibilities; (3) Regional Response Team 6 (RRT 6), hosted by Asheville Fire and Rescue received a non-matching grant from the NC Department of Crime Control and Public Safety, Division of Emergency Management for the purpose of procuring equipment and training in the amount of $25,000; and (4) Firehouse Subs Safety Foundation awarded Asheville Fire and Rescue a Technical Rescue Trailer valued at $16,994.47.

In response to Mayor Bellamy about the Committee's discussion regarding cameras at an Occupy Asheville rally, Councilman Russell stated that was not discussed at their Committee. Assistant City Manager Jeff Richardson, support staff for the Public Safety Committee, recognized this was an issue that Council was hearing from the community, but the challenge last week was the shear volume of agenda items for the Public Safety Committee. He said that staff has talked internally regarding the use of cameras for a wide range of activities. It was his recommendation that at the next regularly scheduled Public Safety Committee meeting staff come prepared to present information on the use of video, best practices used throughout police departments throughout the nature, what our current use is, advantages/disadvantages, etc. and then let the Committee determine what the next appropriate next step.

Mayor Bellamy said that she would forward Mr. Richardson the e-mails she has received regarding concerns. The Committee can then address those specific questions.

**Planning & Economic Development Committee**

Councilman Davis, Chair of the Planning & Economic Development Committee, briefly updated the Council on some items the Planning & Economic Development Committee has have reviewed. Most recently, they reviewed a request from the River District Design Review Committee for a boundary and responsibilities change. He requested Council direction on whether to refer the matter to the Boards & Commissions Committee or directly to the Planning & Zoning Commission which will then come back to City Council for a public hearing.

It was the consensus of the Council to refer the matter directly to the Planning & Zoning Commission.

**Strategic Operating Plan**

Assistant City Manager Jeff Richardson said that the Asheville City Council identified short and long term goals at the February, 2011 strategic planning retreat and staff is providing its quarterly updates on progress of the five key focus areas.

City Council asked City staff to provide quarterly updates on key strategic initiatives associated with the five primary focus areas of the City's Strategic Plan. Staff has tracked projects using performance indicators and measurements through the Fiscal Year 2011-12.

Due to the significant work associated with end-of-year operations, there will not be a formal quarterly update presentation regarding the progress of the Strategic Operating Plan. However, staff provided Council with the quarterly economic indicators, and crime statistics for this quarter. The next quarterly update presentation on Council's Strategic Operating Plan is scheduled for February 28, 2012.

In addition, City Council has asked for an activity report on a quarterly basis of the Domestic Partner Registry. Since the Registry began on May 2, 2011, a total of 25 couples have registered.

At the request of Mayor Bellamy, Mr. Richardson highlighted the unemployment rate, which is good news for the community.

**Financial Report**

Budget Manager Tony McDowell provided Council with the following financial information which reflects the City's overall financial position for the fiscal year through September 2011.

*Amendments.* The General Fund budget presented in this first quarter report reflects the adopted budget of $87,645,955; along with four budget amendments approved by Council during the first quarter that totaled $492,850. A summary of the four amendments is presented below. None of the amendments involved an appropriation from fund balance.

| | |
|---|---|
| Adopted Budget | 87,645,955 |
| Budget Amendments: | |
| NCDENR Park Recycling Bin Grant | 30,000 |
| NC Arts Council Grassroots Arts Grant | 49,850 |
| Buncombe County/Changing Together Partnership | 63,000 |
| Debt-Funded Purchase of Computer Equipment | 350,000 |
| 9/30/2011 Budget | $88,138,805 |

*Revenues.* Through September 30, 2011, the City has collected $9,853,268 in General Fund revenue, which represents approximately 11.2% of the total General Fund revenue budget. There is no change in property tax estimates to report. Staff will receive updated property tax data from Buncombe County in late December or early January. Sales tax estimates also appear to be on track to meet budget. Staff is projecting that state utility tax revenue and several other smaller revenues will fall short of budget in the current year based on how those revenues came in during FY 2010-11. Because of the projected under-performance in these revenues, staff is currently estimating that *total FY 2011-12 General Fund revenue will come in under budget by $630,000 or 0.7%.*

*Expenditures.* General Fund expenditures through September 30, 2011, total $18,184,586 or 20.6% of the budget, which is typical for this point in the fiscal year. One area to note on the expenditure side is fuel expenses. Average fuel prices in the first quarter were approximately 40% higher than they were one year ago. Prices have moderated some since September, but staff will need to continue to closely monitor fuel expenses throughout the year. In order to address the projected under performance in revenues and fuel expenses, staff continues to actively pursue savings strategies as it has in previous years. *These strategies include evaluating vacancies as they occur, line item reductions, and seeking opportunities to maximize efficiency in operations. Staff anticipates being able to generate the necessary expenditure savings with these strategies to fully offset the expected revenue shortfall.*

*Fund Balance.* The City ended FY 2010-11 with available fund balance of $13.18 million, which equated to 15.2% of FY 2010-11 expenditures. *With implementation of the savings*

*strategies mentioned above, FY 2011-12 expenditures are expected to equal revenues, which means available fund balance will remain at $13.18 million or 15.2% of estimated expenditures.*

In summary, he said that regarding capital improvements (1) $267,000 is in our capital reserve account; (2) the following are the FY 2012 debt-funded projects moving forward: City Hall exterior, new sidewalk construction, greenway development and vehicle replacements - Debt is to be issued in March 2012; and (3) City Hall service elevator repairs is $100,000. He explained that we will reallocate some of the building maintenance funding this year for the elevator repairs, which may mean we may have to delay one routine roof replacement project to next fiscal year.

**IV. PUBLIC HEARINGS:**

**A. CONTINUATION OF PUBLIC HEARING TO CONSIDER CLOSING SEVERAL PORTIONS OF UNOPENED RIGHTS-OF-WAY AND CITY STREETS WITHIN THE MONTFORD COMMONS DEVELOPMENT AREA**

Mayor Bellamy said that the City has been notified that the petitioner has withdrawn their request for these closings.

**B. PUBLIC HEARING TO CONSIDER PERMANENTLY CLOSING AN ALLEY BETWEEN NEBRASKA STREET AND NEVADA AVENUE**

**RESOLUTION NO. 11-227 - RESOLUTION TO PERMANENTLY CLOSE AN ALLEY BETWEEN NEBRASKA STREET AND NEVADA AVENUE**

Public Works Director Cathy Ball said that this is the consideration of a resolution to permanently close an alley between Nebraska Street and Nevada Avenue.

N. C. Gen. Stat. sec 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, City Council at their regular meeting on October 11, 2011, initiated the closure process, on behalf of the adjacent property owners, Julia Watts Schafer, Edward V. Hardin, Jane P. Ward, Hannah Danise, Dewitt Hurst, Kandi Kilpatrick, Alexander Brown, Bonnie R. Locklear, Jack Askew and Katherine Folkman, and Joanne C. Gunter, who have requested the City of Asheville to permanently close an alley between Nebraska Street and Nevada Avenue. Three (3) adjacent property owners did not join the petition to close the alley between Nebraska Street and Nevada Avenue and were sent a copy of the Resolution of Intent via certified mail.

The Greenway Commission met on August 11, 2011. The Commission discussed various subject areas and voted 4-1 against supporting the closure.

***The Asheville City Development Plan 2025*** (comprehensive plan) exemplifies a 'Smart Growth' vision for growth and development in Asheville. Included in this vision is an inextricable connection between transportation and development where access to property supports sustainable infill development and combats sprawl. This section of west Asheville is well suited to sustainable infill development given its proximity to transportation, employment centers, and goods & services along Haywood Road. Additionally, unlike many other unopened rights-of-way in the city, Moody Alley is relatively flat and developable and all of the adjacent properties allow for multi-family development (RM-8 zoning). Of these adjacent properties, approximately half are of sufficient size to support more than one full residential unit, in some cases up to 4 units; while the other half can support, at a minimum, an accessory apartment. Given a variety of site constraints the most practical means of access to construct additional units would be through Moody Alley which would provide additional flexibility and options for sensitive siting and design.

Besides improving opportunities for sustainable infill development, alleys provide a variety of other benefits including:

- Access to off-street parking for residents and delivery vehicles
- Off-street pedestrian and bike connectivity
- Creates multi-purpose common space for property owners
- Provides accessible location for utility placement

Not all subdivision plats and residential communities can accommodate alley access, and not all unopened alleys can be developed in a practical manner that will help meet carbon reduction goals by controlling sprawl. There are, however, numerous opportunities that still exist, and to withdraw public dedication of Moody Alley will diminish the city's ability to adapt to meet future needs for housing and connectivity in this area. New recognition for these alleyways (and other rights-of-way) is a phenomenon that is being observed across the United States and many cities are now developing guidelines to develop, recapture, and retrofit these spaces to address present and future community needs.

City Council waived the $4,000 closure fee at the City Council meeting of October 11, 2011.

City staff does not recommend City Council adopt the resolution to permanently close an alley between Nebraska Street and Nevada Avenue. A resolution is provided should City Council wish to approve the closure.

City Attorney Oast understood that a temporary restraining order that prohibits work in the alley is still in effect.

When Vice-Mayor Newman asked if the Greenway Commission reached their conclusion not to close the alley because the property has value for a greenway, Assistant Planning & Development Director Shannon Tuch did not wish to speak for the Commission; however, she thought part of their concern over some of the other land use issues raised. It's not to say that that strip of land wouldn't have some value as a potential pedestrian or bicycle connection, but not necessarily for a greenway.

Vice-Mayor Newman wondered if Council needed to give clarification to the Greenway Commission to specifically look at whether land has value for a greenway and not to weigh in on larger land use questions.

At 6:16 p.m., Mayor Bellamy opened up the public hearing.

The following individuals spoke in support of closing the alley for various reasons, some being, but are not limited to: this 20-foot wide alley was dedicated in the 1920's but never formally accepted by the City; there are no records of the alley having been used as a road, but only as an extension of neighbor's backyards; the alley is a slice of wilderness and provides peace and harmony in the backyards of adjoining property owners; Mr. Jay Fiano began cutting trees and brush in the alley without any discussion of the adjoining property owners; opening up the alley will only benefit one of many property owners abutting the alley; state statutes allow City Council to close an alley; 11 out of 13 adjacent property owners want the alley closed; this issue has no bearing on the pending litigation even though the Court has granted a preliminary injunction forbidding Mr. Fiano from cutting anymore foliage or trees in the alley; the public interest is being served by the alley being closed; Mr. Fiano does have access to a public right-of-way; alley is a source of privacy and security; if Mr. Fiano had not over-built on his property, there would not have been any need for his to request the alley to be opened:

Ms. Julia Schafer, resident on Nebraska
Mr. Jason Peltz, attorney representing Ms. Julia Schafer
Mr. Brian Lee, adjoining property owner
Ms. Jane Ward, resident on Nebraska Street
Ms. Barbara Hurst, adjoining property owner
Mr. Steven Brewer, resident on Nebraska
Ms. Tray Groce, resident on Nebraska
Adjoining property owner
Mr. Timothy Sadler
Mr. Evan Schafer, resident on Nebraska
Mr. Dewitt Hurst, adjoining property owner
Ms. Amena Spangler, west Asheville resident

The following individuals spoke in support of not closing the alley for various reasons, some being, but are not limited to: staff says the topography of the area is appropriate for a road; the road has been shown on City maps for over 100 years; Council should listen to their staff and the Greenway Commission not to close the alley; City Council should not intervene in what is clearly a disagreement between two property owners (Ms. Schafer and Mr. Fiano); builders need access to rights-of-way to complete infill development; private parties should not be allowed to close public rights-of-way; the property could be used for a greenway; there are not a lot of areas suitable for infill development and we should use existing infrastructure and zoning to take advantage of those areas; area is suitable for more dense development, which will reduce sprawl; postpone action to allow property owners to find the best solution for the neighborhood:

Mr. Robert Deutsch, attorney representing Mr. Jay Fiano
Mr. Raymond Thompson, President of Sure Foot Builders
Mr. Russell Davis, Civil Engineer
Mr. Marcus Renner, representing Green Building Council of WNC
Mr. Michael Silverman, resident on Nebraska Street

Ms. Pat Johnson said that Mr. Fiano built his house and then sold her the two lots of land left over, which in effect made his back part land-locked. It was his choice on whether to sell the property or to have access.

Mr. Jay Fiano, adjoining property owner, apologized for disrupting his neighborhood and not being more open with his neighbors. It was his understanding that he need only work with the Planning & Zoning Department and the Building Safety Department for the issuance of permits for clearing the alley. He said that he divided his property and since the back portion did not abut a publicly maintained street, there was the concept that it may be easier to access the back parcel through the alleyway. He felt he may be able to work this out in a manner that is more beneficial to his neighbors. He asked Council to defer action for potential mediation from the City Attorney or other suitable party.

City Attorney Oast read the pertinent portion of N.C. Gen. Stat. sec. 160A-299:
"At the hearing, any person may be heard on the question of whether or not the closing would be detrimental to the public interest, or the property rights of any individual. If it appears to the satisfaction of the Council after the hearing that closing the street or alley is not contrary to the public interest, and that no individual owning property in the vicinity of the street or alley or in the subdivision in which it is located would thereby be deprived of reasonable means of ingress and egress to his property, the council may adopt an order closing the street or alley."

At 7:04 p.m., Mayor Bellamy closed the public hearing.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Vice-Mayor Newman moved to adopt Resolution No. 11-227 to close the alley between Nebraska Street and Nevada Avenue. This motion was seconded by Councilman Smith.

Vice-Mayor Newman felt the basic question is whether or not there should be a public street constructed in this location for the public's interest. After hearing the large majority of residents who live in the area and a visit to the site, he felt it was against the public interest to have a new public street in this location. There are paper alleys all over Asheville and when people where building they had ideas where streets might be located. Some streets were built and some were not. Since then mature neighborhoods have been established and the neighbors did not want those new streets built. He appreciated staff's interest in preserving infill development; however, this is a location where building a new public street is not worth the cost to the neighborhood.

In response to Councilwoman Manheimer on whether there is an access issue, Ms. Tuch said that the statutes describe reasonable access. All lots currently front publicly maintained streets. Mr. Fiano's lot was larger and he divided some of his property off to create an "L". In terms of reasonable access, the property is zoned multi-family and there is a question about whether or not it's reasonable to expect that someone may want to add another residential unit to back of the property that is large enough to support more than one unit.

Mr. Deutsch understood that the "L" shaped lot would support an ancillary structure in the back but if it is built his only access is through the alley.

In response to Councilwoman Manheimer, Ms. Ball said that 11 out of 13 adjacent property owners signed the petition to close the alley.

Councilwoman Manheimer said that there is a platted alley that appears as an easement in the deeds for most of the properties adjacent to this strip of land. That means there is a private right to use it to those people that are adjacent to the alley. She thinks there will still be (if Council chooses to close this alley) a legal question of whether or not the affected land owners have the right to use the 20-ft wide strip regardless of whether the City has an interest in it or not. That being said, that is an issue for those property owners. Based upon what she had heard tonight, she will support the closing.

In response to Councilman Davis, Ms. Ball said that a petition to close can be initiated by one person.

City Attorney Oast said that if Council chooses to close the alley, the last "Whereas" in the resolution will need to be amended (since there has been objections to the alley closing) to read: "Whereas, Council finds that the closing is not contrary to the public interest and that no individual owning property in the vicinity of the street or alley or in the subdivision of which it is located will be deprived of reasonable means of ingress and egress to their property." Vice-Mayor Newman and Councilman Smith agreed to amend the motion as stated by City Attorney Oast.

In response to Councilman Russell, Ms. Ball said if someone came in and were able to show proof that a paper alley allowed for the use of their property through their deed, (typically an opinion by an attorney), then we would approve a driveway permit from the street to allow that to occur.

In response to Councilman Bothwell, Ms. Tuch said that all properties could support at a minimum one accessory unit. However, whether or not it was most appropriately reached by alley or street would be up to the individual property owner.

The amended motion made by Vice-Mayor Newman and seconded by Councilman Smith carried unanimously.

**Closed Session**

At 7:22 p.m., Councilman Smith moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including a lawsuit involving the following parties: Jensen, et al; City of Asheville (Biltmore Lake Annexation Lawsuit). The statutory authorization is N.C. Gen. Stat. sec. 143-318.11(a)(3); and (2) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Bothwell and carried unanimously.

At 7:49 p.m., Councilman Smith moved to come out of closed session. This motion was seconded by Councilman Davis and carried unanimously.

**C. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 5 WOODLAWN AVENUE FOR A BED & BREAKFAST INN**

**ORDINANCE NO. 4034 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 5 WOODLAWN AVENUE FOR A BED & BREAKFAST INN**

Deputy City Clerk Kleisler administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast explained that this process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

City Attorney Oast asked if any Council member has any special knowledge associated with this project that they disclose it at this time.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

City Attorney Oast said that the Authorized Practice Committee of the North Carolina State Bar has issued an advisory opinion that appearing in a representative capacity for a party before a local governmental body in a quasi-judicial proceeding is the practice of law, especially with respect to such aspects of the hearing as examining or cross-examining witnesses, or advocating for legal conclusions or results. This does not prevent persons, including land use professionals, from presenting information or expressing opinions within their knowledge or area of expertise.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 7:50 p.m.

Urban Planner Julia Fields submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Fields said that the applicant, Fred Eggerton is requesting approval of a conditional use permit for property located at 5 Woodlawn Avenue (Location Map – Attachment to City Exhibit 3). The site contains the Rankin-Bearden House which was designated as a local historic landmark by the Asheville City Council on November 14, 2006. The parcel on which this historic home is located is zoned RM-8 (Residential Multi-Family Medium Density District) and is .43 acres in size (18,810 square feet). The home contains 4,180 square feet of living space with 1,280 square feet of porches/decks. There are five bedrooms in the structure.

The structure was originally constructed as a home circa 1848 and is believed to be the oldest intact frame house in Asheville and one of the few remaining antebellum houses in Buncombe County (Front Façade – City Exhibit 4). The property was in decline and being used as a boarding house when the applicant purchased it in 1993 and began restoration (Existing Condition – City Exhibit 5).

The applicant is requesting the issuance of a conditional use permit pursuant to Section 7-16-2(d)(1) of the City's Unified Development Ordinance (UDO).This section provides for historic landmarks to be issued a conditional use permit (in all residential districts) to make use of the property in a manner other than is allowed in the zoning district applied to the property. In this instance, the applicable zoning, RM-8, allows for Bed and Breakfast Inns as a Use by Right Subject to Special Requirements (USSR). However, because the existing property is less than 20,000 square feet in size (a USSR standard for Bed and Breakfast Inns; not variable) the applicant is pursuing the conditional use permit.

Conditional use permit applications for historic landmarks must show:

- That the property is designated as a historic landmark. This was done in 2006.
- That the current usage of the property is such that the property cannot be preserved and the granting of a conditional use permit enables its preservation. Mr. Eggerton has satisfied the Historic Resources Commission on this issue.
- That the use which may be permitted is not inconsistent with the design and or uses for which the structure had been designed or used during the life of the structure. The structure has been previously used as a boardinghouse and a single-family residence. Staff feels a bed and breakfast inn is not inconsistent with these uses and that the design of the home with many bedrooms and entrances is consistent with the use as a bed and breakfast inn.
- A written letter of recommendation must be submitted by the Historic Resources Commission.

The staff does propose that the following bed and breakfast standards for the RM8 district be applied as additional conditions:

- The owner/manager shall reside on the property.
- The maximum number of guest rooms provided by the bed and breakfast inn shall be eight.
- Passive recreation-related outdoor activities, such as tea-time, are allowed outside the principal structure or any accessory structures, but all other activities and functions designed to serve and entertain guests shall take place within the principal structure.
- The length of stay of guests shall not exceed 14 days.
- Signage shall be limited to a single sign, not to exceed eight square feet, with a maximum height of four feet. The sign may be located in the front yard and must be indirectly lit.
- Exterior lighting shall be residential in nature and shall not be directed towards adjacent properties.

- Activities and functions at the bed and breakfast inn shall be provided for overnight guests only and shall be limited to breakfast and an afternoon and/or evening refreshment. In addition to the functions for overnight guests, the bed and breakfast inn may have four social gatherings per year. No commercial activities other than providing lodging for registered guests shall be permitted.

This property meets the spacing requirement for bed and breakfast inns in residential districts that is found in the UDO.

While the property has a Woodlawn Avenue address it actually faces Elizabeth Place. Access to parking is off of Woodlawn Avenue. Six parking spaces (one handicapped) are proposed.

As this is a local landmark and located in the Montford Historic District, all improvements must be approved by the Historic Resources Commission of Asheville-Buncombe County.

At the October 3, 2011 meeting of the Technical Review Committee, this project was recommended to proceed to Council with the conditions as listed in the TRC report. She has received one call from a neighbor who inquired about parking and after being advised they had six spaces, expressed support.

City Council must take formal action as set forth in Section 7-5-5(e)(3) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case pursuant to Section 7-16-2(c) of the UDO. Staff's review indicates that all seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The proposed project has been reviewed by City staff and approved conditionally. The project must meet the technical standards set forth in the UDO, the City's Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The structure and improvements on the property are existing and no significant changes to the topography or natural features are proposed.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The ability to maintain this historic structure as a bed and breakfast inn, which is difficult to do as a single-family home, would likely assist in improving (not injuring) the values of adjoining or abutting properties. In the past the structure had been used as a boarding house.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   The structure is an existing one and has been in existence since the mid-1800s. It is a local historic landmark and any improvements will have to receive a Certificate of Appropriateness from the Historic Resources ensuring that such improvements are in keeping with the historic district.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
   This application supports the strategy found in the *Asheville City Plan 2025* which encourages promoting the adaptive reuse of the City's valuable commerical and residential historic districts.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   The proposed development has been approved by the Technical Review Committee and was approved with conditions concerning all transportation, water, etc. provisions.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
   Although the streets abutting this property are narrow, the use of this structure as a bed and breakfast inn is not expected to cause undue traffic congestion or create traffic hazards. Six off-street parking spaces are provided.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- The ability to use this historic structure as a bed and breakfast inn should allow for the generation of additional income for the maintenance and preservation of the structure.
- The use of this structure, believed to be the oldest intact frame house in Asheville, as a bed and breakfast inn, would provide for greater public appreciation of a significant historic landmark.
- This application supports the strategy found in the Asheville City Plan 2025 which encourages promoting the adaptive reuse of the City's valuable commerical and residential historic districts.

Con: None noted.

Staff recommends approval of the Conditional Use Permit subject to the conditions listed in the TRC report, the standard conditions and the following additional conditions which apply to other bed and breakfast inns on residentially zoned properties:

- The owner/manager shall reside on the property.
- The maximum number of guest rooms provided by the bed and breakfast inn shall be eight.
- Passive recreation-related outdoor activities, such as tea-time, are allowed outside the principal structure or any accessory structures, but all other activities and functions designed to serve and entertain guests shall take place within the principal structure.
- The length of stay of guests shall not exceed 14 days.
- Signage shall be limited to a single sign, not to exceed eight square feet, with a maximum height of four feet. The sign may be located in the front yard and must be indirectly lit.
- Exterior lighting shall be residential in nature and shall not be directed towards adjacent properties.
- Activities and functions at the bed and breakfast inn shall be provided for overnight guests only and shall be limited to breakfast and an afternoon and/or evening refreshment. In addition to the functions for overnight guests, the bed

and breakfast inn may have four social gatherings per year. No commercial activities other than providing lodging for registered guests shall be permitted.

Mr. Fred Eggerton, owner of the house, said he bought the house when it was being condemned and began restoring it. He asked for Council's support for it to be used as a Bed & Breakfast Inn.

After rebuttal, Mayor Bellamy closed the public hearing at 7:56 p.m.

Councilman Russell moved for the adoption of Ordinance No. 4034, granting a conditional use permit for property located at 5 Woodlawn Avenue, to permit it to be used as a Bed & Breakfast Inn, subject to the conditions recommended by City staff, and subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with cut-off fixtures or full cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (5) This project will undergo final review by the TRC prior to issuance of any required permits; (6) The owner/manager shall reside on the property; (7) The maximum number of guest rooms provided by the bed and breakfast inn shall be eight; (8) Passive recreation-related outdoor activities, such as tea-time, are allowed outside the principal structure or any accessory structures, but all other activities and functions designed to serve and entertain guests shall take place within the principal structure; (9) The length of stay of guests shall not exceed 14 days; (10) Signage shall be limited to a single sign, not to exceed eight square feet, with a maximum height of four feet. The sign may be located in the front yard and must be indirectly lit; (11) Exterior lighting shall be residential in nature and shall not be directed towards adjacent properties; and (12) Activities and functions at the bed and breakfast inn shall be provided for overnight guests only and shall be limited to breakfast and an afternoon and/or evening refreshment. In addition to the functions for overnight guests, the bed and breakfast inn may have four social gatherings per year. No commercial activities other than providing lodging for registered guests shall be permitted. This motion was seconded by Councilman Bothwell and carried unanimously.

**ORDINANCE BOOK NO. 27 - PAGE 224**

**D. PUBLIC HEARING TO CONSIDER THE CONDITIONAL ZONING FOR ELECTROLUX, LOCATED AT 1310 FANNING BRIDGE ROAD, FROM INDUSTRIAL DISTRICT AND AIRPORT DISTRICT TO INDUSTRIAL DISTRICT/CONDITIONAL ZONING FOR A 304,000 SQUARE FOOT ADDITION TO AN EXISTING 400,000 SQUARE FOOT MANUFACTURING FACILITY, ALONG WITH A MODIFICATION REQUEST TO THE LOCATION OF SOME STREET TREES**

**ORDINANCE NO. 4035 - ORDINANCE TO CONDITIONALLY ZONE ELECTROLUX, LOCATED AT 1310 FANNING BRIDGE ROAD, FROM INDUSTRIAL DISTRICT AND AIRPORT DISTRICT TO INDUSTRIAL DISTRICT/CONDITIONAL ZONING FOR A 304,000 SQUARE FOOT ADDITION TO AN EXISTING 400,000 SQUARE FOOT MANUFACTURING FACILITY**

Urban Planner Julia Fields said that this is the consideration of an ordinance to conditionally zone Electrolux, located at 1310 Fanning Bridge Road to rezone from Industrial District and Airport District to Industrial District/Conditional Zoning for a 304,000 square foot

addition to an existing 400,000 square foot manufacturing facility. This public hearing was advertised on November 11 and 18, 2011.

Ms. Fields said that the applicant, Electrolux, currently has a warehouse/distribution facility located at 1310 Fanning Bridge Road in Asheville and is seeking conditional zoning approval to allow for a significant expansion and improved operations. The property is currently zoned Airport and Industrial and is owned by Minkles, LLC (existing operation) and the City of Asheville (currently under lease to the Airport Authority). It is proposed that the City-owned property will be leased (long term) or sold to Minkles, LLC, either of which would require FAA Approval (requested by the Airport Authority). The applicant is seeking rezoning to Industrial CZ (Conditional Zoning). The proposed expansion to the existing 400,000 square foot facility is for an additional 304,000 square feet.

The current facility has a single entrance for employee and truck traffic off of Fanning Bridge Road. The plans call for the demolition of the current parking and loading configuration and the creation of a new drive off of Airport Road for trucks entering a new loading dock area. The employee parking with continued access from Fanning Bridge Road will be reconstructed to provide for 260 spaces.

Due to the width of the rights-of-way of Airport and Fanning Bridge Roads, a modification would need to be granted to allow for some of the street trees to be located farther than 20 feet from the edge of the pavement.

The Technical Review Committee reviewed this proposal on October 17, 2011, and recommended approval with conditions. The applicant has submitted revised plans to staff addressing many of the issues in the report. At a meeting on November 2, 2011, the Asheville Planning and Zoning Commission considered this petition and unanimously (7-0) recommended it to you favorably. No one spoke at the meeting except representatives of Electrolux.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The applicant is expanding an existing building to provide for improved function at their facility. The existing building has been in operation for many years now and is in a location with immediate access to major transportation corridors. It is surrounded by other major traffic generating uses.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   There will be loss of some of the existing wooded areas to the north and east of the proposed expansion due to needed grading; however, significant building impact and other landscaping will be planted as part of the project.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The use of the land is not changing; the operation is expanding to facilitate improved processes. The property is surrounded by other major traffic generating uses.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   The development is in an area with other very substantial buildings and operations.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
   The proposed development supports the depiction in the City's comprehensive plan of the Asheville Regional Airport area as a regional node. It also supports the strategy of having Asheville's planning and zoning processes facilitate sustained and positive economic development. It supports the Council goal of supporting a strong local economy by continuing to implement sustainable growth and development.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   There are no additional truck loading docks proposed in the expansion. The development is located just off of a major interstate highway and along a four lane state highway. The project has received approval from the City's Technical Review Committee concerning issues of water, fire, and police protection.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
   Although this is a major expansion, the intensity of the use will change little from existing operations.

Pros:

- Expansion of an existing major distribution facility supports many City goals concerning economic development.
- Provides for an improved traffic pattern for both employee and truck traffic.

Con: None noted

Staff recommends approval of this request subject to the conditions noted in the TRC report and with the landscape modification requested. At a meeting on November 2, 2011, the Asheville Planning and Zoning Commission considered this petition and unanimously (7-0) recommended it to you favorably. No one spoke at the meeting except representatives of Electrolux.

Mayor Bellamy opened the public hearing at 8:01 p.m.

Mr. Dennis Justice spoke in support of the conditional zoning.

Mayor Bellamy closed the public hearing at 8:03 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Mayor Bellamy said that this is a non-aviation use of City-owned property and she didn't feel like the Airport Authority should benefit from our property. Any revenue stream produced from this potential lease or sale should come back to the City. She felt that the City should be at the table when those discussions are going forward.

Councilman Russell moved for the adoption of Ordinance No. 4035, to conditionally zone Electrolux, located at 1310 Fanning Bridge Road to rezone from Industrial District and Airport District to Industrial District/Conditional Zoning for a 304,000 square foot addition to an existing 400,000 square foot manufacturing facility, with the landscape modification, subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with cut-off fixtures or full cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (5) This project will undergo final review by the TRC prior to issuance of any required permits; and (6) The issue of ownership or long-term lease of the property must be completed prior to any permit being issued. This motion was seconded by Councilman Davis and carried unanimously.

**ORDINANCE BOOK NO. 27 – PAGE 229**

**C. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR THE PROJECT IDENTIFIED AS THE AVENTINE, LOCATED AT LONG SHOALS ROAD AND CLAYTON ROAD FOR A 312 APARTMENT COMPLEX**

**ORDINANCE NO. 4036 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR THE PROJECT IDENTIFIED AS THE AVENTINE, LOCATED AT LONG SHOALS ROAD AND CLAYTON ROAD FOR A 312 APARTMENT COMPLEX**

Deputy City Clerk Kleisler administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast explained that this process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

City Attorney Oast asked if any Council member has any special knowledge associated with this project that they disclose it at this time.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

City Attorney Oast said that the Authorized Practice Committee of the North Carolina State Bar has issued an advisory opinion that appearing in a representative capacity for a party before a local governmental body in a quasi-judicial proceeding is the practice of law, especially with respect to such aspects of the hearing as examining or cross-examining witnesses, or advocating for legal conclusions or results. This does not prevent persons, including land use professionals, from presenting information or expressing opinions within their knowledge or area of expertise.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 8:08 p.m.

Urban Planner Nate Pennington submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Pennington said that this is the consideration of the issuance of a conditional use permit for property located at Long Shoals Road and Clayton Road.

The subject property consists of one parcel comprising 61.74 acres according to Buncombe County tax records and is located in the City's extra-territorial jurisdiction (ETJ). The property is located along Long Shoals Road, Clayton Road and the French Broad River in south Asheville in the vicinity of the I-26 interchange, although without any immediate proximity to the current city limits which terminate at the French Broad River. If approved, the subject property would be subdivided into four (4) tracts and the project would be built entirely on tract 3. Tract three is proposed to be 35.86 acres and would be developed at a total density of 8.7 dwelling units per acre. There are currently no plans for the development of the remaining parcels. The maximum density permitted in the CI zoning district is 16 units per acre.

The following list provides a breakdown of the proposed development:

- 7 apartment buildings would house the 312 apartment units
- 3 – 4 story configurations
- 152 – one bedroom units
- 115 – two bedroom units
- 45 – three bedroom units
- Clubhouse, leasing area, pool/cabana area, restrooms, mail kiosk located in vicinity of building #7
- 3 freestanding garage buildings located throughout the site and a maintenance/garage/car wash structure located in the vicinity of building #6

The site is heavily wooded with the exception of a large Progress Energy transmission line that splits the property in a northwest direction almost parallel to Clayton Road. Old soil roadbeds are located throughout the site. The property contains documented wetland areas, a stream, tributaries and regulated floodplain along the French Broad River.

The apartment project is proposed to be built in one phase with subsequent development of outparcels to occur in the future. Flournoy Development Company would retain ownership of tract 3 containing the apartments while the remaining outparcels would remain (for now) in the ownership of Biltmore Farms Inc.

Access to the site is proposed to be provided from both Long Shoals Road and Clayton Road via a series of meandering driveways that weave through the site.

According to the site plan, 490 parking spaces are provided. This amount of parking is well within the minimum/maximum parking threshold and is inclusive of required ADA spaces. 26 bicycle parking spaces are provided and this number is in compliance of the required 5% bicycle parking standard. Parking is dispersed throughout the site – located behind building #'s 1 – 6 and in the front and rear of building #7.

The site is heavily wooded and large areas of the property will remain as such in order to meet open space and tree save standards. Street trees will be required along the entire frontage of Long Shoals Road and Clayton Road. Building impact and retaining wall landscaping are dispersed throughout the site. Parking lot landscaping has been provided in applicable areas and no modification requests to landscaping standards are being sought.

The open space requirement for this type of development is 15% of the total site size; a total of 5.38 acres for this site. The site plan illustrates that more than adequate open space has been reserved to meet this requirement.

Sidewalk construction (or fee-in-lieu) is required along all street frontages along Long Shoals Road and Clayton Road. The City traffic engineer has indicated that a fee-in-lieu of option might be more ideal (future sidewalk maintenance issues) given the fact that this project is located in ETJ.

Large scale developments are required to provide an urban level of service to meet the needs of their residential and/or commercial tenants. While staff recommended that the applicant consider voluntary annexation to meet these needs, the applicant has elected to contract for services both privately (solid waste/recycling, etc.) and with Buncombe County (police and fire protection).

This proposal was recommended for approval with conditions by the Technical Review Committee on October 17, 2011.

At their regularly scheduled meeting on November 2, 2011, the Planning and Zoning Commission considered this project. The Commission heard from three members of the community with issues related to future commercial development on the proposed outparcels and appropriate development of the property in accordance with City goals and policies specifically related to sustainability and affordable housing.

After hearing from the public, the Commission discussed the project. Some members had concerns because the project offers no affordable housing, does not commit to a minimal standard of "green building" techniques (i.e. Energy Star Certification) and has a purely auto-oriented design. Other members appreciated the level of density the project proposes as well as the overall preservation of open space and vegetation; noting the difficulties associated with developing the site.

The Commission ultimately recommended approval of the project on a 6 to 1 vote; but also recommended the developer further consider City adopted goals and policies before City Council for review.

City Council must take formal action as set forth in Section 7-5-5(e)(3) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case pursuant to Section 7-16-2(c). Staff's review indicates that all seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the *UDO*, the *Standards and Specifications Manual*, the *North Carolina Building Code* and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The subject property is appropriately zoned for the proposed residential development. The development was designed to preserve the existing riparian buffer along the French Broad River and development is being clustered outside of the regulated floodplain. The

development is fairly isolated from Long Shoals Road and Clayton Road and is bounded by a large electrical transmission line and the French Broad River. The only immediate neighbor is Biltmore Baptist Church to the north and is separated from the church by a very large parking lot.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
As noted in Finding #2, the proposed development is compatible with surrounding uses and adjacent transportation corridors.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
As noted in Finding #2, the development is setback from adjacent road frontages and is located in the vicinity of a very large church. The development is clustered in a way that keeps it isolated from residential development across Long Shoals Road. The proposed density is almost one-half of the permitted residential density for the CI zoning district.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
Elements of the proposal are only partially aligned with the City's goals and objectives for "Green and Sustainable," but not for "Affordable" as noted in the Compliance with Comprehensive Plan and other Adopted Plans section. The most notable missing element, given past expectations from the Council, is that a project of this magnitude (312 residential units) provides no affordable units.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
The property is located along Long Shoals Road, Clayton Road and the French Broad River in south Asheville in the vicinity of the I-26 interchange. The nearest bus stop is approximately two miles from the subject site along Hendersonville Road. Adequate water supply, fire and police protection, waste disposal and similar facilities are verified during the TRC review process.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
A traffic impact study has determined that the proposed use will not cause undue traffic congestion or create a traffic hazard along the existing street infra-structure. The existing street infra-structure, which was recently upgraded, is sufficient to handle the additional traffic from the proposed use. The location of the access points must provide adequate intersection and stopping sight distances required by NCDOT and/or City policies and guidelines. Since both access points are along state-maintained streets, the North Carolina Department of Transportation has final approval of the appropriate driveway permits.

Based on the above findings and the analysis provided in the report, staff finds this request, with conditions noted, to be reasonable.

Pros:
- Higher density development furthers the goals and objectives of the comprehensive plan.
- Clustered development provides for the preservation of dense vegetation along the French Broad River.

Cons:

500

- Applicant does not propose to reserve any units for affordable housing.
- Dense development is not in the vicinity of public transportation and will be fully auto dependent.
- At the Planning & Zoning Commission meeting, the representative for this Georgia based developer stated that they employ their own construction workers and management staff thereby limiting hiring of local construction workers.

Staff recommends that the City Council approve this request, with a few areas of concern. While the application meets the technical requirements of the underlying zoning district and other UDO standards, and it complies to a certain extent with goals for added density and green building standards, and the market rate housing it proposes generally meets current levels of affordability for "workforce" level housing; this project offers no affordable housing. We therefore believe that it falls short of compliance with that long range policy objective that has been preferred by the City Council in recent years.

Mr. Lou Bissette, attorney representing Flournoy Development, said the project is comprised of 312 units for a total capital investment of approximately $20 Million. The property consists of approximately 36 acres in the City's extra-territorial jurisdiction. The maximum density is 16 units per acre and this development is only 8.7 dwelling units per acre, which they believe is sustainable. Project includes 490 parking spaces, 26 bicycle parking spaces, parking is disbursed throughout the site, and the open space requirement is much more than required. He reminded the Council that it was recommended by the Planning & Zoning Commission and the Technical Review Committee, noting there are no variances requested. He asked that all of the information provided to the Planning Department be included in the record (Applicant Exhibit 1). He explained how all seven standards have been met as proposed in the site plan. He said all 312 residential units will rent for well below the City's workforce housing maximum rates, e.g., Asheville's workforce housing rate for a 1-bedroom is $1,063 and their unit will begin at $825. That is similar for the 2 and 3 bedrooms as well. They felt that this location, which is 10 miles from the City center in a semi-rural area outside of the City with no public transit, lends itself more to workforce housing than to the affordable housing units. The need in the area is for workforce housing. The Aventine is also committed to green and sustainable construction and in addition to the density and the buffering requirements will meet several components of Energy Star Version 2.5. The Energy Star based proposals, along with other green building techniques, including the installation of 2 electric car charging stations and a set-aside of a bus shelter space for future use, are also aligned with the City's goals for green and sustainable housing. Although the nearest bus stop is approximately 2 miles from the project site along Hendersonville Road, the site has adequate access, water supply, fire and police protection, waste disposal and similar facilities. Mr. Bissette noted an error in the staff report which said that the developer was going to bring all of the construction forces here from Georgia. That is not the case. They have their own contracting firm but workers and the trades people will be bid out here. He requested Council's approval of the project, subject to the conditions by staff.

Mr. Paul Szurek, representing the owner of the property Biltmore Farms, request Council's approval of the permit. He explained how they need more workforce housing in south Asheville. Workforce housing needs to be nearby Biltmore Park so it can offer a low commute, low carbon lifestyle. We are fortunate to have a ready built project financed that will meet the needs for workforce housing and raise property values in this area.

Mr. Timothy Sadler supported the project and suggested solar panels to make them financially sustainable for the people who live in the apartments.

After rebuttal, Mayor Bellamy closed the public hearing at 8:25 p.m.

Councilman Bothwell felt that since there were so many jobs across the highway in Biltmore Park it would be nice for those people to have a sidewalk connection so they could walk to work.

Mr. Will Buie, Civil Engineer, responded to Councilwoman Manheimer by describing the proposed retaining walls. The walls will be as high as 40 feet; however, the walls will be terraced – 20 foot wall, terrace and then another 20 foot wall. Their goal will be to preserve the adjacent vegetation, in addition to the additional landscaping required.

Councilman Smith was curious of whether anyone would be able to see the high retaining walls from the river. Mr. Buie responded that it's hard to tell what you would see from the river; however, at the closest point there is a 55-ft buffer between the river and the retaining wall.

Upon inquiry of Councilman Smith, Mr. Buie explained how they will work with the City on erosion control measures. Councilman Smith felt 55 feet is not a lot of room to catch water.

Councilman Russell moved for the adoption of Ordinance No. 4036 to approve the Level III site plan for the project identified as The Aventine, located at Long Shoals Road and Clayton Road, for a 312 unit apartment complex, subject to the following conditions (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with cut-off fixtures or full cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (5) This project will undergo final review by the TRC prior to issuance of any required permits; and (6) A minor subdivision application must be submitted for the creation of the outparcel lots before zoning permit issuance. This motion was seconded by Councilman Davis.

When Councilman Smith asked if the buildings themselves would be Energy Star certified, Mr. Buie said the owner elected to pursue the Energy Star 2.5 project. He said they will meet the components of Energy Star certification, however they will not go through the certification or inspection process as they cost double of what the actual infrastructure will cost to install. It is their preference to put those dollars into the actual buildings rather than into certification.

When Councilman Smith asked if the owners are open to adding a percentage of affordability, Mr. Ryan Foster, Vice-President of Flournoy Development Company, said that with the financing they currently have in place they are not sure they would get approval with an affordability component. Restricting rents and incomes will increase cost and will hinder the financial feasibility of the project. The approval they have is based on rents currently in the pro forma. They prefer to stay with workforce than an affordable housing component, noting their rents are lower than workforce housing.

When Councilman Smith asked if Mr. Foster has asked his financial partners about. adding an affordable housing component, Mr. Foster replied that he hadn't because they have already run the financial feasibility of the project and felt they would not even consider it. They felt fortunate to have an equity partner who is committed to the project as it is.

Councilman Smith said that since this is Phase 1 of 4 phases, he was curious about the future phases if we can expect the future phases also not to rise to these same City goals.

Mr. Szurek said the remaining phases will be commercial development. There is a possibility for one of the parcels to be some kind of senior housing. With respect to the very valid goals of affordable housing, those are really community goals and at some point he questioned whether it's valid to impose them on individual members of the community as opposed to the

broader community. Mr. Foster is correct in that if you change the pro forma and constrain rents you will risk the project not being developed.

Vice-Mayor Newman understood that Council needs to base their decision on whether the seven conditional standards have been met. With that understanding, he asked if the developer or property owner would be willing to consider voluntarily annexing the property into the City of Asheville at some point. He explained that if this is a $20 Million investment, it will reduce the City's share of sales taxes generated in Buncombe County by that amount. The City has done some creative things with development partners in the past about plans to come into the city.

Mr. Bissette said that at the Planning & Zoning Commission meeting it was mentioned and they have agreed to provide an urban level of service. He knew a number of projects have voluntarily annexed into the City, but those received some help or incentives from the City for coming in. This project has asked for no variances or special incentives of any kind.

Mr. Buie said the developers are open to that idea, outside of the bounds of this permit. There is a significant cost that they and Biltmore Farms will incur to extend utilities to the site, specifically sewer. There are other significant costs that go along with this. If there can be a discussion outside of the bounds of this that can make that pro forma work, he felt that is something they would consider. At this time, they don't know what that would be. He would be concerned about postponing this permit because their investor would need some certainty that things were moving forward with the project. They have a goal of breaking ground in April. He asked for Council to consider the permit at this meeting, but felt the developers would have a valid and honest conversation about this as we proceed forward with the project.

City Attorney Oast cautioned Council to not consider the response to the annexation question in making their decision.

Councilman Smith appreciated the efforts being made to build during these economic times. He was pleased the developers have made changes, specifically around the Energy Star pieces. He would not be able to support this project due to the lack of affordability. He also had concerns about the height and impact of the retaining walls on the river, as well as some of the stormwater components.

The motion made by Councilman Russell, and seconded by Councilman Davis carried on a 4-3 vote, with Vice-Mayor Newman, Councilman Bothwell and Councilman Smith voting "no."

City Attorney Oast said that because the ordinance was not adopted by a 2/3 vote of Council, it would be necessary to bring the ordinance back for a second and final reading at the next Council meeting.

City Attorney Oast said that because there will be a new seated Council at the next formal meeting, Council Members Elect Hunt and Pelly (both of who were in the audience) can review the record and be allowed to vote on the second and final reading.

Councilman Russell pointed out this project is in the extra-territorial jurisdiction area and the residents will not be City residents.

Councilman Smith said that he is still open to supporting the project if he can learn more about what will happen at the river and if his concerns around affordability can be addressed.

**ORDINANCE BOOK NO. 27 - PAGE 233**

**V. UNFINISHED BUSINESS:**

## A. SPECIAL WATER RATE FOR WATER CONSUMPTION GREATER THAN 1,000 CCF PER MONTH BY LOCAL MANUFACTURES

Director of Water Resources Steve Shoaf said that this is the consideration of a special water rate for water consumption greater than 1,000 CCF per month by local manufacturers.

The cost of water service continues to increase based on the costs of energy, materials, chemicals, maintenance, personnel and capital improvements. Water treatment, system operation and capital costs are influenced by a global market, and we compete with other sectors for energy, materials, goods, and services.

The water rate study conducted by Raftelis Financial Consultants, Inc. in 2010 – 2011 indicated inequities between customer classes in the water rate structure. To be fair to residential customers who are currently subsidizing the other water customers, the study pointed to a need to adjust multi-family, small commercial, and large commercial water rates to a more equitable position.

Multi-family and small commercial water rates were adjusted to 85% of the residential rate beginning in Fiscal Year 2012. Small commercial water consumption is defined as consumption of less than 1,000 CCF per month. These were fairly minor adjustments and future increases will track the necessary increases in residential rates.

Large commercial water use (consumption after the first 1,000 CCF per month or 748,000 gallons per month) has traditionally been steeply discounted. In Fiscal Year 2011, the water rate for large commercial consumption ($1.41 / CCF) was 37% of the residential water rate ($3.77 / CCF). The consultants performing the water rate study could not justify the heavy discount based on the cost of service. Their recommendation is to raise the large commercial water rate over 5 years to 70% of the residential water rate. At that point, future increases will trend with the necessary increases in residential rates.

Over the next five (5) fiscal years, Water Resources is projecting that water rates for large commercial consumption will increase at an accelerated pace to narrow the gap between the residential and large commercial categories.

A survey was provided to 5 of the 6 manufacturers that would be impacted by this rate adjustment. The sixth manufacturer did not respond to voice mail messages requesting participation in the survey. Four of the 6 participated in discussions about the rate increase and two responded to the survey in writing after discussions with the Water Resources Department.

Survey Results: The four manufacturers indicated through discussion that they were not in favor of a rate increase, but all four did acknowledge that water rate increases are "inevitable". Two manufacturers stated that water rate increases could affect where expansions in production might occur in the future. They are part of corporations with multiple locations and those decisions would be made at the corporate level. One manufacturer cited competition with similar businesses in other locations within the region as the need to control the proposed water rate increases. Another manufacturer stated that increased costs would impact employee hiring, training, and advancement. When discussing alternatives, one respondent pointed to the model used by MSD to spread out the increases over a longer time period. The MSD plan is to bring all sewer users to a single rate at the end of this program.

This study is part of City Council's strategic plan to improve job growth and community development by providing support to local businesses.

Pros:

- Approval of a special, 10-year manufacturing rate schedule will allow local manufacturers to manage their budgets and control operating costs.

- The City Council will be able to establish policy related to the water rates and local manufacturers.
- Approval of a special, 5-year manufacturing rate schedule (as opposed to a 10-year schedule) will reduce the gap between residential and commercial rate payers.

Cons:

- Establishing a special manufacturing rate will continue to extend the disparity between residential and commercial water rates.
- Establishing a special manufacturing rate will decrease revenue from customers in this class.

The following chart represents the proposed water rates (per CCF) for consumption greater than 1,000 CCF per month.

| | FY 10/11 | FY 11/12 | FY 12/13 | FY 13/14 | FY 14/15 | FY15/16 | FY 16-17 |
|---|---|---|---|---|---|---|---|
| 5-Year | $1.41 | $1.69 | $1.85 | $2.22 | $2.63 | $3.03 | $3.06 |
| 10-Year | $1.41 | $1.69 | $1.86 | $2.05 | $2.23 | $2.43 | $2.65 |

The greatest impact will be on the largest commercial users because they will be using more water over the 1,000 CCF per month threshold. The 5-year rate schedule would mean an increase in expenditures for water at the end of five years ranging from 40% to 72% depending on the volume of water used. For the six manufacturers, creating a 10-year schedule for increasing the large user rate will result in $250,000 savings or a similar decrease in revenue for the Water Resources Department over the next five years. If the 5-year schedule was maintained, Water Resources would propose keeping the capital improvement fee fixed for 3-inch and larger meters for FY 12/13. All other rates and fees would increase as outlined in the Raftelis rate study.

City staff is asking City Council for policy direction about an approach for rate setting as it relates to the six manufacturers.

Vice-Mayor Newman felt that commercial rates do need to be brought into closer to residential rates. He continued to believe that the manufacturing sector of the economy is uniquely vulnerable. He felt it makes sense, as part of our community's economic development strategy, to use this resource to preserve those vulnerable manufacturing operations. Even though he understood that rates will need to go up, but there are still dramatic increases over the 10-year period. He was in favor of a more gradual approach.

Councilman Bothwell felt we have a tremendous resource in our water and in this water-short world, any water intense business that chose to move away from our great water source will hurt themselves in the long run. He felt that raising the rates to a fair rate now and quickly makes more sense than stretching it out, especially since the residents are subsidizing businesses now. He would support the 5-year rate schedule.

Mayor Bellamy felt this needed further discussion the new Council. She asked for consideration of (1) scheduling our implementation of rate increases at the beginning of the year (opposed to the middle of the year) as most businesses have completed their budgets by the time we ask for a rate increase on July 1; and (2) voting one year in advance on our rate increases so businesses can anticipate increases in their budgets.

Councilman Smith agreed there needed to be further discussion on this issue. He also suggested further discussion with manufacturers to determine how they are going to be able to help support the water system that they depend on while at the same time we are meeting the needs without unfairly burdening the residential water users.

Councilman Davis liked the 10-year rate schedule model as it gives companies the opportunity to budget for increases.

Councilman Smith said that the Finance Committee has been discussing this issue since 2007 and liked the 10-year rate schedule model. He then moved to create a new class for the 10-year pricing program. This motion was seconded by Councilman Davis.

City Manager Jackson said that rates need to be in an ordinance format and we have not given any public notice, nor provided Council with pros and cons, or a fiscal impact statement. This is information only for Council showing a study with equity models. He understands that more discussion is necessary on this topic and that the newly formed Finance Committee will be reviewing this. Therefore, Councilman Russell moved to withdraw his motion.

It was the consensus of Council to have the newly formed Finance Committee review this issue.

**VI. NEW BUSINESS:**

**A. RESOLUTION NO. 11-228 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE THE NAMING RIGHTS AGREEMENT WITH U.S. CELLULAR CORPORATION FOR THE SPONSORSHIP OF THE ASHEVILLE CIVIC CENTER**

**RESOLUTION NO. 11-229 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE CHANGE ORDERS WITH BRANTLEY CONSTRUCTION COMPANY, GENERAL CONTRACTOR; IRWIN TELESCOPIC SEATING, SEATING RISER CONTRACTOR; CAPTURION NETWORK, SCOREBOARDS/VIDEO BOARDS; AND SPL INTEGRATED SOLUTIONS, SOUND REINFORCEMENT SYSTEM, FOR THE PURPOSE OF COMPLETING RENOVATIONS OF THE ASHEVILLE CIVIC CENTER**

**RESOLUTION NO. 11-230 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AMENDMENT TO THE PROFESSIONAL SERVICES WITH BETSCH ASSOCIATES/PBC+L FOR ADDITIONAL SCOPE OF DESIGN SERVICES FOR THE ASHEVILLE CIVIC CENTER RENOVATIONS**

**ORDINANCE NO. 4037 - BUDGET AMENDMENT TO INCREASE THE CIVIC CENTER RENOVATIONS PROJECT BUDGET WITH REVENUE COMING FROM OUTSIDE FUNDING PARTNERS AND CIVIC CENTER FUND BALANCE**

Economic Development/Civic Center Director Sam Powers said that this is the consideration of a resolution authorizing the Mayor to execute a License Agreement with U.S. Cellular Corporation for naming rights of the Asheville Civic Center complex city-owned property at 87 Haywood Street, Asheville, NC.

The Asheville Civic Center was constructed in the mid-1970s to serve as the major events and entertainment venue for Asheville and Western North Carolina. There have been numerous Civic Center studies over the past ten years; all had a common theme that major capital improvements are required to keep the facility viable as a major destination and economic development tool. Over the past 18 months, the facility has made tremendous strides to undertake major renovations to the facility. The City and several partner organizations led a successful bid to regain the Southern Conference Basketball Tournament, which has a significant tourism spending and Hotel Occupancy Tax generation impact. This success has served as a

catalyst to leverage significant funding of $2 million from the TDA Product Development Grant fund, $1 million from Buncombe County, plus current Civic Center CIP funds of $1.3 million.

One of the key goals of the renovation process has been to seek additional partnerships, including private sector financial participation in the project, as a way to increase upfront equity and on-going assistance with capital improvements. Naming rights for event facilities has developed as a best-practice to enhance funding for the venues.

In the past, former civic center directors and city leaders have had discussions with local and regional companies to inquire about possible naming rights interest in the Asheville Civic Center. No companies were interested in either component parts or venue naming rights. After the announcement of the major renovation project and the renewed community partnerships that enabled the project, the city economic development director was contacted by U.S. Cellular Corporation with an expressed interest in naming rights for the venue. U.S. Cellular has been active in these public-private partnerships, including naming rights for the Chicago White-Sox Park, as well as the U.S. Cellular Arena in Milwaukee, Wisconsin, the U.S. Cellular Center in Cedar Rapids, Iowa, the U.S. Cellular Community Park in Medford, Oregon and the U.S. Cellular Coliseum in Bloomington, Illinois.

City staff researched other naming rights agreements in the public domain, and learned that there is a wide variation in the amounts of funding in naming rights agreements. New venue construction garnered substantially more naming rights fees. Major metropolitan media markets, professional sports facilities, and long term commitments were financially more substantial. Existing facilities, especially older facilities, generated less interest and financial commitment.

As a result of the consistent, long-term lack of interest from local or regional companies in any naming rights for the civic center, coupled with a proactive interest from a financially strong, nationally prominent technology-based company that has the ability to help with social media and market development for the venue, staff began negotiations with U.S. Cellular and reached an agreement in terms for a 5 year licensing agreement with a possible three year extension.

Other key components of the licensing agreement are: U.S. Cellular will receive Exterior Façade signage facing I-240, a Marquee Sign facing Haywood Street; Highway Directional signage/local way finding signage; Interior Signage/logo inclusion on marketing material, tickets; 2500 square feet of space for product displays; Event space on an annual basis. Additionally the agreement allows ExploreAsheville.com Arena, Banquet Hall, Museum, Exhibit Hall, Auditorium and Vendors (Soft Drink, Beer, Food, etc.) as continued and future sponsorship opportunities for the facility

The Notice of Intent to enter into a License Agreement with U.S. Cellular Corporation was published on November 11, 2011, in the Asheville Citizen-Times, in accordance with G.S. 160A-272.

This action complies with multiple City Council Strategic Operating Plan Objectives. The action supports current and prior Strategic Operating Plan Goals: Fiscal Responsibility, by leveraging internal and external partnerships for pursuing capital improvement projects and infrastructure projects; Green and Sustainable, by taking the City's sustainability program to the next level, which will include HVAC improvements to the Banquet Hall, increased recycling, and energy efficient lighting improvements; and the Job Growth and Community Development Focus Area, by creating more collaborative and effective working partnerships between the City of Asheville, the business community, and other key organizations to effectively manage the City's regulatory environment while accomplishing economic development goals.

The action also complies with the Civic Center Commission's Strategic Plan, as well as recommendations of the 2006 Civic Center Task Force. The action supports the Downtown

Master Plan, which calls for a near-term action step to maintain and upgrade the existing Civic Center and Thomas Wolfe Auditorium to serve for at least the next five to ten years.

Pros:

- Utilize initial funding for support of current facility upgrades and continue discussions with key partners including County/TDA, while leveraging additional funding using private money as incentive.
- Plan for additional upgrades to facility, enhancing chances for additional events, etc
- Marketing and promotional assistance from U.S. Cellular.
- Reserves key venue components for other naming rights and sponsorship opportunities.

Con:

- None noted.

The agreement has a positive financial impact on the Civic Center for continuing capital improvements: a license agreement of $750,000 over a five year period, plus $60,000 in capital cost-sharing, totaling $810,000; a five percent attendance incentive/deduction over four years totaling an additional $32,000; and an additional three year license agreement extension that would increase the amount another $511,310 for a total of approximately $1,350,000 over eight years. A budget amendment to accept these funds is included in a separate staff report to include the funding in the Civic Center capital budget.

City staff recommends City Council adopt a resolution authorizing the Mayor to execute a License Agreement with U.S. Cellular Corporation for naming rights of the Asheville Civic Center complex city-owned property at 87 Haywood Street, Asheville, NC.

Regarding the change orders, amendment to a contract and budget amendment, Mr. Powers said that this is the consideration of (1) a resolution authorizing the City Manager to execute change orders with Brantley Construction Company, General Contractor (contract amount: $4,077,921.00); Irwin Telescopic Seating, Seating riser contractor (contract amount: $775,746.00); Capturion Network, scoreboards/video boards (contract amount: $254,715.00); and SPL Integrated Solutions, Sound reinforcement system (contract amount: $418,461.03); up to the budgeted contingency of $400,000 for the purpose of completing the current Civic Center renovations; (2) a resolution to authorize the City Manager to execute an amendment to the professional services contract with Betsch Associates/PBC+L for design services related to the Civic Center renovations in the amount of $295,720 for a total contract amount not to exceed $825,705 for Phase II of the project; and (3) a budget amendment in the amount of $357,000 to increase the Civic Center renovations project budget with revenue coming from outside funding partners and Civic Center fund balance.

City Council previously approved various contracts to renovate the Civic Center for the Southern Conference Basketball Tournament coming March 2012. These contracts include a general contractor as well as specialized contractors for the sound system, seating risers, and scoreboard/electronics. Staff is requesting that Council authorize the City Manager to execute change orders for these contracts up to the budgeted amount of $400,000 in order to complete the project in time for the Southern Conference Basketball Tournament.

A standard procedure in construction contracts would authorize a contingency to cover potential routine project change order requests for unforeseen construction components related to the overall renovation of the arena, locker rooms, concourse, banquet hall, museum area and concessions areas, sound system, scoreboard, and seating risers. Due to an oversight in preparation of the staff report, staff did not request the approval for authorization of the construction contract contingency and authorization for the City Manager to execute the change orders.

508

Staff has been pleased with the progress of the work to date, and the project is currently on schedule for completion in accordance with the plans and specifications within the time specified in the contract. There are currently only approximately $97,264 in pending change directives and change orders necessary to insure that the project is completed.

While staff does not expect the changes to be in the amount of $400,000, there are some unknown factors that could increase the original contracts. Given the time constraints on the project, staff is requesting the ability to expedite the process by asking City Council to approve these changes.

Approval of the resolution authorizing the City Manager to execute change orders with the contractors up to $400,000 and the resolution increasing the contract with Betsch Associates/PBC+L by $295,720 also requires approval of a project budget amendment. There is available budget already in the Civic Center renovation project to cover a portion of these additional amounts; however the project budget needs to be increased by $357,000 to fully fund them. Revenue to cover the $357,000 budget amendment is coming from three sources: (1) US Cellular first year funding, (2) ABC contribution, and (3) Civic Center fund balance. This budget amendment will bring the total project budget for Civic Center renovations to $7,332,000. The chart below shows the original budget for this project, the August budget amendment, and the proposed budget amendment before Council tonight.

| FY 2012 CIVIC CENTER PROJECT BUDGET | | |
|---|---|---|
| **ORIGINAL BUDGET** | | |
| **Funding Sources** | | **Amount** |
| Tourism Development Authority | $ | 1,750,000 |
| Buncombe County | $ | 320,000 |
| City of Asheville Capital Contributions | $ | 800,000 |
| **Total Original Budget** | **$** | **2,870,000** |
| **AUGUST BUDGET AMENDMENT** | | |
| **Funding Sources** | | **Amount** |
| Civic Center Box Office Proceeds | $ | 580,000 |
| Debt Proceeds | $ | 3,525,000 |
| **Total Budget Amendment Aug** | **$** | **4,105,000** |
| **TOTAL BUDGET AUGUST** | **$** | **6,975,000** |
| **NOVEMBER BUDGET AMENDMENT** | | |
| **Funding Sources** | | **Amount** |
| US Cellular | $ | 132,000 |
| Civic Center Fund Balance Transfer | $ | 200,000 |
| ABC | $ | 25,000 |
| **Total Budget Amendment Nov** | **$** | **357,000** |
| **TOTAL BUDGET NOVEMBER** | **$** | **7,332,000** |

| **Funding Uses/Project Components** | | **Amount** |
|---|---|---|
| Design | $ | 825,705 |
| Seating Replacement | $ | 775,000 |
| Scoreboard Replacement | $ | 255,000 |
| Sound System | $ | 418,461 |
| Technology Upgrades and Asbestos Abatement | $ | 120,000 |
| Construction | $ | 4,077,921 |
| Chairs and other equipment | $ | 459,913 |
| Contingency | $ | 400,000 |

| TOTAL | $ | 7,332,000 |
|---|---|---|

This action complies with the City Council Strategic Operating Plan's Fiscal Responsibility goal of developing strategic partnerships to leverage resources for infrastructure and CIP projects. This action also complies with the Civic Center Commission Master Plan that encourages continuing renovations for the facility, and supports the goal of developing new partnerships. This request supports Council's strategic plan allowing for timely renovations to the Civic Center for the Southern Conference.

This action has been reviewed and recommended by the Civic Center Commission.

Pros:

- Allows for timely renovations to the Civic Center for the Southern Conference Basketball Tournament.
- Assures that the project will stay within budget as the change orders cannot exceed the budget of $400,000.

Con:

- None.

The budget amendment will increase the total Civic Center renovation project budget by $357,000. $157,000 of this amount will come from outside project partners with the remaining coming from Civic Center fund balance. As reported in the FY 2010-11 audit presentation, Civic Center June 30, 2011 fund balance exceeded its 16% target amount by $394,296. Staff is recommending that $200,000 be appropriated from fund balance for the renovation project. The remaining $194,296 will be held in fund balance to meet cash requirements at the Civic Center box office. This Civic Center fund balance appropriation has no impact on General Fund fund balance.

Staff recommends City Council authorize (1) a resolution authorizing the City Manager to execute change orders with Brantley Construction Company, General Contractor (contract amount: $4,077,921.00); Irwin Telescopic Seating, Seating riser contractor (contract amount $775,746.00); Capturion Network, scoreboards/video boards (contract amount: $254,715.00); and SPL Integrated Solutions, Sound reinforcement system (contract amount: $418,461.03); up to the budgeted contingency of $400,000 for the purpose of completing the current Civic Center renovations; (2) a resolution to authorize the City Manager to execute an amendment to the professional services contract with Betsch Associates/PBC+L for design services related to the Civic Center renovations in the amount of $295,720 for a total contract amount not to exceed $825,705 for Phase II of the project; and (3) a budget amendment in the amount of $357,000 to increase the Civic Center renovations project budget with revenue coming from outside funding partners and Civic Center fund balance.

Regarding the naming rights, Mr. Powers said that everyone can agree that our Civic Center is an important economic development engine for Asheville. Our Downtown Master Plan recently reiterated that it is an important anchor for downtown. It is exciting to see passion and interest in the Civic Center. It builds on an overwhelming positive momentum that has been built by working together with numerous partners in the last 24 months, after years of frustration about how to bring new life and required capital improvements to the complex. City Council has specifically included the Civic Center as a City-wise priority in its strategic plans since at least 2007. He citied the following:

- Asheville City Council's goals and vision 2007-08 (1) Support a renovated Civic Center as a regional entertainment destination; pursue initiative to improve the customer experience at the Civic Center.

510

- Asheville City Council 2008-09 Strategic Plan (1) Support a sustainable community and a sustainable city government through a strong commitment to infrastructure maintenance, capital improvements, long-term planning and fiscal responsibility; (2) Develop a long-term plan to address the City's aging infrastructure including facilities and sidewalks; and (3) Take action, including addressing capital needs, to improve the customer service experience at the Asheville Civic Center.

- Asheville City Council 2009-10 Strategic Plan (1) Support a strong commitment to infrastructure maintenance, capital improvements, long-term planning and fiscal responsibility; (2) Develop a long-term plan to address the City's aging infrastructure including facilities and sidewalks; and (3) Take action, including addressing capital needs, to improve the customer service experience at the Asheville Civic Center.

- City of Asheville Strategic Plan 2010-11 (1) Explore alternatives for enhancing the City's long-term financial commitment to master plan implementation, infrastructure maintenance, capital improvements, and public facilities; and (2) Leverage internal and external partnerships for pursuing capital improvements and infrastructure projects.

- City of Asheville Strategic Plan 2011-12 (1) Leverage internal and external partnerships for pursuing capital improvements and infrastructure projects; and (2) Consider funding for Asheville Civic Center improvements by building on momentum with existing partners.

Much of the decision to specifically focus on the Civic Center in the Strategic Plan is due to the many studies and reports over the last 15 years devoted to the future of the Civic Center. He briefly reviewed some of the following key studies and their recommendations: (1) 1996-98 – Hunter Interest Report; (2) 2000 – Highland Group Report; (3) 2001 – Heery Study; (4) 2002-03 – Performing Arts Center Study by Westlake, Reed & Leskosky; (5) 2005-06 – Civic Center Task Force. The Task Force conducted 9 public meetings and looked at past reports and other funding models from centers around the state and in the southeast (including hotel occupancy and food & beverage taxes). They found that 67% of the current revenue generated by the Civic Center comes from the Arena. They also studied the Economic Impact Study by WCU – direct and indirect effects of the expenditures by the Civic Center created a total impact on the local economy over $22 Million. Measuring the impact in jobs, the Civic Center creates 295 direct jobs and 73 indirect jobs for a total of 368 jobs in the local economy. The Civic Center Task Force brought their findings to Council: One finding was two options – One was to convert the Civic Center to Performing Arts Center and build a new arena on a new location; The other option was to renovate the Arena and build a new Performing Arts Center. The Civic Center Commission voted to support the second option to build a new Performing Arts Center at the Parkside site. The other finding is that there is no "silver bullet" for financing these options. There would need to be a combination of public and private money for any scenario. Way to finance included: a hotel occupancy tax of 1% generated $1.3 Million a year (in 2006 numbers) – that current amount is now approximately $1.6 Million a year; private contributions proposed at $10 Million; seek a County contribution; ½% sales tax which would generate (at the time) $15 Million/year; food and beverage taxes; other state and federal contributions; and a Tax Increment Financing District; (6) in 2008 City Council receives public input and passes a resolution committing to reserve space for five years for a performance center adjacent to Pack Square Park as part of a multiple use redevelopment project on the "Parkside" site with details included in a joint development agreement to be developed; (7) in 2009 City representatives are contacted about the possibility of bidding to host the Southern Conference College Basketball Tournament again; (8) in 2010, the Southern Conference awards the Men's and Women's SoCon Basketball Tournament to Asheville. The City applies and is successful in its application to the Tourism Development Authority for a $2 Million Tourism Product Development Fund grant to be used for capital improvements. Buncombe County supports the partnership with a contribution of $1 Million and the ABC Board provides $25,000/year in educational support for an underage drinking prevention campaign. UNC-Asheville agrees to host the women's games in the new Kimmel Arena; (9) in late 2010 U.S. Cellular expresses interest and possible sponsorship opportunities at the Civic

Center; and (10) in 2011 staff conducts a project assessment, due diligence, confers with City Council and receives direction, announcement of a tentative agreement, which brings us to public comment at this meeting.

As the project continued to develop, one of the tasks that staff tried to do was benchmark other facilities to understand their agreements to use as a guide as the project moved forward in their due diligence. He then briefly talked about the following benchmark projects reviewed, along specifics in their naming rights: Bank of Kentucky Center in Highland Heights Kentucky; Bojangles' Coliseum in Charlotte North Carolina; Canada Inns Stadium in Winnipeg Manitobia; Carolina First Arena in Charleston South Carolina; RBC Center in Raleigh North Carolina; U.S. Cellular Arena in Milwaukee Wisconsin, Bancorp South Center in Tupelo Mississippi; and Bi-Lo Center in Greenville South Carolina.

Mr. Powers then reviewed the following key points of the tentative agreement: (1) Five-year agreement: $750,000 over 5-year period, plus $60,000 in capital cost-sharing, totaling $810,000; (2) Five percent attendance incentive/deduction over four years totaling additional $32,000; (3) additional three year extension would increase the amount of an additional $511,310 for a total of approximately $1,350,000 over eight years; (4) marking and promotional assistance from U.S. Cellular; (5) utilize initial funding for support of current facility upgrades; (6) exterior signage: façade facing I-240; (7) marquee sign: facing Haywood Street; (8) highway directional signage/local wayfinding signage; (9) interior signage/logo inclusion on marketing material, tickets, etc.; (10) 2500 square fee of space for product displays; (11) event space on an annual basis; (12) confirms that ExploreAsheville.com Arena, Banquet Hall, Museum, Thomas Wolfe Auditorium, Exhibit Hall and Vendors (soft drink, beer, food, etc.) are allowed as continued future sponsorship opportunities for the facility; and (13) the final action in the U.S. Cellular partnership is for City Council to receive public comment and vote on the licensing agreement at the next formal meeting scheduled for November 22, 2011.

Vice-Mayor Newman said there are a lot of good things happening at the Civic Center and a lot of people are working hard to see the facility reach more of its potential. There has been a genuine effort to solicit other private sector partners in recent years but until this partnership, the idea of private sector investments have not been very fruitful. While some organizations or businesses might not have been interested 3-5 years ago, they may be interested today.

Vice-Mayor Newman then moved (1) to affirm the use of a naming rights partnership as part of the overall financing strategy for the Civic Center improvements; (2) to accept the proposal from U.S. Cellular Corporation; and (3) to defer implementation of the current proposed partnership until December 31, 2011, and allow any other organization that wants to put forward a credible serious proposal for partnering with the City on a public/private partnership for investments in the Civic Center to put forward a proposal for consideration. If no credible proposal is presented during that time period that presents a superior value proposition to the City of Asheville, compared to the current proposal that we have received, then the current proposal would go into effect on January 1, 2012. If the City Manager does receive a credible proposal that presents a superior value proposition to the community of Asheville during that time, Council direct the City Manager and his staff to consider that and to bring this issue back to City Council for deliberation. This motion was seconded by Councilman Davis.

Councilman Bothwell felt there are two separate ideas and wondered if they should be voted on separately. A lot of comment he has received has been about not selling the naming rights. His sense of the citizenry is that we are in a different time than in 2001 when Council approved the naming rights for the Civic Center. We need to reconsider reducing the corporate influence in government. He understood the public/private partnership concept, but as far as naming the core civic institution for our City, he felt the citizens need to have a voice on whether or not we should put a corporate name on the building. The separate issue is if they do, then we should get the highest price for it.

512

Councilman Smith felt that what Mr. Power's presentation underscored was the 15-year history of trying to devise a strategy for improvements to the Civic Center. It also underscored the duration of public debate, input and studies and year after year Council commitment to public/private partnerships, including naming rights, in order to restore our Civic Center

Councilwoman Manheimer said it was ironic to hear comments about the Civic Center at this time because for years she has heard comments about why not tear the Civic Center down and build something different. She said the Civic Center is an economic engine for Asheville. It brings is tons of folks who dine in our restaurants, stay in our hotels, shop in our shops, and pay sales tax. One concern she has about the information being distributed about the sale of these naming rights is the omission of the subsidy that the citizens of Asheville pay to support the Civic Center. The Civic Center is supported solely by the citizens of Asheville and not Buncombe County. It is the Asheville residents' hard-earned property taxes and sales tax that fund our General Fund that in turn pay for the subsidy that is required to run the Civic Center. It is not a break-even business. For some years it has been subsidized by Asheville residents for several hundred thousand dollars. That is just in operational costs. That is money we can't spend on new sidewalk construction or whatever urgent need there is. That is just a flat General Fund subsidy. That piece of information has been missing. As Council members, we must make sure that we have all the services we need and we have clearly heard from residents not to raise property taxes. So, Council has to find solutions that combine those two things – provide services and don't raise taxes. So while she would like to say we don't ever need to engage in corporate partnerships and always preserve the name of Asheville, that seems unrealistic to her. There are cities in this country that are having to file bankruptcy, stop bus service, scale back police, etc., but Asheville is not going to be one of them because we are fiscally careful. The other issue raised is that if we are going to sell the naming rights, it should have been an open process and granted, perhaps it should have been. However, she did some research on the sale of naming rights and it does appear there are two ways to do it. You can put it out for bid (which is usually done for new construction) or you can do it as a negotiated economic development deal (which is done without much involvement by City Council at all other than to let them know its happening). In this case, that is the method use noting that it has been a very open dialogue that Council was interested in selling the naming rights for years but we didn't have any takers. She supported Vice-Mayor Newman's motion that would allow for other people to basically put in an upset bid. Now that everyone knows the offer on the table and all the components of it, let's invite someone else to try to upset that offer.

Councilman Davis said that he was a member of the Civic Center Task Force and what bothers him most are the omissions made along the way. This has been a very open process and we have been fighting very hard to develop partnerships for years. Before that we worked hard to try to get partnerships with the County, Tourism Development Authority, etc. to bring the building to where we are now. The building is now, through partnerships, finally being renovated. The fraction of money from the naming rights is needed to make a new concession area. The Civic Center has good structure and is being rehabbed. There have not been a lot of people stepping forward for partnerships even though this is an energy driver for downtown.

Councilman Bothwell felt the amount of money that this advertising deal (not a partnership) amounts to about $5 on a tax bill for $175,000 house each year. We would not be talking about a large tax increase. At the current rate, this agreement for $1.3 Million over 8 years, would be .1% of the City budget. The operations cost for the Civic Center is over $2.1 Million and this deal is just $150,000 a year. He felt we could add $1 to parking fees for events or add $1 to ticket fees to make this money up, other than selling the name of our Civic Center. We have heavily invested in our name with advertising through the Tourism Development Authority, the Chamber of Commerce, etc. for years building up the reputation of Asheville as a cute town in the mountains, but now the Civic Center will have the same face at Atlanta and Charlotte. He noted that the possible extra money is also a possible loss if attendance revenues are lower. We are not just talking about a partnership to name an arena, we are talking about Asheville and we

are worth more than that. We are losing the value of the repetition of Asheville every time an ad is run, a ticket is printed at the Civic Center or at TicketMaster, etc. He wondered if the amount of advertising we are losing might be worth more than the amount of advertising we are selling. If Council adopts this resolution, he suggested we aggressively market to prove that there is any bidding going on.

City Manager Jackson said that City staff will make special efforts to market this and advise Council what those steps to market it would be.

The following individuals spoke in opposition of selling the naming rights of the Asheville Civic Center, basically citing there are other ways to rehabilitate the facilities and renaming it will take away from the unique quality of Asheville:

Mr. Timothy Sadler
Mr. Paul Van Heden
Mr. Mark Bloom
Ms. Amena Spangler
Mr. Matthew Byrd
Mr. Tim Ballard
Mr. Jim Aycock
Mr. Andrew Stevens

The following individuals spoke in support of selling the naming rights of the Asheville Civic Center due to the history outlined by Mr. Powers:

Mr. Mike Burke, Chairman of the Civic Center Commission
Mr. Lou Bissette
Mr. Dennis Justice

Councilman Smith said that Asheville has unique restrictions around using our water and the hotel occupancy tax. Our hotel occupancy tax is only 4% where the state average is between 6-7%. Of that 4%, 3% goes to the Tourism Development Authority and 1% goes to the Tourism Product Development Fund. They have been generous in that they are returning some of that tax money into public infrastructure that will fuel tourism. If our legislators in Raleigh were willing to allow Asheville to simply rise to the state average, and not single us out to have the lowest occupancy tax in the state of North Carolina, then we would have the dollars to repair and renovate our infrastructure, like the Civic Center. City Council has lobbied hard but we need more voices. He urged the public to contact our legislators and let them know you think this is important.

Vice-Mayor Newman said that the Civic Center in unique in that it is not a core function of the City government. In many ways it is a commercial facility – full of concerts, trade shows, etc. Whatever decision is made about naming rights does not automatically mean all City facilities are open for naming. This is a site specific question about this particular facility. We must seek out every opportunity we can to develop ways to pay for the infrastructure in the City because the mechanisms most cities have in our state are not at our disposal. If property taxes were raised, there would be a lost list of things that would be so important for Council to devote those resources to, chances are the Civic Center renovation would not be in the top 10.

Mayor Bellamy said that she cannot take credit for this partnership. Staff worked with U.S. Cellular on this opportunity. She did make the announcement, noting that staff had the consensus of Council to move forward. She heard no dissenting voices from City Council in closed session to not move this partnership forward. At this time, copies of those minutes can be obtained from City Clerk Maggie Burleson. She said that this is change to a lot of people and they felt they were not involved in the process because they felt the process was not as public as people would have liked. To them she apologized. She personally received a phone call from

the Mr. Freeman, CFO of Ingles, apologizing for their e-mail sent. Mr. Freeman said that was a surprise to him and others in the corporation to have the e-mail forwarded to the community in the way it was. He said that in the future Ingles would like to be at the table for other endeavors, acknowledging that Ingles in the past was not receptive to naming opportunities at the Civic Center. She noted that not only did the City have future naming opportunities but also UNC-Asheville and the Performing Arts Center. She said our legislators can help us and it was the consensus of Council to provide a link on the City's webpage to our state legislators. She thanked those who have come to the table to help with the Civic Center, noting there are other opportunities for partners in our community to help. She has been on City Council for 12 years and has never seen this level of desire to protect the Civic Center and she hoped it doesn't stop. From all the e-mails and conversations she has personally had, she felt this is a balanced conversation. The name of the Civic Center does not change the soul of who our community is. No one thing or name will stop Asheville from being Asheville and being celebrated for being different. As a native of Asheville, she has watched our community grow into being in a class by itself. She hoped that as we move forward we will gain more partners to help us with our bigger financial issues. She also hoped that we will look at this issue and learn from it. Like Councilwoman Manheimer, she too thought we need to look at this type of process for economic development issues in the future. She asked the City Attorney to see how we can meet the needs of our partners and also make sure the public is informed. She does not feel that any attendance at a graduation, or attendance at Moogfest will be diminished because the building is named the U.S. Cellular Center. She hoped our relationship with U.S. Cellular (noting that the City partnered with U.S. Cellular to bring Asheville cellular service) continues.

The motion made by Vice-Mayor Newman and seconded by Councilman Davis carried on a 6-1 vote, with Councilman Bothwell voting "no."

**RESOLUTION BOOK NO. 34 – PAGE 200**

Councilman Smith moved for the adoption of Resolution No. 11-229. This motion was seconded by Councilman Bothwell and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 201**

Councilman Smith moved for the adoption of Resolution No. 11-230. This motion was seconded by Councilman Russell and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 202**

Councilman Smith moved for the adoption of Ordinance No. 4037. This motion was seconded by Councilman Russell and carried unanimously.

**ORDINANCE BOOK NO. 27 – PAGE 240**

At 10:45 p.m., Mayor Bellamy announced a short recess.

**B. RESOLUTION WAIVING THE STREET CLOSING FEE FOR THE CLOSING OF A PORTION OF COLLEGE STREET NECESSARY FOR THE BUNCOMBE COUNTY LIFE SAFETY ADDITION**

Due to the length of the meeting, at the suggestion of Mayor Bellamy, Councilman Smith moved to delay action on New Business Items "B", "C", and "D" until the December 13, 2011, meeting. This motion was seconded by Councilman Bothwell and carried unanimously.

**C. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A MANAGEMENT AGREEMENT WITH FIRST TRANSIT INC. TO MANAGE THE OPERATION OF THE ASHEVILLE TRANSIT SYSTEM**

Due to the length of the meeting, at the suggestion of Mayor Bellamy, Councilman Smith moved to delay action on New Business Items "B", "C", and "D" until the December 13, 2011, meeting. This motion was seconded by Councilman Bothwell and carried unanimously.

**D. RESOLUTION AUTHORIZING THE CITY OF ASHEVILLE'S PARTICIPATION IN THE N.C. STATE TREASURER'S OTHER POST EMPLOYEE BENEFIT FUND**

**RESOLUTION SUSPENDING RETIREE HEALTH CARE COVERAGE FOR CITY EMPLOYEES HIRED AFTER JUNE 30, 2012**

Due to the length of the meeting, at the suggestion of Mayor Bellamy, Councilman Smith moved to delay action on New Business Items "B", "C", and "D" until the December 13, 2011, meeting. This motion was seconded by Councilman Bothwell and carried unanimously.

**E. RESOLUTION NO. 11-231 - RESOLUTION ADOPTING AN AMENDMENT TO THE 2010 CONSOLIDATED ANNUAL ACTION PLAN FOR GREEN OPPORTUNITIES WEATHERIZATION ASSISTANCE**

Community Development Director Jeff Staudinger said that this is the consideration of a resolution authorizing an amendment to the City's Consolidated Annual Action Plan for 2010-11 for the Green Opportunities Weatherization Assistance CDBG Grant.

Green Opportunities requests an amendment to their 2010-2011 Weatherization Assistance CDBG grant agreement. Their request is:

1) To modify the number of homes served from 65 to 45.
2) To expand the geographic service area to include all Asheville city.
3) To modify the per house reimbursement rate from $830.77 to $1,466.16 per home.

Two external conditions have led to this request. First, federal DOE Recovery Act (ARRA) funding requires that all persons performing DOE funded weatherization be paid Davis-Bacon wages. Green Opportunities had been paying their trainees a stipend, but to perform ARRA-funded weatherization activity were required to pay $18 an hour. Davis-Bacon regulations allow for stepped wages to be paid for persons in a certified apprenticeship program. Green Opportunities designed an apprenticeship curriculum, and then applied for and received certification. However, this process took months, during which production essentially ceased. Second, the State Energy Office tightened their guidelines for prioritization of applications. As Community Action Opportunities implemented these guidelines in their four-county service area, the number of applications approved from the limited targeted geographic area served by Green Opportunities dwindled significantly. The proposed change will immediately increase the flow of homes to be weatherized. Community Action Opportunities indicates it has sufficient approved applications in the City to assign to Green Opportunities, which in turn has indicated it can ramp up its production levels to meet the proposed number to be served. The increase in the reimbursement rate will help Green Opportunities meet the increased production rate.

The proposed Action Plan Amendment directly relates to the Council's Strategic Goal of "Affordable."

The Housing and Community Development Committee agrees with this recommendation to approve the amendment.

Pro:

- The proposed amendment allows for efficient use of funds in a timely fashion, and will assist in meeting overall program goals. The funds will also assist the sponsoring organization's viability and ability to meet community needs.

Con:

- The production output will be decreased from 65 to 45 homes.

The proposed amendment uses funds already allocated to the specific program. There is no increase in administrative responsibility for the City. No City General Funds are allocated to this program.

Staff recommends that Council approve the amendment to the 2010-2011 Consolidated Annual Action Plan for Green Opportunities Weatherization Assistance program.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 11-231. This motion was seconded by Councilman Smith and carried on a 6-1 vote, with Councilman Russell voting "no."

**RESOLUTION BOOK NO. 34 – PAGE 203**

**F. RESOLUTION NO. 11-232 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR A GRANT THROUGH THE BUNCOMBE COUNTY TOURISM DEVELOPMENT AUTHORITY DURING THE 2012 TOURISM DEVELOPMENT PRODUCT FUND FOR CIVIC CENTER RENOVATIONS**

Director of Finance & Management Services Lauren Bradley said that this is review of potential projects for application to the Tourism Product Development Fund (TPDF).

The Buncombe County Tourism Development Authority's Tourism Product Development Fund (TPDF) was created by the State Legislature in 2001. This makes funding possible for tourism projects that will increase the number of overnight stays by visitors in Buncombe County lodging properties.

The City has previously received TPDF funding for the Wayfinding Partnership and Civic Center phase one upgrades. Additionally, the WNC Soccer Foundation received $400,000 of funding for the City's John B. Lewis Soccer complex in 2002, 2004, and 2009.

She provided Council with a "Frequently Asked Questions" information sheet that outlines the criteria and funding process for the TPDF. This document answers many of the questions about the guidelines and eligibility for funding of projects.

In an effort to leverage resources and build on priorities in the City's strategic operating plan, develop partnerships with the Tourism Development Authority, and meet core funding criteria of the TPDF, staff has developed the following summary of possible projects for Council review:

<u>Phase II Civic Center Improvements</u>

The Tourism Product Development Fund (TDPF) grant application will continue to leverage the strong partnerships that have been built between the City, the Tourism Development Authority, Buncombe County, and other private and public sector partners, to take the Civic Center to the

next level as the region's premiere event and entertainment venue. The design team is currently reviewing the preliminary costs estimates.

The project will seek to prioritize the following items:

1. Completion of renovations for the upper seating bowl
2. Development of a Club Level amenity that is highly desirable for premium events
3. Create additional required storage for the new seating and risers
4. Build additional capacity for the new Asheville Craft Beer Garden feature
5. Provide renovations to the lobby area to aid the increased activity from events occurring in both the arena and auditorium concurrently

This action complies with the City Council Strategic Operating Plan of Job Growth and Community Development in that it considers funding for Civic Center improvements by building momentum with existing partners.

**Future Funding Cycles**

Greenway Development: Beaucatcher Overlook

Initial planning must occur prior to submitting a greenway project for possible funding. Staff has identified Beaucatcher Overlook as a candidate for a future Tourism Product Development funding cycle. The project is currently in the design phase and will not be completed in time for the January 2012 cycle. However, this project will be ready for submission for a TDPF grant in January 2013, with specific construction costs identified by mid-to-late 2012. The FY 11-12 CIP includes funding for construction of the Beaucatcher Overlook greenway and could be used as matching fund for a TPDF grant. Any TPDF funding would allow the City to extend the greenway or apply CIP funds to other projects.

Future greenway projects have also been identified below. The proposed five-year CIP includes a funding allocation for design work for the Town Branch Greenway project in FY 12-13 with construction funding contemplated in FY 13-14, making it a feasible candidate for TDPF consideration in the 2014 funding cycle. If funding were awarded for construction of the Town Branch greenway, CIP funding would be made available for additional greenway projects, as listed below.

| Project | Funding Cycle Year | Cost for Land Acquisition | CIP Allocation for Land Acquisition | CIP Design Costs | CIP Allocation for Design |
|---|---|---|---|---|---|
| Town Branch Greenway | January 2014 | $350,000 | FY 12-13 | $250,000 | FY 13-14 |
| Clingman Forest Greenway | January 2015 | $220,000 | Not currently included in CIP | $100,000 | Not currently included in CIP |
| Nature Center Visitors Enhancement Project | January 2016 | N/A | N/A | $250,000 | Not currently included in CIP |

Pedestrian Trash Receptacles in the Central Business District (CBD)

There are approximately 136 pedestrian receptacles in the CBD that are serviced seven days per week. The overall condition of the metal receptacles is 'average' due to over 15 years of heavy

use in a public setting. Additionally, the existing containers are not optimal for cleaning beneath the receptacle and are designed such that trash can easily blow onto the sidewalk or street.

The Asheville Department of Public Works would like to partner with the Downtown Commission, Downtown Association and Downtown Asheville Residential Neighbors to replace these receptacles with new containers that include recycling capabilities. In addition to replacing the existing containers, the project would add approximately 60 containers in strategic locations. Replacing these old receptacles would improve downtown cleanliness, resulting in more visitors who stay in Asheville for longer periods of time.

The joint trash/recycling containers cost approximately $2,200 each and can be artistically customized to coordinate with the Wayfinding signs.

We would propose to replace 136 trash cans and add an additional 64 trash receptacles. The project can be completed with the 24 months required by the TPDF Grant.

*Benefits:*

- Proposal includes recycling containers;
- Proposal adds 60+ trash/recycling receptacles;
- The design of the containers can be customized to fit Asheville;
- The design of the trash receptacles do not allow for trash to blow out or get stuck under the container;
- The trash receptacles can be solar powered;
- The receptacles have a sensor that can communicate to let staff know when they are full.

In order to make the project viable for TDPF funding, staff is seeking grant resources to use a matching funds for the City's share. Therefore, this project would not be a feasible candidate for consideration in the 2013 or 2014 funding cycle.

Staff identified a project for this year's funding cycle, in addition to possible projects for future cycles. Given that the TPDF does not fund design work, any preliminary work must be completed by the city. More detailed preliminary work will be completed prior to any project being selected for an application to the TPDF.

Each project summary includes the relationship to the strategic operating plan and fiscal information available at this time. It should be noted that fiscal impacts are preliminary. In some projects, local funding has been identified; however, some projects do not have sources of funds identified.

City staff recommends City Council review the project summaries and provide direction to staff.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 11-232 to apply for grant funding from the Tourism Product Development Fund during the 2012 funding cycle for the Asheville Civic Center renovations. This motion was seconded by Councilman Smith and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 204**

## G. BOARDS & COMMISSIONS

### Affordable Housing Advisory Committee

Vice-Mayor Newman said that Mr. Anthony Goodson, representing the Housing Authority, has resigned as a member of the Affordable Housing Advisory Committee, thus leaving an unexpired term until September 1, 2014.

The following individuals have applied for the vacancy on the Affordable Housing Advisory Committee: Richard Warren, Paul Reeves, Roger Hartley, Melissa Anne Bernard and Jayden Gurney.

Vice-Mayor Newman said that the Boards & Commissions Committee felt it was important to have representation from the Housing Authority on this Committee and recommended interviewing Jayden Gurney, as the representative from the Housing Authority.

Therefore, it was the consensus of Council to interview Mr. Gurney for a position on the Affordable Housing Advisory Committee.

### RESOLUTION NO. 11-233 - RESOLUTION APPOINTING MEMBERS TO THE ALCOHOLIC BEVERAGE CONTROL BOARD

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that the terms of Charles Worley and Jim Ellis, as members on the Alcoholic Beverage Control (ABC) Board expired on November 13, 2010.

The following individuals have applied for the vacancies on the ABC Board: Genny Lynn Beville and Tim Flora.

Vice-Mayor Newman said that the Boards & Commissions Committee recommended reappointing Jim Ellis. It was also the Committee's recommendation to appoint William A. Russell Jr.; after he was no longer a member of Council to make that appointment and that action be taken on December 13, 2011.

Vice-Mayor Newman moved to reappoint Mr. Ellis to serve an additional three year term, term to expire November 13, 2014, or until his successor has been appointed. This motion was seconded by Councilman Davis and carried on a 6-1 vote with Councilman Bothwell voting "no".

Councilman Bothwell voted against reappointment of Mr. Ellis because he felt the ABC Board should be held accountable to the citizens of Asheville for the things that went wrong on their watch. He thought all Board members should have resigned. The ABC Board is a fairly unique board and oversees a multi-million dollar business. Board members have a fiduciary responsibility.

Mayor Bellamy said it was brought to her attention that there have been some issues that have happened under Council's watch and wondered if Council should have to resign. She questioned how our policy-making boards (who are not there for day to day operations) are going to have to adhere to the criteria that every board/commission is responsible for staff action. She wondered how we should hold people accountable at this level or at our appointee level going forward.

Mayor Bellamy wondered if the Boards & Commissions Committee should review criteria of what every board/commission member is responsible for.

Councilman Davis understood Councilman Bothwell's persistent position, but felt he is continuing to cast doubt on the findings of the ABC report. The reality is the ABC Board does not

look at the individual receipts of the credit card expenses. In fact, the audit was received the same day Mr. Candy chose to resign.

**RESOLUTION BOOK NO. 34 – PAGE 205**

**VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:**

Mr. Matthew Byrd, with Occupy Asheville, read a letter from the Occupy Asheville General Assembly which considered the request made by Councilman Smith and the Asheville Police Department to elect representatives from their group to communicate consistently with City staff and APD. This request was voted on at their General Assembly on Friday, November 11, 2011, and was unanimously rejected. He then stated the reasons for rejection in summary being (1) they seek to communicate with consensus through a structure that provides for direct audience with all interested members; and (2) their trust in the City has been diminished by recent actions by the Asheville Police Department.

Mr. Mark Bloom expressed concerns about (1) why the existing traffic signal turns red along Biltmore Avenue since Aston Street is closed for construction activities; and (2) the new traffic signal at the intersection of Hospital Drive and Victoria Road is not operating in an efficient manner. City Manager Jackson said that he would refer the concerns to our Director of Transportation.

Mr. Paul Choi expressed concern about the traffic pattern on Hospital Drive. City Manager Jackson said that this traffic-related concern would be referred to our Director of Transportation as well.

As this is Vice-Mayor Newman's last formal Council meeting, he said it has been a great pleasure to work with all of Council and wished the new Council all the best. He hoped their service would be as rewarding for them as it has been for him. It was been a privilege for him to be a part of it.

As this was also Councilman Russell's last formal Council meeting, he said it has been an honor and privilege to serve the citizens of Asheville.

**PRIMARY ELECTION RESULTS – CITY OF ASHEVILLE – OCTOBER, 11, 2011; GENERAL ELECTION RESULTS – CITY OF ASHEVILLE – NOVEMBER 8, 2011; AND GENERAL ELECTION RECOUNT RESULTS – CITY OF ASHEVILLE – NOVEMBER 8, 2011**

Attached hereto as Exhibit "A" is the abstract containing the number of legal votes in the Primary Election, City of Asheville, held on October 11, 2011. Also attached as Exhibit "B" is the abstract containing the number of legal votes cast in the General Election, City of Asheville, held on November 8, 2011. In addition, Exhibit "C" is the abstract of votes for the General Election Recount of November 8, 2011.

**VIII. ADJOURNMENT:**

Mayor Bellamy adjourned the meeting at 11:25 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

**PRIMARY ELECTION**
October 11, 2011
ABSTRACT OF VOTES
FOR
STATE OF NORTH CAROLINA

**INSTRUCTIONS**

THREE COPIES are to be made. One copy is to be signed by the County Board of Elections and delivered by them, when the canvass is concluded, to the Clerk of Superior Court. One copy is to be retained by the County Board of Elections. One copy is to be mailed on canvass day to the Chairman of the State Board of Elections, Raleigh, North Carolina (GS 163-182.6).

**STATE OF NORTH CAROLINA**
**COUNTY OF BUNCOMBE**

The County Board of Elections for said county, having opened, canvassed, and judicially determined the original returns of the election in the precincts in this county, held as above stated, do hereby certify that the above is a true abstract thereof, and contains the number of legal ballots cast in each precinct for each office or referendum named, the name of each person or choice voted for, their party affiliation (where applicable), and the number of votes cast for each person or choice for the item named.

This is the 18th day of October 2011

This day personally appeared before me, [redacted] Chairman of the County Board of Elections, who being duly sworn, says the abstract of votes herein contained is true and correct, according to the returns made to said Board.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed My notarial seal this the 18 day of October, 2011.

(Seal)

My Commission (if any) Expires: 7/11/2016

# GENERAL ELECTION
November 8, 2011
ABSTRACT OF VOTES
FOR
STATE OF NORTH CAROLINA

## INSTRUCTIONS

THREE COPIES are to be made. One copy is to be signed by the County Board of Elections and delivered by them, when the canvass is concluded, to the City Clerk (GS 163-300). One copy is to be retained by the County Board of Elections. One copy is to be mailed on canvass day to the Chairman of the State Board of Elections, Raleigh, North Carolina (GS 163-182.6).

**STATE OF NORTH CAROLINA**
**COUNTY OF BUNCOMBE**

The County Board of Elections for said county, having opened, canvassed, and judicially determined the original returns of the election in the precincts in this county, held as above stated, do hereby certify that the above is a true abstract thereof, and contains the number of legal ballots cast in each precinct for each office or referendum named, the name of each person or choice voted for, their party affiliation (where applicable), and the number of votes cast for each person or choice for the item named.

This is the 15th day of November 2011

This day personally appeared before me, JULES BYRD
Chairman of the County Board of Elections, who being duly sworn, says the abstract of votes herein contained is true and correct, according to the returns made to said Board.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed My notarial seal this the 15th day of NOVEMBER 2011.

(Seal)

My Com[redacted]n (if any) Expires: 7/11/16

# GENERAL ELECTION
# RECOUNT
November 8, 2011
ABSTRACT OF VOTES
FOR
ASHEVILLE CITY COUNCIL
STATE OF NORTH CAROLINA

## INSTRUCTIONS

THREE COPIES are to be made. One copy is to be signed by the County Board of Elections and delivered by them, when the canvass is concluded, to the City Clerk (GS 163-300). One copy is to be retained by the County Board of Elections. One copy is to be mailed on canvass day to the Chairman of the State Board of Elections, Raleigh, North Carolina (GS 163-182.6).

**STATE OF NORTH CAROLINA**
**COUNTY OF BUNCOMBE**

The County Board of Elections for said county, having opened, canvassed, and judicially determined the original returns of the election in the precincts in this county, held as above stated, do hereby certify that the above is a true abstract thereof, and contains the number of legal ballots cast in each precinct for each office or referendum named, the name of each person or choice voted for, their party affiliation (where applicable), and the number of votes cast for each person or choice for the item named.

This is the 18th day of November 2011

This day personally appeared before me, JONES BYRD
Chairman of the County Board of Elections, who being duly sworn, says the abstract of votes herein contained is true and correct, according to the returns made to said Board.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed My notarial seal this the 18 day of NOVEMBER, 2011.

(Seal)

My Co[redacted]on (if any) Expires: 7/11/16

**ORGANIZATIONAL SESSION:**

Mayor Terry M. Bellamy welcomed everyone to the organizational session.

Mayor Bellamy led City Council in the Pledge of Allegiance.

Mayor Bellamy then introduced the Reverend Mark Ward from the Unitarian Universalist Church of Asheville and the Reverend Wes Austin from Abernethy United Methodist Church who both gave an invocation.

The Honorable J. Calvin Hill, Chief District Court Judge of the Buncombe County District Court, administered the Oath of Office to the following, who after sworn (or affirmed), thanked family and friends for their support:

Council Member Jan B. Davis
Council Member Marc W. Hunt
Council Member Christopher A. Pelly

**RESOLUTION NO. 11-239 - RESOLUTION OF APPRECIATION FOR BROWNIE W. NEWMAN**

Mayor Bellamy read the resolution.

Resolution No. 11-239 was adopted by acclamation.

Mayor Bellamy thanked Mr. Newman for his service to Asheville and presented him with the resolution, a plaque, his name plate and a City pen.

Mr. Newman thanked the public and his family for allowing him to serve. He also thanked City staff and City Council for their professionalism and dedication to the citizens of Asheville.

**RESOLUTION BOOK NO. 34 - PAGE 206**

**RESOLUTION NO. 11-240 - RESOLUTION OF APPRECIATION FOR WILLIAM A. RUSSELL JR.**

Mayor Bellamy read the resolution.

Resolution No. 11-240 was adopted by acclamation.

Mayor Bellamy thanked Mr. Russell for his service to Asheville and presented him with the resolution, a plaque, his name plate and a City pen.

Mr. Russell thanked the public and his family for allowing him to serve. He also thanked City staff and City Council for their professionalism and dedication to the citizens of Asheville.

**RESOLUTION BOOK NO. 34 - PAGE 207**

**ELECTION OF VICE-MAYOR**

Councilman Davis nominated Councilwoman Manheimer as Vice-Mayor of the City of Asheville. Councilman Smith seconded the nomination.

After hearing no more nominations, Mayor Bellamy closed the floor for nominations.

2

Mayor Bellamy called for a vote, resulting in Councilwoman Manheimer being appointed as Vice-Mayor unanimously.

**COMMENTS**

Councilman Davis, Councilman Hunt and Councilman Pelly each expressed their honor to be allowed to serve the citizens, appreciated the support of their family and friends, and looked forward to working for and with City residents.

Mayor Bellamy said that this has begun a new chapter in Asheville's history and looked forward to working with the new Council and our community.

**ADJOURNMENT:**

Mayor Bellamy adjourned the meeting at 5:50 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – December 13, 2011 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Esther E. Manheimer; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Marc W. Hunt; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

**PLEDGE OF ALLEGIANCE**

Mayor Bellamy led City Council in the Pledge of Allegiance.

**INVOCATION**

Vice-Mayor Manheimer gave the invocation.

**I. PROCLAMATIONS:**

**A. EMPLOYEE RECOGNITIONS**

APD Officer Scott Muse; APD Sgt. Joseph Johnson; Special Agent Derek Wiles from the Secretary of State's Office, Enforcement Division; TFO Ray Richardson – Durham ABC Agent; Special Agent Renee Davis; Special Agent DeeDee Jones; SAC John Lynch, N.C. Secretary of State's Office; and SA Jahaira Torrens – ICE – Dept. of Homeland Security, Raleigh Office – For their work associated with an APD Counterfeit Ring of stereo equipment; (2) APD Sgt. Joseph Silberman – Awarded the Forensic Interviewer Certification; (3) Fire Marshal Wayne Hamilton – Achieved the designation as a Certified Fire Investigator; and (4) Michelle Massey-Smith – Awarded the 2011 N.C. American Water Works Association Water Distribution Operator of the Year.

Mayor Bellamy thanked the employees on what they do on behalf of the City of Asheville and City Council. She was proud of City staff and looked forward to highlighting more accomplishments.

**II. CONSENT AGENDA:**

**A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON NOVEMBER 22, 2011, AND DECEMBER 6, 2011**

**B. RESOLUTION NO. 11-234 - RESOLUTION AUTHORIZING THE NEGOTIATION OF AN INSTALLMENT FINANCING CONTRACT FOR VARIOUS CAPITAL PROJECTS AND ACQUISITIONS TO BE DELIVERED IN FISCAL YEAR 2012 AS WELL AS THE REFINANCING OF EXISTING DEBT AND SETTING THE PUBLIC HEARING FOR THE TRANSACTION ON JANUARY 10, 2012**

Summary: The consideration of resolution authorizing the negotiation of an installment financing contract for various capital projects and acquisitions to be delivered in FY 2012 as well as the refinancing of existing debt and setting the public hearing for the transaction on January 10, 2012.

4

On October 25, 2011, the Asheville City Council approved a resolution directing the City Manager and Finance Director to pursue debt financing for capital projects and refinancing existing debt in FY 2012, and to appoint bond counsel and the managing underwriter for the transaction. The components of the debt issuance include: (1) $20.1 million in "new money" for Council approved capital projects authorized as part of the FY 2012 and FY 2011 Budgets, (2) $14.1 million for the takeout of the interim note on the 51 Biltmore Parking Deck project and (3) $10.8 million for the refinancing of some existing debt to achieve financial savings.

The debt will likely be issued as Limited Obligation Bonds, also commonly known as Certificates of Participation. This form of obligation has been used previously by the City to construct and renovate the Municipal and Water Maintenance Buildings and Grove Arcade in 1997 and two fire stations in 2006. These types of obligations are limited obligations of the City, payable solely from currently budgeted appropriations of the City.

As a next step in the process, staff is seeking City Council consideration of a resolution authorizing the negotiation of an installment financing contract for the purpose described above. The resolution also authorizes the City to make application to the Local Government Commission for approval of the transaction, makes the necessary findings required by the Local Government Commission and sets the public hearing for the matter on January 10, 2012.

After the public hearing on January 10, staff anticipates returning to City Council for final consideration of the installment financing contract on February 28, 2012 and closing on the transaction in late March 2012.

This action supports the City of Asheville's goal to operate the City to the highest level of fiscal responsibility by enhancing its commitment to infrastructure maintenance and capital improvements.

Pros:

- Allows the City to move forward with the FY 2012 debt financing while complying with all applicable statutes and regulations.
- Refunding of existing debt results in financial savings and the reinvestment of those savings in the CIP.

Con:

- None noted.

The total amount projected for identified capital projects and refinancing is approximately $45 million. The resolution authorizes the City to negotiate an installment financing contract in a principal amount not to exceed $50 million in the event that project estimates change between the time the resolution is approved and the installment financing contract is executed.

The projected annual debt service costs associated with the transaction range from $5.28 million to $1.44 million through 2032. The General Fund portion of the debt service, including projects funded through the "Green CIP," ranges from $3.64 million to $550,000 during that same time. The range of annual debt service payments over the life of the transaction is a function of several factors - the final payoff in 2021 of the debt being refinanced and components of the "new money" projects that are being financed over their useful lives of 5, 10 and 20 years. The repayment of the "new money" debt issuance is incorporated in the debt management plan through the capacity being generated by the retirement of existing debt and a portion of the savings generated by the refunding. The refinancing of existing debt, at current market rates, is projected to produce about $1 million in cash flow savings through 2021.

Staff recommends that City Council approve the resolution as proposed.

**RESOLUTION BOOK NO. 34 – PAGE 208**

**C. RESOLUTION NO. 11-235 - RESOLUTION ADOPTING THE 2012 CITY COUNCIL MEETING SCHEDULE**

**RESOLUTION BOOK NO. 34 – PAGE 214**

**D. ORDINANCE NO. 4038 - BUDGET AMENDMENT FOR HARVEST HOUSE AND SENIOR OPPORTUNITY CENTER FROM THE STATE OF N.C. DEPT. OF HEALTH & HUMAN SERVICES THROUGH THE SENIOR CENTER GENERAL PURPOSE FUNDING**

Summary: The consideration of a budget amendment in the amount of $12,205 for Senior Opportunity Center and $12,205 for Harvest House for an appropriation from the State of N.C., Dept. of Health and Human Services, Division on Aging and the Land of Sky Regional Council/Area Agency on Aging through the Senior Center General Purpose Funding.

Funds will be used at the Senior Opportunity Center to 1) replace cabinets, countertops and flooring in kitchen, 2) upgrade facility lighting, and 3) purchase program and facility equipment. The allocation requires a 25% local match which will be provided via in-kind services of staff time to manage the project.

Funds will be used at Harvest House to 1) replace windows, ceiling tiles and bathroom floor tiles, 2) install ADA accessible interior facility doors handles, and 3) purchase program and facility equipment. This allocation also requires a 25% local match which will be provided via in-kind services of staff time to manage the project.

This action complies with the City Council Strategic Goal of fiscal responsibility in that it provides an alternative for enhancing the city's infrastructure maintenance. This action also complies with the Parks, Recreation, Cultural Arts & Greenways Master Plan in that it will 1) increase the level of service for indoor facilities to bring older facilities up to date before building new facilities, 2) increase department funding with alternative funding via grants, and 3) enhance the department's means to respond to identified programming priorities.

Pros:

- Facility improvements will address existing maintenance projects and improve accessibility.
- Equipment purchases will enhance the customer experience and expand programming opportunities provided

Con:

- None

The allocation will increase the City's General Fund budget by $24,410 in special project accounts designated for the Senior Opportunity Center and Harvest House. The 25% local match will be provided through in-kind services of staff time to manage the projects.

Staff recommends City Council to approve the budget amendment authorizing the City Manager to establish a budget in the amount of 1) $12,205 for Senior Opportunity Center, and 2) $12,205 for Harvest House for facility improvements and equipment.

**ORDINANCE BOOK NO. 27 – PAGE 242**

**E. RESOLUTION NO. 11-236 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR A STATE MATCH TO PURCHASE TWO**

6

**COMPRESSED NATURAL GAS REPLACEMENT BUSES FOR HENDERSON COUNTY'S TRANSIT SYSTEM**

**ORDINANCE NO. 4039 - BUDGET AMENDMENT TO PURCHASE TWO COMPRESSED NATURAL GAS REPLACEMENT BUSES ON BEHALF OF HENDERSON COUNTY'S TRANSIT SYSTEM**

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the N.C. Dept. of Transportation (NCDOT) to provide a Section 5307 Capital Grant in the amount of $39,052 to be used for the State match to purchase two Compressed Natural Gas (CNG) replacement buses for Henderson County's transit system; and an associated budget amendment, in the amount of $390,523, to set up the project to purchase the subject buses.

As a result of the 2000 Census, the City of Asheville was reclassified from a non-urbanized area to an urbanized area with a population greater than 200,000 persons and now includes municipalities in Buncombe, Haywood, and Henderson counties. After the reclassification, Henderson County's transit system became part of the transit systems operating in the overall urbanized area. The Federal Transit Administration named the City of Asheville the designated recipient and as a result, the City of Asheville oversees all of the Federal funding administration. The City of Asheville and Henderson County have signed a sub-recipient agreement that specifies how the funds are disbursed. The City of Asheville is accountable to the Federal Transit Administration regarding the use of all Federal funds and owns all the capital items that Henderson County purchases with Federal funds.

The estimated total cost of the subject project is $390,523. Federal funds will provide 80% of the cost, State funds will provide 10% of the cost, and Henderson County will provide 10% of the cost. The City of Asheville performs all of the administrative tasks including the bidding process, requests for funding, review of documentation, and reporting. A contract is in place and City staff will order the buses as soon as the subject agreement is fully executed by both parties.

This action complies with the current City Council 2011-12 Strategic Operating Plan within the fiscal responsibility focus area by operating the City of Asheville to the highest levels of fiscal responsibility.

Pros:

- The two new CNG buses will produce savings in maintenance and fuel costs.
- The Federal Transit Administration (FTA) provides 80% of the total estimated project cost.
- The North Carolina Department of Transportation (NCDOT) provides 10% of the total estimated project cost.
- Henderson County provides 10% of the total estimated project cost.
- There is **no** cost obligation for the City of Asheville other than administrative expenses.

Con:

- The City of Asheville is responsible for administrative expenses including staff time to oversee the project.

The total estimated project cost is $390,523, with 80% or $312,419 coming from Federal funds, 10% or $39,052 coming from State funds, and 10% or $39,052 coming from Henderson County. There is no direct fiscal impact to the City of Asheville, however the City's cost of administering the project is not recovered.

City staff recommends that City Council approve a resolution authorizing the City Manager to enter into an agreement with the NCDOT to provide a Section 5307 Capital Grant in

the amount of $39,052 to be used for the State match to purchase two Compressed Natural Gas (CNG) replacement buses for Henderson County's transit system; and adopt the associated budget amendment.

**RESOLUTION BOOK NO. 34 – PAGE 215**
**ORDINANCE BOOK NO. 27 – PAGE 244**

**F. RESOLUTION NO. 11-237 - RESOLUTION ACCEPTING COOPERS HAWK DRIVE AS A CITY-MAINTAINED STREET**

Summary: The consideration of a resolution to accept Coopers Hawk Drive as a city-maintained street in a recently annexed area of the City of Asheville.

Code of Ordinances sec. 7-15-1(f)(4)a requires that streets dedicated for public use be accepted by resolution of the City Council. The Coopers Hawk Drive Annexation area was approved by City Council on October 26, 2010, via Ordinance # 3911 with an effective date of November 30, 2011.

Coopers Hawk Drive from Ramble Way to its dead-end is a privately-maintained street that has an average width of 24 feet with 24-inch curb and gutter, a length of 0.57 mile, and a right-of-way width of 50 feet. A 5-foot back of curb sidewalk also exists along the entire length of the street.

As a part of the Annexation Services Plan, the subject street was inspected by Transportation Department staff and Public Works Department staff and the general street conditions were determined to be satisfactory and any maintenance issues will be handled as part of the City's routine maintenance funding.

Following City Council's approval of this resolution, the subject street will be added to the official Powell Bill List.

This action complies with the City Council 2011-12 Strategic Operating Plan by accepting street infra-structure to help support the healthy growth of the City. In addition, this action complies with the amended Annexation Services Plan that was approved by City Council on October 26, 2010 (Resolution # 10-233).

Pros:

- The City of Asheville will receive Powell Bill Funds from the North Carolina Department of Transportation (NCDOT) to help maintain the street.
- The street provides access and connectivity in a well-established residential community.

Cons:

- The initial cost to accept the street is about $800 in needed repairs.
- Powell Bill Funds will not cover 100% of the total cost to maintain the street.

The initial cost to accomplish needed repairs is about $800 and the funds are included in the current operating budget of the Public Works Department. The City will receive Powell Bill Funds in the future to help maintain the street.

Staff recommends that City Council approve a resolution to accept Coopers Hawk Drive as a city-maintained street.

**RESOLUTION BOOK NO. 34 – PAGE 216**

**G. ORDINANCE NO. 4040 - BUDGET AMENDMENT TO BUDGET U.S. DEPT. OF JUSTICE BULLETPROOF VEST PARTNERSHIP REIMBURSEMENT FUNDS**

8

Summary: The consideration of a budget amendment, in the amount of $9,037, to appropriate Department of Justice Bulletproof Vest Partnership reimbursement funds for the purchase of police patrol safety equipment.

The Asheville Police Department currently participates in the Department of Justice Bulletproof Vest Partnership reimbursement program. This program is designed to off-set the tremendous cost involved in purchasing bulletproof vests for police officers. During the current fiscal year, the City of Asheville has collected $9,037 from the Department of Justice Bulletproof Vest Partnership reimbursement program. Adding these funds into the (police) Bulletproof Vest Partnership safety equipment budget line would assist in the purchase of additional bulletproof vests for Asheville Police officers.

This action conforms to the City Council's Strategic Operating Plan under Fiscal Responsibility. Goal I, Objective 1: Identify resources for strategic initiatives and create meaningful performance measures for programs and services.

Pro:

- Reimbursement revenue to cover the rising cost of bulletproof vests for Asheville Police Officers

Con:

- None noted.

This budget amendment is fully funded by federal grant funds; therefore there will be no additional expense to the City's budget.

City staff recommends City Council adopt the budget amendment in the amount of $9,037 to appropriate Department of Justice Bulletproof Vest Partnership reimbursement funds for the purchase of police safety equipment.

**ORDINANCE BOOK NO. 27 – PAGE 246**

**H. RESOLUTION NO. 11-238 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT GRANT FUNDS FROM THE U.S. DEPT. OF JUSTICE, EDWARD BYRNE MEMORIAL JUSTICE ASSISTANCE GRANT PROGRAM**

**ORDINANCE NO. 4041 - BUDGET AMENDMENT TO ACCEPT GRANT FUNDS FROM THE U.S. DEPT. OF JUSTICE, EDWARD BYRNE MEMORIAL JUSTICE ASSISTANCE GRANT PROGRAM**

Summary: The consideration of a resolution authorizing the City Manager to accept grant funds under the Edward Byrne Memorial Justice Assistance Grant (JAG) program local solicitation; and the associated budget amendment in the amount of $71,706.

The City of Asheville has been awarded a grant from the Department of Justice in the amount of $71,706 to be shared with the Buncombe County Sheriff's Department. The Asheville Police Department (APD) and the Buncombe County Sheriff's Department have signed a Memorandum of Understanding with the City of Asheville serving as the administering agency. There is no local grant match and the City of Asheville's portion of the grant is $52,140. The purpose of the grant program is to replace outdated speed measuring devices and enhance traffic safety and speed enforcement efforts. The North Carolina Justice Academy, Speed Measuring Instrument Committee is systematically phasing-out the speed measuring devices currently used by APD. This decision has caused APD to seek grant funding to replace nearly $140,000 in APD speed measuring equipment that will no longer be approved for use in North Carolina.

This action conforms to the City Council's Strategic Operating Plan under Fiscal Responsibility. Goal I, Objective 1: Identify resources for strategic initiatives and create meaningful performance measures for programs and services.

Pros:

- Grant revenue will assist in replacing outdated speed measuring devices.
- Enhanced community traffic safety and speed enforcement capability.
- No local match required.

Con:

- None noted.

This budget amendment is fully funded with grant revenue with no local match required.

City staff recommends City Council adopt (1) the resolution authorizing the City Manager to enter into an agreement with the Department of Justice for the grant monies; and (2) the associated budget amendment, in the amount of $71,706.

**RESOLUTION BOOK NO. 34 – PAGE 218**
**ORDINANCE BOOK NO. 27 – PAGE 248**

**I. RESOLUTION NO. 11-241 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT GRANT FUNDS FROM THE U.S. DEPT. OF JUSTICE COPS HIRING PROGRAM**

**ORDINANCE NO. 4042 - BUDGET AMENDMENT FROM THE U.S. DEPT. OF JUSTICE COPS HIRING PROGRAM**

Summary: The consideration of a resolution authorizing the City Manager to accept grant funds from the U.S. Department of Justice COPS Hiring Program (CHP) in the amount of $711,255; and the associated budget amendment in the amount of $118,543 to budget funds that will be spent and reimbursed in FY 2011-12.

The City of Asheville has been awarded a grant from the U.S. Department of Justice COPS Hiring Program (CHP) in the amount of $711,255. This grant will allow the Asheville Police Department (APD) to hire 5 police officers to support ongoing crime prevention efforts at the walkover access to Hillcrest Apartments, suppress group and gang related violence in public housing areas in support of the Focused Deterrence strategy and engage youth though Police Activities League (PAL) activities. The grant amount will provide full funding for the salaries and fringe benefits for 5 police officers over three years. In the fourth year, the City will be responsible for absorbing this cost in its General Fund budget.

Between January and June 30, 2012, staff anticipates that the City will spend $118,543 for these five additional police officers. Therefore, the City's General Fund budget is being amended to reflect this expense and the associated grant revenue. The grant revenue and the expenses associated with the 5 officers for subsequent fiscal years will be included in those years' adopted General Fund budgets.

This action conforms to the City Council's Strategic Operating Plan under Fiscal Responsibility. Goal I, Objective 1: Identify resources for strategic initiatives and create meaningful performance measures for programs and services; and Safe. Goal I, Objective 1: Implement strategies to significantly improve public safety in neighborhoods in Asheville with the highest levels of crime.

Pro:

- Federal CHP monies to cover salary and fringe benefits for 5 police officers for three years.

Con:

- $215,000 increase to COA operating budget at the beginning of the fourth year.

In hiring the 5 police officers, the City of Asheville will receive $711,255 in salary and fringe benefits from the CHP over three years. The City will absorb $215,000 in salary and fringe benefits for the 5 police officers beginning in the fourth year.

City staff recommends City Council adopt (1) the resolution authorizing the City Manager to enter into an agreement with the Department of Justice COPS Hiring Program for the grant monies in the amount of $711,255; and (2) the associated budget amendment, in the amount of $118,543 to budget funds that will be spent and reimbursed in FY 2011-12.

When Councilman Smith asked about how we will be able to sustain funding these new officers in the future, City Manager Jackson said that this is something that will have to be planned for and we must continue to build jobs and tax base to meet these needs. We will have to continue to be frugal and find ways to save money and plan to absorb this into our budget in the future.

**RESOLUTION BOOK NO. 34 – PAGE 219**
**ORDINANCE BOOK NO. 27 - PAGE 250**

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Bothwell moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

## III. PRESENTATIONS & REPORTS:

### A. SISTER CITIES UPDATE

Mr. Rick Lutovsky, President of Asheville Sister Cities Inc. (ASCI), introduced Mr. Russ Martin, who presented the sign agreement from Valladolid and gifts from Mayor Gonzalo Escalante Alcocer. He then introduced Mr. Gwen Hughes, Special Projects Coordinator for ASCI. Mr. Martin introduced Ms. Karon Korp, Valladolid Chair, who provided a report on the Valladolid delegation trip.

Ms. Korp said that memories, new friendships and life changing experiences were brought back by the group of delegates who traveled to Valladolid the week of November 17-23rd, 2011. The timing could not have been more perfect, as all of Mexico celebrated their Revolution and independence with style, decorations and parades. The purpose of their visit was multi-faceted, and much was accomplished to further our sister city relations in many areas.

A highlight of the trip was the reaffirmation of our formal agreement with Valladolid Mayor Gonzalo Escalante Alcocer who warmly received the group, with details for the signing smoothly orchestrated by former Mayor Russ Martin, an official envoy of Mayor Terry Bellamy. In attendance at the reaffirmation, along with the delegation, were the Director of International Relations for the State of Yucatan, a representative of the American Consul General's office, and a representative from the Mexican Embassy.

A formal Proclamation from Mayor Bellamy was delivered, and gifts were exchanged. The speakers – which also included the Yucatan government representatives, Rick Lutovsky, ASCI President, and Tom Jones, Chair in Valladolid - emphasized to the large audience present the importance of the relationship between Valladolid and Asheville, and the concerns the two share in common: business development, education, tourism, and the vitality of our two cities. Later in the evening, the delegation was hosted by the City of Valladolid at an impressive dinner at the Casa de los Venados, given by John & Dorienne Venator in their 18,000 sq. ft home, featuring the largest collection of Mexican folk art in the country. The evening continued with the crowning of the Revolution Queens, and once again, each speaker on the stage spoke of Asheville and our relationship, as thousands in the street waved and applauded, and our delegation sat front row, proud to represent our city.

Another highlight of the visit were the connections made between Shelley White, Senior Executive for Workforce Development at AB Tech, and Raul Mendoza, Director of ITSVA in Valladolid, along with his Senior Executives Gilberto Diaz and Hector Aguilar. Shelley presented Director Mendoza, Gilberto and Hector with gifts from AB Tech, and a personal letter from Dr. Hank Dunn, with new objectives for exchanges between the institutions. Two college students from our area accompanied the delegation, an initiative of ASCI's focus on youth: Angelica R. Adkins, from AB Tech, and Tykara Young, from Warren Wilson College. Earlier in the year, ASCI's board approved scholarships to assist the students with their expenses, making it possible for them to participate. At the Annual Meeting in January, you'll have the opportunity to hear their personal stories of the trip.

The Mexican Committee's support for the elementary school in Dzitnup made an incredible impact with this delegation: securing two laptop computers to donate to the school (they had none on premise) and bringing books, school supplies and Pen Pal letters from Isaac Dixon Elementary school, thanks to the help of Spanish Teacher Fania Franklin and her students. New member Louis Lieb visited Dzitnup for the first time, along with his friend Marilyn Cain, and was instrumental in getting the letters and books to bring along. Jennifer Hill donated supplies, and Lynn Eddy gave support for the purchase of new books also given to the school. While at Dzitnup, the group visited with each classroom and were enthusiastically greeted by the many students, in addition to being presented with 90 pen pal letters to bring back to students in western North Carolina. Before leaving, several of the students performed a traditional dance that had the whole group enchanted.

On the ground in Valladolid, Tom and Kathie Jones, along with the help of Jane Goldthwaite, put together a tremendous schedule of activities and events for the group. Committee members Francisco Mendoza and Harriet Rich were also instrumental in organizing the myriad details, and ITSVA provided transportation for the group's many endeavors. Home Hosts Byron and Rebecca Augustin, Ivan and Evelyn de Leon, and Hector and Yolanda Aguilar made their Asheville guests feel welcome, and took part in many activities. Luis Calcaneo, Director of Tourism, showed off the new Office of Tourism in the Palacio Municipal, and looks forward to hosting more visitors from our area!

Gwen and Carroll Hughes made their 6th trip to Valladolid, and enjoyed reconnecting with old friends. As Special Projects Coordinator for ASCI, Gwen was instrumental in the planning as well. Dona Chela, who visited us in August was thrilled to see her Asheville friends and show off her city. Most of the group stayed at Casa Hamaca (you'll recall the September auction item of three free days, which came in handy for Russ and Karon) and owner Denis Larsen could not have been more accommodating. A new English Library has been created in Valladolid, in space provided by Casa Hamaca, and many of the books brought by the group were donated to their ambitious efforts.

Several years ago ASCI partnered with LEAF to hold a fund raising event to purchase instruments for the X'ocen performance group, Laboratorios de Teatro Campesino e Indigena. With ongoing support by Tom and Kathie Jones, and a recent grant from the LEAF Foundation,

12

the group has grown by leaps and bounds, and now features as many as 200 performers from surrounding areas in the Yucatan: Dzitnup, Nohzuytun, Tikuch, Xuilub, X'ocen, and Valladolid, and from Quintana Roo: San Silverio, Yalchen, and Tulum. The outstanding performance illustrates a day in the life of a community, and the delegation was quite impressed with the breadth and scope of the presentation. It is a goal of the Valladolid committee to bring a portion of the group here in 2012 to participate in the October Lake Eden Arts Festival. At the closing of the performance, the actors gave a tribute to Tom and Kathie Jones for their support on behalf of the group.

It's impossible to visit the Yucatan without seeing the breathtaking sites of the ancient Mayan realm, and the delegation were guests of Raul Mendoza, from ITSVA, as they toured Chichen Itza and learned more about this incredible site. Author and ex-pat Byron Augustin, now living in Valladolid, served as tour guide of the site called Ek Balaam, which lies just north of the city.

Finally, in breakout sessions, the group gathered with their Valladolid counterparts to talk about our many joint projects, student and teacher exchanges, and our desire to host a delegation from Valladolid next year. The group spent their last night celebrating at the Hacienda Oxman, swimming in the deep cenote' there, and dancing to a wonderful seven piece Mariachi band.

To say the delegation was a success would be an understatement. Whirlwind, definitely applies. The sights, people and culture of this marvelous colonial city weave their magic upon a visitor, leaving an indelible imprint.

On behalf of City Council, Mayor Bellamy thanked the delegation very much for their outstanding representation of Asheville

**B. ONE-YEAR UPDATE ON OPENING OF HILLCREST PEDESTRIAN BRIDGE**

Interim Police Chief Wade Wood outlined the following points regarding the one-year update on the opening of the Hillcrest Pedestrian Bridge: (1) The Hillcrest walkover bridge has been open for one year. The second six month period has shown a decrease in activity leading to fewer calls for service to police, and a decrease in fiscal impact from the first six month period; (2) 15 police calls for service from June to November 27, 2011, down from 75 during the first six months; (3) 11.3 hours of police service from June to November 27, 2011, down from 57.2 during the first six months; (4) $282.50 for 11.3 hours, down from $1,429.50 during the first six months; (5) NCDOT opened the bridge on December 2, 2010; (6) Progress Energy installed a street light at the bottom of the stairs at Roberts Street during July 2011; (7) Nuisance court participants performed major clearing around the sidewalks and stairs during August 2011; (8) City Council approved a vegetation removal agreement with the NCDOT during September 2011 (Resolution # 11-201); (9) Progress Energy installed street lights along the sidewalk during November 2011; (10) Target date to begin vegetation removal is January 2012; (11) Vegetation removal will only take place within public right-of-way; (12) The vegetation will be mulched and left on site; (13) City staff will verify boundaries during November and December 2011; (14) City staff will clearly mark the vegetation removal boundary and the trees that should **not** be removed; and (15) NCDOT will make additional repairs to the existing fencing when the vegetation removal process is completed.

Efforts to maintain cleanliness, adequate lighting, and secure fencing have added significantly to the positive outcomes relating to safety and access. It is imperative that these things continue in order to prevent the area from becoming problematic in the future. This has been a successful first year due to the partnership of the NCDOT, City Engineering and Police.

The fiscal impact as noted above, from June through November 27, police service totaled 11.3 hours at a cost of $282.50.

Councilman Smith thanked Interim Chief Wood for their work on this re-opening.

## IV. PUBLIC HEARINGS:

### A. PUBLIC HEARING TO CONSIDER AMENDMENTS TO THE 2010 AND 2011 CONSOLIDATED ANNUAL ACTION PLANS

### RESOLUTION NO. 11-242 - RESOLUTION TO APPROVE AMENDMENTS TO THE 2010 AND 2011 CONSOLIDATED ANNUAL ACTION PLANS

Director of Community Development Jeff Staudinger said that this is the consideration of three substantial amendments (Homeward Bound, Housing Assistance Corporation and Western Carolina Community Action) to the 2010-2011 and 2011-2012 Consolidated Annual Actions Plans for CDBG and HOME.

Three Action Plan amendments are proposed.

1. Homeward Bound requests an amendment to increase their $55,203 2011-2012 CDBG Supportive Housing grant by $28,000. This request is made to allow for a full-time case manager position to be focused on the permanent housing program being run in collaboration with the Asheville Housing Authority. The new total grant will be $83,203.

Homeward Bound employs case managers to provide direct assistance to chronically homeless persons to allow them to access and retain affordable housing. The partnership with the Housing Authority gives homeless persons priority for public housing and housing choice vouchers. This program has been recognized both by HUD and by the US Interagency Council on Homelessness as a national best practice. Evidence of its effectiveness has been the Point-In-Time Count reduction of the numbers of chronically homeless persons in Asheville, and the 93% retention rate in permanent housing for the persons who have been assisted by this program. This amendment would allow for service to be provided to an additional 5-10 persons currently experiencing chronic homelessness. Sufficient CDBG funds are currently held in contingency to amend this grant at the level requested.

2. Housing Assistance Corporation requests an amendment to increase their $350,000 2010-2011 HOME grant award for their Oak Haven development by $95,000. The new total grant will be $445,000.

HAC is constructing 56 LIHTC units in Hendersonville for elderly and disabled persons. The project is now under construction. Prior to construction, updated project pricing created a $291,000 finance gap. In order to make up the gap, HAC reduced the project cost by $90,000, and deferred $200,000 of its development fee. HAC seeks $95,000 of additional funding to recover a portion of the deferred development fee. The project would still require a deferred fee of $106,000. Deferred fees affect the sustainability of the organization. The Consortium has $95,000 in available funds, due to the cancellation of the WCCA Rosman development.

3. Western Carolina Community Action is requesting approval to repurpose $15,400 of their 2010-2011 HOME Downpayment Assistance Program grant to Tenant Based Rental Assistance (TBRA). There is no change proposed to the total grant amount.

WCCA was awarded $23,100 of HOME funds in 2010-2011 to provide downpayment assistance loans to four households in Transylvania County. Transylvania County provided $7,700 in matching funds. Since then, four WCCA clients have been able to become homeowners through the USDA 502 direct lending program without the necessity of using DPA funds, and one additional client has been approved by USDA. WCCA has one loan of $7,000 pending. There are no additional clients seeking assistance at this time. There is no program in

Transylvania County that provides security deposit, utility deposit and other upfront rental assistance to low income renters. Ashville's TBRA program has proven very effective in helping low income households secure affordable rental housing, and by so doing house persons who have experienced or are in danger of homelessness. WCCA has operated the HUD Housing Choice Voucher program in Transylvania County for 35 years, and is a consistent "high performer" in this program.

The Housing and Community Development Committee and Asheville Regional Housing Consortium agree with this recommendation.

The draft Action Plan amendments directly relate to the Council's Strategic Goal of "Affordable."

Pros:

- The activities are all eligible activities under CDBG and HOME program rules.
- These proposed amendments allow for efficient use of funds in a timely fashion, and will assist in meeting overall program goals.
- The funds will also assist the sponsoring organizations viability and ability to meet community needs.

Con:

- There are none.

The proposed amendments use funds already available through the CDBG and HOME programs. There is no increase in administrative responsibility for the City. No City General Funds are allocated for these programs.

Staff recommends that Council approve the proposed amendments to the 2010 and 2011 Consolidated Annual Action Plans.

Mayor Bellamy opened the public hearing at 5:40 p.m.

Rev. Christopher Chiaronmonte spoke against providing funds to Homeward Bound as he felt they are taking away funds of those that need it.

When Rev. Lisa Landis wondered if these funds could go to different organizations, Mayor Bellamy responded that these organizations applied for funding.

Mr. John Spitzberg, former social worker for A-Hope, felt that some of the programs they provided are no longer in existence today and explained how the City should be funding one-day shelters.

Dr. Milton Byrd spoke about how this is structured vs. the flow of how you see that type of social environment move.

A man was opposed to funding any of the organizations as he felt the funds would be used for salaries.

A woman was concerned that some people do not know how to navigate the system to the extent needed to access these funds.

A man felt that there is no temporary housing in this community that is not religious based.

Mayor Bellamy closed the public hearing at 5:54 p.m.

Mayor Bellamy said that Homeward Bound has a commitment to housing people using the Housing First model and they have case managers to counsel people who are placed in homes. Even though the City does not fund the Salvation Army or the WNC Rescue Mission, they are partners in the need to house the homeless.

Councilman Bothwell said that the CDBG & HOME funds are intended to provide a certain type of housing and are not used for programming. While we do not have enough resources in the City to help the homeless, churches step forward to also put families in homes. They are organized and have many volunteers and donors to assist.

Councilmen Smith, Davis and Hunt spoke in support in Homeward Bound, noting a lot of people work closely together to address the needs of the homeless.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Hunt moved for the adoption of Resolution No. 11-242. This motion was seconded by Councilman Bothwell and carried unanimously.

**RESOLUTION BOOK NO. 34– PAGE 220**

**V. UNFINISHED BUSINESS:**

**A. SECOND READING OF ORDINANCE NO. 4036 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR THE PROJECT IDENTIFIED AS THE AVENTINE, LOCATED AT LONG SHOALS ROAD AND CLAYTON ROAD FOR A 312 APARTMENT COMPLEX**

City Attorney Oast said that in the interim, between the November 22 Council meeting, where this matter was first presented and voted on, and the second reading scheduled for December 13 several questions have come up. The following memo will attempt to address them (City Exhibit 4):

Procedural Issues. The public hearing on this conditional use permit application was held at the November 22, 2011 meeting of City Council. The public hearing was quasi judicial, and was closed after receiving presentations and comments on November 22. A motion was made to approve the project as recommended by staff. The motion passed on a 4/3 vote.

North Carolina law provides that ordinances or actions having the effect of an ordinance must pass by a two-third's majority of Council in order to be finally adopted on the date on which they are introduced. Because the Aventine project failed to achieve this two-thirds majority, a second reading is required. By operation of the statute requiring the second reading, the matter is still pending before Council on the motion made at the last meeting. A motion to adopt on second reading may not be legally required, and the Mayor may simply call for a vote. However, a motion to approve the project would not be out of order.

Between the November 22 meeting when the matter first came before Council, and this December 13 meeting, two new members of Council have taken office. Similar issues have been addressed by the North Carolina courts. Based on those cases, it appears that the new board may vote on this matter, provided the new members have had an opportunity to review the minutes and any other material presented. In this case, both new members were present at the public hearing on November 22, and have had an opportunity to review the information presented, as well as to consult with staff as to procedural matters.

16

In connection with the second reading, Council may ask questions of staff or other witnesses who appeared at the public hearing. In fact, at the previous meeting, Council indicated that there were some aspects of the project as to which further information was desired, and we have asked the applicant and staff to be prepared. While it would be appropriate for the staff and/or applicant witnesses to respond to Council questions (especially since there are new members of Council), the public hearing has been closed without continuation, and reopening it for the receipt of additional substantive evidence may create some due process issues as to lack of notice.

Findings/Conclusions Based on Record. As he advises Council at every conditional use permit hearing, Council must base its decision on the information received at the public hearing, and must make its own findings as to the criteria applicable to conditional use permits. Accordingly, Council may not consider information not in the record, or not relevant to the required determinations. At the November 22 meeting, information was presented as to several issues that, in his opinion, is not clearly relevant to the matters that Council should consider. These include:

1. Voluntary Annexation. While certainly an issue of importance to Council, the willingness of the applicant for the Aventine project to pursue voluntary annexation of the property should not enter into Council's consideration.

2. Ownership of the Property/Developer. Conditional use permits run with the land, and will be binding on whoever owns it now or in the future. Council's deliberations should be without regard to the current or future ownership of the property, or who the proposed developer is.

3. Financial Ability. There was some information presented that the developer has obtained financing, and is able to proceed with the project upon approval. This should also not enter into Council's consideration. Not only does it not bear on any of the required findings, but circumstances could change such that the developer is not able to proceed. Under the UDO, the developer has up to two years to begin the permitted use, or the permit expires.

Proposed Order. The applicant has prepared a proposed order, which he provided to Council. This document may be viewed as the applicant's legal argument for why the conditional use permit should be approved. In the past, when there has been a second reading for conditional use permits, he has used the interval between the first and second readings to prepare and submit similar orders for Council's consideration. This serves the dual purposes of summarizing the evidence on each issue, and clarifies for Council what is being voted on. He has reviewed the proposed order and has no substantial disagreement with it, especially since there was no information presented in opposition to the project. However, Council is the decision-maker, and as with staff's recommended decision, Council may disregard some or all of the proposed findings and conclusions, and should make its own decisions as to each of the required findings. Procedurally, Council may discuss and vote on each determination separately.

Must Satisfy All Required Findings. Finally, in order for a conditional use permit to be issued, the applicant must meet each of the seven criteria outlined in the ordinance. If the application fails to meet one of those criteria, the conditional use permit fails.

When Councilman Davis moved for adoption of the 2nd reading of Ordinance No. 4036, City Attorney Oast said Council did not need a motion or a second but a motion is not inappropriate.

Mr. Will Buie, Civil Engineer, used an aerial (attached to City Exhibit 3) photograph to show the vegetative screen that would remain in place. Using a rendering of the proposed site plan, he showed the distance between the edge of the retaining walls and the edge of the river. He said it's about 300 feet at the southernmost portion and about 55 feet at the closest portion.

The precedent for the retaining wall is across the river at Biltmore Park Town Square. They have a retaining wall at that location which is a little over 60 feet high.

In response to Councilman Hunt, Mr. Buie said that the trees along the riverfront are much higher than their proposed retaining wall. He did not have a sense of how tall the many trees were along the proposed retaining wall.

Councilman Pelly said that he has reviewed the staff report, read the Planning & Zoning Commission minutes and was present for the public hearing on November 22. He understood that seven conditional use standards must be met; however, he noted (as staff did) that the missing element for conditional use standard five was no affordable units in the 312 residential development. At the Planning & Zoning Commission meeting, Mr. Buie said that the rents would range from $1,100 for a one-bedroom apartment to $1,700 for a four-bedroom apartment. At the Nov. 22 Council meeting, the developers said the needs of their investors preclude allowing for the inclusion of affordable units as this would cause the project financially unsustainable. At a time when (1) borrowing costs and interest rates are at the lowest they have been in generations; (2) land values and labor costs are depressed; and (3) another south Asheville apartment complex (Weirbridge Village) found it was possible to include affordable units, he felt that to allow this development without a commitment to affordable units injects unpredictability into this and future developments. We need to set an expectation standard for all who would develop on this scale that affordability has to be a part of the mix. By by-passing the wishes in the City's Comprehensive Plan, the express wishes of the Planning & Zoning Commission and of City Council, he felt the developer has not met all seven standards required. He could not support the project.

Councilman Bothwell was also concerned about the lack of affordable units, but in addition to that, he was unclear how the project met the green and sustainable goals of the City. He noted that the developer was planning to meet the Energy Star Version 2.5; however, after an extensive internet search he could not find that rating. He was also not clear that a land-locked development with no pedestrian egress and no transit connection can be green.

In response to Councilman Bothwell, Mr. Buie said that the energy star process relates more than just to the appliances, as it also relates to the type duct work in the ceiling to make the home as energy efficient as possible. The developer has made a commitment to meet all the requirements of that particular certification; however, they have asked they not go through the certification process as the inspection process is extremely expensive.

Councilman Hunt agreed with Councilman Pelly as he was interested in the development pattern for the City as well. The units are well clustered and it is proximate to a well-designed Urban Village but was disappointed the development is separated from that without a bicycle or pedestrian connection. If the project does not move forward, he would be concerned because there is a demand for rental units in this price range in this community. He said that rental housing, in the developer's committed range, is in high demand. Concerns he would have if we don't approve this project is (1) this project may move outside the City's zoning jurisdiction that would result in fewer requirements that are consistent with the City's standards; and (2) the demand for single-family and duplex housing might be developed further out on the rural landscape and further fragment and degrade our rural landscape. When the Biltmore Park vision came together he envisioned a walkability connection, with more green building, more affordability and more compactness in development. It's that kind of development pattern that makes Asheville stand out. He was concerned that this development is much like suburban residential semi-sprawl development that occurs typically in other places around the country. He felt we are missing an opportunity to add to Asheville's strength if we move forward with this development. However, in considering what our role is in this conditional use permit, he felt that the development meets the specific standards laid out, but there are subjective goals. He felt Council should adopt an ordinance that clarifies their goals in terms of affordability, green

building, perhaps visual screening, strong stormwater regulations, etc. for predictability for developers. He believed that predictability is a key component of smart growth.

In response to Councilman Hunt, Mr. W. Louis Bissette, attorney representing the developer, said that the developer has committed to rents that start at $800 a month (noting that the City's workforce housing range starts at $800, which is about $200 below the maximum workforce housing range). City Attorney Oast said that commitment can and will be made a part of the conditional use permit.

In response to Mayor Bellamy, when Community Development Director explained the definition of affordable housing and workforce housing, Mr. Bissette said the figures from the City say the maximum workforce housing rate for a 1-bedroom is $1,063, a 2-bedroom is $1,390. The Aventine 1-bedroom starts at $825; 2-bedroom starts at $1,000; and a 3-bedroom starts at $1,295. Mr. Buie said that there are 152 1-bedroom units, 115 2-bedroom units and 45 3-bedroom units.

Mr. Paul Szurek explained how workforce housing is needed in this area.

Councilman Davis appreciated the workforce housing rents; however, he wished the project was more pedestrian connected and transit oriented.

Councilman Smith felt that the Council's idea of affordability and sustainable are good questions to discuss at Council's retreat. Because of that, he was concerned about setting a precedent of defining "sustainability" and "exceptional" in Finding No. 7. He was pleased the developer was able to get the 1-bedroom units down to the $800 price point.

In response to Councilman Smith, City Attorney Oast said that if Council would like the units to be in the workforce range, the Order can be re-drafted to accomplish that; however, he noted that incorporated in the Order is the site plan that contains information about the number of units that are 1, 2 and 3-bedroom.

There was a brief discussion, initiated by Councilman Hunt, regarding the duration of the commitment of workforce housing rents. Mr. Bissette said that the developer is committed to these initial rents as long as he can. Vice-Mayor Manheimer felt if we are going to require developers to commit to a certain rent for a certain period of time, then the developers need to know about that ahead of time.

Councilman Pelly was more comfortable with the workforce rent range starting at $825 and would be able to support the project.

Councilman Davis moved to call the question. This motion was seconded by Vice-Mayor Manheimer and carried on a 6-1 vote, with Councilman Pelly voting "no."

On the original motion to approve the Level III site plan (subject to the conditions outlined on November 22 in the motion), and at the request of Councilman Smith, it was the consensus of Council to have Finding No. 7 be amended to read: "The Project as proposed, is consistent with developing the property by utilizing a number of green building techniques, including Energy Star components and providing recycling opportunities to tenants, water conservation and best management practices." With that amendment, the motion carried unanimously.

**ORDINANCE BOOK NO. 27 - PAGE 233**

**B. CONSIDERATION OF A CHARITABLE CONTRIBUTION COMBINED CAMPAIGN FOR CITY OF ASHEVILLE EMPLOYEES**

Director of Finance and Management Services Lauren Bradley said that this is the consideration of a request to continue the consideration of charitable contributions combined campaign for City employees to the City Council meeting on February 14, 2012.

At the September 13, 2011, Finance Committee meeting, a representative from EarthShare North Carolina (ESNC) requested that the City consider expanding its campaign to be a "combined campaign," or one that includes additional federations, which are "umbrella" organizations that have multiple independent, charitable agencies who all work on a specific area of focus as members.

The Finance Committee directed staff to gather further background information about a combined campaign, which was shared with City Council at its October 25, 2011, meeting. At that meeting, Council directed staff to work with representatives from the United Way of Asheville & Buncombe County and EarthShare North Carolina to develop a mutually acceptable proposal for a combined campaign in Asheville and to report back to Council on December 13, 2011.

Staff has been in communication with these two groups over the last several weeks to develop a proposal for further City Council consideration. The stakeholders involved in this process are requesting that consideration of this item be continued until February 14, 2012, to allow additional time to fully evaluate and develop a proposal. The group anticipates bringing forward any major policy issues to the Finance Committee at its January meeting, if necessary.

City staff recommends City Council continue the item to February 14, 2012.

Councilman Hunt moved to continue this matter until February 14, 2012. This motion was seconded by Councilman Bothwell and carried unanimously.

## VI. NEW BUSINESS:

### A. RESOLUTION NO. 11-243 - RESOLUTION WAIVING THE STREET CLOSING FEE FOR THE CLOSING OF A PORTION OF COLLEGE STREET NECESSARY FOR THE BUNCOMBE COUNTY LIFE SAFETY ADDITION

Public Works Director Cathy Ball said that this is the consideration of a resolution to waive the street closing fee for the closing of a portion of College Street necessary for the Buncombe County Life Safety addition.

Buncombe County has petitioned City Council to permanently close a portion of College Street for the purpose of facilitating the Buncombe County Life Safety, and requests waiving the $4,000.00 street closing fee.

City staff supports waiving the street closing fee as it supports a governmental public benefit.

This request supports Council's strategic plan improving public safety for our citizens and develop partnerships with the County. She noted that Buncombe County has contributed $1 Million for renovation of the Civic Center.

Pro:

- Supports a benefit to the community in that the Life Safety addition to the Buncombe County Court House will provide safer access.

Con:

- Expenses are incurred by the City, for staff time, advertising and public notification.

20

The street closing fee, which includes public notification and advertising, is $4,000. Approximately $1,800 of this amount includes cost of advertising and notification required for the closing. The remaining amount covers staff time in processing the request.

City staff recommends City Council waive the street closing fees for a portion of College Street for the purpose of constructing the Buncombe County Life Safety addition.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Smith moved for the adoption of Resolution No. 11-243. This motion was seconded by Councilman Davis and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 221**

**B. RESOLUTION NO. 11-244 - RESOLUTION AUTHORIZING THE CITY OF ASHEVILLE'S PARTICIPATION IN THE N.C. STATE TREASURER'S OTHER POST EMPLOYEE BENEFIT FUND**

**RESOLUTION NO. 11-245 - RESOLUTION SUSPENDING RETIREE HEALTH CARE COVERAGE FOR CITY EMPLOYEES HIRED AFTER JUNE 30, 2012**

Director of Finance & Management Services Lauren Bradley said that this is the consideration of resolutions (1) authorizing the City of Asheville's participation in the North Carolina State Treasurer's Other Post Employment Benefit (OPEB) Fund and (2) suspending retiree health care coverage for City employees hired after June 30, 2012.

Employee compensation packages for active workers can sometimes include healthcare and similar benefits following the completion of active service. Generically, such benefits are described as other postemployment benefits (OPEB) to distinguish them from pensions.

For many years, employers have been required to recognize expenses for the cost of pension benefits as those benefits are earned by employees during their active service life. The Governmental Accounting Standards Board (GASB) extended this same requirement to OPEB effective fiscal year 2008. This change in accounting standards focused attention on the costs of OPEB. The real issue is not the accounting for OPEB, but rather the underlying budgetary and funding challenge that those accounting standards highlight. Meeting this challenge requires local governments to ensure that any such benefits they offer are sustainable over the long term.

State and local governments are required to determine the "actuarial accrued liability" (AAL), or the current value of future OPEB benefits that have been promised to and earned by employees to date. To measure future costs, several factors are taken into account including the number of employees that are expected to receive the benefit, length of time employees will work, life expectancy for employees after retirement, and health care cost increases. The City of Asheville completed this analysis in October 2011, which showed that as of December 31, 2009, the City's AAL was $33,846,854.

State and local governments are also required to determine an "annual required contribution" (ARC) that is actuarially determined and includes amounts sufficient to cover the current year's OPEB costs and the accrued liability amortized over 30 years. By including payment for the amortized unfunded liability, the ARC will likely be substantially higher than annual pay-as-you-go payments. As of December 31, 2009, the City's ARC was $2,995,947.

These accounting standards create an impetus for policy decisions surrounding how to fund the City's existing OPEB liability and how to address the City's benefits structure for future hires to reduce the growth of the liability over time. The policy decisions associated with this report do not entail changes to retiree health care coverage for existing employees or retirees.

**OPEB Funding**

The City has partially addressed the ARC in the past through pay-as-you-go funding for current retiree health care costs. The table below illustrates the City's pay-as-you-go employer contributions for OPEB costs for the fiscal year ending June 30, 2011, along with the net OPEB obligation at year end. The net OPEB amount represents the City's cumulative total OPEB obligation, including payments for the amortized unfunded liability.

| Column 1 | Column 2 | Column 1 - Column 2 | Column 4 | Column 3 + Column 4 |
|---|---|---|---|---|
| Annual OPEB Cost | Employer Contributions made for FY 11 | Increase in Net OPEB Obligation | OPEB Obligation at Beginning of FY 11 | Net OPEB Obligation at end of FY 11 |
| $ 3,008,762 | $ 2,316,990 | $ 691,772 | $ 2,334,093 | $ 3,025,865 |

Since FY 2009, the City has reserved a portion of its assets in the Internal Services Fund – the fund designated to account for its self-insurance programs – to "prefund" the current net OPEB obligation. As of June 30, 2011, the Internal Services Fund had enough cash to fully fund the net OPEB obligation in the amount of $3,025,865.

If a local government chooses to fund in whole or in part its OPEB liability, GASB requires those funds to be deposited in an irrevocable trust fund. Legislation was approved in 2007 by the North Carolina General Assembly that allows local governments to invest OPEB funds with the State Treasurer in an irrevocable trust. Any monies placed in this trust can only be used for the purpose of the trust – retiree OPEB benefits – and the monies are free and clear from the City's creditors. These funds cannot be used for any purpose other than the purpose of the OPEB plan, even in emergencies.

Any OPEB monies invested with the State Treasurer will be allowed to be invested similarly to the Retirement funds, providing for a better return on investment than the City may be able to achieve on its own. This higher investment return positively affects the OPEB calculation by reducing the OPEB liability. For these reasons, it is staff's recommendation that the City of Asheville participate in the North Carolina State Treasurer's OPEB Fund with an initial deposit of $3,025,865.

During FY 2012 and beyond, the net OPEB obligation will continue to grow. Currently, the City does not budget an appropriation to fund the ARC beyond current year expenses, as illustrated in the previous table. To address ongoing funding, staff is recommending that the City appropriate and incrementally increase a budget allocation to address the unfunded portion of the ARC over four years. For example, the City would budget $200,000 in FY 12-13 for OPEB, $400,000 in FY 13-14, $600,000 in FY 14-15 and $800,000 in FY 15-16 for the OPEB obligation. This step-up in annual appropriations over a four year period would place the City in the position at the end of the fourth year of fully funding the annual required contribution. The combination of increased annual contributions along with investment earnings from the trust will provide assets for paying OPEB costs and place the retiree health program on a sound, sustainable financial foundation.

**Benefits Structure**

Given the magnitude of OPEB obligations, many governments are exploring ways to modify health care options, including raising premiums, copayments, coinsurance rates, and the

22

like. Over the last two years, the City of Asheville has evaluated similar changes and will continue to bring forward options for City Council consideration during the FY 2013 budget cycle. For the purpose of this report, however, staff is not recommending changes to the health care plan for existing employees and retirees.

Instead, staff is recommending that City Council suspend retiree health insurance benefits for all employees hired after June 30, 2012. While this action may impact recruitment and retention of new employees, it would significantly limit the future growth of the City's OPEB obligation and provide an opportunity for the City to ramp up its annual funding allocation. The City could consider reinstating the OPEB benefit for employees hired after June 30, 2012 at a later date.

The City Council Finance Committee reviewed this item at its meeting on September 13, 2011, and recommended that it move forward for consideration by the full Council.

This action supports the City of Asheville's strategic goal to operate the City to the highest levels of fiscal responsibility.

Pros:

- Prefunding the OPEB liability tends to substantially reduce long-term costs as the investment of fund assets produces earnings that help finance OPEB obligations.
- Prefunding mechanisms promote intergenerational equity because they set aside funds for benefits earned today but not payable for many years into the future.
- Prefunding could have a positive impact on the City's credit worthiness as measured by rating agencies.
- Provides a phased plan for addressing the City's unfunded portion of the OPEB liability.

Cons:

- Restricts the use of funds so that they can only be used for OPEB.
- This action will move assets from the city's government-wide financial statements to a trust, which will result in a decrease in net assets; however, this action has no impact on the General Fund's unrestricted fund balance.
- Eliminating retiree health care coverage for future hires may impact the City's ability to recruitment and retention efforts; this decision could be revisited at a later date if and when economic conditions improve.

As of June 30, 2011, the Internal Services Fund had enough cash to fully fund the net OPEB obligation in the amount of $3,025,865. After funding the net OPEB liability, as of June 30, 2011, the Internal Services Fund will have $933,466 in unrestricted net assets. Staff recommends that this amount remain in the Internal Services Fund to fund unplanned expenses in the City's self-insurance programs.

In order to address the growing OPEB liability and the resulting potential long-term impact on the City's credit worthiness and financial sustainability, staff is recommending the following actions: (1) Approval of a resolution authorizing the City's participation in the State Treasurer's investment trust for local government OPEB funds and related Trust Agreement beginning with a contribution of $3,025,865; (2) Consensus to direct staff to recommend an annual OPEB contribution to the trust fund in the annual budget cycle such that the City reaches the full annual required contribution in the next four years, and; (3) Approval of a resolution to suspend retiree health insurance benefits for employees hired after June 30, 2012.

Mayor Bellamy stressed that this does not affect current or current retirees. If approved, it would go into effect for employees hired after June 30, 2012.

In response to Councilman Hunt regarding the suspension of retiree health insurance benefits for employees hired after June 30, 2012, Ms. Bradley said that once we have caught up on being fully funded, Council would have the flexibility of applying the benefit retroactively or staff could provide Council with a menu of options or other benefits that Council might wish to consider in its place.

In response to Councilman Bothwell, Ms. Bradley said that would not affect the City being a living wage employer. She said the value of the benefit is not realized by the employee until they actually retire. It's not part of their take home pay or part of their health care coverage they are presently receiving.

Councilman Smith hoped we would be able to restore these benefits after we are fully funded in order to remain an employer of choice in the area.

In response to Councilman Pelly, City Manager Jackson said that the City averages 80 new employees a year. Councilman Pelly hoped we could restore the benefit sooner than later because the longer we wait to reinstate it, the tougher it will be to restore the benefit. He felt it was important for Council to revisit this item in one year to see whether we're in a position to re-establish it.

When Vice-Mayor Manheimer asked if the state has suspended retiree health insurance benefits for new hires, Ms. Bradley did not know; however, she did know that many city and county governments have taken this step to address the unfunded liability that they have already incurred.

Mayor Bellamy noted that this Council cannot bind future Councils so when this is revisited in one year, Council will have an opportunity to see how the payments are being made along with best practices. Ms. Bradley responded that the OPEB contribution will have to become a part of the annual budget discussion to talk about the step-up plan and the City's progress in meeting it.

Councilman Davis moved for the adoption of Resolution No. 11-244, authorizing the City's participation in the State Treasurer's investment trust for local government OPEB funds and related Trust Agreement beginning with a contribution of $3,025,865. This motion was seconded by Councilman Smith.

When Rev. Lisa Landis asked if City Council participated in the retirement program for the City of Asheville, Mayor Bellamy replied that they do not.

Mr. Don Lillenfeld did not support the City turning over their funds to the State as he did not think we can trust the State to safeguard those funds.

Mr. Matthew Byrd did not support trusting the State with the City's mass fund that we could control as a City.

In response to Mr. Karl Katterjohn, Mayor Bellamy said that the City would not be tied into the State's bond rating.

The motion made by Councilman Davis and seconded by Councilman Smith carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 222**

Councilman Smith moved to adopt Resolution No. 11-245, to suspend retiree health insurance benefits for employees hired after June 30, 2012, and that this issue be revisited after one year. This motion was seconded by Councilman Davis and carried unanimously.

24

**RESOLUTION BOOK NO. 34 – PAGE 224**

**C. RESOLUTION NO. 11-246 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A MANAGEMENT AGREEMENT WITH FIRST TRANSIT INC. TO MANAGE THE OPERATION OF THE ASHEVILLE TRANSIT SYSTEM**

Director of Transportation Ken Putnam said that this is the consideration of a resolution authorizing the City Manager to enter into a management agreement with First Transit, Inc. to manage the operation of the Asheville Transit System.

Since North Carolina law prohibits municipalities from engaging in collective bargaining, the City of Asheville must hire a management company to operate the transit system. The management company is a party to a 13(c) Labor Agreement with the Amalgamated Transit Union Local 128 covering all hourly employees. A collective bargaining agreement between Transit Management of Asheville, a subsidiary of First Transit, Inc., and the ATU Local 128 is in place until December 31, 2011.

The three-year contract with First Transit expired on June 30, 2011. This contract was extended twice and it will expire on December 31, 2011. During these extensions staff released a Request for Proposals with the intent to modify the conditions in the current management contract. The city decided to pursue a new contract to incorporate new insurance and liability protections and improvements to current procedures.

The City issued a Request for Proposals (RFP) on June 9, 2011 and it closed on July 18, 2011. Three proposals were received from the following firms:

- MV Transportation, Inc., Fairfield, California
- McDonald Transit Associates, Inc., Fort Worth, Texas
- First Transit, Inc., Cincinnati, Ohio

The proposals were evaluated by a committee that included four members of staff from various City departments and a member of the Transit Commission. The committee individually evaluated and scored the proposals, then combined the scores. The evaluation process took about four months and numerous meetings to ensure that all aspects relevant to the RFP were considered. During the process, the firms were asked to provide additional information to help clarify questions posed by the committee. The committee received much support from the Legal and Risk Management Departments to help the committee understand the legal, insurance, and liability aspects of the RFP.

The parameters to evaluate the proposals, as delineated in the RFP, were based on the following items:

- Vendor organization including history of the company, organization structure, types of services offered, location of offices, etc.
- Qualifications of the company including number of systems managed, number of contracts, management philosophy, training, procedures, and policies.
- Re-engineering options that would potentially make transit operations more efficient.
- Qualifications of the resident general manager as well as central staff that will provide support to the general manager.
- Additional services, references, legal actions, and fee.

After careful review and consideration of all the evaluation factors and the information provided, the committee recommends First Transit, Inc. to provide management services to the City of Asheville.

If approved by City Council, the City will enter into a three-year contract with the management company that can be renewed for another three periods of one year after agreement between both parties. The project cost will be $243,869 for the first year with increments of approximately 4% per year.

| Base Management Fee | Errors and Omissions Liability Policy | Employment Practice Policies Cost | Worker's Comp. and Employer's Liability cost | Total |
|---|---|---|---|---|
| $132,000 | $0 | $9,825 | $102,044 | $243,869 |

The base fee of $132,000 and the Employment Practice Policies cost of $9,825 are already allocated in the FY 2011-12 Transit Administration budget. The Workers Compensation and Employer's Liability costs are allocated in the FY 2011-12 Transit Operations budget. The Errors and Omissions Liability Policy is part of the base management fee.

First Transit, Inc will furnish, through its subsidiary, all management and supervisory services required and necessary for the efficient and economical operation of ATS services under the policies, standards, and procedures established by the City of Asheville.

First Transit, Inc. will provide a resident General Manager and a management support team who shall be responsible for the day-to-day operations of the ATS transit system and have supervisory experience in the following services:

- General transit operations and policies; the management firm is responsible for the day to day operation of the transit system and for developing the policies and procedures to guide transit operation and employees.
- Labor relations; the management firm is responsible for negotiating agreements with the local union, including but not limited to the Collective Bargaining Agreement, day to day labor relations, etc;
- Employment, and training; the management company is responsible for hiring all the employees that operate the transit system, according to their internal policies. The company is also responsible for preparing and implementing a training plan for all the drivers, mechanics, dispatchers, and supervisors. These expenses are part of the operational budget.
- Assistance to city staff with Federal regulations, processes and reporting.
- Routing and scheduling; the company will work very closely with the City of Asheville transportation planning staff to determine the best routes and schedules. The company is responsible for implementing all the operational improvements in the Transit Master Plan Implementation – Phase I.
- OSHA regulations; the company is responsible for complying with the Department of Labor regulations.
- Office management, finance and accounting; the company is responsible for administering and keep all the records related to the pass-through funds that pay for operations and for the day to day administration.
- Risk management, insurance, and claims; the company is responsible for providing timely and accurate information to the COA Risk Management office.
- Equipment and facility maintenance; the management company is responsible for the operation of all equipment and facilities involved in the daily operation, owned by the city.

26

- Stores and purchasing; the company is in charge of keeping all the parts and inventory owned by the city, in adequate and safe places. In addition, the management company provides its expertise preparing technical specifications for all the equipment bought for transit operations.
- Specialized services under the Americans with Disabilities Act, including specific training to be able to help customers with disabilities.
- Provision of legal counsel in all legal affairs, suits, pleas, and litigation in which the provider has an interest.

The RFP process has given the City the opportunity to include substantial improvements to current procedures, as recommended in 2010. The following improvements will be part of the new contract:

- Improved and enhanced hiring methods according to the procedures established by the city.
- Enhanced training system, including but not limited to: Federal, state and local safety rules and regulations, system policies and procedures, route training, vehicle inspections, safe driving, emergency procedures, passenger assistance techniques, equipment operation, drug and alcohol use policy, preventive maintenance procedures, etc.
- The Resident General Manager is required to complete the Transportation Leadership Development course, which is offered by the Institute of Transportation Research and Education.
- First Transit will perform an environmental audit every three years to ensure that the Environmental Management System has continuity.

New insurance and liability provisions have been added to the contract, and First Transit, Inc will be responsible for providing the following items:

- Employment Practices Liability policy, which provides coverage for employment related claims, such as harassment, discrimination, wrongful terminations, etc.
- Errors & Omissions Liability policy, which is also referred to as "professional liability" and provides coverage for wrongful acts from professional services that might cause a financial loss.
- Worker's Compensation/Employers Liability policy, which provides coverage to injured workers; paying medical bills and lost wages.

At their December 6, 2011, meeting, the Transit Commission endorsed this action.

This action complies with the City Council Strategic Operating Plan by supporting the fiscal responsibility focus area, specifically operating the City of Asheville to the highest levels of fiscal responsibility.

Pro:

- First Transit, Inc. will provide the management services required to keep the transit system functioning properly and efficiently, managing all the aspects related to the operation.

Con:

- None.

The project cost will be $243,869 for the first year with increments of approximately 4% per year.

| Management fee | Errors and Omissions Liability Policy | Employment Practice Policies Cost | Worker's Comp. and Employer's Liability cost | Total |
|---|---|---|---|---|
| $132,000 | $0 | $9,825 | $102,044 | $243,869 |

The base fee of $132,000 and the Employment Practice Policies cost of $9,825 are already allocated in the FY 2011-12 Transit Administration budget. The Workers Compensation and Employer's Liability costs are allocated in the FY 2011-12 Transit Operations budget. Staff will request a budget amendment to include this cost in the Transit Administration budget at a future date. The Errors and Omissions Liability Policy is part of the base management fee.

City staff recommends that City Council approve a resolution authorizing the City Manager to enter into a transit management agreement with First Transit, Inc. to manage the daily operation of the Asheville Transit System.

Mayor Bellamy said that safety must be the top priority and that the drivers are given the training they need.

In response to Mayor Bellamy, Mr. Putnam said that the contract has been re-written and throughout the process there were many meetings and information sharing between all bidders and staff to make sure we were getting the most important things in the contract, and to also give the City the ability to hold the management company more accountable than we have in the past.

Mayor Bellamy stressed they need to hire the best people available and training them. Mr. Putnam said that provisions relating to that are also in the contract (especially a lot more training opportunities) and the hiring process mirrors our own hiring practices.

Mayor Bellamy urged staff to look at providing bus service to serve MAHEC's new building and the area as whole.

When Councilman Bothwell hoped that we are not pushing our bus drivers to speed to meet schedules, Mr. Putnam responded that safety is the number one concern. In all training sessions, safety is number one and we are trying to be proactive by doing spot checks.

Mr. John Spitzberg urged Council to initiate bus service on Sunday.

Mr. Don Lillenfeld was glad to hear safety is the number one priority for the bus drivers and the passengers.

Mr. Alan Ditmore hoped for bus service on Sundays and holidays.

Mr. Charles Rawls relayed an incident where it took someone 2 hours to get to work and 2 hours to return home. He wondered what has been done to address that issue. City Manager Jackson said he would make transit staff available to go over the route schedule with Mr. Rawls.

Ms. Marion Patton felt that if you address the riding needs of a broader population, the people who really depend in it would benefit.

In response to Mr. Matthew Byrd, Mr. Putnam said that the FY 2011 contract with First Transit was $254,000 and the FY 12 contract with First Transit is $243,000.

28

Councilman Bothwell said that because the City receives federal transportation funding, the City must employ union drivers. Because the State prohibits cities from employing union drivers, we have to hire a management company to hire the drivers to drive the buses.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Smith moved for the adoption of Resolution No. 11-246. This motion was seconded by Councilman Bothwell and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 225**

**D. ORDINANCE PROHIBITING CAMPING ON CITY PROPERTY**

**ORDINANCE PROHIBITING ENCLOSED SHELTERS ON CITY PROPERTY**

**ORDINANCE PROHIBITING STORAGE ON CITY PROPERTY**

City Attorney Oast said that this is the consideration of three ordinances clarifying the use of City property for camping and related purposes.

Recent activities on City property, including parks and right of ways, have revealed issues and uncertainties regarding the use of those areas in certain circumstances. These concerns relate to the actual uses permitted (or not permitted) in those areas, as well as concerns regarding public safety and security.

Most of these issues and uncertainties have arisen in the context of the "Occupy Asheville" movement, which is similar to "Occupy" movements occurring in cities across the country, The movements typically involve a 24/7 presence on public property, or public areas on private property, like Zuccotti Park in New York City. The "Occupy Asheville" group started out in a parking lot on Lexington Avenue, moved from there to the sidewalk in front of the Federal building on Patton Avenue, then to the park area in front of the Biltmore Building, and is now located on City property in front of the City Building.

City parks are subject to a closing time of 10 p.m., by ordinance. Pursuant to City policy, camping is not allowed in City parks. However, the area in front of the City building, while immediately adjacent to a park, is not regularly programmed as a park. Thus, the park closing time and no camping rules do not clearly apply. In other cities, encampments have been forcibly dismantled and there have been confrontations with police, and legal actions with mixed results. The experience in Asheville has been generally cooperative and respectful, with no serious confrontations.

However, concerns have arisen with some activities, notably the use of enclosed tents, proximity of the encampments to business/public entrances for nearby buildings, and presence on or near public right of way. These concerns would exist with any similar use of City property. The concerns relate to the safety and security of members of the public who use the buildings adjacent to the encampments for business purposes such as visiting offices within the building, or using City parks for recreational activities. Special concerns have been expressed by those who must use the buildings at times other than normal working hours, especially employees who work late or on weekends. Concerns have also been expressed regarding damage to vegetation in City parks, and the lack of sanitary facilities.

The ordinances are intended to address these concerns, while recognizing and respecting the rights of assembly and speech, and the right to use public forums for that purpose.

(a) The first ordinance, Sec. 12-46, clarifies that camping is not permitted on City property, and defines camping to include certain specific activities.

(b) The second ordinance, Sec. 11-39, prohibits the erection of enclosed structures on public property, and defines enclosed structures to include tents or makeshift shelters that have more than one side.

(c) The third ordinance, Sec. 11-40, prohibits the storage or leaving of equipment, bags, parcels, or other personal items on City property, and allows the City to remove them.

These ordinances do not prohibit: (a) overnight presence on or occupation of City properties that are not parks, or the public right of way; (b) the use of pop-up tents, umbrellas, or other equipment, as long as that equipment is not left unattended; (c) sleeping on public property, as long as the property remains available for its primary intended use.

In essence, what the ordinances do is clarify that public properties, including parks, remain available for free speech or assembly purposes, but that other activities not essential to the free speech or assembly use do not occur in such a way as to interfere with the use and enjoyment of these properties by others. Unpermitted activities must yield to activities for which a permit has been obtained. As drafted, these ordinances provide that they may be enforced through criminal penalties, a Class 3 misdemeanor.

This action complies with the City Council strategic operating plan in that (1) it promotes safety and security of the public; and (2) it promotes availability of parks and recreational facilities for use by all.

Pros:

- Clarifies permitted activities on public property and right of way.
- Respects rights of assembling and speech.
- Promotes public safety and security.

Cons: None noted.

Adoption of the ordinances is recommended.

Councilman Smith said that since Council has not had time to consult with the homeless service providers to understand better the ramifications of what these ordinances might mean and to allow time for community consideration and review by a Council Committee, he moved to refer these ordinances to the City Council Public Committee for further review. This motion was seconded by Councilman Bothwell.

Councilman Smith noted that the regularly scheduled Public Safety Committee is the 3rd Tuesday of each month; however, new Committee members (which will be appointed later during this meeting) may wish to set a special meeting to review these ordinances. He did note that the Committee meeting is open to the public.

Nine individuals supported referring these ordinances to the Public Safety Committee. Rev. Lisa Landis said that the Detention Center has closed their 24-hour restrooms and asked for approval to locate a Port A Potty on City property in the immediate area.

Nine individuals spoke against referred these ordinances to the Public Safety Committee in that the people need to be heard today and the issues need to be dealt with today.

Councilman Bothwell said that the normal way that changes to our ordinances come to Council is through a City Council Committee. The Committee that oversees policy issues in the

30

Police and Fire Departments is the Public Safety Committee. He noted that question have been raised by Council about constitutional issues, application of some of the ordinances, definitions of city property, etc. that should be debated at the Public Safety Committee meeting (which is open to the public).

Councilman Hunt explained that the City Council Public Safety Committee is an open meeting made up of three City Council members only. He noted that public comment is allowed.

If this matter is referred to the Public Safety Committee, Councilman Pelly questioned what assurances the Occupy Asheville people would have to continue their current status and would the City consider providing a space for a Port A Potty on City property. Mayor Bellamy responded that by delaying this issue, City staff will continue to use their best judgment and best case scenarios as there is no clear policy direction from Council. Without Council direction and clear expectations of the policies, staff will do conservative enforcement of their interpretation of existing ordinances. Regarding the Port A Potty, there is already a procedure in place giving staff clear direction.

Councilman Davis felt we are selectively enforcing our ordinances, recalling that the homeless have requested space for camping in the City and also recalling that we have had to go to other public properties in the City breaking up homeless camp sites.

Vice-Mayor Manheimer felt that this issue needed a more thorough vetting of the implications of the ordinances before voting, noting that she has been in contact with the City Attorney for clarification of the definition of City property.

In response to Vice-Mayor Manheimer, City Manager Jackson explained what he meant by status quo, i.e., if we are uncertain whether or not the land that is being camped upon is park land, we would not enforce the park curfew.

The motion made by Councilman Smith and seconded by Councilman Bothwell to refer these ordinances to the Council Public Committee carried on a 5-2 vote, with Mayor Bellamy and Councilman Davis voting "no."

Councilman Pelly said that if we do not allow the placement of a Port A Potty on City property for the use by Occupy Asheville until after the Public Safety Committee addresses the issue, we are criminalizing them because there are no restroom facilities for them. He felt we need a short term response until there is a resolution.

Vice-Mayor Manheimer felt it was important for Council to make the rules and apply them equally to everyone.

After a brief discussion, City Attorney Oast said that it's not possible in our ordinances (Section 16-97) to have a Port A Potty on public property except in connection with a permitted event.

Councilman Bothwell said that the restrooms in the Detention Center were open 24/7, with a key from the Magistrate; however, it is now not open after hours. It was the consensus of Council to direct the City Manager contact the appropriate staff to convey Council's question about the possibility of re-opening the public restroom facilities at the Detention Center.

Mayor Bellamy asked for a representative from Occupy Asheville to make contact with City Manager Jackson in order to be advised of the response regarding the Detention Center restroom facilities.

Because the regularly scheduled meeting of the Public Safety Committee would not be held until January 17, Councilman Bothwell, Chair of the Public Safety Committee, called for a

special meeting on Tuesday, January 3, 2012, at 3:30 p.m. in the 4th Floor Training Room in the Municipal Building. He asked Council that if they have other questions they would like brought up at that meeting to forward them to him.

At 8:18 p.m., Mayor Bellamy called a short recess.

**E. ASSIGNMENT OF BOARDS & COMMISSIONS MEMBERS/LIAISONS FOR 2012-13**

Discussion and appointments were made for the City Council liaison and mandatory seats for Council on the various boards and commissions. City Clerk Burleson has a complete listing of all appointments made.

City Manager Jackson said that he would work with Councilman Pelly in drafting the scope of a new Neighborhood Advisory Committee.

**F. RESOLUTION NO. 11-247 - RESOLUTION APPOINTING A MEMBER AND CHAIR TO THE ALCOHOLIC BEVERAGE CONTROL BOARD**

Vice-Mayor Manheimer, Chair of the Boards & Commissions Committee, said that the term of Charles Worley, as a member and Chairman on the Alcoholic Beverage Control (ABC) Board expired on November 13, 2010.

The following individuals have applied for a vacancy on the ABC Board: Genny Lynn Beville and Tim Flora.

Vice-Mayor Manheimer said that the Boards & Commissions Committee recommended appointing William A. Russell Jr. as a member and Chairman.

Councilman Davis moved to appoint William A. Russell Jr. to serve a three-year term, term to expire November 13, 2014, or until his successor has been appointed. This motion was seconded by Councilman Hunt and carried unanimously.

Mayor Bellamy said that she has talked with Mr. Ellis about becoming Chairman as he has seniority on the ABC Board.

Councilman Hunt moved to appoint Jim Ellis to serve as Chairman until his term expires on November 13, 2014, or until City Council appoints a replacement. This motion was seconded by Mayor Bellamy and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 226**

**VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:**

Mr. Scott Owen asked that Occupy Asheville receive the same police protection as other citizens.

Mr. Kayvon Kazemini felt that the land where Occupy Asheville is currently located should be for the use of the public unrestricted.

Mr. Jonathan Geller felt that the Police Department is selectively enforcing the ordinances, citing an arrest for someone handing out flyers.

Mr. James Lawrence Smith asked for a copy of a 911 recording on October 8, 2011. City Attorney Oast said that the City has provided the transcript to Mr. Smith and it was his opinion that we have abided by the law.

32

Dr. Milton Byrd spoke about the need for public trust.

Rev. Lisa Landis spoke about the distribution of wealth and the many different options for economic development.

Mr. Tim Sadler asked for a complete listing of all the City's boards & commissions be placed on the City's website calendar.

Mr. Alan Ditmore explained why he supported Occupy Asheville's action.

Mr. Barry Summers felt the City should take more of an aggressive position with our legislators regarding the possibility of privatizing our drinking water.

In response to a questions raised by a member of the audience, City Attorney Oast said that the public property ordinances were proposed because there were issues that have come up that staff did not have clear means to deal with.

Mr. Martin Ramsey said that Occupy Asheville is not a lobby organization but a direct action organization.

Mr. Reid Thompson felt that City Council is restricting First Amendment rights when they only allow the public three minutes to speak and that presentations must be provided to staff prior to the meeting. He asked the new Council revisit these rules and give the citizens rights to express themselves in certain ways.

Councilman Bothwell appreciated some of the civic engagements that Occupy Asheville has been involved with.

**Annexation Petition Certification – December 12, 2011**

City Attorney Oast said that "Pursuant to Session Law 2011-173 ("Law"), the Buncombe County Board of Elections ("BOE") certifies to the City of Asheville ("City") that 399 petitions signed by landowners as identified on the list ("List") provided to BOE by the Buncombe County Tax Assessor containing 464 parcels proposed for annexation pursuant to the Law have been received. Pursuant to SL 2011-173 (S27), Section 2 (6), 1 unsigned petition for one property parcel was mailed twice, once by mail and returned undeliverable, and once by mail, return receipt requested and returned again; therefore, the number of parcels used for calculating the percentage should be 463. BOE is unable to determine the validity of 27 petitions received when compared to the List. The petitions received are attached to this Certification and hereby delivered to the City pursuant to the Law." City Clerk Burleson signed for the petitions on December 12, 2011.

**VIII. ADJOURNMENT:**

Mayor Bellamy adjourned the meeting at 10:00 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – January 10, 2012 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Esther E. Manheimer; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Marc W. Hunt; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

**PLEDGE OF ALLEGIANCE**

Mayor Bellamy led City Council in the Pledge of Allegiance.

**INVOCATION**

Mayor Bellamy gave the invocation.

**I. PROCLAMATIONS:**

**A. PROCLAMATION PROCLAIMING JANUARY 23-27, 2012, AS "NO NAME CALLING WEEK"**

Mayor Bellamy read the proclamation proclaiming January 23-27, 2012, as "No Name Calling Week" in the City of Asheville. She presented the proclamation to Ms. Debbie Bryant and Ms. Michele Lemelle with the Safe and Drug Free Schools Coordinators for the Asheville City Schools and Buncombe County Schools, who briefed City Council on some activities taking place during the week.

**B. RESOLUTION NO. 12-1 - RESOLUTION SUPPORTING THE RENAMING THE SMOKY PARK BRIDGES ALONG I-240 IN ASHEVILLE IN MEMORY OF FIRE CAPTAIN JEFFREY BOWEN**

Fire Chief Scott Burnette said that the Commissioner of Insurance had an idea to honor Fire Captain Jeffrey Bowen. As the North Carolina State Fire Marshal, Mr. Wayne Goowin has contacted the N.C. Dept. of Transportation Board for the Western District requesting that the Smoky Park Bridge located in the City of Asheville be renamed in honor of Fire Captain Jeff Bowen. This bridge was selected due to its proximity to Capt. Bowen's Fire Station and it is the bridge Capt. Bowen used to travel every day going to and from his Fire Station. Mr. Goowin has asked the City Council and the Buncombe County Board of Commissions to pass a resolution in support of the renaming of the Smoky Park Bridges (Bridge # 322 and # 323) along I-240 in Asheville to "Captain Jeffrey Bowen Bridges".

When Mayor Bellamy asked for public comment, no one spoke.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Manheimer moved for the adoption of Resolution No. 12-1. This motion was seconded by Councilman Davis and carried unanimously.

Captain Bowen's mother Laurel, his wife Stacy and his son C.J. thanked City Council for this honor.

RESOLUTION BOOK NO. 34– PAGE 227

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON DECEMBER 13, 2011

B. RESOLUTION NO. 12-2 - RESOLUTION APPOINTING CHRIS PELLY AS AN EX-OFFICIO, NON-VOTING MEMBER TO THE CITIZENS-POLICE ADVISORY COMMITTEE

RESOLUTION BOOK NO. 34 – PAGE 228

C. RESOLUTION NO. 12-3 - RESOLUTION APPOINTING MARC HUNT AS A MEMBER TO THE HUB COMMUNITY ECONOMIC DEVELOPMENT ALLIANCE

RESOLUTION BOOK NO. 34 – PAGE 229

D. RESOLUTION NO. 12-4 - RESOLUTION APPOINTING CHRIS PELLY AS A MEMBER TO THE METROPOLITAN SEWERAGE DISTRICT BOARD OF DIRECTORS

RESOLUTION BOOK NO. 34 – PAGE 230

E. RESOLUTION NO. 12-5 - RESOLUTION APPOINTING VICE-MAYOR ESTER MANHEIMER AS CHAIRMAN TO THE POLICE OFFICERS & FIREFIGHTERS DISABILITY REVIEW BOARD

RESOLUTION BOOK NO. 34 – PAGE 231

F. RESOLUTION NO. 12-6 - RESOLUTION APPOINTING GORDON SMITH AS AN EX-OFFICIO, NON-VOTING MEMBER TO THE BUNCOMBE COUNTY TOURISM DEVELOPMENT AUTHORITY

RESOLUTION BOOK NO. 34 – PAGE 232

G. RESOLUTION NO. 12-7 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN ASSIGNMENT AND ASSUMPTION OF THE CITYWIDE RECYCLING CONTRACT

Summary: The consideration of a resolution authorizing the City Manager to enter into an assignment and assumption of the citywide recycling contract.

The City of Asheville has contracted with Curbside Management, Inc. for citywide recycling services since prior to 2009. To provide the City with more effective, efficient and innovative future services, Curbside Management has partnered with Recycling Partners, LLC. to form Curbside Recycling, LLC., (d/b/a "Curbie"). Curbie is a North Carolina company and will remain at the facilities currently occupied by Curbside Management. The terms and conditions of the current contract with Curbside Management will remain valid and effective.

Consent to the Assignment and Assumption of the Curbside Management Recycling Contract will allow continuation and expansion of Council's goals, specifically with regard to the implementation of single steam recycling collection, which will significantly divert waste previously destined for the landfill.

Pros:

- Continue existing contract, with no additional costs or terms
- Services and new single-stream project would continue unimpeded

Con:

- If not reassigned, entire recycling program would have to be rebid

No additional fiscal impact as current contract and terms would continue as previously agreed.

City staff recommends City Council consent to the Assignment and Assumption of the Curbside Management Recycling Contract to Curbside Recycling, LLC.

In response to Mayor Bellamy, City Manager Jackson said that technically, Council is not being asked to assign the recycling contact but to consent to and authorize the City Manager to sign an assignment and assumption agreement. This assignment will not jeopardize the recycling program but, instead will enhance and improve the program.

**RESOLUTION BOOK NO. 34 – PAGE 233**

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Bothwell moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Hunt and carried unanimously.

## III. PRESENTATIONS & REPORTS:

### A. BASILICA OF ST. LAWRENCE PROPOSAL TO PURCHASE CITY PROPERTY

City Manager Gary Jackson said that on December 20, 2011, the City received a proposal from the Basilica of St. Lawrence to purchase the city-owned land on Haywood Street, directly across from the Basilica of St. Lawrence. In order to be responsive to the proposal, City Council may wish to provide direction on the process regarding the plan for the Haywood Street site prior to responding to this specific proposal. An additional letter was sent on December 30, 2011, extending the time to consider this proposal to January 31, 2012.

City Council has previously explored options for developing underperforming City assets, to include the Haywood Street site. The City engaged in an extensive Request for Qualifications process in the fall of 2007 to prequalify a short list of developers for the Haywood Street site. In April 2008, Council directed staff to negotiate with the McKibbon Hotel Group for purchase of the Haywood Street site for redevelopment. To date, no agreement has been concluded, but the McKibbon Hotel Group is still interested in the site.

He recommended Council hear the proposal, consider previous policy direction and advise staff on Council's desired process. Given the seriousness and value of this property, it was his recommendation for Council to delegate this to the Planning & Economic Development Committee to revisit the history and background related to this property, to consider what Council's goals and interest are for this property, the financial investment already made in this property, review the proposal in depth, revisit the proposal on the table from McKibbon Hotel Group, and provide a full report to the Council.

Mr. Matt Morris, representing Basilica of St. Lawrence, understood that this Haywood Street site has been trying to be developed by the City over the last 10 years. He provided Council with the following background information "(1) The Basilica is one of the oldest and most historical structures in Asheville with a very high interest environmentally and economically as an adjoining neighbor to this Haywood site on what will be development on this site in the future. Our position is to protect and preserve the Basilica. Over 300,000 tourists visit the Basilica each year. The Basilica carries National Significance within the National Register of Historic Places; (2) The dome of the Basilica is unique in the history of the American building arts. It is the final great work of Rafael Guastavino Sr., and is one of the very few buildings in which he served as both architect and builder. It is an irreplaceable work of construction and art; (3) As the owners of the Basilica of St. Lawrence, the Bishop of the Roman Catholic Diocese of Charlotte approved to acquire this site with the basis that they are in the best position to control future development in front of the Basilica and protect the dome at the same time; and (4) The Basilica understands it must work with the City to balance being fiscally responsible on this site with any future development while at the same time waiting for the best time to deliver the right developer under the right economic conditions. The Basilica understands that doing nothing on this site is not an option. We will address this in a Purchase and Sale Agreement; (5) Through the Basilica, we will propose something that will be compatible to the Asheville Downtown National Register District in terms of scale and design; (6) Under the umbrella of the Basilica controlling this site, there is a higher probability that a developer (or philanthropic type developer) will come forward to construct something of significant architectural relevance that compliments this area and the history of the Basilica, Grove Arcade and surrounding buildings; and (7) The future development vision: Architectural relevance to enhance tourism to the area / open plaza / square urban designs, with fountains, hardscape, artist area, etc. Something developed of great value to our history and tourism and delivers a "sense of place" for Asheville." He then showed some renderings and photos that will be their guidance to the developer.

He said that the first step should be to have the City reach public and procedural approval to have their Letter of Intent accepted so that they can then move forward in committee to Purchase and Sale Agreement approval and funding. During the Purchase and Sale Agreement, they will work towards approved terms that will spell out coordinated efforts with the City and Basilica for future development timeframes.

He felt the first stage they are looking at is creating a parking lot for a period of time.

It was the consensus of Council to refer this proposal to the Planning & Economic Development Committee to revisit the history and background related to this property, to consider what Council's goals and interest are for this property, the financial investment already made in this property, review the proposal in depth, revisit the proposal on the table from McKibbon Hotel Group, and provide a full report to the Council.

Mayor Bellamy said that the Planning & Economic Development Committee will be meeting on Tuesday, January 17, at 3:30 p.m. in the First Floor North Conference Room of City Hall. The public is invited to attend.

## IV. PUBLIC HEARINGS:

### A. PUBLIC HEARING TO CONSIDER THE PERMANENT CLOSING OF A RIGHT-OF-WAY ON COLLEGE STREET

### RESOLUTION NO. 12-8 - RESOLUTION TO PERMANENTLY CLOSE A RIGHT-OF-WAY ON COLLEGE STREET

Assistant Director of Public Works David Foster said that this is the consideration of a resolution to permanently close an 80-foot right-of-way on College Street. This public hearing was advertised on December 18 and 25, 2011, and January 1 and 8, 2012.

N. C. Gen. Stat. sec 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, adjacent property owner Buncombe County has requested the City of Asheville to permanently close a right-of-way of College Street, being a portion of College Street running with the Buncombe County property line on the Southern sidewalk of College Street beginning in the front of the existing Buncombe County Courthouse and toward the old Biltmore Press Building. He explained it's not an elimination of the right-of-way, but a narrowing of it.

The Greenway Commission met on December 8, 2011, and approved the closure unanimously.

This closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties
- Buncombe County will be installing the sidewalk within the remaining College Street right of way.

Con:

- None

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt the resolution to permanently close a portion of College Street.

Mayor Bellamy opened the public hearing at 5:24 p.m.

When someone asked if the closure would affect the bicycle lanes, Mr. Foster said that the closure will not change or alter significantly the existing public infrastructure. The sidewalk, parking and bicycle lane will remain.

Mayor Bellamy closed the public hearing at 5:25 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Smith moved for the adoption of Resolution No. 12-8. This motion was seconded by Councilman Hunt and carried unanimously.

**RESOLUTION BOOK NO. 34– PAGE 234**

**B. PUBLIC HEARING ON THE PROPOSED EXECUTION AND DELIVERY OF AN INSTALLMENT FINANCING CONTRACT FOR VARIOUS CAPITAL PROJECTS AND ACQUISITIONS TO BE DELIVERED IN FISCAL YEAR 2012 AS WELL AS THE REFINANCING OF EXISTING DEBT**

Director of Finance and Management Services Lauren Bradley said that this is the public hearing to receive public comments on the proposed execution and delivery of an installment financing contract for various capital projects and acquisitions to be delivered in FY 2012 as well as the refinancing of existing debt.

Under the provisions of Section 160A-20 of the General Statutes of North Carolina, installment financing contracts involving real property require a public hearing in which the public may comment on the proposed financing. On December 13, 2011, City Council approved a resolution authorizing the negotiation of an installment financing contract and setting the public hearing for: (1) $20.1 million in "new money" for Council approved capital projects authorized as part of the FY 2012 and FY 2011 Budgets, (2) $14.1 million for the takeout of the interim note on the 51 Biltmore Parking Deck project and (3) $10.8 million for the refinancing of some existing debt to achieve financial savings.

After the public hearing, staff anticipates returning to City Council for final consideration of the installment financing contract on February 28, 2012, and closing on the transaction in late March 2012.

Staff recommends that City Council receive public comment regarding the financing and the project during the public hearing.

Mayor Bellamy opened the public hearing at 5:28 p.m.

When Mr. Don Lilenfeld asked if it will cost the City more since we are refinancing, Ms. Bradley replied no.

Mayor Bellamy closed the public hearing at 5:29 p.m.

Mayor Bellamy said that this will be returning to City Council for final consideration of the installment financing contract on February 28, 2012, and closing on the transaction in late March 2012.

**C. PUBLIC HEARING TO CONSIDER AMENDMENTS TO THE UNIFIED DEVELOPMENT ORDINANCE CONCERNING CHANGES TO THE STANDARDS REGULATING TEMPORARY USES**

**ORDINANCE NO. 4043 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE CONCERNING CHANGES TO THE STANDARDS REGULATING TEMPORARY USES**

Assistant Planning & Development Director Shannon Tuch said that this is the consideration of an ordinance amending the Unified Development Ordinance concerning changes to the standards regulating temporary uses. This public hearing was advertised on December 30, 2011, and January 6, 2012.

Over the last several months, interest in a collection of amendments has grown and been intermittently discussed amongst staff and the Planning & Economic Development Committee. One of the amendments discussed were some changes to **Article XIV – Accessory and Temporary Uses and Structures,** to provide greater flexibility in some instances, and improved enforcement in others.

Recent changes in the economy have resulted in new practices and warrant a reexamination of applicable standards. Specifically, interest in temporary uses has increased over the last several years to include a growing interest in new large temporary (special) events that can have a positive effect on the local economy, as well as smaller temporary uses that wish to locate in residential areas. Additionally, on-going challenges related to enforcement of portable

on-demand storage containers (PODS) has led stakeholders in the community to request an application process associated with this temporary use to ensure that they do not exceed their maximum allowable time frames and that they do not enjoy an unfair advertising advantage.

There are three issues being addressed through this amendment:

**1. Temporary Use Thresholds** - Temporary uses can range in character, duration and size. Some temporary uses are on-going, recurring uses such as the local tailgate markets; others are seasonal and intended to last only a short designated period of time, typically 30-60 days. Growing in popularity, however, have been temporary uses that may be better classified as temporary "events" that last only 1-2 days. These events vary significantly in size and the larger the event, the greater the need for identification as well as greater the need for review. This amendment proposes to break special short-term events into three thresholds and adjust the review accordingly.

**2. Temporary Uses in Residential Districts** - Temporary uses have not been permitted in residential districts unless a function of a legal and conforming, non-residential use such as a fundraiser held to support a local school or charitable organization. These legal, non-residential uses often include large surface parking lots and there has been a emerging interest in being able to use these areas for privately managed (or supported by the non-residential use) farmers/tailgate markets or produce stands that may benefit the community in which it is located. The most likely sites for these would be the parking areas of churches or schools.

**3. Permitting for Portable On Demand Storage containers (PODS)** – PODS are currently allowed without permit in both commercial and residential areas. In residential areas, they are limited to 14 consecutive days, two times a year; and in commercial areas for 60 days, two times a year. There have been on-going enforcement issues related to such containers exceeding their allotted time periods in commercial areas. In addition, concerns have been received that these same containers are being used as off-premise advertising. As a result the staff is proposing requiring permits for containers in commercial areas that are in front of the principle structure or visible from public thoroughfares and in prohibiting signage on the containers, similar to the prohibition for signs on vehicles when not located on the business property.

Also included in this ordinance is a small housekeeping amendment intended to clarify that temporary mobile food vehicles must leave a site every night or be parked away from the public thoroughfare.

The Planning & Zoning Commission reviewed this ordinance at their December 7, 2011, meeting and voted unanimously to approve the amendment.

This proposal does not directly relate to the goals outlined in the Strategic Operating Plan but is most closely aligned with the goal for "job growth and community development" by balancing business needs with community needs and concerns.

Pros:

- Provides additional identification for larger temporary events.
- Provides opportunity for temporary events in residential areas.
- Addresses an on-going enforcement issue and disparate enforcement of off-premise signage/advertising.

Cons:

- Contributes to the complexity of a permit review.
- Increases the need for permit review.

Increased review times and permit coordination is likely. A separate fee proposal, which will attempt to mitigate the additional costs, will be brought forward for consideration as part of the FY 2012-13 budget process. Costs associated with enforcement are expected to neither increase nor decrease.

Ms. Tuch recommended some changes to the ordinance before the Council. In summary, (1) in Section 7-14-2 (c) (9), the words "when not visible from public areas" be removed; (2) in Section 7-12-2 (d) (3), the addition of the words "and not include signage" be added at the end of the paragraph; and (3) in Section 7-14-2 (d) (3) (f), the addition of the words "... permit for review and approval at the discretion of the Planning director with input from appointed officials."

She recommended approval of this wording amendment, as amended

At 5:38 p.m., Mayor Bellamy opened the public hearing.

Mr. Jay Clarkson, speaking on behalf of Manna Food Bank, supported the ordinance amendment to allow fruit & vegetable markets in residential areas as it will be a way to get fresh fruits and vegetables to those in need and who have no transportation.

Mr. George Morosani, owner of 9 self-storage facilities in Asheville, spoke in support of the ordinance amendment regarding PODS and agreed that all permits should be posted on the exterior of the container and visible to the public. He felt this is a good way to straighten out the rules for outdoor advertising,

Mr. Matthew Byrd felt the main issue is the free advertising and it should be allowed in all districts. In addition, since the issue seems to be signs and not actual storage, he felt having a separate ordinance that prevents any form of storage should not be adopted.

At 5:46 p.m., Mayor Bellamy closed the public hearing.

In response to Councilman Hunt, Ms. Tuch said that there is a definition for a fruit and vegetable market. It covers a wide range of food products, like meats and eggs. What we do limit the amount of non-food items, like handmade candles and jewelry, to not more than 25% so it does not turn into a flea market condition.

There was a brief discussion, initiated by Councilman Smith, about not overlapping the fruit and vegetable markets during the regular business hours for the primary use. He felt that in order to maximize the community benefit of the market, it would be beneficial to have the market open when the people where there for the primary use, such as before and after church or dropping off and picking up children at school. Ms. Tuch explained that the smaller churches and schools don't have a large parking lot (most don't have enough parking to begin with) and most rely on off-street parking. We would not want to displace the parking in the neighborhood to allow for the market in the parking lot. She noted that drop off and pick-up at school is the greatest congestion hours and after the church service is also very congested. To add another use, which could potentially attract others not already on the property, is a concern. Ms. Tuch said that a compromise might be that the market only take up a small space and staff perform a parking analysis. If there is enough parking to cover the use, then the market could also be allowed.

Mayor Bellamy suggested the ordinance be in place for 6 months and staff report back after that time period. She was glad that we are expanding the markets into more locations, but felt we need to do a small step at a time. She agreed that at schools, there is a lot of congestion with parents picking up the children, buses, children walking and biking. There might be a possibility for the schools to work with the markets to allow them to be in their lots at perhaps 4:00 instead of 2:30.

Councilman Smith moved for the adoption of Ordinance No. 4043, with the amendments outlined by Ms. Tuch, with staff reporting back to Council in six months on an update and a possible compromise for the markets to be on the property during the regular business hours of the primary use. This motion was seconded by Councilman Davis and carried unanimously.

At the request of Mayor Bellamy, it was the consensus of Council to have the Planning & Economic Development Committee review the possibility of increased signage on mobile food trucks.

**ORDINANCE BOOK NO. 27 – PAGE 252**

**V. UNFINISHED BUSINESS:**

**A. REGULATING THE USE OF CITY PROPERTY**

Councilman Bothwell, Chair of the Public Safety Committee, said that the Public Safety Committee met on January 3 and briefly discussed the three ordinances presented by City Attorney Oast on December 31, 2011. After public comment, the Committee voted 2-1 to set the three ordinances aside and look into the possibility of a camping permit process. They recommended the following proposal, crafted by Councilman Smith, for City Council consideration:

- Permitted activity is for purposes of "speech"
- Register individual campers
- Maintain cleanliness standards (garbage removal, store items in tents)
- Move tents with regularity (every 48 hours?) to maintain grounds
- True cost pricing for camping permits – by the person, not the tent.
- One tent or less per person, with storage allowed only inside tents.
- No open fires/flame
- Reapply every 7 days
- Provide for use by all
- Port-a-johns permitted using standards for other outdoor event permits
- Port-a-johns available to the public
- Port-a-johns not subsidized by city taxpayers
- Permitted only in specific area(s) - utilize current property only - add other properties as appropriate
- Does not include parks pending further review by Recreation Board and Parks, Recreation &Cultural Arts Department
- Consequences of violation could be:
    - rescinding permit for individuals in violation
    - fines (up to $25) for safety violations (fire, sanitation, other)
    - fines (up to $100 or eviction and referral to Homeless Service Provider) for camping without permit
    - notify homeless service providers if violator requests it
- Speech allowed 24 hours – these rules apply only to camping/sleeping

Councilman Smith said that in his conversations with staff, they don't have ready language for an ordinance to be considered at this meeting. He understood that staff is seeking general Council direction on whether there is sufficient Council interest to proceed in the direction of a camping permit process. He said that staff would be prepared to report back to Council in two weeks with a draft ordinance for consideration.

It was the consensus of Council to direct staff to craft an ordinance regarding a camping permit process for Council consideration on January 24, 2012.

## VI. NEW BUSINESS:

### A. RESOLUTION NO. 12-9 - RESOLUTION AMENDING THE TRANSFORMATIONAL PROJECTS POLICY TO EXPAND THE AREA OF ELIGIBILITY TO INCLUDE THOSE SECTIONS OF SCHENCK PARKWAY AND LONG SHOALS ROAD (FROM THE INTERSECTION WITH HENDERSONVILLE ROAD TO THE INTERSECTION OF CLAYTON ROAD) POLICY

City Manager Jackson said that this is the consideration of a resolution amending the Transformational Projects Policy to include those sections of Schenck Parkway and Long Shoals Road (from the intersection with Hendersonville Road to the Intersection of Clayton Road) within the City of Asheville to the areas eligible for incentives.

In March of 2011, City Council adopted the Transformational Projects Policy. This policy makes grants available to developers who build affordable and workforce housing, or certified "green" commercial, residential or mixed use developments, in designated geographic areas in the City. The eligible geographic area generally coincide to those areas within one-quarter mile of existing Asheville Transit routes. The Policy guidelines allocate points for developments that meet certain housing affordability or green building criteria, and the points earned indicate the extent of the grant award available. The amount of the grant award available is equivalent to the difference between the City property tax on the existing property prior to the new development, and the City property tax on the property after the qualified development has taken place, for a specified time period based on points earned. The Incentive also allows for a percentage of fee rebate based upon earned points. All grant awards are subject to approval by City Council.

Biltmore Farms LLC has requested that the City extend its Transformational Projects Policy to the Biltmore Park Town Square area. The proposed expansion area includes Biltmore Park (which has remaining parcels on which approximately 100 to 165 additional multifamily units could be developed), Schenck Parkway, and Long Shoals Road (from the intersection with Hendersonville Road to the intersection of Clayton Road). The request is that the policy be the same as the current incentive policy, encompassing properties which are within one-quarter mile of the named roads.

Their rationale for this proposed expansion is to give equal access to incentives to developers in this area who can build energy efficient affordable and workforce housing. There are numerous parcels of developable land within the City limits that are very close to, or on a transportation corridor to, Biltmore Park and its high employment concentrations. Staff notes that the Land Use Incentive Grant is not applicable for the extraterritorial jurisdiction (ETJ), so those areas within the proposed boundaries but in the ETJ would not be eligible until or unless they were annexed.

When this proposal was reviewed by the Housing and Community Development Committee it was noted that the eligible geographic boundaries of the Land Use Incentive Policy as currently adopted align with City Transit routes. There is currently no bus service to Biltmore Park Town Square or on Long Shoals Road west of Hendersonville Road.

The Transit Master Plan does recommend bringing bus service to Biltmore Park Town Square "immediately," but that action is constrained by budget limitations. The Plan also recommends a Long Shoals Road express in the next two to five years with a freeway routing to downtown.

After discussion, the Housing and Community Development Committee recommended approval of this request.

The draft Action Plan Amendments directly relate to the Council's Strategic Goal of "Affordable."

Pros:

- The proposed expanded boundaries for the LUIG could encourage workforce and affordable housing development near a growing employment center;
- Biltmore Park is an example of planned mixed use development that encourages locating residential uses within walking and other alternative transportation access to employment, shopping and services;

Cons:

- There is no public transportation currently to Biltmore Park, although it is planned.
- Major transportation infrastructure (in the form of very wide roads) separates Biltmore Park from development on Long Shoals Road north, making walking and bicycling to the transit available on Hendersonville Road difficult.
- Some of the proposed expansion area is either in the ETJ or county, and would not be eligible for incentives until or unless annexed.

Land Use Incentive Grants are to be paid from City General Funds, and are based upon the difference in city property tax payable for a newly developed property versus an existing property, and a rebate of some building permit fees. The grants are to be made on a case-by-case basis.

Staff recommends that Council approve the proposed expansion of the area eligible for the Land Use Incentive Grant as it reflects the intent for future transit service to a substantially dense and mixed-use area of the city offering housing, shopping, services, and jobs.

Mr. Paul Szurek, representing Biltmore Farms, spoke in support of the resolution.

Mr. Matthew Byrd spoke in opposition of the resolution and felt that we should be creating incentives to restructure our buildings downtown.

In response to Councilman Davis, Community Development Director Jeff Staudinger said that this does not affect the recently adopted conditional use permit for The Aventine.

Councilman Hunt said that the incentives were initially created for transit routes and the Long Shoals Road corridor is becoming more developed and urbanized. In order to have a transit route there, we need to justify it by good smart development that is dense. He also acknowledged the good partnership that the City has with Biltmore Farms. He reiterated that this policy does not apply to property in the City's extraterritorial jurisdiction area, but he was interested in working with staff to consider incentives for voluntary annexation in places like further out Long Shoals Road.

Mayor Bellamy felt this is another item that the Planning & Development Committee should look at in the future.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Manheimer moved for the adoption of Resolution No. 12-9. This motion was seconded by Councilman Hunt and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 235**

**B. RESOLUTION NO. 12-10 - RESOLUTION APPROVING HOUSING TRUST FUND LOAN RECOMMENDATIONS**

Community Development Director Jeff Staudinger said that this is the consideration of a resolution authorizing approval of Housing Trust Fund loans to Beaucatcher Properties, LLC (Johnston Blvd) and Mountain Housing Opportunities, LLC (Glen Rock Hotel).

Staff received three (3) applications for HTF funding totaling $800,000. These applications were presented to the Housing and Community Development Committee (HCD) on December 1st and each was evaluated on its own merit. Resources were insufficient to approve all applications in the amounts requested. The total amount of fund resources, including the current cash balance, pending land sale, and projected revenues thru June 30, 2012, is $665,646.

Two (2) applications have been recommended by the HCD for approval:

1) Beaucatcher Properties LLC for the construction of a cottage development on Johnston Boulevard in West Asheville, $200,000.
2) Mountain Housing Opportunities, LLC (MHO) for rehabilitation of the historic Glen Rock Hotel building on Depot Street, $220,000.

Beaucatcher Properties, LLC - Johnston Blvd $200,000.

Mr. Kirk Booth, representing Beaucatcher Properties, has proposed an 18-unit family rental development project on Johnston Blvd in West Asheville. The site size is 1.1 acres. The property is currently zoned Residential (RS-8). The loan terms requested are $200,000 at 3.00% interest, fully amortizing for 30 years. The total project development cost is $1,610,000. The per-unit subsidy is $11,111. The project is planned to be affordable to households earning 80% of area median income.

The project is designed as a cottage style development composed primarily of single-unit structures. No TRC or P&Z approval will be required. Units will be offered first to Section 8 Voucher holders. The project includes an existing 2-bedroom home on the site that will be remodeled and incorporated in the proposed development. The unit is currently unoccupied. The new units will consist of eleven (11) three-bedroom single family homes and six (6) one-bedroom apartments over garages. The site is infill development in an older established neighborhood with water and sewer access available.

The loan request represents 12.4% of the total development costs. The land is being purchased at $120,000 and includes the existing 2-bedroom house. The land cost is $6,666 per-unit. The total per-unit development cost is $89,444 per unit.

The project is within 1/4 mile of transit. None of the units will be ADA accessible. The project will not be Energy Star certified but does incorporate many of the desired elements such as energy star appliances, low-e windows, and low-flow water systems.

Strengths:

- The cottage style development allows for added density as use by right.
- Infill development supports strategic planning goals.
- Construction ready to proceed immediately.
- The developer has completed other local projects in a timely manner. The four units supported in 2011 have been completed and leased.

Concerns:

- Three bedroom rental units are not a Housing Trust Fund priority;
- Rent structure is set at the maximum of 80% AMI affordability level.

Mountain Housing Opportunities, LLC (MHO) - Glen Rock Hotel $220,000

MHO has proposed a 22-unit multifamily rental development in the historic Glen Rock Hotel building on Depot Street. The site size is .66 acres and is currently zoned Urban Place with Conditional Use zoning. The proposed total project development cost is $2,118,980. Through this project, 11 HOME units will be created, fulfilling the HOME unit commitment in the old East Riverside project. The amount of that grant ($235,000) is included in the project's sources of funds.

The request has been approved by HCD as two separate loans, with the more favorable terms being offered for the units rented below 60% AMI. The first loan in the amount of $165,500 will be structured as a deferred interest-only loan at 2.00% interest with principal deferred for 20 years. This represents 75% of the total loan request. Twelve (12) of the proposed units will be targeted to persons at or below 60% AMI. The second loan in the amount of $55,000 will be amortized at 2.5% interest for 20 years. This represents 25% of the total loan request. Ten (10) of the proposed units will be targeted to persons at or below 80% AMI.

The project proposal meets the funds' stated priorities in that 100% of the units will be one-bedroom floor plans. The first floor of the hotel (12,600 SF) will be developed commercially at a later time. The second and third floors (15,306 SF including common areas) will be adapted to residential use. The upper floors include eight (8) rooms of 150 square feet (1200 SF total) that cannot be used as living space. These spaces are attributed to the live/work component of the project and residents will have the option to lease these additional spaces for $150 per month for use as office or studio space which generates an additional $14,400 in annual gross rents. The per-unit subsidy based on a total loan of $220,000 is $10,000. The total loan request represents 10.4% of the total development costs. The developer will also be applying for additional HOME funds and a request of $200,000 is anticipated. The land and building cost is prorated at $22,343 per unit. The total per-unit development cost is $96,317.

The project is located in the East of the Riverway area, and is easily accessible to services, transit and employment. Two (2) of the units will be fully ADA accessible. The project will be LEED certified. Success of previous mixed-use developments demonstrates sufficient developer capacity for this type of project.

Strengths:

- Priority development area.
- Development team has been successful on similar projects.
- Financing commitments totaling $398,500 have been received from Buncombe County and NeighborWorks America.
- Urban location with easy access to employment, transit, and services.
- Energy efficiency with LEED certification
- Addresses the need for additional one-bedroom and efficiency units.
- Rehab and adaptive reuse of existing building.
- Catalyst for continued revitalization of a formerly distressed area.

Concerns:

- Developer relying heavily on City subsidy.
- Increased competition for all resources makes finding the right mix of development sources challenging
- HOME funding cuts will mean increased competition for that resource
- The City has a significant prior investment in the Glen Rock Apartments representing a substantial concentration of capital.

The projects directly support the City's Strategic Operating Goals: (1) *Affordable*: The project proposal is supportive of the City's goal of providing safe and decent affordable housing units to the citizens of Asheville; and (2) *Sustainable*: The proposed projects provide new housing units

located near transit lines, higher urban development densities, and encourage higher standards of energy efficiency. The projects also address the priorities of the Consolidated Strategic Housing & Community Development Plan by increasing the housing stock, providing affordable rental units, building high quality energy-efficient housing, and coordinating development with transportation and jobs.

The current balance in the Trust Fund is $292,211. The proposed projects are new construction and are anticipated to add $3.7 million dollars in new development to the City tax base. If the projected program income of $373,435 is received as expected, then there will be no adverse fiscal impact. Although highly unlikely, if future revenue projections prove incorrect then funds may not be available for disbursement until the fund has been replenished; either through a new appropriation or the receipt of future program revenue beyond July 1, 2012.

The Housing and Community Development Committee recommends City Council approve a resolution approving the following loans:

1. $200,000 amortized at 3.00% interest for 30 years to Beaucatcher Properties, LLC for the development of 18 single-family rental units on Johnston Boulevard; to be made immediately available for disbursement following loan closing.

2. $165,000 at 2.00% interest-only with principal deferred 20 years to Mountain Housing Opportunities, LLC for the development of 12 multifamily units at the Glen Rock Hotel on Depot Street; all funds to be made immediately available for disbursement following loan closing. These 12 units to be restricted to families earning 60% or less of the area median income.

3. $55,000 amortized at 2.5% interest for 20 years to Mountain Housing Opportunities, LLC for the development of 10 additional multifamily units at the Glen Rock Hotel on Depot Street; all funds to be made immediately available for disbursement following loan closing. These 10 units to be restricted to families earning 80% or less of the area median income.

Mr. Staudinger responded to several financial requests raised by Vice-Mayor Manheimer.

In response to Councilman Hunt, Mr. Staudinger said that there are multiple projects in the in the pipeline that would seek Housing Trust Fund resources. Every year we receive active interest from at least 3-4 developers (private sector, non-profits and partnerships) seeking resources, whether the resources are combined with HOME funds, or the Low Income Housing Tax Credit Program, or whether they are for projects that are developed privately or by non-profit developers. The demand far out cedes the funds available at any one time in the Housing Trust Fund. He explained that we do not release funds until a budget amendment has been approved by City Council and the cash is available to lend the applicants. We are expecting a receipt sometime in the next few months from the sale of land that is under contract with Habitat for Humanity that was purchased by the City as part of a foreclosure proceeding. We expect to have sufficient resources to meet the demand within this fiscal year for these loans and loans that have not closed. New commitments will always depend on whether an additional allocation is included by Council in the annual budget of the Housing Trust Fund.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Smith moved for the adoption of Resolution No. 12-10. This motion was seconded by Councilman Davis and carried unanimously.

**RESOLUTION BOOK NO. 34 – PAGE 236**

## C. RESOLUTION NO. 12-11 - RESOLUTION AUTHORIZING THE CITY MANAGER TO AMEND THE CONTRACT WITH DIXON HUGHES GOODMAN LLP FOR AUDITING SERVICES FOR FISCAL YEAR 2010-2011

## RESOLUTION NO. 12-12 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CONTRACT WITH DIXON HUGHES GOODMAN LLP FOR AUDITING SERVICES FOR FISCAL YEAR 2011-2012

Finance & Management Services Director Lauren Bradley said that this is the consideration of: (1) a resolution authorizing the Mayor to amend the contract to audit city accounts for fiscal year 2010-2011; and (2) next steps for awarding the auditing services contract for fiscal year 2011-2012.

North Carolina General Statute 159-34 requires that local governments have their accounts audited each fiscal year and submit a copy of the audit to the Local Government Commission (LGC) and confers upon the LGC the authority to issue rules and regulations to ensure the quality and consistency of auditing services. The LGC has issued several rules in connection with the audit contract including amendments to the audit contract be approved by a vote of the governing board in a public meeting.

### (1) Contract Amendment for FY 2010-2011 Audit Services

On May 24, 2011, City Council approved a contract with Dixon Hughes PLLC, in the amount of $109,000 for auditing services for Fiscal Year 2010-2011. The contract did not include reporting changes related to GASB 54 implementation and major fund reclassification. In addition, the contract did not include the Energy Efficiency Conservation Block Grant to be audited as a major program.

Dixon Hughes has submitted an amendment to the contract in the amount of $10,000 seeking additional compensation for required work not included in the original contract. If approved, the total amount of the 2010-2011 contract would increase from $109,000 to $119,000. Funds are available in the Accounting Division of the Finance Department to cover this additional expenditure. This supplemental billing is not unusual. Dixon Hughes requested and received an additional $13,600 in connection with the 2010 contract and $10,500 with the 2008 audit contract.

Pros:

- Complies with the requirements of the Local Government Commission in connection with amending the audit contract
- Conforms to the terms and conditions of the audit contract

Con:

- Requires additional funding (resources are available).

### (2) Next Steps for Awarding Audit Services for FY 2011-2012

**Best Practices**

The Government Finance Officer's Association (GFOA) has made the following recommendations, among others, regarding the selection of auditing services:

- Governmental entities should enter into multiyear agreements of at least five years in duration when obtaining the services of independent auditors. Such multiyear agreements can take a variety of different forms (e.g., a series of single-year contracts) and allow for greater continuity and help minimize the potential for disruption in connection with the independent audit. Multiyear agreements can also help to reduce

audit costs by allowing auditors to recover certain "startup" costs over several years, rather than over a single year.

- Governmental entities should undertake a full-scale competitive process for the selection of independent auditors at the end of the term of each audit contract, consistent with applicable legal requirements. Ideally, auditor independence would be enhanced by a policy requiring that the independent auditor be replaced at the end of the audit contract, as is often the case in the private sector. Unfortunately, the frequent lack of competition among audit firms fully qualified to perform public-sector audits could make a policy of mandatory auditor rotation counterproductive. In such cases, it is recommended that a governmental entity actively seek the participation of all qualified firms, including the current auditors, assuming that the past performance of the current auditors has proven satisfactory.

**History**

The City of Asheville has utilized Dixon Hughes for auditing services for the last six fiscal years under single-year contracts. The City retained the services of Martin Starnes & Associated for the FY 2004-2005 fiscal year audit and utilized Crisp Evans Hughes for several years prior to FY 2005.

The City's long term relationship with Dixon Hughes is likely related to several factors, including the fact that it is the largest CPA firm in the southeast with a local office in Asheville. During the last three years, Dixon Hughes worked with Asheville as the City transitioned to a more complex financial system through the implementation of the enterprise resource planning (ERP) software Munis. At the same time, the City's Finance Department experienced staff turnover in key positions, and continuity in the independent auditor's role has been essential to timely completion of the audit. As a result, Dixon Hughes has extensive experience auditing the City's financial systems, accounts and records, including valuable insight and understanding of the financial system's processes and controls.

Last year, City Council expressed an interest in pursuing a competitive process for the selection of independent auditors. Staff is prepared to launch a Request for Proposals (RFP) for these services if City Council maintains an interest in doing so; however, staff is requesting that the City delay the RFP process for an additional year to permit a relatively new team in the Finance Department the optimal opportunity to complete the audit by October 31, 2012, a deadline that was recently adopted by City Council as part of the City's Financial Policy. Transitioning to a new audit firm will require additional time to get the auditors familiar with Asheville's financial systems, processes and controls. As illustration, according to a survey of the public accounting firms and Fortune 1000 public companies (United States General Accounting Office 2003), auditors' initial year audit costs increase by more than 20 percent over subsequent year costs to acquire the necessary knowledge of the client. In addition, their marketing costs also increase by at least more than 1 percent. Additionally, the survey found that clients will incur additional auditor selection costs and auditor support costs of at least 17% of initial-year audit fees.

As such, staff recommends retaining the services of Dixon Hughes for a single, final year to conduct the audit of the city's accounts for the fiscal year ending June 30, 2012. Staff further recommends that the City issue an RFP in the November/December 2012 timeframe for audit services for FY 2013.

If City Council would prefer to issue an RFP for services for FY 2012, the process would need to begin immediately, with RFP development and release occurring in January 2012, and evaluations and award occurring in February. The timeline for the RFP would not provide an opportunity for Finance Committee participation, and a recommendation would be brought forward to the full Council instead. Staff would seek City Council direction on whether Dixon

Hughes should be invited to respond to the RFP or should be instructed not to participate in the process.

**Contract Proposal**

Dixon Hughes has proposed an audit fee for fiscal year 2011-2012 of $95,000. The original fee for last year's audit was $109,000. The fee proposal of $95,000 represents a reduction from the prior year's fee because of efficiencies gained in the audit performance over the last year. The proposed fee appears to be competitive when compared to similar sized municipal audit fees for FY 2010 based on information available from the North Carolina State Department of the State Treasurer.

This action complies with City Council's Strategic Operating Plan of operating the City of Asheville's organization to the highest fiscal responsibility.

Pros:
